Release Notes - BellaVita - Version 2.6.5

Bug

- [BEV-2853] - Closed **Error when exporting Article Sales Turnover into XLS: "Sheet name cannot be blank, greater than 31 chars, or contain any of /*?{}"**
  When exporting Article Sales Turnover into one sheet XLS, the sheet name was not accepted ("Sheet name cannot be blank, greater than 31 chars, or contain any of /*?{}").

- [BEV-2860] - Resolved **Resolution: IF the guest has an open reservation, it will be displayed - otherwise the most recent one.**
  Resolution: IF the guest has an open reservation, it will be displayed - otherwise the most recent one. The behaviour can be controlled by a system parameter: com.softwareag.ch.w4y.imprt.ImportGuestFinder.findAllReservations - true: for a guest with no current or future reservations, the most recent reservation is listed - false: only current and future reservations are listed

- [BEV-2889] - Closed **Bellavita sends €0.01 smaller amounts to Opera HTNG**
  Bellavita sends €0.01 smaller amounts to Opera HTNG

- [BEV-2904] - Resolved **Search for a reservation which starts on the same day as the present day fails**
  When searchîng for a reservation which starts on the same day as the present at date parameter, the search doesn't yield any results.

- [BEV-2909] - Closed **When an offer is replaced in a package booking, then the paying guest is set as the participator instead of the participator of the replaced booking.**

- [BEV-2932] - Resolved **Journal: Subscription Discount not credited properly**
  When crediting a subscription sale, the subscription discount is credited to customed. The discount amount instead should be credited to the SPA. (see excerpt from Waldhaus Flims Journal Report, Document Number 117856)

- [BEV-2933] - Closed **Payment positions with the same payment method are merged.**
  Payment positions with the same payment method are merged into a single payment position.

Documentation

- [BEV-2907] - Resolved **Configurable formatting of output fields on every turnover report**
  Configurable formatting of output fields on every turnover report

Improvement

- [BEV-803] - Resolved **Journal per turnover employee**
  Journal per turnover employee

- [BEV-1774] - Closed **BV articles may be exported into MF materials control**
  Upon each export of stock movements, all active external stock articles are exported into articles.exp. Format: Article;ArticleGroup;StandardPrice

- [BEV-2624] - Resolved **Status "no posting" in V8 should get considered properly in BV**
  Status "no posting" in V8 should get considered properly in BV. If the guest ha "no post" flag on the pms side, the settling transaction is be rolled back, the user is informed about the error and must choose another payment method.

- [BEV-2844] - Resolved **Employee Occupancy grouping of the occupancy evaluation to specific (high priority) working hours**
  Employee Occupancy grouping of the occupancy evaluation to specific (high priority) working hours

- [BEV-2895] - Resolved **Automatic Display of all Employees in a Schedule**
  Sometimes a customer forgets that a newly added employee also has to be added to some schedule. A new attribute, "assign all employees", has been introduced to the schedule entity. Setting this attribute to true results in displaying all employees automatically. New employees will appear automatically on this schedule.

- [BEV-2937] - Resolved **Polish fiscalisation dll module doesn't load on "Windows Server 2008"**
  The fiscalisation module can be disabled on any workstation and for any fiscalisation by setting the following parameter in {{workstation.properties}}: {{ch.cid.bv.fiscal.IFiscalizer.enabled=true --> fiscalizer ist aktiviert}}
  {{ch.cid.bv.fiscal.IFiscalizer.enabled=false --> fiscalizer ist deaktiviert, es werden keine Resourcen allokiert}}

New Feature

Task

- [BEV-2808] - Resolved **Document Type is bound to configurable printer.**
  Document Type is bound to printer. This can be configured in settings, but only if Italian fiscalisation is enabled (menu File | Settings).
- [BEV-2809] - Resolved **Journal grouped by document type**
  Journal grouped by document type There is besides the Jasper version also a CR version which alllows parametrisation (guest filter by country, minimum amount of journal position)

Sub-task

- [BEV-1075] - Closed **Guest details configurable in order to print / hide employee and / or room, and display an additional footer text**
- [BEV-1948] - Resolved **Stationary modification**
  Stationary modification when printing a guest document (see http://bellavita.defsys.ch/wiki/doku.php?id=bev:dist:reports:crystal:quick_adaptations)
