

Oracle® Communications IP Service Activator

Release Notes

Release 7.3.4

E75630-01

June 2016

This document provides release notes for Oracle Communications IP Service Activator release 7.3.4 and includes the following:

- [New Features](#)
- [Fixes in This Release](#)
- [Known Problems](#)
- [Deprecated and Removed Features](#)

New Features

The new features in this release of IP Service Activator are:

- [Programmatic Intent-Based Network REST API](#)
- [MEF Network Resource Provisioning API Reference Implementation](#)
- [VRF Format Upgrade Option for Cisco Devices](#)

Programmatic Intent-Based Network REST API

IP Service Activator release 7.3.4 introduces support for the programmatic intent-based network Representational State Transfer (REST) API, which allows service providers and system integrators to define API calls with a higher level of granularity. This interface simplifies the logic required in upstream systems to provision complex services.

The IP Service Activator REST web service allows you to create and use custom Groovy scripts that use common REST methods. See the new *IP Service Activator API Developer's Guide* for information about the REST API and using the Groovy scripting language.

MEF Network Resource Provisioning API Reference Implementation

IP Service Activator is now delivered with a MEF Service Provisioning API Reference Implementation, which you can use for provisioning EVC Segments over an MPLS Flow Domain (as a VPLS), in support of any MEF service types, such as E-Line, E-LAN, E-Tree, E-Access, and so on.

VRF Format Upgrade Option for Cisco Devices

On Cisco devices, you can now upgrade the VRF format from IP VRF to VRF definition for either all VRFs on a device, or for selected customers and VPNs. This enables you to upgrade the VRF format on devices by using a single step.

Fixes in This Release

IP Service Activator 7.3.4 includes all fixes up to and including release 7.2.0.8.2. For more information, see *IP Service Activator Release Notes 7.2*.

Known Problems

There are no known problems in this release of IP Service Activator.

Deprecated and Removed Features

The *IP Service Activator OSS Java Development Library Guide* has been removed from the documentation set as of this release of IP Service Activator documentation. This content is now available in the new *IP Service Activator API Developer's Guide*.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.
