April 2016

Oracle Documaker 12.5.0

Release Notes

Oracle announces Oracle Documaker 12.5. This document introduces Documaker 12.5 and describes its new features and enhancements grouped into the following areas:

- *General Enhancements on page 3*

- *Documaker Standard Edition Enhancements on page 3*

- *Documaker Enterprise Edition Enhancements on page 5*

In addition, you will find information on:

- *Training on page 6*

- *Documentation on page 6*

- *Oracle Global Customer Support on page 7*

ABOUT ORACLE DOCUMAKER

Oracle Documaker is a Customer Communication Management (CCM) suite of products that enables organizations to dynamically create, manage, publish, and deliver adaptive enterprise content throughout the business life cycle across all locations and lines of business. It offers a cost-effective way to address the design, production, and multichannel delivery of a broad spectrum of documents from highly structured transactional documents delivered in high-volume batch to highly personalized interactive correspondence delivered on-demand. Oracle Documaker's rule-driven process transforms data into personalized and precise mission-critical enterprise customer communications. Oracle Documaker helps businesses improve customer service, get to market faster, reduce risk of improper communication, maximize effective customer contact, and reduce costs.

Visit us online at http://www.oracle.com/us/products/applications/documaker/overview/index.html for more information on how Documaker can improve your business operations.

Oracle Documaker provides...

- Robust design environment for tight integration between content, data and logic

- Conversion tools to preserve legacy investments

- A Web-based solution enabling interactive and on-demand communications

- Multi-channel delivery and output supports E-mail, Fax, HTML, PDF, RTF, SMS, and 7 other named print stream outputs. Additionally, Oracle Documaker Mobile provides support for content generation and delivery to mobile devices

- Templates so you can generate documents quickly and consistently

- Lightweight, cost-efficient and service-centric approach to make it easy to use

- Integration within enterprise infrastructure to promote straight through processing (quote, rate, bind and issue)

- Enhanced Language Support including Documaker's international language support for producing output in any language and product interfaces in Chinese (simplified), Dutch, English, French, German, Indonesian, Japanese, Polish, Portuguese, Spanish, and Russian.

- Documaker Mobile which enables the existing content from Documaker to be formatted as Responsive HTML5 and in other UTF-8 based text formats such as or Comma Separated Values (CSV), JSON, eXtensible Markup Language (XML), XHTML, etc. enabling user defined data schemas to define the nomenclature.

GENERAL ENHANCEMENTS

Language Support for Oracle Documaker

Starting in 12.5, Russian language is supported. This extends the existing list of languages which include; Chinese (simplified), Dutch, English, French, German, Japanese, Portuguese, and Spanish.

See Documaker Enterprise Installation Guide for details.

New DAL functions

Starting in 12.5, Documaker introduces two new DAL functions - InsertListItem and RemoveListItem.

See the DAL Reference Help for details.

AcroForm Fillable PDF Support

Starting in 12.5, Documaker extends support for fillable PDF forms with Acrobat Forms (AcroForm) or PDF Interactive form type for Documaker Standard as well as Enterprise Edition.

See the '*Using the PDF Print Driver*' topic in the Output Management Guide for details.

See '*PrtType: PDF setting*' topic in **Documaker Studio Help** for details.

DOCUMAKER STANDARD EDITION ENHANCEMENTS

Email Body Support with Different Content for Attachment

Starting in 12.5, Documaker introduces support for generating emails with bodies designed as forms in Studio and separate, different content attachments to the email that are also sourced from forms designed in Studio.

See the '*Using the EPT Print Driver*' topic in the Output Management Guide for details.

See the '*Creating a Form*' topic in the Documaker Studio User Guide for details.

See the '*Form Options*' topic in **Documaker Studio Help** for details.

JDBC Connection Support

Documaker Standard Edition has been extended to include the Java Database Connectivity (JDBC) database handler.

See the *'Creating a New Workspace'* topic in the Documaker Studio User Guide for details.

See the *'DBHandler:JDBC'* topic in **Documaker Studio Help** for details.

See the *'JDBC Handler'* topic in DAL Reference Help for details.

Table Row and Column Merge Support

Starting in 12.5, Documaker Studio includes the ability to merge table columns and rows. Merged table cells are supported when converting an RTF or Word Doc file containing a table with merged cells.

See the 'Merging Table Cells' topic in the Documaker Studio User Guide and **Documaker Studio Help** for details.

Modernized Paragraph Selection Dialog

Starting in 12.5, Documaker has an updated Paragraph Selection dialog that provides better paragraph selection and preview methods. The most significant change in this feature is the way a user selects paragraphs.

See the *'Assembling Paragraphs'* topic in the Documaker Desktop User Guide for details.

See the *'Paragraph Assembly'* topic in the **WipEdit Help** and **DMEntry Help** for details.

Quick Response Code (QR) Barcode

Starting in 12.5, Documaker enables customers to generate the quick response (QR) Barcode. The QR barcode is the type of matrix barcode which has machine-readable optical label that contains information about the item to which it is attached. A QR code uses four standardized encoding modes (numeric, alphanumeric, byte/binary, and kanji) to efficiently store data; extensions may also be used.

See the *'QR Barcode'* section in the Documaker Studio User Guide and **Documaker Studio Help** for details.

Comparison Tool

Starting in 12.5, Documaker introduces a comparison tool in Documaker Studio that will help a user compare two resources to determine where the differences occur.

See the **Documaker Compare Help** for details.

See the '*Working with Libraries'* topic in the Documaker Studio User Guide for details.

DocuSign Signature Integration

Starting in 12.5, Oracle Documaker Enterprise Edition can be configured to send publications to DocuSign to initiate a signing workflow. This capability adds support for the form designer to add a DocuSign signature block to a document template in Studio, allowing the PDF output from ODEE to capture the needed signature details at runtime.

See *'Inserting Signature'* topic in the Documaker Studio User Guide for details.

See the '*Integrating with DocuSign*' topic in the Documaker Enterprise Administrator Guide for more details.

Signature Objects Support in Documaker Add-In for Word

Starting in 12.5, Documaker introduces support for Signature type object with the options of AssureSign Signature Block, DocuSign Signature Block, PDF Placeholder and Silanis Signature Block.

See the Documaker Add-In for Word Help for details.

Pantone Spot Color

Starting in 12.5, 84 new colors were added to the list of list of Spot colors in Studio's Business Definition Manager.

See the '*Using Spot Colors*' section in the Documaker Studio User Guide for information on PANTONE® spot colors.

DOCUMAKER ENTERPRISE EDITION ENHANCEMENTS

The following changes affect Oracle Documaker Enterprise Edition (ODEE). This includes changes to Document Factory and the Administrator, Dashboard, and Interactive web applications.

Enhanced Performance

This feature enhances Oracle Documaker Enterprise Edition (ODEE) performance by improving the throughput of the system and reducing the amount of wall clock time required to produce a batch. The Supervisor and Worker communication pattern has been modified to reduce messages and eliminate latency.

See the '*Using the Scheduler*' section in the Documaker Enterprise Administrator Guide for more details.

SQL Server 2012 Support

Starting in 12.5, support for SQL Server 2012 Service Pack 2 database in ODEE administration and assembly line schemas has been added. This support is in addition to existing support for database types Oracle and DB2 on z/OS.

See the Documaker Enterprise Installation Guide for details.

See the System Requirement Guide for details.

WebCenter Rebranding

Oracle Universal Content Management (UCM) was renamed to Oracle WebCenter Content. The following documents have been updated to reflect ths name change:

See Documaker Enterprise Installation Guide for details.

See Documaker Enterprise Administrator Guide for details.

See Documaker Interactive Correspondence Help for details.

Integrating EmailDestination with ODEE

Starting in 12.5, Documaker introduces generic EmailDestination integrated with the Oracle Documaker Enterprise Edition application.

See Documaker Enterprise Administrator Guide for details.

Best Practices for Accessible PDF

12.5 introduces the Accessibility guide. This guide contains information on topics such as accessible PDFs and keyboard navigation.

See Accessibility Guide for details.

TRAINING

To receive the full benefits of the new product features included in this and earlier releases, Oracle University offers a comprehensive range of training classes. For a list of courses, including fees and availability, please call 1.800.529.0165.

Oracle also provides a set of self-based tutorials available for immediate download on OTN at http://www.oracle.com/technetwork/documentation/insurance-097481.html#Documaker.

DOCUMENTATION

For system requirements and installation instructions, please refer to the appropriate guide:

- Documaker Connector Installation Guide
- Documaker Desktop Installation Guide
- Docupresentment Installation Guide
- Documaker Enterprise Installation Guide
- Documaker Installation Guide
- Documaker System Requirements

You can find the latest versions of these guides as well as additional manuals, tutorials and samples on the Oracle Technology Network web site, on the Oracle Documentation page:

http://www.oracle.com/technetwork/documentation/insurance-097481.html

Check Oracle's Software Delivery Cloud for platform availability:

http://edelivery.oracle.com

We would like to hear your comments on any documentation suggestions you have. To send us your comments, click here or use the feedback links in the various guides. If your feedback is not documentation-related, or you have questions about the installation or use of our products, please visit the My Oracle Support web site. For more information, see *Oracle Global Customer Support* on page 7.

You can use your favorite search engine to find topics in the Documaker documentation set on OTN. For instance, to find information on the Documaker Add-In for Microsoft Word, you could enter the following:

Oracle Documaker + Documaker Add-In

Or, for information about Documaker's MET2FAP utility, you could enter:

Oracle Documaker + MET2FAP

ORACLE GLOBAL CUSTOMER SUPPORT

If you have any questions about the installation or use of our products, please call +1.800.223.1711 or visit the My Oracle Support web site:

http://www.oracle.com/us/support/contact/index.html. Go to My Oracle Support to find answers in the Oracle Support Knowledge Base, submit, update or review your Service Requests, engage the My Oracle Support Community, download software updates, and tap into Oracle proactive support tools and best practices.

Hearing impaired customers in the U.S. who need to speak with an Oracle Support representative may use a telecommunications relay service (TRS); information about TRS is available at http://www.fcc.gov/cgb/consumerfacts/trs.html, and a list of phone numbers is available at http://www.fcc.gov/cgb/dro/trsphonebk.html. International hearing impaired customers should use the TRS at 1.605.224.1837.
