This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this software or related documentation is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information on content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

Release overview

The Release Notes v8.4.2 describe new features and enhancements for the mymicros.net version 8.4.2 components. For a complete list of v8.4.2 features and enhancements, click [here](#).

mymicros.net Features and updates

You can now ensure information is not sent to Google Analytics

CR ID #: NA
TP ID #: 76148

You can now leave the Portal and iCare Analytics token fields blank in the MICROS organization to ensure information is not sent to Google Analytics.

Java only needed for downloading RTA and mytasks

CR ID #: NA
TP ID #: 60164

Following the removal of Java Applets, you now only need to install Java for downloading RTA and mytasks. This enhancement includes the following interface and usability changes:

- Location/Revenue Center/Order Type/Menu Item filter

Added the ability to drag and drop.

- Location/Revenue Center filter
Added a search text box in both the source and target screens.
- Business Date filter
Easier switching between the financial and standard calendar.
- RTA and mytask download portlets
Added validation to the RTA download to check for Java. If you do not have Java installed, the system shows a No Java Installed message.
- Alignment
Embedded all alignment windows into the graphical user interface.
- Improved usability for selecting locations and master groups.

.connect usability improvements

- Embedded all screens into the graphical user interface.
- Added automatic saving for inline editing when making changes to any table within the .connect module.
- Added automatic saving when using Add List, Add Location, and Delete in the Deployment List. Removed Save button.

-
- Added a display on the Create Job screen to show the version number and organization name in the case of custom scripts.
 - Added automatic selection of items in Job Status. Removed the ability to select items from the header.
 - Added the ability to set all jobs to the Terminated status in the Job Status screen.
 - Changed the default selection from Deployment Lists to Locations on the Deploy Job and the Deploy All Jobs screens.
 - Removed the password, download password, status, beta code, and beta script columns from the Overview on the Location Setup screen.
 - Renamed the external address mq/ip to External Reference on the Location Setup screen.

iCare Features and updates

There are no new features or enhancements with this release.

myinventory Features and updates

This section includes brief summaries of some of the more significant enhancements and new features for myinventory.

Enhanced myinventory transaction view with new fields

CR ID #: NA
SCR ID #: 28774

The myinventory transaction view now includes two columns that record the following information:

- Timestamp when the document was booked
- Document date of the transaction

mylabor Features and updates

There are no new features or enhancements with this release.

Operating Systems

The mymicros.net version v8.4.2 release is supported on the following platforms:

Databases
Microsoft SQL Server 2012
Microsoft SQL Server 2008 RD (Release 2)
Microsoft SQL Server 2008

Application Server Operating Systems
Microsoft Server 2012
Microsoft Server 2008 (Release 2)
Oracle Application Server 11g
Oracle Application Server 10g

Issues

Resolved Issues

The following list summarizes some of the corrective actions for previously detected issues.

Product	CR ID #	TP ID #	Description
mymicros.net			
	35952	82059	An error message is no longer displayed when running the Admin Server operation remasterAlign on databases with a large number of items.
	35951	82056	The posting server no longer displays an error message when updating menu item prices.
	35953	81634	Menu items containing special characters are no longer duplicated on databases using WE8MSWIN1252 character set for 8700 and 9700 systems.
	35695	74473	The performance of purging historical weather forecast data has been increased by using indexing.
mylabor			
	35254	60253	Transferring an employee to a new location and then assigning additional locations to that employee no longer creates duplicate entries for the transfer location in the HR_EMPLOYEE, EMPLOYEE and JOB_CODE tables.
myinventory			
	35784	28298	myinventory setup now includes all components required for the successful installation of the thick client.
