## Bug

---

**BEV-3853 DoPrintExtendedDescription key note was duplicated**

It was reported that on Employee Details(without presence) report the booking remark was shown two times, although DoPrintExtendedDescription was adden only once. This has been corrected..

**BEV-3999 Displaying a voucher with a negative remaining amount caused a ModificationException**

It was reported in version 2.6.5.14 that under special circumstances it could happen that there were Coupons with negative remaining amounts in the system. This has been corrected

**BEV-3908 When an offer is set as "online bookable" it is ensured, that the offer numbering is set to be unique.**

When an offer is set as "online bookable" through the "online category", it is ensured, that unique offer numbering is enforced.

SystemParameter: ch.corix.w4y.bo.booking.Offer.doEnforceUniqueOfferNumber

**BEV-3886 Schedule creation problems resolved.**

Two problems with schedule creation have been fixed.

1. It was not possible to add already existing formatter profiles.

2.Copy & paste copied also the special id, which is wrong because this attribute is used by the system to identify special schedules..

**BEV-3869 In the Search and Book Dialog bookings were created without reference numbers**

To set a reference number it was enough to open the booking dialog and close it with the ok button.

The guest booking table now is refreshed after the first guest has been added.

**BEV-3867 Articles are now properly considered in correction of invoice**

As part of BEV-2433 a document cancellation created a new article sale instance for the existing article sale. ArticleSalePosition.changeArticleSaleToCancelled().

During the invoice correction, the article positions of the article sale are checked to see if the article sale is billed. Before BEV-2433 only the original article sale existed and returned the positions of both the original invoice and the newly created credit memo. Now only the credit memo positions are considered. ArticleSale.isBilled has no meaning with several article sales for the same sale.

**BEV-3861 BellaVita is now compatible with Windows 2012 server**

Due to an incompatible dll in the Jet runtime the bv.exe crashed when started on a Windows 2012 Server.

This has been fixed through a new compiler version.

The default workstation directory has been changed from

"%allusersprofle%/Application Data/bellavita"

to

"%allusersprofle%/bellavita"

**BEV-3857 Duplicated prices in Consumed bookings report**

Price duplication of one offer on 'Anzahl buchungen per gast report'however it was consumed only one time. version 2.6.5.7

In the test environments (2.7.0.5;2.7.1.;2.7.2) it didn't show anything on the report. No filters can be chosen. Please find attached error log from our side.

The report and screenshots from customer.

**BEV-3745 Posting rounding amount can't be blocked anymore / Package compensation to be checked again.**

When payment method package is set to 'not export', the package posting document for the rounded amount is still exported. This can result in posting errors (with the IFC).

**BEV-3848 TEMP\_% index was dropped during upgrade**

When upgrading a system, the {{ant index.drop}} dropped all index entries, even those which were created for the table {{TEMP\_INVOICE}} and similar tables.

The tables are created when the based-on report is created. This report handling now also adds the indices back to the table at this time.

**BEV-3847 System Parameter Descriptions were not displayed.**

The descriptions were left empty.

**BEV-3838 Mailing list/ turnover relevant filters did not work**

When using filters for the mailing list, no data was shown, although guest/records should have been presented as result of the selected filters.  
Other filters worked fine.

**BEV-3796 HTNG No post warning on wrong pop up order.**

This issue duplicates:  
Major Open BEV-2924 Status "no posting" in in Opera should get considered properly in BV

**BEV-3930 The guest panel confirmation letter printout was empty.**

Print button in Guest Panels didn't work properly.  
The resulting confirmation letter was empty.  
This has now been fixed.

**BEV-3549 Articles Sales were not correctly calculated on the article turnover report**

Articles Sales were not correctly calculated on the article turnover report

**BEV-3818 After a time of malfunctioning, the Tool Bar "Save" icon now is enabled properly after modifications**

After a modification of a persistent object, the tool bar "save" icon should be enabled.  
This stopped working.

1. When the save button is disabled, the user may get the idea, that the object instance has not been modified.
2. The "save" menu entry of the file menu is not disabled.
3. Sometimes the object violation is not displayed on the tab where the modification is made. Example: Offer. (This fooled me).
4. When a new instance is selected in a tree (master data), the current instance is saved automatically disregarding the state of the save button.

Summary:  
Inconsistent states could be stored without the user being aware of it.  
This has now been fixed.

**BEV-3835 Somtimes after confirming a treatment change, the original treatment fields were still shown**

If you changed a treatment, and clicked OK to confirm the changes, then sometimes the original treatment fields were still shown.  
This has now been fixed.

## Improvement

---

- BEV-3687      Searching of bookings by reservation reference number and reference number**
- It is now possible to search bookings by both reference number reservation reference number.  
The reservation reference identifies a reservation with possible several bookings, e.g. an online booking reservation.
- BEV-3870      Multiple line employee absence description**
- The employee absence description has been extended from a single line to a multiple line text area..
- BEV-3808      It is now possible to print only one invoice at the time of settlement and no copy.**
- The number of copies is configurable for Payment Methods. Its value can be 1, 2 or 3. If it is set to 1 it is only printed once (there is no copy). In other cases it is printed twice or third times.
- BEV-3992      The scheduled task "BillBookings" now handles manually billed bookings properly.**
- Manually billed bookings could interrupt the task execution
- BEV-2832      The article search dialog has been completely integrated into the invoice dialog.**
- It is now possible to
1. search by article number
  2. add several articles to the invoice without leaving the article search dialog.
- BEV-1076      The guest history tab now displays the price of items as the price applied, and not the standard price.**
- If a Tip is added to the bill for the amount of 10 EUR - on guest profile/history tab it now displayed correctly as 10.00 EUR and not as 0 EUR as of the Master Data price.
- BEV-3872      Mailing list filter has been extended**
- The mailing list filter has been extended with member contract (time interval-since when the guest has member contract)
- BEV-3871      Also multiple offers can be booked online**
- Example:  
"1 h Aerobics" is scheduled for 2013-11-04 and 2013-11-11 with max 10 guests at the time.  
Description = "Enjoy 1 h Aerobics in a group of max 10 persons."
- Each occurrence of the multiple offer is booked and billed separately.
- BEV-3878      Employee Commission list now shows only employees with positive amount**
- The employees with zero turnover amount ave been removed from the Employee Commission list
- BEV-3991      The booking dialog now displays also guest remarks.**
- Guest remarks may be of importance for the therapist.  
Guest remarks my be created also by the guest himself, through the online booking web interface.  
Unfortunately these online remarks cannot be modified later on by the guest..

**BEV-3836      Licence Concept: Introduction of free facilities**

The BellaVita licence evaluates the number of fullworthy facilities.  
See <http://bellavitadistr.microsdc.com/wiki/doku.php?id=bev:config:licence>

Unfortunately some tools (like "hot stones" used for massages) are counted as fullworthy.  
Is is now possible to classify a facility as secondary if it is only used in combination with another facility for any offer.

As the facility count is affected by the offer skills, the facility count is now displayed not only in the licence dialog, but also in the facility - and the offer master data panels.  
The marking of facilities as free should is done by the system and must be accompanied by a information dialog.

The facility panel displays the marking as free and displays the reason for the marking.

1. Secondary facility
2. Not used with Employee skill

As part of this issue, configuration modifications resulting in exceeding the number of licenced facilities are rejected.

Wiki section:  
[http://bellavitadistr.microsdc.com/wiki/doku.php?id=bev:config:licence#runtime\\_check](http://bellavitadistr.microsdc.com/wiki/doku.php?id=bev:config:licence#runtime_check)

---

## Sub-task

**BEV-3889      Package distribution now handles also "multiple offers" correctly**

Consequently multiple offers were not usable for packages.

**BEV-3716      Error Handling of document exports has been improved.**

Sometimes the document instance which couldn't be exported, were not marked in the export journal, which made later re-export rather time-consuming.

---

## Task

**BEV-2848      BellaVita now supports also the Finnish language.**

As usual, not translated items are shown in English.

## Find out more about what MICROS-Fidelio can do for you

For more information about Suite8  
please contact us at [sales-eu@micros.com](mailto:sales-eu@micros.com).

## About MICROS-Fidelio

Serving the hospitality and speciality retail industries, we are the world's leading developer of enterprise applications. Our global presence and local support have helped us build a long list of references - hotels, restaurants, conference centres, retail, stadiums, theme parks, casinos and cruise ships. We maintain an intense dialogue with colleagues throughout these industries. The result is a wide range of integrated software, hardware and business technology solutions and services. These help to optimise your operation and increase profits by providing your guests with a personalised service.
