Bug

BEV-2751 **Wrong ResID take into booking dialog**

Wrong reservation ID taken into booking dialog. Furthermore, if the paying guest was changed, the reservation ID was not changed to the new ID.

BEV-4138 **Multi-offer report does not work**

The type of guest's reference number has been changed from String to Long, which caused the compilation error. Version 2.7.0.11 was still using String for Reference number.

BEV-4270 **Cancellation is possible by roomcharge but the room number is not visible**

This is due to the change in BEV-3987 (automatic preselection of room payment method). This should not be reverted but in case of setting in Hotel room the field "room number" it should be treated the same as manually selected.

BEV-4293 **Bookings (daily) report does not show correct information.**

BEV-4296 **Check-in of booking in package fails with error message "an internal error message .. at least one document position does not contain any payment method"**
This happens only after settling the package, and checking the first booking. This has now been fixed

BEV-4302 **Synchronisation may not work when several network adapters are configured for the workstations.**
A new configuration parameter, rmi.subnet, has been introduced for local.properties.
Descibed in Wiki:
http://bellavitadistr.microsdc.com/wiki/doku.php?id=bev:support:solutions#synchronization_having_no_effect

BEV-4304 **Overbooking setting in Booking Dialog doesn't work properly**

BEV-4308 **Article group Turnover report is not working. Nested Exception in Default Report Summary.**

BEV-4310 **Employee Occupation (daily) shows 0's for the booked / consumed / reserved values in the employee occupation time.**
Employee Occupation (daily) shows 0's for the booked / consumed / reserved values in the employee occupation time. Problem: The timeslice was changed. Therefore the booking iteration repeated over empty time slices --> no data enclosed.

BEV-4314 **Leisure: Master Data and Administration**

- Masterdata: Order / Suppliers
- Import / Export completely Guest Import
- in GuestPanel: Subscription, Vouchers, Sales, Member
- Offer Panel:
  -- Medical
  -- Form Template
  -- Offer type (default wellness), because of Leisure --> can be hidden
  -- Default External Booking (because of leisure), when creating a new booking should also be hided.

BEV-4315 **Leisure: booking not marked accounted and price not correctly set**

Leisure price correctly set and accounted flag is now used in booking list

BEV-4317 **Profile Region not considered**

When the BV guest is updated from Opera over HTNG, the Opera Profile state province (BV region) is now considered.

BEV-4320 **Package Distribution fails with displaying reason.**

When a package distribution cannot be completed, because the date range cannot room the bookings, the reason was not displayed.
This has now been fixed.

BEV-4321 **Price does not get updated in V8 after reservation is set to consumed**

Leisure: Price wasn't updated in V8 after reservation was set to consumed. Furthermore the online reservation price was not shown.

BEV-4324 **Guest Details Report: Incremental date failure**

The listing did show the treatments within the same day and date. This has now been corrected.

BEV-4325 **Leisure BUG: New Online Booking guest can't be booked**

This happened due to new guests being "registered" in bellavita through login xml request. The new guest is logged in and then the bookings were not properly attached to the guest.

BEV-4326 **Online Booking: System Error when creating booking for new guest**

BEV-4327 **Suite8 Online booking remark did not appear on the booking in "Book a SPA"**

When accessing the offer list for a treatment category, the offer remark (online) was not visible.This is now visible, also as html tag. If html is enabled images can be added inline.

BEV-4328 **HTNG: posting error when itemizer id not unique**

HTNG: posting error when itemizer ID is not unique, because each itemizer counts as a separate grouping item for the sales itemizer summary, even when the itemizer code is the same.

BEV-4329 **HTNG Posting Error when tip included.**

Payment amount has been set to include the tip.
Check amount set to payment amount.

BEV-4330 **HTNG resort did not get set for an article sales.**

The resort now gets set.

BEV-4331 **Tip amount limited to tip article price**

The entered amount is now not limited the tip article price.

BEV-4332 **Invoice: room number not printed in Opera environment (opera guest profile),**

BEV-4333 **After package import, existing package booking from another guest are linked to that package**
Fixed sequences and linking PMS packages

BEV-4334 **Multiple Offer can't be added when Preparation Time > 0**

BEV-4335 **Posting blocked when guest not in sync with Opera guest**

The posting was blocked when the guest was not in sync with the Opera profile. Without synchronization the guest's profile had no information about current PMS reservation or their status. Therefore it was not possible to do any postings as they have been blocked by the application. This has been changed to a modified behaviour which looks for current PMS reservations alternatively in PMS. No configuration is needed.

BEV-4336 **For HTNG, PMS reservations may be created/updated upon guest search.**

If for some reason, the BV service or the Opera notification service is not running, then PMS reservations in BellaVita will not be synchronized with Opera and the corresponding Spa consumptions may not be chargeable.
To overcome this limitation, PMS reservations are synchronized as guests and are adopted from the guest search dialog.
Condition: In local.properties, the attribute "guestimport.enable" must be set to true.

BEV-4337 **HTNG posting fails with sales itemizer with different VAT rate**

If two positions with different vat rates were used, the posting failed.

BEV-4339 **Absences was not printed on the resource details report**

BEV-4340 **Bug: Oracle 7 driver transmits the user name and workstation name to oracle as session parameter {{v$session.osuser}}**
Oracle 7 driver transmits the user name and workstation name to oracle as session parameter v$session.osuser. Due to the columns limit VARCHAR(30) this ended up with a connection error.

BEV-4341 **Jasper Booking Confirmation now shows the correct Report Title**

First the print template "ReportTitle" definition is considered.
If not available, then the resource bundle definition is considered.

BEV-4348 **This happened only in an HTNG configuration and has now been fixed.**

Code entries for corix code class Country is filled up. Opening a guest panel took very long.

Cost Estimate

BEV-4297 **Enhanced Chargetype Journal with summary by cashier**

Enhanced Chargetype Journal with summary by cashier.
Further: turnover / journal can be filtered by cashier, Cashier Selection before printing.

Documentation

BEV-3896 **Open Source library licences listed in the info panel**

All used open source libraries (LGPL) should be listed in the info Panel.
The current list is probably not uptodate and should be updated and kept uptdated.

Improvement

BEV-3864 **Keystroke list for quick access of functions**

Keystroke list for quick access of functions. Keystroke in Bellavita are used for quick access to a function.

BEV-4319 **Reminder message for "unsecure" hotel guests**

For hotel guest not checked in or scheduled for departure today, a warning note is displayed on the bookings.

New Feature

BEV-4274 **Assign prefered employee to a guest for a certain treatment**

You can define the preferred employees on the Notes tab of the Guest profile. The employees are filtered accordingly when you create a new booking.

Task

BEV-4295 **Leisure Administration only allows the user to configure the leisure functionality.**

The Key Note and System Key Note are shown now under Notes node in Multi Language. The changes have been committed.

BEV-4299 **Package, Subscription, Voucher to be hidden in BellaVita Leisure.**

BEV-4300 **Posting set booking to accounted, and accounted should be visualized properly**

The settled flag on the booking list only shows the value of billed flag. It has been introduced for Leisure to take into count the accounted flag as well. If a booking is billed or accounted then the settled will be true on the UI.

BEV-4309 **OpenJMS on VM with two network adapters can't be bound to one of the adapter ip address**

BEV-4313 **Create and assign new role for v8leisure user**

New roles created for v8leisure user didn't have the Guest administration role. This has been fixed and is now also part of the deployment. If the user doesn't have the permission, creating new bookings will be impossible for that user.

BEV-4322 **Leisure should not show logo**

Suppress any logo on login logout panel.
