# Bug

**BEV-4102    Facility Areas are not considered properly upon scheduling**

Facility Areas are not considered properly upon scheduling. This is resolved for booking Dialog & search and book.

**BEV-4271    Package and Offer Activation/Deactivation**

OFFER DEACTIVATION:
Offer cannot be deactivated if it's part of a simple package. However it can be deactivated if it's part of a fix total quantity package and the package can be booked without the deactivated offer. Which means that the sum of other offers' max quantity must be equal or greater than fix total quantity, in order to have enough treatment available for the package.

OFFER ACTIVATION:
Every time without condition.

PACKAGE DEACTIVATION:
A package cannot be deactivated if it's a system package "PackageWithAllOffers" or if it's linked to a PMS package.

PACKAGE ACTIVATION:
Package cannot be activated when it contains inactive offers or another package already exists with the same description.

GENERAL:
New package cannot be created with inactive offers. New booking cannot be created with inactive offer.
The existing packages can be booked with inactive offers, because they were created when the offer wasn't deactivated.
Also the existing future bookings with inactive offers could be consumed.

**BEV-4204    Package distribution calculates wrong start time for next booking**

BugFix:
Package distribution calculates correct start time for next booking considering clearing, preparation and rest time.

**BEV-4104    Cannot delete charge type**

It was not possible to delete charge type.

**BEV-4180    Null pointer exception occurs when using "add offer from list end" function for customized package sequence setup.**

**BEV-4239    Apply selected sequence runs in infinite loop**

There was a bug in the logic.
Several day changes were inserted after each other. Issue is fixed by checking day changes and skip inserting them if previous one in the sequence is a day change.

**BEV-4221    CrystalReportDocument is closed exception is raised because of an issue when reusing cr documents.**

CrystalReportDocument is closed exception is raised because of an issue when reusing cr documents.
Bug is fixed by guard.
Option: BellaVitaReporting.useCachedReportDocument=false in order to disable the Cache any prevent any such exception.

**BEV-4184    Change prepaid flag for booking triggers unnecessary modifications**

Unnecessary modifications are removed when prepaid flag is changed for a booking in order to gain performance improvement.

**BEV-4220    Customized Package Planning panel does not show Guest with Dates**

Package planning's upper part displays the guest with dates correctly.
The bottom part is refreshed according to the selected date.

Additional improvement:
Number of offers in the package and the number of bookings are displayed in the beginning of the row like:
(4/12) Massage
Which means, 4 massages are scheduled of total 12

**BEV-3387    Install dialog email address not used for local.properties**

The email address set for 1st level support entered in the installation dialog does not change the default value in local.properties.
To reproduce: start full install and check the local properties after email address is added.

**BEV-3972    Locked out after session timeout**

If navigation request from background task (for example report creation) happens after user logged out, then these actions are stored, and if user logs in again then it will be navigated automatically to that panel/task. If multiple options are available to navigate, then a dialog appears and user can select the task to continue with.

**BEV-3973    Invoice printing error for jasper report in 2.7.2 and higher versions**

Pls. follow the instructions in:

http://bellavitadistr.microsdc.com/wiki/doku.php?id=bev:dist:upgrade:handmade#section2720

**BEV-4182    Medical Package displays wrong state**

States for Medical Packages:
 1. "not booked" - No Admission Consultation booked.
 2. "not prescribed" - Admission Consultation is booked but no other treatments added to the package.
 3. "not distributed" - Admission Consultation is booked, but none of the prescribed treatments are booked.
 3. "in planning" - Admission Consultation is booked and ANY of the prescribed treatments are booked.
 4. "in treatment" - Admission Consultation is booked and ALL of the prescribed treatments are booked.
 5. "consumed" - All of the treatments are checked-in including admission consultation

**BEV-4058    Mailing list filter doesn't work**

Mailing list filters are fixed:'Filter criteria of past bookings' and 'Filter criteria for products bought...' now they are working properly.

**BEV-4283    Article Name is not displayed on Turnover Report per Employee.**

Now Article Name is displayed on Turnover Report per Employee.

**BEV-4189    In the distribution dialog an offer entry can be distributed more than once**

It is now fixed that in the Distribution Dialog an offer entry can be distributed only one time.

**BEV-4275    Manual amount higher then paid amount shows a not understandable violation message (Discount Note)**

When user enters a higher amount, a Violation message is shown and the Dialog can't be confirmed. No Discount is given. When settling to invoice the manual amount is simply adjusted to the calculated amount.

# Change Request

### BEV-4170    Use javac with source and target 1.7. all over the project.

Use javac with source and target 1.7. all over the project.
Java 1.7. is also used as part of the deployment. JRE 7 needs to be downloaded from the Distribution Server, if automatic download is not used (ant bvsync).
Wiki: http://bellavitadistr.microsdc.com/wiki/doku.php?id=bev:dist:upgrade:handmade#general

### BEV-4178    Package Handling: all package treatments should be posted at once when settling.

Required system parameters:
CustomizedPackage.enablePackageSplitPosting = true
CustomizedPackage.sendPackageSplitAtOnceWhenSettling = true

During package settlement the system books automatically the remaining treatments (if it exist), in order to be able to create a Posting document position referenced to the booking.

Only facility resource assigned to these system bookings and start time selected from 0:00 AM - 8:00 AM period to avoid blocking the resource from other bookings.

When package settlement is done, then bookings are finalized. This means the bookings cannot be deleted and redistributed on the Package Distribution Dialog. Furthermore, the bookings cannot be cancelled, replaced or removed from the package.

The system let the user complete the bookings: Set proper start time, select employee resource or change facility resource. The booking cannot be moved to other Spa.

Posting happens right after the package is settled.

### BEV-4159    Zero VAT rate can be selected when settling as an exemption.

Zero VAT rate can be selected when settling. A Zero vat needs first to be configured in Administration Panel, then a document Position can Zero vat be assigned.

### BEV-3529    New License type Dayspa

New License type is available for Day spas

# Chargeable

### BEV-4241    ORACLE    - License Key Remediation Plan.

Based on requirements from Oracle any products or modules may not require licence-codes or may not check any expiration date or similar.
These requirements are covered with the new version; as such please forward to your colleagues in charge of the installation or support.
These requirements do under no circumstances replace the prerequisite that each installation requires a licence to be ordered.
Using this module without a license covered violates the license agreement and might have legal consequences.

The ordinary license is replaced by an immediate license activation. See how to enter a license from 2.7.2.1. on.
http://bellavitadistr.microsdc.com/wiki/doku.php?id=bev:dist#license_entry

# Improvement

**BEV-3600  WISH customized Package ID on confirmation to be optional**

WISH customized Package ID on confirmation to be optional.
Use Report Parameter to enable this.
DoSupressCustomizedPackageReferenceNumber=true: supress the reference id number
DoSupressCustomizedPackageReferenceNumber=false (default): print the reference id number

**BEV-3143  Skills no longer needed may be deactivated**

A deactivated skill will remain assigned to any employee, facility or offer but cannot be used for future assignments.

**BEV-3906  Barcode Reader is only functional when Spa is selected and licence configured for this Spa (in Multispa Environment)**

Barcode Reader is only functional when Spa is selected and licence configured for this Spa (in Multispa Environment)

**BEV-3782  Articles without an article number should be handled in a better way for Materials Control.**

If "External Materials Control" license is available, then Article cannot be saved without article number.

**BEV-3737  Presence Templates for Week**

New type of Presence Template has been introduced. This presence template contains a presence sequence which can be applied for an employee.
Templates can be created and modified in a dialog that can be accessed from employee's presence panel.
User can create a sequence of presences and absences. Same functions are available as used for ordinary Presence/absence creation. (New, New from Template, Copy-Paste, and Periodicity)
The already existing templates can be applied for an employee with right clicking on the employee's presence schedule.
Similar dialog appears as used for organizing templates, but it is extended with new fields (Start Date, Spa, and Area).
New templates can be created, existing ones modified just before applying them.
Start date is automatically detected from the location of the mouse click, but it can be changed on the dialog. The presence template is applied starting from this date.
The presences in the template have a Spa and Area attribute. A template can have presences with different spa, and different areas. These attributes can be overwritten on the dialog as well. The newly created presences will have the same spa and same area.

**BEV-995  OK & Copy often yields an error message on the booking dialog. A new popup sub-menu is available in the schedule for creating a new booking by copying and searching the next time Slot via Search and Book Dialog.**

When copying a booking in the booking Dialog a new check box indicates if a next timeslot should be Chosen automatically or not. This because of error Message with the standard function forcing the user to search manually.
Further a new popup sub-menu is available in the schedule for creating a new booking by copying and searching the next time Slot via Search and Book Dialog.

**BEV-3729  Checking option for Support: there is a Report available for not exported documents (not correctly or not issued postings).**

Checking option for Support: there is a Report available for not exported documents (not correctly or not issued postings).
See Report creator (ctrl-r) see Root | Administration | Log (not exported documents).

**BEV-3417  Availability search by group name**

The search and book dialog now allows a selection of an offer group.
Example: Display available time slots of all kinds of massages.
The dialog has also been extended with an overall tool tip: "I" on blue button.
The schedule context menu, right mouse key, has been extended with a link to the search and book dialog.

**BEV-3828** **"No internet connection available" configuration**

BellaVita can be configured without internet connection in order to suppress error messages because of the missing internet connection.

**BEV-4063** **BellaVita Self-Diagnosis**

BellaVita gives the possibility to alert the user if any problems are occurred during the scheduled diagnosis that runs in the background or launched by the administrator. The result can be seen on the dialog that can be reached from the toolbar or from the Administrator menu in the top right corner of the application. Currently available diagnosis: HTNG test, FIAS test, JMS test, Mail service, Suite8 connection checks the configuration, tries to connect to the DB, runs queries against the DB.

**BEV-4199** **Existing display formatter should be available on guest schedule: "Offer display in color"**

The schedule formatter which displays bookings according to offer's color is available for guest schedule.

**BEV-4200** **User friendly error message in case of saving package with incorrect bookings**

List of violated bookings in case of saving.

**BEV-4097** **Now it is not possible to configure offers without skills to avoid booking mistakes.**

Offer cannot be configured without skill

**BEV-4098** **Show train icon**

In case of training system, the train icon is displayed on the dialog and on windows taskbar.

**BEV-4069** **Booking Dialog: Performance improvement for guests with many bookings.**

Especially in medical Spas, one guest can have many bookings over time as part of one or more therapies.
Operations like setting the guest, replacing employee and concluding with ok take noticeable (from 5 to 20 s) longer if the guest has 25 bookings.
After the improvement the performance did no longer suffer for guests with a large number of bookings.

## New Feature

**BEV-3161** **Italian fiscalisation and in TdS in particularly VAT exemption are required.**

Italian fiscalisation and in TdS in particularly VAT exemption are required.

**BEV-4186** **With a new parameter Setting (in case of {{DoSuppressPackageBookingPrice}} = {{true}}) the package booking price can be printed / suppressed for the guest check report and booking confirmation (CR reports).**
With a new parameter Setting (in case of {{DoSuppressPackageBookingPrice}} = {{true}}) the package booking price can be printed / suppressed for the guest check report and booking confirmation (CR reports).

## Sub-task

**BEV-3369**    **Logging changes in the application**

Logs the changes for Articles, Offers, Packages under Master Data, and logs also all the changes that is made on the Guest. All the created bookings and sold packages are also under logging. Invoice creation and changes (invoice correction and cancellation) is logged.

**BEV-3484**    **Market segmentation possibility for Danubius.**

Market segmentation possibility for Danubius. Each booking can be assigned a market code. When settlings the market code is used for Segmentation. As a result the journals and turnover reports can be run with a market code filter only showing the relevant data.

**BEV-4028**    **Reminder message for same treatments**

Reminder message should pop up if dispatcher tries to book an offer for a guest who has the same type of offer for the same day.
No restrictions, just reminder.
System parameter:
Booking.enableReminderForSameTreatmentOnSameDay (default: false)

## Task

**BEV-3887**    **Journal should support different subtypes of document**

Journal should support different subtypes of document. For this the base type is record into the document objects, and used in views for correct calculation in reports, etc..
