1. Preface

1.1 Introduction

This user guide deals with the Oracle FLEXCUBE Business Activity Monitor. The BAM facilitates reporting of the status of transactions within a specific period. The maintenances required for the proper functioning of BAM system and the processing related to it are covered in this manual.

1.2 <u>Audience</u>

This manual is intended for the following User/User Roles:

Role	Function
Back office data entry Clerks	Input functions for maintenance related to the interface
Back office Managers/Officers	Authorization functions

1.3 **Documentation Accessibility**

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

1.4 <u>Abbreviations</u>

Abbreviation	Description
System	Unless specified, it shall always refer to Oracle FLEXCUBE
BAM	Business Activity Monitor

1.5 Organization

This manual is organized into the following chapters:

Chapter	Description
Chapter 1	<i>Preface</i> gives information on the intended audience. It also lists the various chapters covered in this User Manual.
Chapter 2	<i>Business Activity Monitor</i> gives information on the duration flow of the transactions

1.6 <u>Related Documents</u>

You may refer the following manuals for more information:

1.7 Glossary of Icons

This User Manual may refer to all or some of the following icons:

lcons	Function
×	Exit
+	Add row
	Delete row
> E	Option List

Refer the Procedures User Manual for further details about the icons.

2. Business Activity Monitor

The BAM system collects the data stored in Oracle FLEXCUBE and generates reports.

You can use the BAM system for monitoring your business activity closely. With the reports generated using BAM, you can have a vivid view of the problems in the business environment and identify the areas that require attention. You can also analyse the new business opportunities and trends that help you enhance your businesses.

The key features of BAM reporting are as follows:

- Monitoring the key performances and displaying them on the dashboard.
- Analysing the duration flow of the transactions.

This chapter contains the following section:

• Section 2.1, "Report Generation"

2.1 Report Generation

You can generate the reports on the transaction duration from the Oracle BAM.

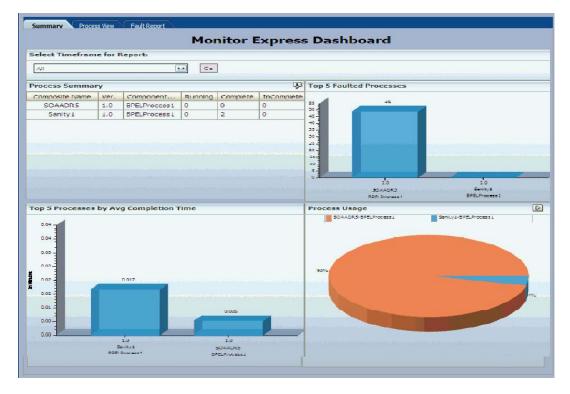

This section contains the following topics:

- Section 2.1.1, "Generating Monitor Express Report"
- Section 2.1.2, "Viewing Process Overview Report"
- Section 2.1.3, "Viewing Time Wise Manager Report"
- Section 2.1.4, "Viewing Manager Report Application Count Wise"
- Section 2.1.5, "Viewing User Performance Report"
- Section 2.1.6, "Viewing User Specific Details"

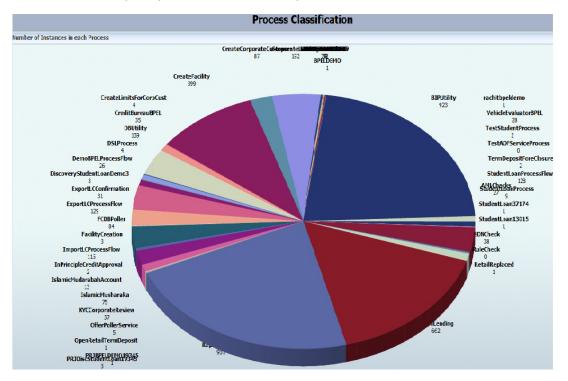

2.1.1 Generating Monitor Express Report

You can view the key performance indicators like average interval time, number of faulted instances of all the processes in the Monitor Express Report.

2.1.2 <u>Viewing Process Overview Report</u>

You can view multiple reports in the overview report.

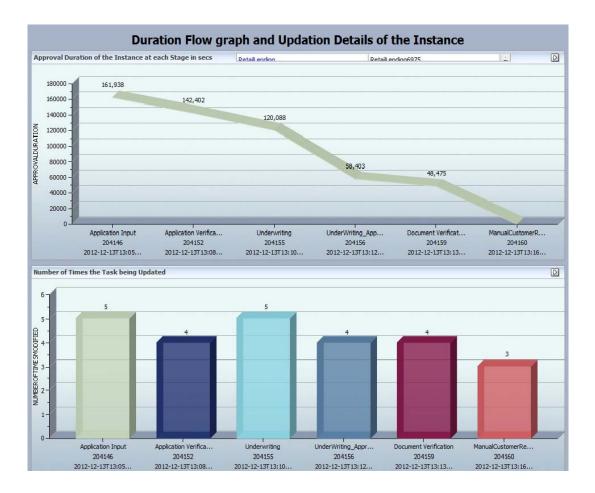

You can invoke the report with the list of instances in a process with its state and status by clicking on the specific process.
