# **mymicros.net Features and updates**

## **mymicros.net reports display sales mix broken down by item**

CR ID #: NA  
TP ID #: 64171

You can now create and generate reports in mymicros.net from the RES Ordering module that detail the sales mix of items broken down by specialty, base ingredients, and size.

## **Java only needed for downloading RTA and mytasks**

CR ID #: NA  
TP ID #: 60164

Following the removal of Java Applets, you now only need to install Java for downloading RTA and mytasks. This enhancement includes the following interface and usability changes:

- Location/Revenue Center/Order Type/Menu Item filter  
Added the ability to drag and drop.
- Location/Revenue Center filter  
Added a search text box in both the source and target screens.
- Business Date filter  
Easier switching between the financial and standard calendar.
- RTA and mytask download portlets  
Added validation to the RTA download to check for Java. If you do not have Java installed, the system shows a No Java Installed message.
- Alignment  
Embedded all alignment windows into the graphical user interface.  
Improved usability for selecting locations and master groups.

---

# iCare Features and updates

This section includes brief summaries of some of the more significant enhancements and new features for iCare.

## **Added support for myiCard.net on Google Chrome**

CR ID #: 35637

TP ID #: 76810

myiCard.net is now supported for Google Chrome.

## **Introduced a new E-Mail job for Stored Value Awards**

CR ID #: NA

TP ID #: 68535

iCare organizations using the ExactTarget Email Marketing integration can now notify their customers using e-mail that they have received a stored value award. A new e-mail job, Stored Value Award, has been added to ExactTarget Email Campaigning and sends an e-mail in near real time to customers who have recently received a stored value award.

---

# myinventory Features and updates

This section includes brief summaries of some of the more significant enhancements and new features for myinventory.

## **Correction inventories can no longer be unbooked**

CR ID #: NA  
SCR ID #: 29471

With this release, you are prevented from unbooking correction inventories created from the Manage Store module.

## **Added additional language to myinventory**

CR ID #: NA  
SCR ID #: 29292

WEB Korean is now supported within myinventory.

## **Added support for myinventory on MC40 CE7/EC7 devices**

CR ID #: NA  
SCR ID #: 29015

myinventory now supports Motorola MC40 Handheld devices running Windows CE7/Embedded Compact 7.

## **Configure myinventory to unlock suspended inventories**

CR ID #: 35582  
SCR ID #: 28925

You can now configure myinventory to automatically unlock suspended inventories if it has not been accessed for a certain amount of time. This ensures that the inventory does not remain in a locked state if an error occurs while processing the inventory.

---

## **Reject prices variances in myinventory | B2B Solutions | Price Variances**

CR ID #: 35227  
SCR ID #: 28776

You can now reject price variances when importing an item catalog or an invoice into myinventory.

## **Improved Inventory Item Activity Report performance**

CR ID #: NA  
SCR ID #: 28773

Improved the performance of the Inventory Item Activity Report by using enhanced indexing.

## **Receipt by Purchase Order and Suspended Receipt modules now show References of Purchase Orders**

CR ID #: 35183  
SCR ID #: 28743

Added the PO Reference column to the overview screens of the Receipt by Purchase Order and Suspended Receipts modules to show the references entered by you when creating Purchase Orders. This helps you to identify and open the correct Purchase Order. If a reference is not defined, the Purchase Order number is shown under the PO Reference column in its place. If there are multiple orders within a document, it shows all references/Purchase Order numbers belonging to those orders.

## **Vendor account field can be made mandatory when creating new vendors**

CR ID #: NA  
SCR ID #: 28715

You can make Vendor Account in *Master Data | Vendors* a mandatory field when creating new vendors in myinventory.

---

# mylabor Features and updates

This section includes brief summaries of some of the more significant enhancements and new features for mylabor.

## **Payroll solution providers can import employee information for a specific organizational level**

CR ID #: NA  
TP ID #: 73716

You can now allow multiple third party payroll solution providers to import employee information for a specific organizational level.

## **TCA is now supported by RES running on mTablet E series with Windows 8.1**

CR ID #: 34721  
TP ID #: 67885

With this release, the Enterprise Time Clock Application (TCA) is supported by RES v5.0 and above running on mTablet E series with Windows 8.1.

## **Closed Time Card export job now supports mylabor**

CR ID #: NA  
TP ID #: 67356

This feature adds the ability to configure an automated payroll export for each payroll interval.

## **BG Code now valid for 90 days**

CR ID #: 35179  
TP ID #: 57314

---

You can now re-use a BG Code for 90 days from the date it was first created. For example, if you create a BG Code on 14/07/2014, you can use that BG Code until on or before 12/10/2014.

### **Maintain staffing requirements by day of the week**

CR ID #: NA

TP ID #: 36378

You can now create staffing requirements for the days of the week that allow you to:

- Maintain separate requirements for weekdays and weekends for the same job and part of the day.
- Add additional resources for those requirements.
- Generate staffing requirements based on the day of the week.

---

# Operating Systems

## Supported Client Applications and Operating Systems

<b>Desktop PC</b>
Microsoft Windows Vista, Microsoft Windows 7, Microsoft Windows 8,
Microsoft Internet Explorer 8, Microsoft Internet Explorer 9, Microsoft Internet Explorer 10*, Microsoft Internet Explorer 11*Microsoft Windows 8.1
Mozilla Firefox (for Microsoft Windows OS)
Adobe Acrobat Reader
Microsoft Excel 2007 or newer

\* Compatibility view may be required for Interactive Reports, Dashboards, and Ad Hoc.

<b>Mobile Devices</b>
mymicros.net Mobile: Apple iOS or Android
inMotion: Apple iOS v6.0 or higher or Android v4.x or higher

<b>Mobile Devices: myinventory</b>
MC40
MC55
MC55a
MC7

# Issues

The following list summarizes some of the corrective actions for previously detected issues

Product	CR ID #	TP ID #	Description
<b>mymicros.net</b>			
	35878	79759	You can now manually align and unalign tax definitions without an error message.
	35682	74206	When using Firefox to select a location in Import/Export Maintenance portlet the message Do not specify a location now appears in the drop-down menu.
	35635	72912	Check Detail reports now show reason codes for item returns.
	35315	63188	myinventory Purchase Order Details are now sent to the mymicros.net database.
	35137	55632	Android devices now support using the full organization name to sign into inMotion.
	35135	55606	When using inMotion employee total hours for the week are now accurately calculated when the employee clocks out for breaks and lunch.
	34721	40854	Portal language settings now take precedence over the browser language settings. Previously, certain parts of the portal rendered in the browser specified language.
	NA	36180	Automatic Organization Sync has been fixed to function as expected. Previously, if you had myinventory enabled for all locations and a location without myinventory enabled posted the daily totals first, Automatic Organization Sync did not run.
	NA	33772	Some reports, which did not render in PDF format, are now rendering without an error.
<b>iCare</b>			
	35350	64031	Eligibility Rules has been fixed and now you only receive the Signup Anniversary Award on the following year's signup anniversary date. Previously, you received the award immediately on the first transaction.
	35001	48508	Internet Explorer 8 no longer becomes unresponsive when the POS Request Code has records greater or equal to 255.
	35315	38160	Points issued to multiple checks using the same iCare account can now be reversed within the

			same business day. The points must be voided in reverse chronological order.
<b>myinventory</b>			
	35448	68011	The Cost Analysis Report no longer shows multiple lines for each cost center. Additionally, currency symbols have been removed from its header.
	35966	29515	The Inventory Daily Variance Report now renders properly and loads without timing out.
	NA	29496	Order Calculation Lookup now accurately calculates the average of the Factor/1000 for each day and now also takes the Forecasted Sales of the current day into account for the calculation.
	NA	29484	MIA2 Scheduler no longer creates a Period Close Inventory if a booked Period Close Inventory already exists for a cost center for that date.
	35912	29432	The Calculate Average Usage job no longer returns an error when performing a calculation using large decimals.
	35891	29390	Invoices are no longer duplicated when a user manually imports an invoice while a B2B Import Invoices/Credit Notes job is scheduled.
	35869	29359	Each recipe is now printed on a new page when option Print without Page Breaks is cleared.
	35792	29300	You can now use the Firefox browser scroll bar, the scroll arrows, or the mouse wheel to scroll through items in the Manage Store and Stock on Hand modules.
	35337	28947	Replace Existing no longer removes all items from the Production – List Management module and now replaces the originally saved document.
	35336	28946	When you have insufficient rights undelivered items are not removed from receipts
	35332, 35334, 35321	28945, 28944, 28927	If you do not have the Book Receipts right you can no longer modify receipts.
	35316	28838	Theoretical Quantity now updates after unbooking a count. After unbooking the inventory the difference is updated correctly.
	35268	28784	The Vendor Purchase Item module no longer returns an error message when saving an item without filtering or refreshing the page.
	35262	28773	The Open Purchase Orders module now shows all purchase orders, including those with items without price quotes.

	35230	28718	The phone number field is no longer impacted when a user sync is performed between mymicros and myinventory. Because mymicros.net does not contain a phone number field, previous syncs caused the phone number field to turn blank.
	NA	28718	B2B Solutions processes invoices without errors when accessed from myinventory and can apply rounding
	NA	28717	The performance of the Inventory Item Activity Report has been increased by using enhanced indexing.
	35024	28548	You no longer receive an error when adding items from large item groups to receipts. Previously, if the option Purchase/Receive all Items was enabled, the application became unresponsive and returned an error when adding items.
<b>mylabor</b>			
	NA	84453	The employee SSN is now available in the HR Employee API response.
	35806	77967	Premium Pay now calculates when the Labor Week Start Day is set to Monday and the employee time punch is between 12 a.m. and the configured Start Labor Hour.
	35744	75750	You can now save employee time card punches after modifying Child Labor Laws without an error.
	35685	74262	You can now run the Labor Dashboard without an error. Previously, the part of the Labor Dashboard that shows Employees Approaching Overtime failed to load if an employee had zero hours and zero pay.
	NA	44084	You can now save changes to a forecast in Advanced View without adding values to Forecast Edit Restrictions. Previously, changes made in Advanced View reverted back to their original values if Forecast Edit Restrictions were not defined.
	NA	44001	Schedule Profile Color Code Themes tab no longer duplicates job codes. Previously, when a new Job Definition was added and the Schedule Profile was saved without making any changes, the Color Codes Themes tab duplicated the job code that was created earlier.
	NA	43034	The Basic Schedule Editor now only shows the Overlapping Shifts error message when there is

			a conflict between the assigned shifts.
	NA	42709	The Scheduling Profile > Job Code drop-down menu now retains the saved information. Previously, when attempting to edit a Schedule Place Holder, the Job Code field did not show the value that was assigned earlier.
	NA	42252	The Basic Scheduler staff graph now renders on small screens properly. Previously, the staff graph could not be viewed completely on small screens as expanding and collapsing it caused the horizontal scroll bar to disappear or not work.
	NA	38822	Employee Change Tracking has been fixed and now reports changes made to the Not a Veteran option.
	NA	38817	You no longer see an erroneous message when saving a schedule. Previously, when you tried to save a schedule, you saw an error message stating that the location was not configured to use Enterprise Labor. (Formerly SCR 12900)
	12900	34845	The Job Rate > Field Name drop-down menu now includes Annual Salary. Previously, No Text Available appeared in its stead.

## v8.4.2 Release Notes Features and Enhancements

The following is a list of all features and enhancements in this release.

Product	Feature/ Enhancement	CR ID #/ TP ID #
<b>mymicros.net</b>		
	mymicros.net reports display sales mix broken down by item	<a href="#">NA/ 64171</a>
	Java only needed for downloading RTA and mytasks	<a href="#">NA/ 60164</a>
<b>iCare</b>		
	Added support for myiCard.net on Google Chrome	<a href="#">35637/ 76810</a>
	Introduced a new E-Mail job for Stored Value Awards	<a href="#">NA/ 68535</a>
<b>myinventory</b>		
	Correction inventories can no longer be unbooked	<a href="#">NA/ 29471</a>
	Additional language added to myinventory	<a href="#">NA/ 29292</a>
