December 2016

Copyright © 2016, Oracle and/or its affiliates. All rights reserved.

Primary Author: Bernadette Goodman

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

#### **Value-Added Reseller (VAR) Language**

##### **Oracle Retail VAR Applications**

The following restrictions and provisions only apply to the programs referred to in this section and licensed to you. You acknowledge that the programs may contain third party software (VAR applications) licensed to Oracle. Depending upon your product and its version number, the VAR applications may include:

- (i) the **MicroStrategy** Components developed and licensed by MicroStrategy Services Corporation (MicroStrategy) of McLean, Virginia to Oracle and imbedded in the MicroStrategy for Oracle Retail Data Warehouse and MicroStrategy for Oracle Retail Planning & Optimization applications.
- (ii) the **Wavelink** component developed and licensed by Wavelink Corporation (Wavelink) of Kirkland, Washington, to Oracle and imbedded in Oracle Retail Mobile Store Inventory Management.
- (iii) the software component known as **Access Via**<sup>™</sup> licensed by Access Via of Seattle, Washington, and imbedded in Oracle Retail Signs and Oracle Retail Labels and Tags.
- (iv) the software component known as **Adobe Flex**<sup>™</sup> licensed by Adobe Systems Incorporated of San Jose, California, and imbedded in Oracle Retail Promotion Planning & Optimization application.

You acknowledge and confirm that Oracle grants you use of only the object code of the VAR Applications. Oracle will not deliver source code to the VAR Applications to you. Notwithstanding any other term or condition of the agreement and this ordering document, you shall not cause or permit alteration of any VAR Applications. For purposes of this section, "alteration" refers to all alterations, translations, upgrades, enhancements, customizations or modifications of all or any portion of the VAR Applications including all reconfigurations, reassembly or reverse assembly, re-engineering or reverse engineering and recompilations or reverse compilations of the VAR Applications or any derivatives of the VAR Applications. You acknowledge that it shall be a breach of the agreement to utilize the relationship, and/or confidential information of the VAR Applications for purposes of competitive discovery.

The VAR Applications contain trade secrets of Oracle and Oracle's licensors and Customer shall not attempt, cause, or permit the alteration, decompilation, reverse engineering, disassembly or other reduction of the VAR Applications to a human perceivable form. Oracle reserves the right to replace, with functional equivalent software, any of the VAR Applications in future releases of the applicable program.

## Send Us Your Comments

Oracle Retail Merchandise Financial Planning Retail Cloud Service User Guide,  
Release 16.0

Oracle welcomes customers' comments and suggestions on the quality and usefulness of this document.

Your feedback is important, and helps us to best meet your needs as a user of our products. For example:

- Are the implementation steps correct and complete?
- Did you understand the context of the procedures?
- Did you find any errors in the information?
- Does the structure of the information help you with your tasks?
- Do you need different information or graphics? If so, where, and in what format?
- Are the examples correct? Do you need more examples?

If you find any errors or have any other suggestions for improvement, then please tell us your name, the name of the company who has licensed our products, the title and part number of the documentation and the chapter, section, and page number (if available).

---

---

**Note:** Before sending us your comments, you might like to check that you have the latest version of the document and if any concerns are already addressed. To do this, access the Online Documentation available on the Oracle Technology Network web site. It contains the most current Documentation Library plus all documents revised or released recently.

---

---

Send your comments to us using the electronic mail address: [retail-doc\\_us@oracle.com](mailto:retail-doc_us@oracle.com)

Please give your name, address, electronic mail address, and telephone number (optional).

If you need assistance with Oracle software, then please contact your support representative or Oracle Support Services.

If you require training or instruction in using Oracle software, then please contact your Oracle local office and inquire about our Oracle University offerings. A list of Oracle offices is available on our web site at <http://www.oracle.com>.

---

---

# Preface

This document describes the Oracle Retail Merchandise Financial Planning Cloud Service user interface. It provides step-by-step instructions to complete most tasks that can be performed through the user interface.

## Audience

This document is for users and administrators of Oracle Retail Merchandise Financial Planning Cloud Service. This includes merchandisers, buyers, business analysts, and administrative personnel.

## Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

### Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

## Related Documents

For more information, see the following documents in the Oracle Retail Merchandise Financial Planning Cloud Service Release 16.0 documentation set:

- *Oracle Retail Merchandise Financial Planning Cloud Service Administration Guide*
- *Oracle Retail Merchandise Financial Planning Cloud Service Implementation Guide*
- *Oracle Retail Merchandise Financial Planning Cloud Service Release Notes*
- *Oracle Retail Merchandise Financial Planning Cost Cloud Service User Guide*
- Oracle Retail Predictive Application Server documentation

For more information about the Fashion Planning Bundle applications, see the following documentation sets:

- Oracle Retail Assortment Planning documentation
- Oracle Retail Item Planning documentation
- Oracle Retail Item Planning Configured for COE documentation
- Oracle Retail Size Profile Optimization documentation

For more information about the RPAS Fusion Client, see the documents in the Oracle Retail Predictive Application Server Release 15.0 documentation set.

## Improved Process for Oracle Retail Documentation Corrections

To more quickly address critical corrections to Oracle Retail documentation content, Oracle Retail documentation may be republished whenever a critical correction is needed. For critical corrections, the republication of an Oracle Retail document may at times not be attached to a numbered software release; instead, the Oracle Retail document will simply be replaced on the Oracle Technology Network Web site, or, in the case of Data Models, to the applicable My Oracle Support Documentation container where they reside.

Oracle Retail documentation is available on the Oracle Technology Network at the following URL:

<http://www.oracle.com/technetwork/documentation/oracle-retail-100266.html>

An updated version of the applicable Oracle Retail document is indicated by Oracle part number, as well as print date (month and year). An updated version uses the same part number, with a higher-numbered suffix. For example, part number E123456-02 is an updated version of a document with part number E123456-01.

If a more recent version of a document is available, that version supersedes all previous versions.

## Oracle Retail Documentation on the Oracle Technology Network

Oracle Retail product documentation is available on the following web site:

<http://www.oracle.com/technetwork/documentation/oracle-retail-100266.html>

(Data Model documents are not available through Oracle Technology Network. You can obtain them through My Oracle Support.)

# Conventions

The following text conventions are used in this document:

<b>Convention</b>	<b>Meaning</b>
<b>boldface</b>	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

---

---

# Introduction

Oracle Retail Merchandise Financial Planning Cloud Service (MFP Cloud Service) provides flexible and easy-to-use financial planning solution templates that enable retailers to create high-level strategic and low-level detailed financial plans. The solution guides users through best-practice planning processes in an efficient, streamlined manner while providing top-down, middle-out, and bottom-up functionality for developing, reconciling, and approving plans.

---

---

**Note:** There are two versions of MFP Cloud Service: MFP Retail Cloud Service and MFP Cost Cloud Service. This guide describes MFP Retail Cloud Service.

For information about MFP Cost Cloud Service, see the *Oracle Retail Merchandise Financial Planning Cost Cloud Service User Guide*.

---

---

MFP Cloud Service provides both pre-season and in-season planning with key financial indicators that include sales, markdowns, receipts, inventory, gross margin, and open-to-buy. MFP Cloud Service users can bring many plans together for quick and easy reconciliation and approval through consistent, disciplined processes. Furthermore, MFP Cloud Service can be used to plan for multiple retail channels including Brick & Mortar, Direct, and Wholesale/Franchise. Additionally, it includes support for location planning and reconciliation with Merch plans.

MFP Cloud Service enables users to perform the following tasks:

- Create a financial plan in a structured way
- Set and pass targets
- Reconcile a plan
- Submit and approve a plan
- Monitor a plan
- Maintain a plan
- Re-plan

## Merch Planning Process

The Merch planning process can be separated into two sub-processes: pre-season and in-season planning. Creating the merchandise financial plan occurs during pre-season planning. Managing and updating the merchandise financial plan occurs during in-season planning. Pre-season planning focuses on creating the Original Plan (Op) against which to benchmark in-season progress. In the pre-season process, the plan is

initialized by seeding from Last Year (Ly) or from a forecast. This seeding gives users a curve of demand against which to spread a new plan. Users then plan sales, receipts inventory, turn, and gross margin measures.

There are two types of users in MFP Cloud Service:

- Merch Targets. These users are usually planning directors or managers. This is a combination of traditional top down and Merch Targets roles. They create the overall targets for the Merch Plan.
- Merch Plan. These roles are usually merchandise planners. They create Op and Cp plans for approval by the Merch Targets role.

The targets are published by superior levels to the subsequent level: Merch Targets passes to Merch Plan. The Merch Plan then submits the Op, Cp, or both to the Merch Targets role for approval. The Op and Cp plans are not created until they are approved by the Merch Targets role.

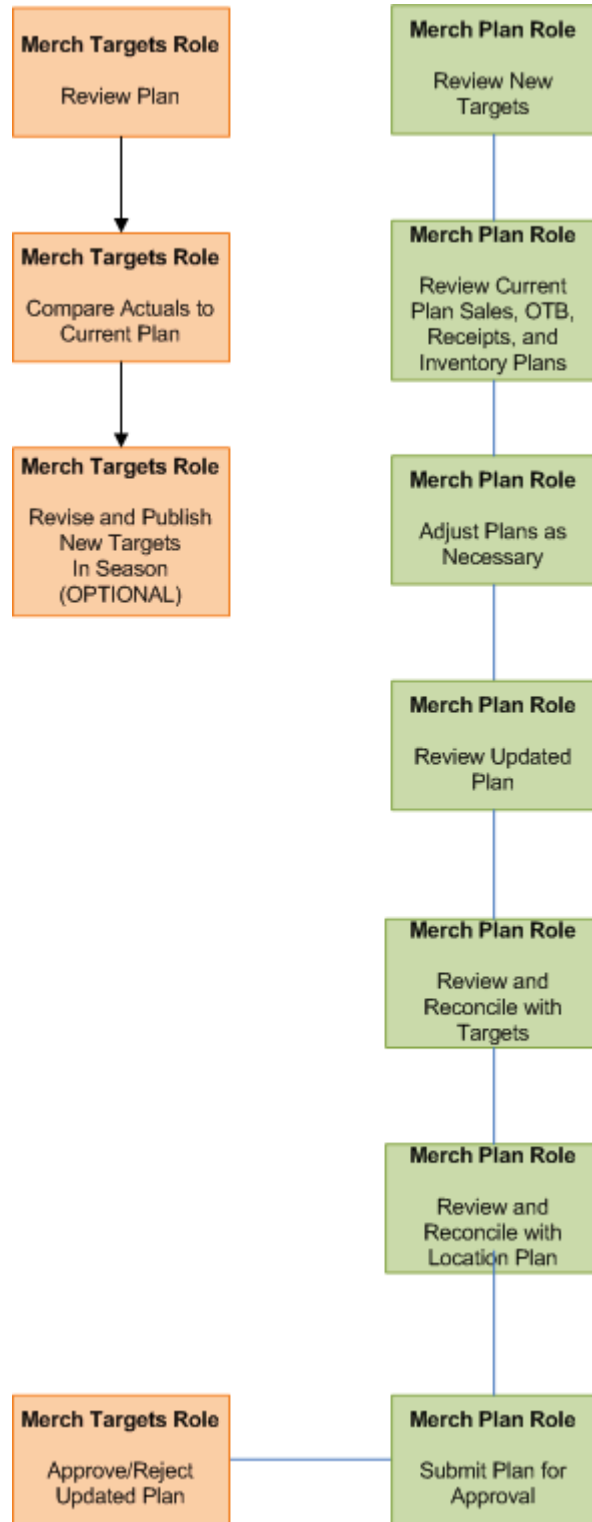

This process is shown in [Figure 1-1](#) and [Figure 1-2](#).

**Figure 1-1 Create Merchandise Financial Targets and Plan Process**

After the planning period has begun, the process of in-season planning begins. The objective of in-season planning is to identify opportunity and risk for the Op.

**Figure 1-2 Manage/Update Merchandise Financial Plan Process**

## Location Planning Process

The Location Planning (LP) process is also separated into two sub-processes: pre-season and in-season planning. Creating the location plan occurs during pre-season planning. Managing and updating the location plan occurs during in-season planning. Pre-season planning focuses on creating the Original Plan (Op) against which to benchmark in-season progress. In the pre-season process, the plan is initialized by seeding from Last Year (Ly) or from a forecast. This seeding gives users a curve of demand against which to spread their new plan. Users then plan sales, receipts, inventory, turn, and gross profit measures.

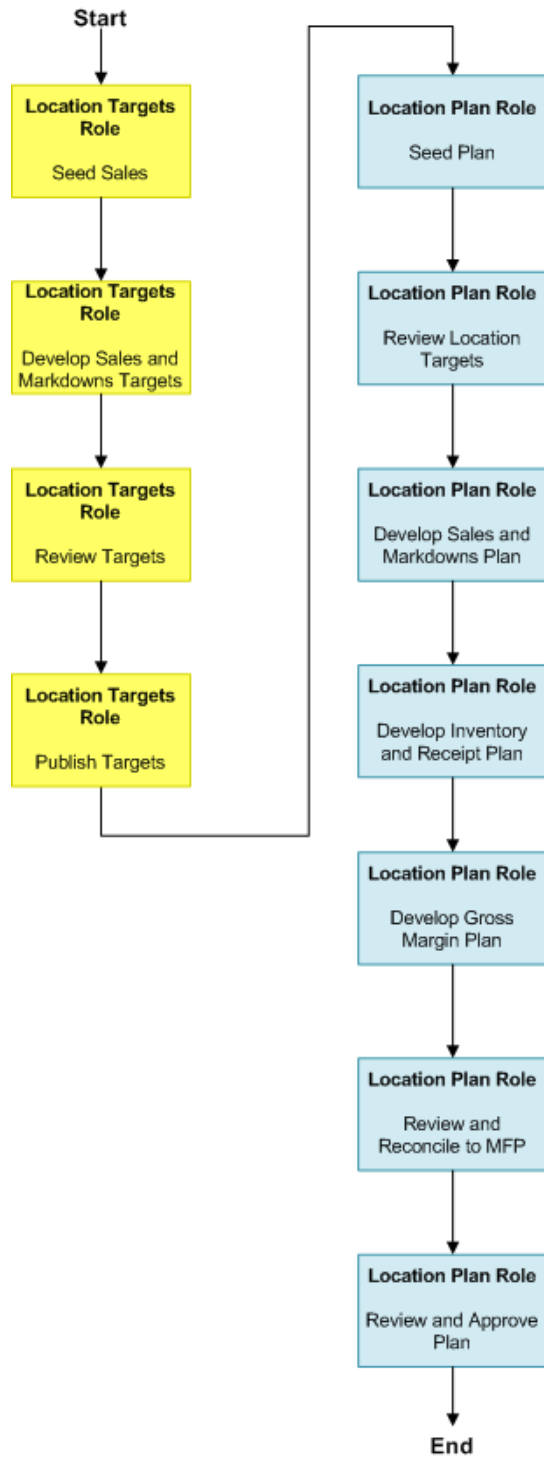

There are two types of users in LP:

- **Location Targets.** These roles may be location planning managers or location planners, meaning that the location targets and plan may be created by the same user. They create a version of LY Sales/Markdowns that is corrected for non-repeating events such as store closures due to bad weather, construction, and so on. These are passed down as targets to the location planner.
- **Location Plan.** These roles are usually location planners. They create Op and Cp plans. They plan total sales, markdowns, and so on through the use of average store metrics, using a number of user defined hierarchies with location attributes (such as comp, volume, size, climate, and demographics).

The targets are published by superior levels to the subsequent levels: top location targets pass targets to the location plan. The location plan self-approves the Op, Cp, or both. The Op and Cp plans are not created until they are approved.

This process is shown in [Figure 1-3](#) and [Figure 1-4](#).

Figure 1-3 Create Location Targets and Plan Process

**Figure 1–4 Manage/Update Location Plan Process**

## Target and Plan Alignment

Merch Targets and Merch Plans align with one another. Location Targets and Location Plans align with one another through seeding the plan with the Target. Merch and Location Plans align with one another.

## Role Planning Overview

The Merch planning process involves multiple user roles. These user roles work together to pass targets and reconcile plans at different levels of the product, location, and calendar dimensions. The process of using multiple roles divides the planning process into logical sections that provide oversight to the plan creation at multiple levels.

The targets user passes targets to the Merch Targets user, both for Merchandise Financial Planning and Location Planning. The approved plans can be made visible to an item planner using a separate product, Oracle Retail Item Planning.

## Planning Roles

Planning roles serve the following purposes:

- They identify the organizational level at which planning occurs.
- They set the product level at which that role will plan.
- They set the time period at which that role will plan.

Each role is part of a bottom-up or a top-down process (see [Table 1–1](#)). The role's base intersection defines the lowest level of product to which that role has access when building a plan. The planning role defines the range of planning responsibilities and also controls the measures shown in planning views and those measures' accessibility.

While the planning roles can be customized during implementation, a standard set of planning roles is supplied with MFP Cloud Service:

- Merch Targets

- Merch Plan
- Location Targets
- Location Plan

The range of planning and the role relationships for these roles are listed in [Table 1–1](#).

**Table 1–1 Range of Planning and Role Relationships**

<b>Role</b>	<b>Base Intersection</b>	<b>Range of Planning</b>	<b>Lowest-Level Time Period</b>
Merch Targets	Department/Week/Channel	Company - Department	Week
Merch Plan	Subclass/Week/ Channel	Department - Subclass	Week
Location Targets	Company/Week/Location	Channel-Location	Week
Location Plan	Department/Week/Location	Channel-Location	Week

## Merchandise Financial Planning Components and Key Processes

The key components and features of MFP Cloud Service provide the basis for standard processes and activities that are necessary for planners to perform their planning functions.

Key components include:

- **Workbooks**

The primary element used in building a plan. A planner uses a workbook to build and maintain plans throughout the season.
- **Views**

Contained within workbooks. The views contain pre-defined lists of measures and are arranged to reflect a step in the standard planning process, allowing a user to work in a logical path to build a plan.
- **View Data**

Used to save, commit, and edit plan data.
- **Planning Roles**

Each MFP Cloud Service user is assigned to a specific role. These roles control the application functions that are available and the level of aggregation in the product dimension for that user. They play an integral part in how plans are created.
- **Plan Versions**

MFP Cloud Service functionally provides the capability to have more than one version of the plan. This allows users to track actual data against the original plan, re-plan the current season, and save to a new plan.
- **Plan Reconciliation and Approvals**

Plan reconciliation is a process of combining lower level plans and comparing them to a higher level target. Plan approval is a built-in application process that allows a Merch Plan role to submit a plan for approval to the Merch Targets role, who can approve or reject it.

## Workbooks

An MFP Cloud Service user accomplishes multiple planning tasks using workbooks. A workbook is a user-defined data subset (of a master database) that includes selected dimensions levels. These workbooks consist of views and graphical charts used for planning, viewing, and analyzing business measures. Workbooks organize related planning information and divide levels of user responsibility. This framework allows a user to easily view, create, modify, and store datasets that are common to repeated tasks.

A workbook structure consists of the following elements:

- Product levels and members such as Department, Class, and Sub-Class for the Men's Sweater Department.
- Calendar levels and members such as Season, Month, and Week for the Spring 2020 Season.
- Location levels and members may reflect multiple channels within an organization at their aggregate level, such as total Brick and Mortar divisions, Catalog, or e-Commerce.
- Plan versions such as Working Plan (Wp), Original Plan (Op), Current Plan (Cp), and Last Year (Ly).
- Measures and corresponding business rules such as Sales, Receipts, and Inventory.

Workbooks can be built automatically, through a batch process, or manually using the Planning Workbook wizard. Each workbook contains the planning views, measures, and business rules needed for a complete plan.

Data in a workbook can be displayed using both multidimensional spreadsheets and charts. The data can be viewed at a detailed level or at an aggregate level.

## Views

Planning views are multidimensional pivot tables that provide users with views of the data contained in a workbook. Oracle Retail Predictive Planning comes with a series of built-in views that support an industry-standard business process. Each view can contain its own unique product, calendar, location, and metric information. This approach enables users across an organization to use a standard planning process.

Views can be customized for each user. Rotating, pivoting, and formatting functions allow a user to create individual views within a view. Each user can also display the data in a graphical format by using the charting functionality.

### Editing View Data

Users edit and enter data in the views. The solution's business rules are implemented throughout the views to ensure consistent edit behavior regardless of where (on which view) the edit is performed.

### Measure Aggregation and Spreading

Users may edit data at many levels of each dimension (product, location, calendar). If the data is modified at an aggregate level (a level with one or more lower levels beneath it), the modifications are distributed to the lower levels within the hierarchy. This function is called *spreading*. If data is modified at a level that has a higher level above it (parent), the data changes are reflected in those higher levels. This is known as *aggregation*.

Each measure that is used in the MFP Cloud Service solution is assigned a default aggregation and spreading behavior. A measure's aggregation method controls how data is calculated at aggregate levels of the dimension, such as month or department. A measure's spread method controls how data is spread to lower levels of a dimension when the user enters data at an aggregate level. [Table 1–2](#) provides a list of relevant aggregation and spread methods that are used in MFP Retail Cloud Service.

### Aggregation Methods

[Table 1–2](#) displays aggregation methods, their results, and their types of measures.

**Table 1–2 Aggregation Methods**

Aggregation (Agg) Methods	Result	Types of Measures
Total	Values are summed up the hierarchy dimensions.	Value or unit measures such as sales and receipts.
Recalc	Value is recalculated at aggregate levels based on its rule calculation.	Percentage measures such as Gross Margin%. Also other calculated measures such as TO and Forward Cover.
PST - Period Start Total	Value is summed up non-calendar dimensions. Value at aggregate time equals the same value as the first child period's value belonging to the aggregate parent.	Beginning of Period Inventory (BOP).
PET - Period End Total	Value is summed up non-calendar dimensions. Value at aggregate time equals the same value as the last child period's value belonging to the aggregate parent.	End of Period Inventory (EOP).
AMBG	All values within and across hierarchies are equal; otherwise a ? is displayed at aggregate levels.	Used by informational text measures, such as <b>Event Information</b> or pick list <b>Approve/Reject</b> .
B_AND	For Boolean types only referring to situations that are either <b>true</b> or <b>false</b> . Value is <b>on</b> or <b>true</b> at an aggregate level if all values within a hierarchy level are <b>on</b> .	Boolean (check box) <b>Submit</b> .

### Spread Methods

[Table 1–3](#) displays spread methods, their results, and their types of measures.

**Table 1–3 Spread Methods**

Spread Methods	Result	Types of Measures
Proportional	Typically used in conjunction with Total Agg type. Value is spread proportionally to the child levels when a value is entered at an aggregate level.	Value or unit measures such as sales and receipts.

**Table 1–3 (Cont.) Spread Methods**

<b>Spread Methods</b>	<b>Result</b>	<b>Types of Measures</b>
None	The result of the edit is passed to another measure. The spread method for the measure that inherits the edit is used to spread the new value to the child levels. For example, an edit to Wp Sales var Ly R% at an aggregate level (Month) results first in the Sales R value being recalculated at the Month level, reflecting the edited percent increase over Ly Sales R. Then the new Sales R value is spread to the week level proportionally. Finally, the Wp Sales var to Ly R% is recalculated at the week level.	Variance measures such as Wp Sales var to Ly R%, Wp Mkd var to Op R%.
PS (Period Start)	For edits at an aggregate level, the edited value is placed into the first logical child level beneath the level of the edit. For example, an edit to BOP Inv at the Month level spreads the edited BOP Inv value to the first week reporting to the Month.	NA
PE (Period End)	For edits at an aggregate level, the edited value is placed into the last logical child level beneath the level of the edit. For example, an edit to EOP Inv at the Month level spreads the edited EOP Inv value to the last week reporting to the Month.	Typically used in conjunction with EOP Inv, Avg Inv.

### Overriding Default Spread Methods

A measure's default spread method can be overridden on a data entry by using the override spread method function. The default spread method is overridden for that specific data edit and is not permanently changed. To use an alternate spread method, enter a number in a data cell at an aggregate level followed by an **r**, **e**, **p**, or **d**. This applies the replicate, even, proportional, or delta distribution function to spread that number to the lowest level.

---

**Note:** Save information in the workbook before trying these features. If the results are not satisfactory, use the **Edit - Revert** command to undo the changes. The Revert command resets the workbook back to its state after the last save was issued.

---

### Explanation of Spread Types

This section describes the following spread types.

- Replicate
- Even
- Proportional
- Delta

For each of the spread types, assume the following dimensions and values.

**Table 1–4 Example for Spread Types**

	<b>February</b>	<b>Week1</b>	<b>Week2</b>	<b>Week3</b>	<b>Week4</b>
Department1	570	155	170	100	145

**Table 1–4 (Cont.) Example for Spread Types**

	February	Week1	Week2	Week3	Week4
Class1	120	20	20	40	40
Class2	100	25	25	25	25
Class3	200	100	50	20	30
Class4	150	10	75	15	50

### Replicate

Replicate copies the entered value to all cells below the aggregate dimension. This method can be used for measures that have an aggregation method of Total or Recalc.

If a value is entered at more than one aggregate dimension (such as aggregate product and time), then the value is copied to all lower-level base cells below the aggregate time and product.

**Example:** Enter 50r for Feb/Department1. The values at every intersection of week and class belonging to Feb/Department1 are changed to 50. The aggregate total is then recalculated as the sum of the lower-level cells, 800. See [Table 1–5](#) for the results.

**Table 1–5 Example for Replicate Method**

	February	Week1	Week2	Week3	Week4
Department1	800	200	200	200	200
Class1	200	50	50	50	50
Class2	200	50	50	50	50
Class3	200	50	50	50	50
Class4	200	50	50	50	50

### Even

Even divides the entered value evenly to all cells below the aggregate dimension. This method can be used for measures that have an aggregation method of Total or Recalc.

If a value is entered at more than one aggregate dimension (such as aggregate product and time), then the value is copied to all lower-level base cells below the aggregate time and product.

**Example:** Enter 600e for Feb/Department1. The value at every intersection of week and class belonging to Feb/Department1 changes to 37.5. The aggregate total is then recalculated as the sum of the lower-level cells, 600. See [Table 1–6](#) for the results.

**Table 1–6 Example for Even Method**

	February	Week1	Week2	Week3	Week4
Department1	600	150	150	150	150
Class1	150	37.5	37.5	37.5	37.5
Class2	150	37.5	37.5	37.5	37.5
Class3	150	37.5	37.5	37.5	37.5
Class4	150	37.5	37.5	37.5	37.5

### Proportional

Proportional spreads the difference between the original and entered value to all cells below the aggregate dimension based on that cell's percent contribution to the original value in the edited cell. This method can be used for value or unit measures that have an aggregation method of Total.

If a value is entered at more than one aggregate dimension (such as aggregate product and time), then the value is copied to all lower-level base cells below the aggregate time and product.

**Example:** Enter **1140p** for Feb/Department1. The value for every intersection of week and class belonging to Feb/Department1 doubles. The percentage contribution of the base cell to the aggregate remains unchanged. See [Table 1-7](#) for the results.

**Table 1-7 Example for Proportional Method**

	February	Week1	Week2	Week3	Week4
Department1	1140	310	340	200	290
Class1	240	40	40	80	80
Class2	200	50	50	50	50
Class3	400	200	100	40	60
Class4	300	20	150	30	100

### Delta

Delta spreads the difference between the original and entered value evenly to all cells below the aggregate dimension. This method can be used for value or unit measures that have an aggregation method of Total.

If a value is entered at more than one aggregate dimension (such as aggregate product and time), then the value is copied to all lower-level base cells below the aggregate time and product.

**Example:** Enter **670d** for Feb/Department1. The value for every intersection of week and class belonging to Feb/Department1 increases by the same value, 100/16 or 6.25. See [Table 1-8](#) for the results.

**Table 1-8 Example for Delta Method**

	February	Week1	Week2	Week3	Week4
Department1	670	155	170	100	145
Class1	120	26.25	26.25	46.25	46.25
Class2	100	31.25	31.25	31.25	31.25
Class3	200	106.25	56.25	26.25	36.25
Class4	150	16.25	81.25	21.25	56.25

### Saving Workbook Data

Two options, Save and Commit, are available to ensure that data is saved during the planning process.

- **Save.** Data is saved to a user database and does not affect the master database. This allows you to manipulate details and evaluate the impact of the changes without changing the master data. Any data saved with the Save option is saved to a local copy of the database. Other users are not able to view the saved data by

default. You may save the workbook with global or group access, enabling others to view your local workbook.

- **Commit.** Data is saved to the master database. Data (including changed) is accessible to all users after their workbooks are rebuilt or refreshed.

Refresh and build are two methods for retrieving updated data from the master database to a local workbook.

- **Refresh.** A user can run any refresh group that has been configured to retrieve data from the master database to an existing workbook.
- **Build.** A user may build a new workbook manually. As an alternative to building a workbook manually, a Merchandise Financial Planning administrator can run a batch process (delivered with Merchandise Financial Planning) to automatically build a new workbook by using the Auto Workbook Build process. Refer to the *Oracle Retail Predictive Application Server Administration Guide for the Fusion Client* for more details.

## Plan Versions

The strategic and financial planning processes supported by MFP Cloud Service use plan versions to designate different plan types that are used throughout the planning horizon. These version names and their abbreviations are used frequently in planning views (for example, to distinguish measures).

The plan versions that are visible to MFP Cloud Service users depend on the users' planning roles.

**Table 1–9 Plan Versions Visible to MFP Cloud Service**

Plan Version	Merch Plan	Merch Targets	Location Plan	Location Targets
Working Plan (Wp)	X	X	X	X
Last Year (Ly)	X	X	X	X
Original Plan (Op)	X	X	X	X
Target (Tgt)	X	X	X	X
Current Plan (Cp)	X	X	X	X
Waiting for Approval (Wa)	X	X	NA	NA

The following sections describe each plan version in more detail.

### Working Plan (Wp)

- The plan version that is editable for a particular pre-season or in-season period.
- This plan version is used to develop and revise plan data.
- Actual data values are loaded into the Wp and Cp versions for all elapsed time periods.

### Last Year (Ly)

- A plan version that provides a reference to last year's actual historical data.

**Target (Tgt)**

- Target measures contain values set by a higher role that are then passed to a lower role. For example, the Merch Targets role and the Merch Plan role pass a target plan version down to the Merch Plan role.
- Targets are created by the role through the **Publish Targets** custom menu button, which is initiated by the user. After the data is committed to the database, those targets become available to the Merch Plan role.

**Waiting for Approval (Wa)**

- A plan awaiting approval by the Merch Targets role. The Merch Plan role submits the plan for approval, which copies the plan data from the Wp version to the Wa version.
- The Merch Targets and Merch Plan roles access the same Wa version. The Merch Plan role owns this version, and the Merch Targets role reads from this version to populate measures. The Wa version is read-only for both roles.
- If the plan is approved, a Waiting for Approval plan is promoted to either the Original Plan (Op) version, the Current Plan (Cp), or both the Op and Cp, depending on which Op plan version is enabled by the administrator.
- If the plan is rejected, the Working Plan (Wp) version is not promoted to Original Plan or Current Plan. Needed adjustments are made before the plan is resubmitted for approval.

**Original Plan (Op)**

- A pre-season plan that has been approved and promoted from Waiting for Approval (Wa) to Original Plan (Op) version.
- The Merch Plan role's plan is the only plan that is approved and becomes the Original Plan.
- All roles can view the Op version measures.

**Current Plan (Cp)**

- An in-season plan that has been approved and promoted from Waiting for Approval (Wa) to Current Plan (Cp) version.
- All roles can view the Cp version measures.
- The Merch Plan role's plan is the only plan that is approved and becomes the Current Plan.
- Actual data values are loaded into the Cp (and Wp) version for all elapsed time periods.

**Plan Reconciliation**

The goal of plan reconciliation, an important step of the financial planning process, is to achieve a single, unified plan that all contributing parties have reviewed and approved. As plans are generated, they move through a reconciliation phase and on to the plan approval phase.

**MFP Custom Menu Options**

MFP Cloud Service custom menu buttons in the RPAS Fusion Client are located above the top right corner of the content area for some workbooks. The custom menus are

specific to the steps in the different tasks. If you are on a specific step, you can see the custom menus that have been configured for that step.

**Figure 1–5 Custom Menu Button in the RPAS Fusion Client**

The custom menu buttons vary depending on the current step. The following custom menu buttons are available:

- Merch Targets Role
  - Seed
  - Publish Targets
- Merch Plan Role
  - Seed
  - Submit Plan
  - Copy Approved Plan
- Location Targets Role
  - Seed
  - Publish Targets
- Location Plan Role
  - Seed
  - Approve Plan

---

---

**Note:** Descriptions of these custom menu buttons are provided where relevant throughout this guide.

---

---

### Seeding the Plan

Seeding is a process that populates certain Working Plan data elements with data from last year data from external systems. Seeding facilitates the ability to create a plan by providing seasonal curves across time and relationships between products and locations. After edits are made to a Working Plan measure that has been seeded, the new edit spreads to lower dimension members based on the data that has already been seeded, maintaining the seasonal curves and relationships between products and locations.

### Plan Approval

In MFP Cloud Service, the Merch Targets and Merch Plan roles participate in the plan approval process.

The Merch Plan role uses the Approval view to submit plans to the Merch Targets role for approval. The Merch Plan role also uses this view to view the status of the submitted plans. The Merch Targets role uses the approval view to approve or reject the submitted plans.

Submit for approval functionality is available as a custom menu button. The **Submit** button allows a user to submit the plan and move the data to the Wa version.

### **Publishing Targets**

In MFP Cloud Service, the Merch Targets role and top down roles may set target values for key measures. They then make these targets available to the role below them in the planning process, Merch Plan.

Merch Targets roles create their plan and use the Publish Target view to update their target measures with the data in their plan. The data is published to Merch Plan roles when they click the **Publish Targets** custom menu button. Then Merch Plan roles have access to these target values in their workbooks after a refresh or build.

---

## MFP Setup Task

The MFP Maintenance activity consists of the following tasks:

- MFP Setup
- Location Setup
- Enable Op Approval
- Load Validate

This chapter focuses on the steps within the MFP Setup Task, which include:

- [History Mapping](#)
- [Local Currency](#)
- [VAT Setup](#)
- [Manage Export](#)

### Opening the MFP Setup Workbook

To open a MFP Setup workbook:

1. Click the **New Workbook** icon in the MFP Setup task.

**Figure 2–1** MFP Setup Task

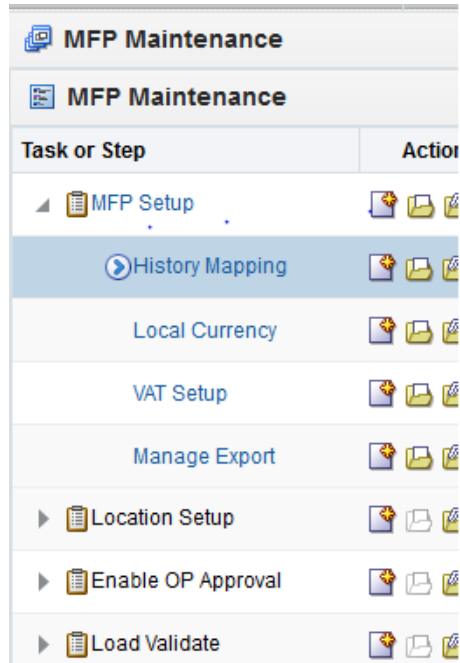

Task or Step	Action
▲ MFP Setup	[New Workbook] [Print] [Export]
History Mapping	[New Workbook] [Print] [Export]
Local Currency	[New Workbook] [Print] [Export]
VAT Setup	[New Workbook] [Print] [Export]
Manage Export	[New Workbook] [Print] [Export]
▶ Location Setup	[New Workbook] [Print] [Export]
▶ Enable OP Approval	[New Workbook] [Print] [Export]
▶ Load Validate	[New Workbook] [Print] [Export]

2. The workbook is built.

## History Mapping

The History Mapping step is used by the administrator to map the weeks for last year and last last year (two years ago).

**Figure 2–2 MFP Setup - History Mapping**

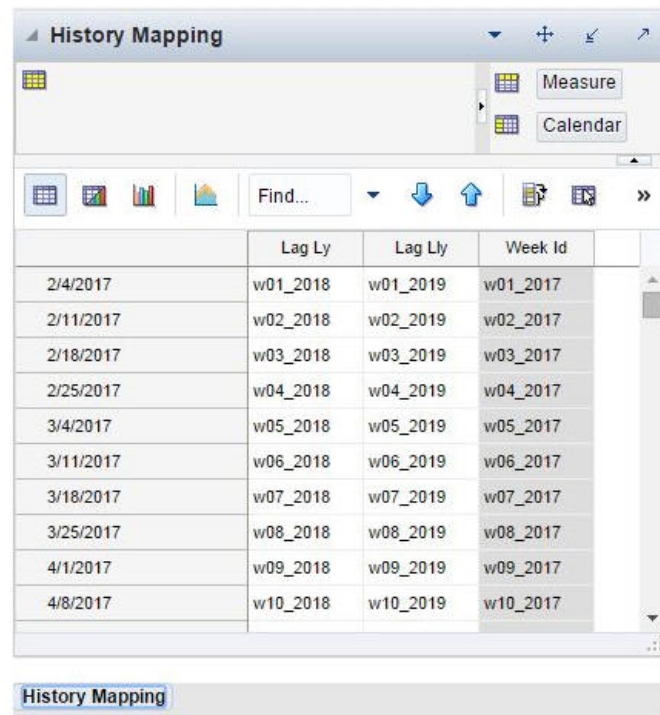

The History Mappings step contains one view: History Mapping.

### History Mapping View

Within this view, you can set the mappings for the last year and the last last year. The last year's mapping is used to identify which week to map to when determining last year's values in a workbook. The last last year is used to identify which week to map to when determining the prior values from the past two years in a workbook.

**Figure 2–3 History Mapping**

The screenshot shows a window titled "History Mapping" with a toolbar containing icons for grid, calendar, and search. Below the toolbar is a table with the following data:

	Lag Ly	Lag Lly	Week Id
2/4/2017	w01_2018	w01_2019	w01_2017
2/11/2017	w02_2018	w02_2019	w02_2017
2/18/2017	w03_2018	w03_2019	w03_2017
2/25/2017	w04_2018	w04_2019	w04_2017
3/4/2017	w05_2018	w05_2019	w05_2017
3/11/2017	w06_2018	w06_2019	w06_2017
3/18/2017	w07_2018	w07_2019	w07_2017
3/25/2017	w08_2018	w08_2019	w08_2017
4/1/2017	w09_2018	w09_2019	w09_2017
4/8/2017	w10_2018	w10_2019	w10_2017

**Table 2–1 Mapping View Measures**

Measure	Description
Lag Ly	Identifies the week used for mapping as adjusted last year.
Lag Lly	Identifies the week that is being used for mapping as last last year (two years ago).
Week ID	Identifies the internal week position for the current week for reference. This is useful for copying week positions when manually setting Lag Ly and Lag Lly.

## Local Currency

The Local Currency step provides support for administering the local currency configuration. This view is only available when the provision option with local currency is implemented.

**Figure 2–4 Local Currency**

The Local Currency step contains two views:

- Local Currency Rate
- Local Currency Symbol

### Local Currency Rate View

Within this view, you can set the local currency conversion rate for each Channel by Week.

**Figure 2–5 Local Currency Rate View**

The screenshot displays the 'Local Currency Rate' view. It includes a toolbar with navigation and analysis tools, and a table showing conversion rates for different channels over a 5-week period (W1 of 3LY to W5 of 3LY). The table data is as follows:

	W1 of 3LY	W2 of 3LY	W3 of 3LY	W4 of 3LY	W5 of 3LY
Brick & Mortar	1.00	1.00	1.00	1.00	1.00
CA Brick & Mortar	0.77	0.77	0.77	0.77	0.77
CA Direct	0.77	0.77	0.77	0.77	0.77
Direct	1.00	1.00	1.00	1.00	1.00
UK Brick & Mortar	1.56	1.56	1.56	1.56	1.56
UK Direct	1.56	1.56	1.56	1.56	1.56
UK Wholesale/Franchise	1.56	1.56	1.56	1.56	1.56
Wholesale/Franchise	1.00	1.00	1.00	1.00	1.00

**Table 2–2 Local Currency Rate View Measures**

Measure	Description
Local Currency Rate	The rate used to convert values to the local currency for a given Channel/Week.

## Local Currency Symbol View

Within this view, the planning administrator sets the local currency symbol for each channel. This currency symbol can be included as the Location attribute in all Local Currency views.

For example, in [Figure 2–6](#) the BRA Brick & Mortar channel has R\$ as its local currency symbol, which indicates that local currency values for this channel are in Brazilian Real. All local currency BRA Brick & Mortar monetary values are displayed with R\$.

**Figure 2–6 Local Currency Symbol View**

	Local Currency Symbol
BRA Brick & Mortar	R\$
BRA Direct	R\$
BRA Wholesale/Franchise	R\$
Brick & Mortar	\$
CA Brick & Mortar	\$
CA Direct	\$
CN Brick & Mortar	¥
CN Direct	¥

**Table 2–3 Local Currency Symbol View Measures**

Measure	Description
Local Currency Symbol	The graphic symbol associated with the channel's local currency.

## VAT Setup

The VAT Setup step allows a planning administrator to enter the Value Added Tax (VAT) rate for each subclass by week.

**Figure 2–7 Vat Setup Step**

MFP Maintenance	
Task or Step	Action
MFP Setup	
History Mapping	
Local Currency	
VAT Setup	
Manage Export	
Location Setup	
Enable OP Approval	
Load Validate	

The VAT Setup step contains a single view, VAT Setup.

### VAT Setup View

In this view, the planning administrator can input the VAT% rate for each subclass by week.

When planning sales retail, the VAT% rate is applied to gross sales and then returns are subtracted to calculate net sales. If no VAT% rate is planned, then net sales are simply determined as gross sales less returns.

VAT Rate% is stored at Week/Subclass/Channel.

**Figure 2–8 VAT Admin - VAT Setup Workbook**

	W1 of 3LY	W2 of 3LY	W3 of 3LY	W4 of 3LY	W5 of 3LY	V
30000 Loafers	5.0 %	5.0 %	5.0 %	5.0 %	5.0 %	
30001 Boots	5.0 %	5.0 %	5.0 %	5.0 %	5.0 %	
30002 Cap Toe	5.0 %	5.0 %	5.0 %	5.0 %	5.0 %

**Table 2–4 VAT Admin - VAT Setup Workbook Measures**

Measure	Description
VAT%	The default Value Added Tax (VAT) rate percentage for the Subclass/Channel.

## Manage Export

The Manage Export step provides the ability to control which periods and positions are included when plans are exported. The values set in this step are employed in batch (along with corresponding Approved/Submitted/Seeded Info measures) to set export flags for all the plan versions that are exportable from MFP Retail Cloud Service:

- Merch Plan Current Plan (MP Cp)
- Merch Plan Original Plan (MP Op)
- Merch Plan Waiting for Approval Plan (MP Wa)
- Merch Plan Working Plan (MP Wp)
- Location Plan Current Plan (LP Cp)
- Location Plan Original Plan (LP Op)
- Location Plan Working Plan (LP Wp)
- Merch Targets Target (MT Tgt)
- Merch Targets Working Plan (MT Wp)
- Location Targets Target (LT Tgt)
- Location Targets Working Plan (LT Wp)

**Figure 2–9 Manage Export**

The planner or administrator indicates whether elapsed periods should be included and which positions should be exported in the following two views:

- Export Elapsed Setting
- Manage Export

### Export Elapsed Setting View

Within this view, the planner or administrator designates whether or not elapsed periods should be included when exporting plan data.

**Figure 2–10 Export Elapsed Setting View**

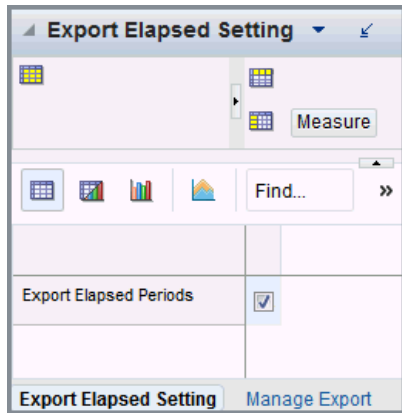

Table 2–5 lists the measures available in this view.

**Table 2-5 Export Elapsed Setting View Measures**

Measure	Description
Export Elapsed Periods	When selected, this flag indicates that data for the elapsed periods must be exported. By default, this value is unchecked, meaning that only data for unelapsed periods will be included in the exported plan data.

## Manage Export View

Within this view, the planning administrator selects the positions that must be included when exporting plan data for all versions.

**Figure 2-11 Manage Export View**

Table 2-6 lists the measures available in this view.

**Table 2-6 Manage Export View Measures**

Measure	Description
Export Mask	Allows the user to control which positions are exported for all plan versions. When selected, the Department/Channel/Half is included when exporting plan data. By default, this boolean is checked for all positions. If the user wants to exclude any Department/Channel/Half from exporting, the user must un-check this boolean.

The export flags are set based on Export Mask and Approved or Submitted Info for Approved or Submitted Plans and Seeded Info for Working Plans.

---

## Location Setup Task

The MFP Maintenance activity consists of the following tasks:

- MFP Setup
- Location Setup
- Enable Op Approval
- Load Validate

This chapter focuses on the steps within the Location Setup Task, which include:

- [Location Info](#)
- [Like Location](#)

### Opening the Location Setup Workbook

To open a Location Setup workbook:

1. Click the **New Workbook** icon in the Location Setup task.

**Figure 3–1** Location Setup Task

Task or Step	Action
▶ MFP Setup	[New Workbook] [Print] [Export]
▲ Location Setup	[New Workbook] [Print] [Export]
Location Info	[New Workbook] [Print] [Export]
Like Location	[New Workbook] [Print] [Export]
▶ Enable OP Approval	[New Workbook] [Print] [Export]
▶ Load Validate	[New Workbook] [Print] [Export]

The workbook is built.

### Location Info

The Location Info step includes two views, Location Info and Location Space.

## Location Info View

In this view, the user can set up additional information related to location, such as description, status of location, and wholesale/franchise location.

**Figure 3–2 Location Info View**

The screenshot shows a software interface titled "Location Info". It features a toolbar with various icons for navigation and editing, including a search bar labeled "Find...". Below the toolbar is a table with the following columns: "Location [ Label ]", "Location Description", "Location Status", and "W/F Location". The table lists 19 locations, each with a unique ID and name, and their corresponding status and W/F location flags.

Location [ Label ]	Location Description	Location Status	W/F Location
1000 Charlotte		Active	<input type="checkbox"/>
10000 WHL/Fran - Macy's A		Active	<input checked="" type="checkbox"/>
10001 WHL/Fran - Macy's B		Active	<input checked="" type="checkbox"/>
10002 WHL/Fran - Macy's C		Active	<input checked="" type="checkbox"/>
10003 WHL/Fran - Foot Locker A		Active	<input checked="" type="checkbox"/>
10004 WHL/Fran - Foot Locker B		Active	<input checked="" type="checkbox"/>
10005 WHL/Fran - Foot Locker C		Active	<input checked="" type="checkbox"/>
10006 WHL/Fran - Foot Locker D		Active	<input checked="" type="checkbox"/>
10007 WHL/Fran - Saks Fifth Avenue A		Active	<input checked="" type="checkbox"/>
10008 WHL/Fran - Saks Fifth Avenue B		Active	<input checked="" type="checkbox"/>
10009 WHL/Fran - Saks Fifth Avenue C		Active	<input checked="" type="checkbox"/>
1001 Atlanta		Active	<input type="checkbox"/>
10010 WHL/Fran - Bloomingdale's A		Active	<input checked="" type="checkbox"/>
10011 WHL/Fran - Bloomingdale's B		Active	<input checked="" type="checkbox"/>
10012 WHL/Fran - Belk		Active	<input checked="" type="checkbox"/>
10013 WHL/Fran - Debenhams A		Active	<input checked="" type="checkbox"/>
10014 WHL/Fran - Debenhams B		Active	<input checked="" type="checkbox"/>
10015 WHL/Fran - Nordstrom		Active	<input checked="" type="checkbox"/>
10016 WHL/Fran - Hudson's Bay A		Active	<input checked="" type="checkbox"/>
10017 WHL/Fran - Hudson's Bay B		Active	<input checked="" type="checkbox"/>
10018 WHL/Fran - El Palacio de Hierro		Active	<input checked="" type="checkbox"/>

Table 3–1 lists the measures available on this view.

**Table 3–1 Location Info View Measures**

Measure	Description
Location Description	Use the attributes employed in associating the two stores (why are these locations alike) to provide a short description of the location, for example, Southern High-Income Hot Dry.
W/F Location	Set the flag to true for all locations that are in a W/F channel.
Location Status	Range: Active, Closed, Refurbish.

## Location Space View

This is the total physical area that a department occupies within the location, expressed in square meters.

**Figure 3–3 Location Space View**

Location [ Label ]	100 Men's Footwear	200 Women's Footwear	300 Men's Casuals	400 Mens Tops	500 Women's Casuals Traditional	505 Women's Casuals Fast	600 Women's Classics
1000 Charlotte	381.30	381.30	762.60	762.60	1,525.20	1,525.20	762.60
1001 Atlanta	54.60	54.60	109.20	109.20	218.40	218.40	109.20
1002 Dallas	42.50	42.50	85.00	85.00	170.00	170.00	85.00
1003 Boston	131.70	131.70	263.40	263.40	526.80	526.80	263.40
1004 New York	84.75	84.75	169.50	169.50	339.00	339.00	169.50
1005 Philadelphia	242.00	242.00	484.00	484.00	968.00	968.00	484.00
1006 Chicago	119.70	119.70	239.40	239.40	478.80	478.80	239.40
1007 Minneapolis	28.35	28.35	56.70	56.70	113.40	113.40	56.70

Table 3–2 lists the measures available on this view.

**Table 3–2 Location Space View Measures**

Measure	Description
Square Meter	The total store area in square meters.

## Like Location

The Like Location step includes one view: Like Location.

### Like Location View

In this view, the user can set up like location information for new locations to use historical sales for Ly in Location Plan workbooks. The user also can set an end date for the like location, after which the application will stop using historical sales of the like location and start using historical sales for the same location in Ly.

**Figure 3–4 Like Location View**

	Like Location	Like Location End Date
1000 Charlotte		
1001 Atlanta		
1002 Dallas		
1003 Boston	1149 Chey...	03/23/202...
1004 New York		
1005 Philadelphia		
1006 Chicago		
1007 Minneapolis	1046 Minot ...	04/11/202...

Table 3–3 lists the measures available in this view.

**Table 3–3 Like Location View Measures**

Measure	Description
Like Location	Identifies the Sister Store for the location. Using the location hierarchy, determines a similar store based on location along with the attributes indicated in alternates (for example, income, climate, and so on.)
Like Location End Date	Date after which Like Location information will be ignored by the system to use historical sales data for Ly. If the date is not set for newly added locations using DPM, then the like location information will be used until DPM status of location becomes formal.

## Enable Op Approval Task

The MFP Maintenance activity consists of the following tasks:

- MFP Setup
- Location Setup
- Enable Op Approval
- Load Validate

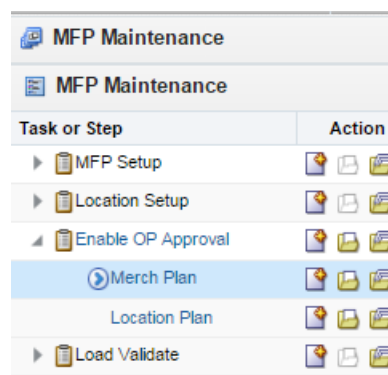

Planning administrators use this workbook to enable Merch Plan and Location Plan users to submit and approve plans to the Original Plan (Op). As a planning administrator, you can select or deselect this option at any time. If you deselect it during the in-season, Merch Plan and Location Plan users cannot submit or approve a plan for the Op. You can choose to do this after the planning process has been finalized in order to lock down the Op.

### Enable OP Approval Workbook Wizard

To build a new Enable OP workbook, complete the following steps:

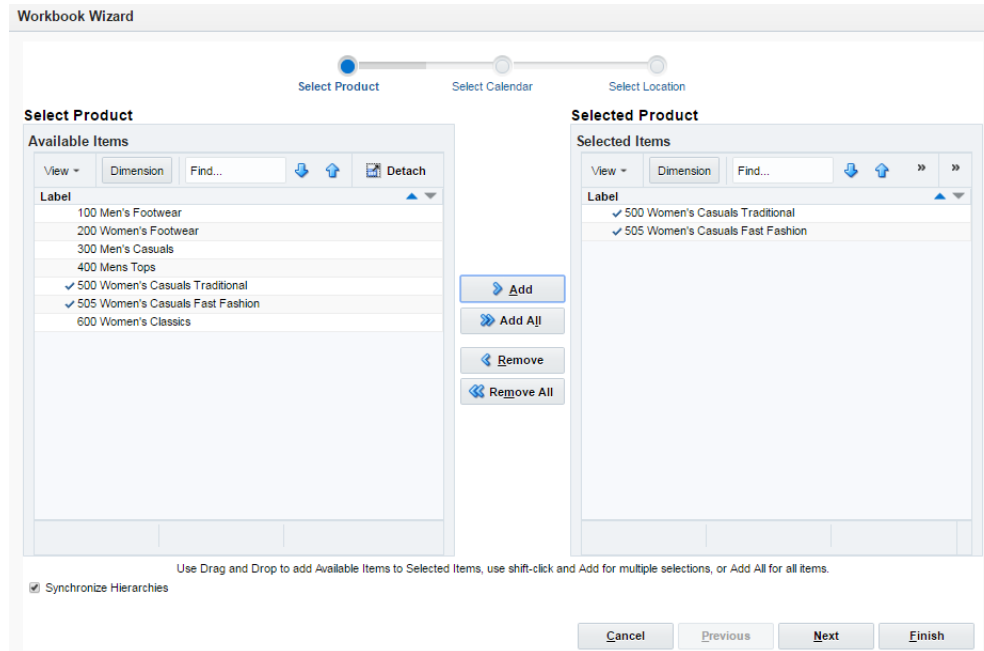

1. Click the **New Workbook** icon in the Enable OP Approval task.

**Figure 4–1** Enable OP Approval Validation

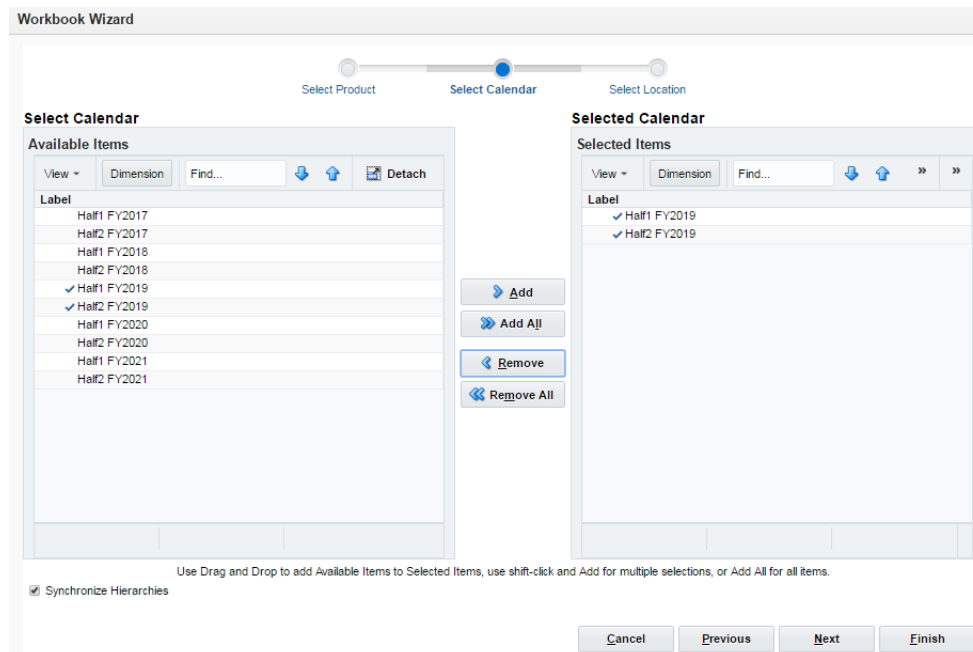

2. The workbook wizard opens at the Product Selection step. Select the departments you want to enable and click **Next**.

**Figure 4–2 Workbook Wizard: Product Selection**

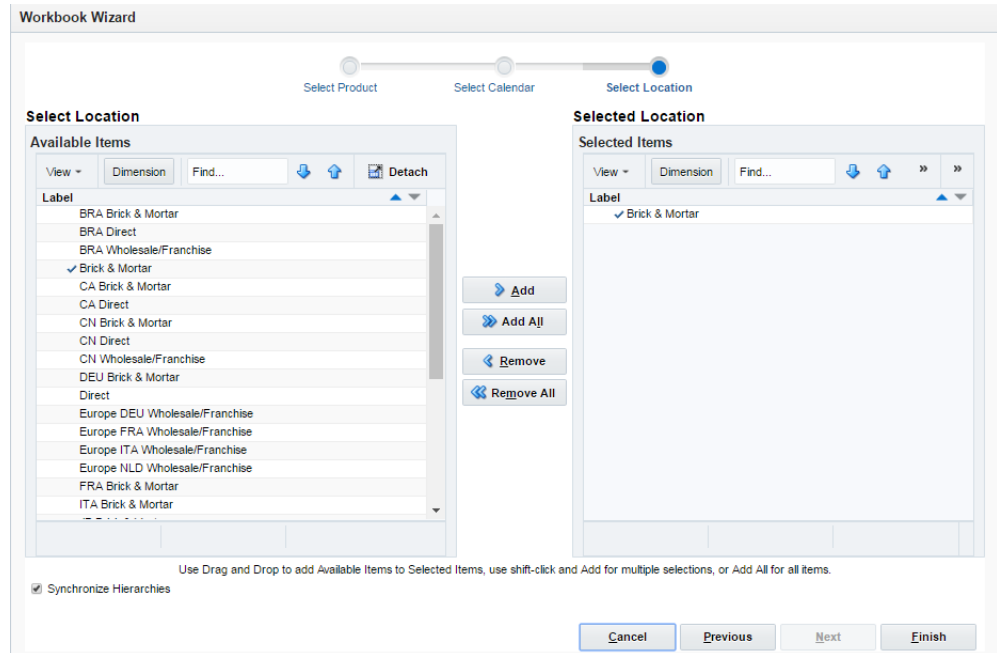

3. The Calendar Selection step appears. Select the halves and click **Next**.

**Figure 4–3 Workbook Wizard: Calendar Selection**

4. The Location Selection step appears. Select the channels you want and click **Finish**.

**Figure 4–4 Workbook Wizard: Location Selection**

The Enable OP Approval workbook is built.

## MP Enable OP Approval

The Merch Plan step has one view: MP Enable OP Approval.

Select the week(s) by department that you want to enable Merch Plan users to submit and approve plans to the original plan. Once you are satisfied with the setting updates you have made, commit the workbook in order to retain your changes.

**Figure 4–5 MP Enable OP Approval View**

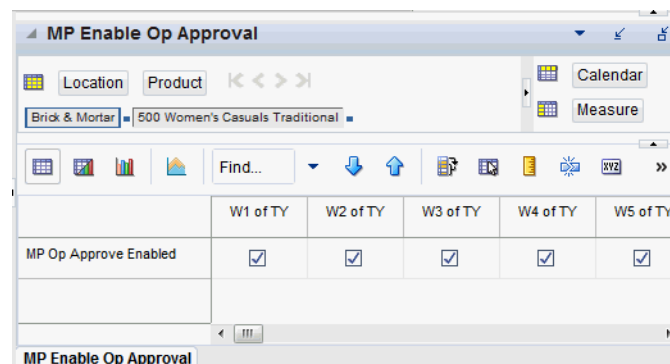

Table 4–1 lists the measures available in this view.

**Table 4–1 Allow OP Approval View Measures**

Measure	Description
MP Op Approve Enabled	Select this measure to enable Merch Plan users to submit and approve plans to the original plan.

## LP Enable OP Approval

The Location Plan step has one view: LP Enable OP Approval.

Select the week(s) by department that you want to enable Location Plan users to submit and approve plans to the original plan. Once you are satisfied with the setting updates you have made, commit the workbook in order to retain your changes.

**Figure 4–6 LP Enable OP Approval View**

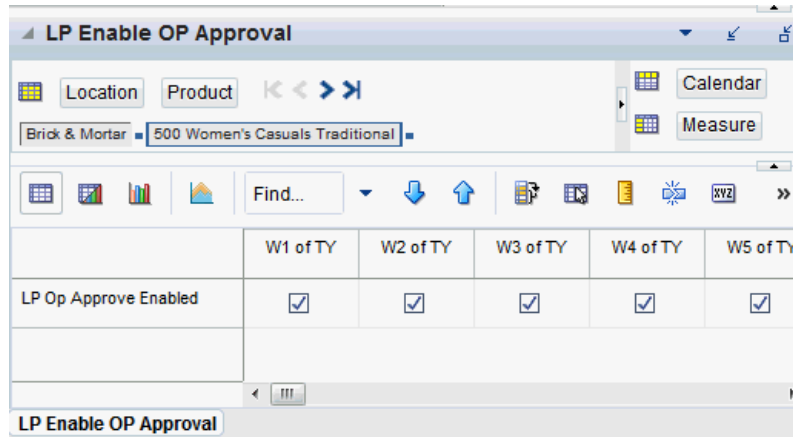

Table 4–2 lists the measures available in this view.

**Table 4–2 Allow OP Approval View Measures**

Measure	Description
LP Op Approve Enabled	Select this measure to enable Location Plan users to approve plans to the original plan.

---

---

## Load Validate Task

The MFP Maintenance activity consists of the following tasks:

- MFP Setup
- Location Setup
- Enable Op Approval
- Load Validate

This chapter focuses on the steps within the Load Validate Task, which include:

- [Actuals](#)
- [Merch Target](#)
- [Merch Plan](#)
- [Location Target](#)
- [Location Plan](#)

To use the Load Validate task, you must first build the workbook.

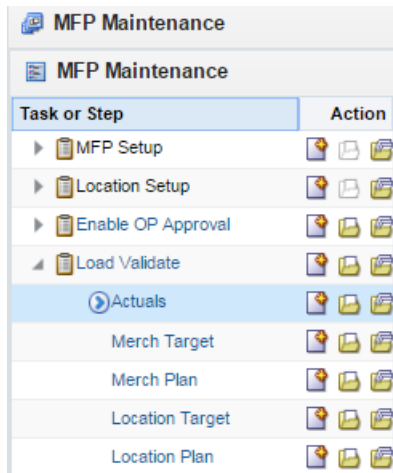

Once built, the workbook contains all measures that are either loaded or touched during the batch calculation process, providing an avenue by which an administrator can verify data loads and batch processes.

### Building the Workbook

To build a Load Validate workbook, complete the following steps:

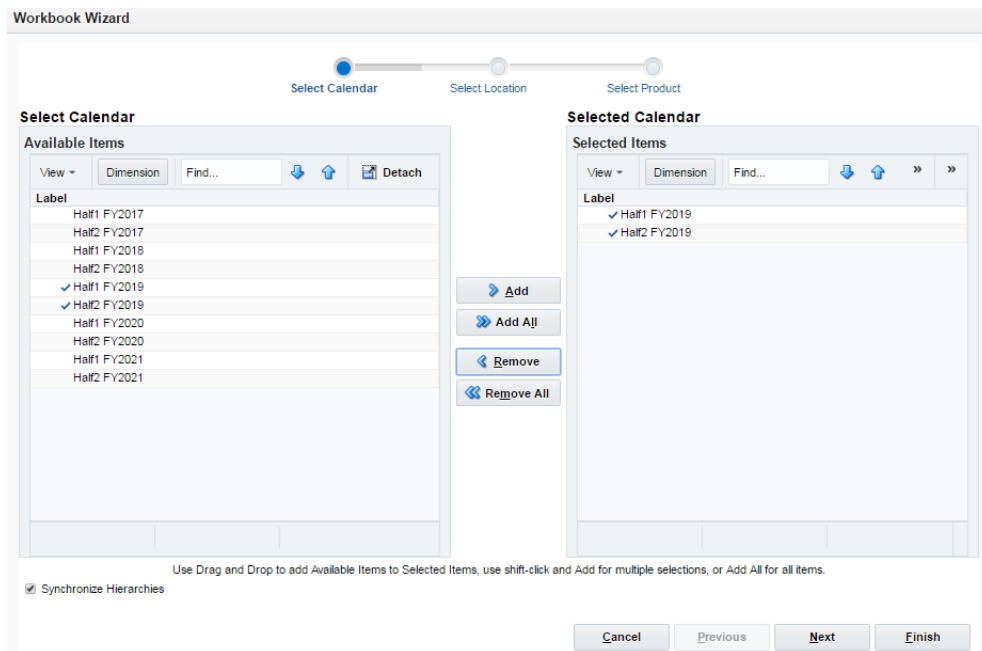

1. Click the **New Workbook** icon in the Load Validate step.

**Figure 5–1 Load Validate**

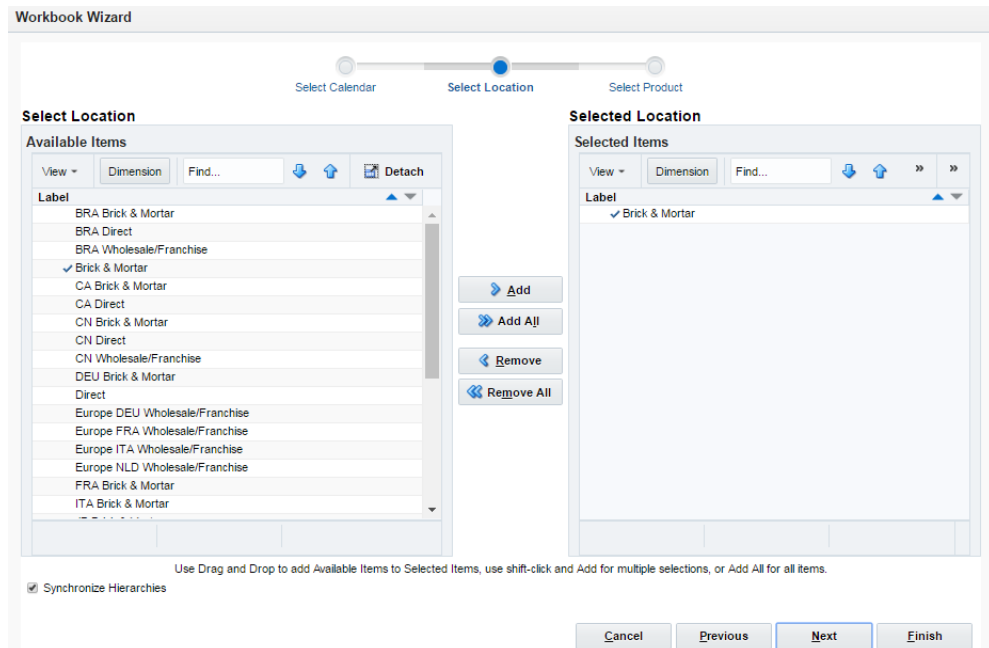

2. The Calendar Selection step appears. Select the years and click **Next**.

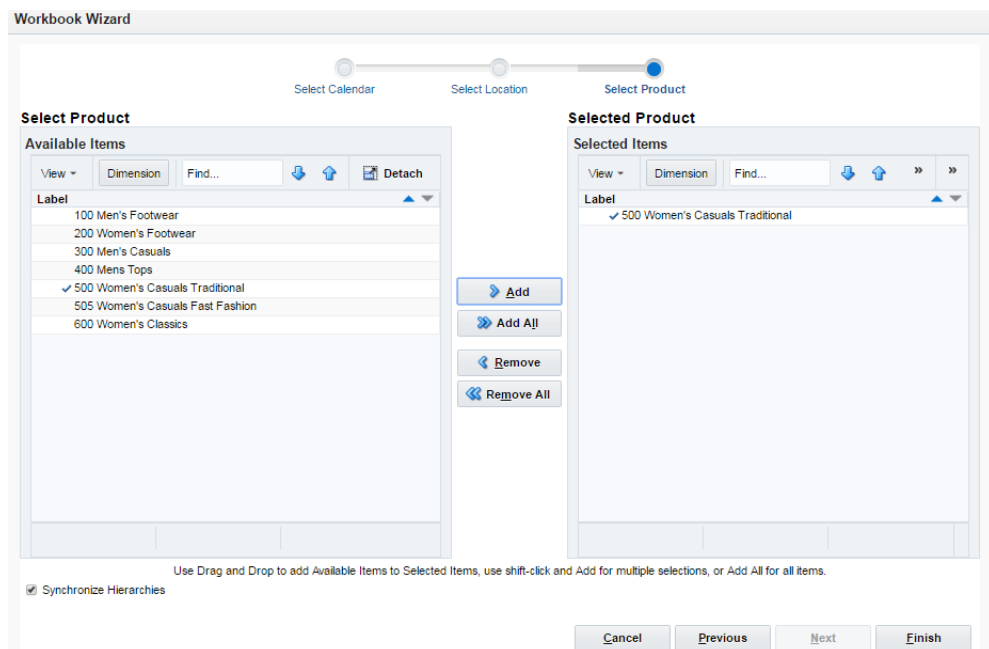

**Figure 5–2 Workbook Wizard: Calendar Selection**

3. The Location Selection step appears. Select the channel and click **Next**.

**Figure 5–3 Workbook Wizard: Location Selection**

4. The Product Selection step appears. Select the items and click **Next**.

**Figure 5–4 Workbook Wizard: Product Selection**

The Data Load Validation workbook is built.

## Actuals

The Actuals step includes a single view of the same name, the Actuals view. Use this view to validate that the actuals data was loaded in the batch process.

Figure 5–5 Actuals View

## Create Merch Plan Targets Task

The Merch Targets role is usually associated with senior and middle management in the merchandise planning organization. The overall goal of the Merch Targets user is to develop strategic and department-level targets that set the financial guidance for the planning organization.

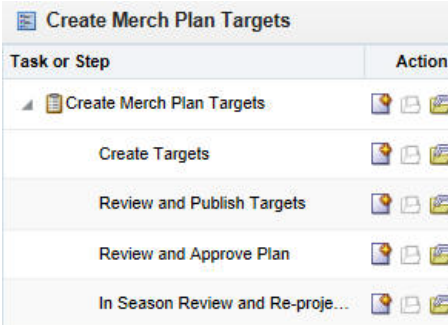

Merch Targets users typically begin planning two to three months before the planning period. This is known as pre-season planning. During this time, Merch Targets users create the Merchandise Financial Plan for the season or for the entire year.

When Merch Targets users open MFP in the RPAS Fusion Client, they are presented with the activity called Create Merch Plan Targets and a task of the same name. This task belongs solely to the Merch Targets user. It includes the following four steps:

- Create Targets
- Review and Publish Targets
- Review and Approve Plan
- In-Season Review and Re-Project Targets

The first two steps are related to pre-season creation and publication of targets to the Merch Planner. The third step involves reviewing and approving or rejecting plans submitted by the Merch Plan role. The fourth step is used for in-season adjustments to targets. These tasks and steps are shown in [Figure 6-1](#).

**Figure 6-1 Merch Targets Role View: Task or Step**

Task or Step	Action
Create Merch Plan Targets	[Icon]
Create Targets	[Icon]
Review and Publish Targets	[Icon]
Review and Approve Plan	[Icon]
In Season Review and Re-proje...	[Icon]

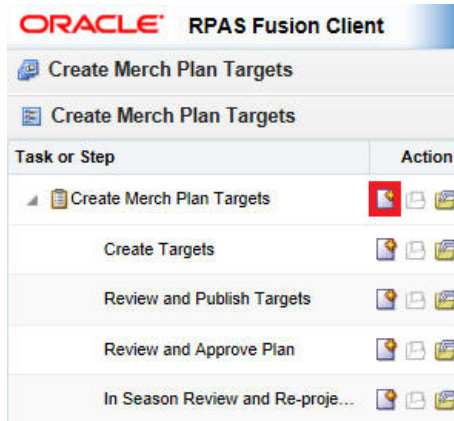

The Merch Targets user must complete the first three steps to publish the strategic targets to the Merch Plan user. To do this, the Merch Targets user must first build the workbook.

## Building the Workbook

To build the Merch Targets role workbook, complete the following steps.

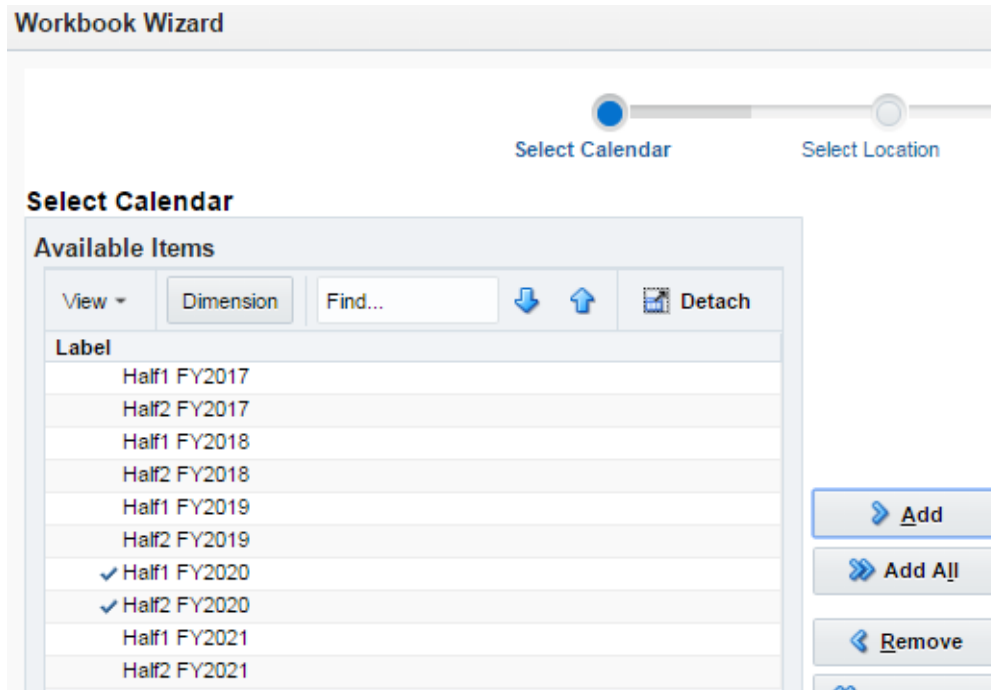

1. Click the **Create New Workbook** icon in the Create Merch Targets task.

**Figure 6–2 Create Merch Plan Targets**

2. The workbook wizard opens at the Calendar Selection step. Select the halves that you want to plan and move them to the Selected Items box. Click **Next**.

**Figure 6–3 Workbook Wizard: Calendar Selection**

3. The Location Selection step of the workbook wizard is displayed. Select the channels you want to plan and move them to the Selected Items box. Click **Next**.

Figure 6–4 Workbook Wizard: Location Selection

4. The Product Selection step of the workbook wizard is displayed. Select the location you want to plan and move it to the Selected Items box. Click **Finish**.

Figure 6–5 Workbook Wizard: Product Selection

The Merch Targets role workbook is built, and the Initialize view opens.

## Create Targets

This section provides details about creating targets.

### Seed Plan

The first action that the Merch Target users complete when creating new targets is to seed the plan with the Initialize view.

This view is found under the first tab within the Create Targets Step, Seed Plan.

**Figure 6–6 Create Targets - Seed Plan: Initialize Plan View**

**Table 6–1 Initialize Plan Measures**

Measure	Description
Seed Source	The seed source used to seed the working plan. Use this option to seed or not seed the working plan. You can seed with Last Year's (Ly) or Forecast (Fcst) data. Or, you can choose the Blank option if you do not want to seed the working plan.
Seed Info	Includes a few pertinent facts about the last time that the Seed custom menu was executed: last seed source concatenated with last seeded date and the last user to seed.  If blank, then the given intersection has never been seeded.

With this view, you can choose to seed your plan with Last Year (Ly) or Forecast (Fcst) data to create a demand curve on which to spread the new plan's initial targets. Or, you can instead choose to not seed the plan, which allows you to create a plan that is not influenced by last year's performance or forecast (plus last year's performance).

In the preceding example, both Half1 and Half2 have been selected to be seeded for the Brick & Mortar channel for the 500 Women's Casuals Traditional department.

### Seeding the Plan

When seeding the plan, you can choose which information is seeded. For instance, you can seed just one half or all halves in the task, as shown in [Figure 6–6](#). You can also choose what locations and products to seed.

There are two ways you can seed. You can seed each level individually, or you can seed several levels at once by changing the dimension level shown in the view.

**Seeding One Level at a Time** As shown in [Figure 6–6](#), only the Brick & Mortar channel and the 500 Woman's Casuals Traditional division have been selected to be seeded with Ly data. This means that the other product divisions have not been selected to be seeded yet. To seed the next division in the Product dimension within the Brick & Mortar channel, complete the following steps:

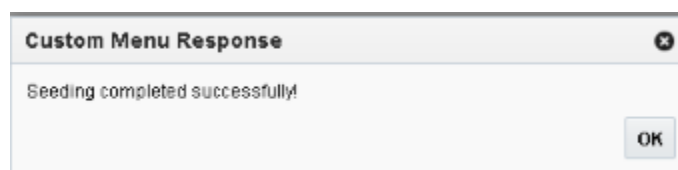

1. Click within the dimension field that you want to change, as shown in [Figure 6–7](#).
2. Click the **Next** or **Previous** arrow, as shown in [Figure 6–7](#).

**Figure 6–7 Changing a Dimension Level with Page Arrows**

3. The page refreshes and the next division in the Product dimension is displayed in the page edge. Note that the Seed Source measure is no longer populated.
4. Select the half that you want to seed with Ly or Forecast data.
5. Click the **Next** arrow to view and seed the next division.
6. When you have selected all the data you want to seed, click **Seed** in the top right corner.

**Figure 6–8 Seed Button**

7. A confirmation message is displayed, stating that the data has been successfully seeded. Click **OK**.

**Figure 6–9 Seeding Success Message**

After you have seeded, the view refreshes and the Last Seed Source and Last Seed Date measures contain the source and date of the last seed.

**Seeding Several Levels at Once** If you want to seed several locations and several products at once, you may want to change the level of the dimensions shown in the page edge.

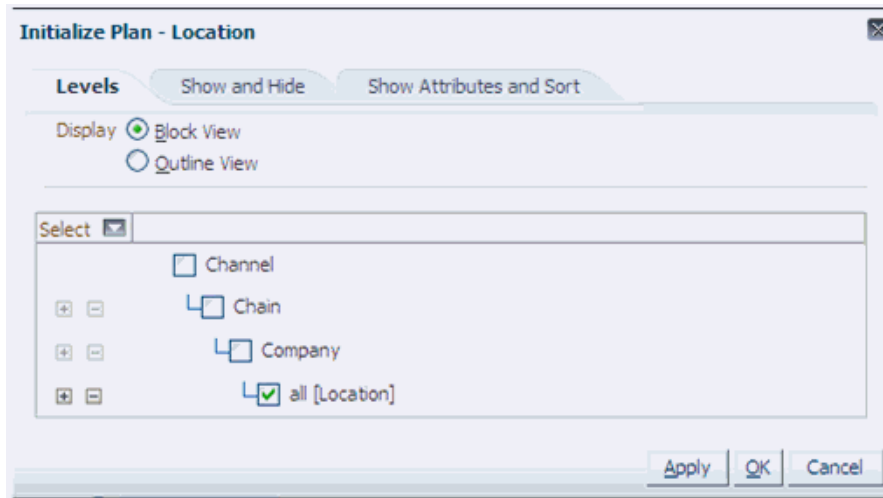

The default setting of the Initialize Plan view is set to show the Calendar dimension at the half level, the Location dimension at the channel level, and the Product dimension at the division level.

To change the dimension level shown in the page edge or grid, complete the following steps:

1. Click the dimension tile of the dimension level you want to change.

**Figure 6–10 Location Dimension Tile**

2. The dimension window is displayed. Select the level of the dimension that you want to appear in the page edge. If you want to view more than one level at a time in the page edge or grid, select multiple levels. In [Figure 6–11](#), Channel was deselected and all [Location] was selected instead.

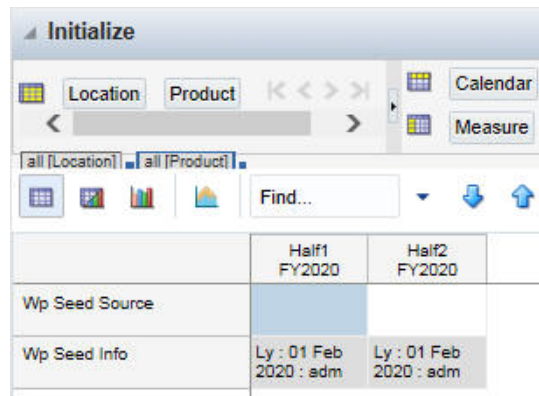

**Figure 6–11 Location Dimension Window**

3. Click **OK** when finished.
4. Repeat steps 1 through 3 for other dimensions if necessary.
5. After the dimensions are at the level you want, select the halves that you want to seed.

In [Figure 6–12](#), both the Location and Product dimensions are at All, and the halves Half1 FY2020 and Half2 FY2020 have been set to seed from last year.

6. When you have selected all the data you want to seed, click **Seed** in the top right corner, as shown in [Figure 6–12](#).

Figure 6–12 Seeding Several Levels at Once

- The view refreshes. The Seed Info measure contains the last seed source concatenated with last seeded date and the last user to seed. A confirmation message is displayed, stating that the data has been successfully seeded. Click OK.

Figure 6–13 Seeding Success Message

After you have seeded the divisions, continue to the next step: "Sales/Markdowns".

## Sales/Markdowns

After you have seeded, develop the sales and markdown targets for those departments. The second tab within the Create Targets step, Sales/Markdowns, has one default view: Sales and Markdowns.

To create the Merch Targets, one approach is to complete the following steps within the views described above:

1. Seed the plan using Last Year or Forecast to create a base plan. All percentage measures will be seeded to maintain same percentage as Last Year. For example: Wp Gross Margin%, Wp Shrink C%.
2. Net Sales Cost will be seeded with values to maintain the same last year Gross Margin%.
3. Enter the Wp Sales R that you are projecting. Use Fcst Sales R as a guide.
4. Enter the projected Wp Gross Margin% at month level and click **Calculate** in order to calculate the Wp Gross Margin R and Wp COGS C.
5. Plan the required inventory by adjusting Wp Stock to Sales Ratio. Adjust other seeded inventory measures such as Wp Shrink C and Wp MOS C and plan the Wp Receipts C.

## Review and Publish Targets

In the Review Targets step, review the targets you created in the [Sales/Markdowns](#) step.

The next action that the Merch Target users complete is to review and then publish their targets.

## Review Targets

In this view, review the targets you created in the previous step. If you need to alter the targets shown in this view, return to the Create Targets step to edit them there.

**Note:** If you have not published Merch Targets yet, the Tgt measures have no values.

If you are satisfied with the target plan you have created, proceed to the next Merch Target role step: [Publish Targets](#).

## Publish Targets

Use Publish Targets when you are ready to publish the targets that you created. Publishing a target copies your Merch Target Wp measure information to the Tgt (Top Down Target) measures in your task, and then it commits those target measures to the database so that Merch Plan users can retrieve those targets.

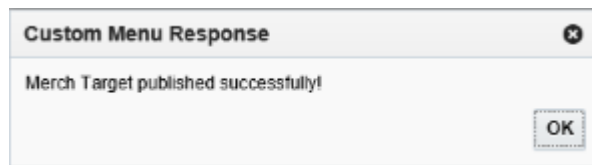

The Tgt measures are shown in the Publish Targets view found in the Review and Publish Targets step. These measures initially have zero values. After the targets are published in this step, those measures are populated with the target information.

**Figure 6–22 Publish Targets**

Wp Publish Targets	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Wp Publish Notes		
Tgt Publish Info	lauren : 05 Feb 2020 :	lauren : 05 Feb 2020 :

To publish the targets, complete the following steps.

1. Select the halves in the Wp Publish Targets measure that you want to publish.
2. If needed, enter relevant information in the Wp Publish Notes measure. This is optional.
3. Repeat steps 1 and 2 for other locations and products if necessary.
4. Click **Publish Targets**. This button is located in the top right corner.
5. A success message is displayed. Click **OK** to close it.

**Figure 6–23 Success Message - Publish Targets**

6. The view refreshes and clears the data in Wp publish Targets and Wp Publish Notes measures. It populates the data for Tgt Publish Info measure as name:date:notes.

## Next Steps

After you have published your targets and committed your task, the Merch Plan user can use the targets to create their plan. To learn about the Merch Plan user's role, see [Chapter 7](#).

If you need to revise your targets at any time during the pre-season, you can follow the same procedures described in this chapter. Since you have already created a working plan, there is no need to seed the task again, unless you want to start again with Ly (Last Year) or Fcst (Forecast) data.

## Create Merch Plan Task

The Merch Plan role is usually associated with the merchandise planner in the merchandise planning organization. During the pre-season, the Merch Plan user receives department targets from the Merch Target user. The Merch Plan user references those targets when creating the department, class, and subclass targets.

When the Merch Plan users open MFP in the RPAS Fusion Client, they are presented with the pre-season activity called Create Merch Plan and a task with the same name. This task belongs only to the Merch Plan user. It includes the following steps:

- Create Plan
- Review and Reconcile
- Review and Submit Plan
- In-Season Review and Re-Project Plan
- In-Season Submit Plan

After the Merch Plan users develop the department plan, they submit their plan to the Merch Target user for approval using the Review and Submit Plan task. This task has two steps:

- Review Plan
- Submit and Copy Approved Plan

These tasks and steps are shown in [Figure 7-1](#).

**Figure 7-1 Create Merch Plan View: Pre-Season Tasks and Steps**

Task or Step	Action
<ul style="list-style-type: none"> <li>▲ Create Merch Plan</li> </ul>	<ul style="list-style-type: none"> <li>+</li> <li>-</li> <li>↻</li> </ul>
<ul style="list-style-type: none"> <li> <ul style="list-style-type: none"> <li>Create Plan</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>+</li> <li>-</li> <li>↻</li> </ul>
<ul style="list-style-type: none"> <li> <ul style="list-style-type: none"> <li>Review and Reconcile</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>+</li> <li>-</li> <li>↻</li> </ul>
<ul style="list-style-type: none"> <li> <ul style="list-style-type: none"> <li>Review and Submit Plan</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>+</li> <li>-</li> <li>↻</li> </ul>
<ul style="list-style-type: none"> <li> <ul style="list-style-type: none"> <li>In Season Review and Re-project Plan</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>+</li> <li>-</li> <li>↻</li> </ul>
<ul style="list-style-type: none"> <li> <ul style="list-style-type: none"> <li>In Season Submit Plan</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>+</li> <li>-</li> <li>↻</li> </ul>

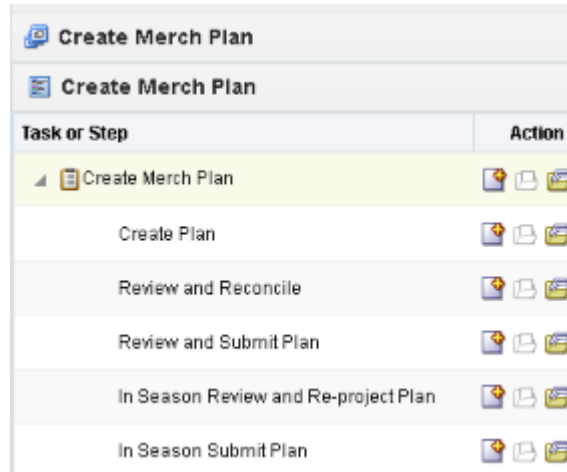

The Merch Plan user must complete the first three steps in the Create Merch Plan task in order to create the department plans and submit them for approval to the Merch Target user. To do this, the Merch Plan user must first build the workbook.

## Building the Workbook

To build the Merch Plan role workbook, complete the following steps.

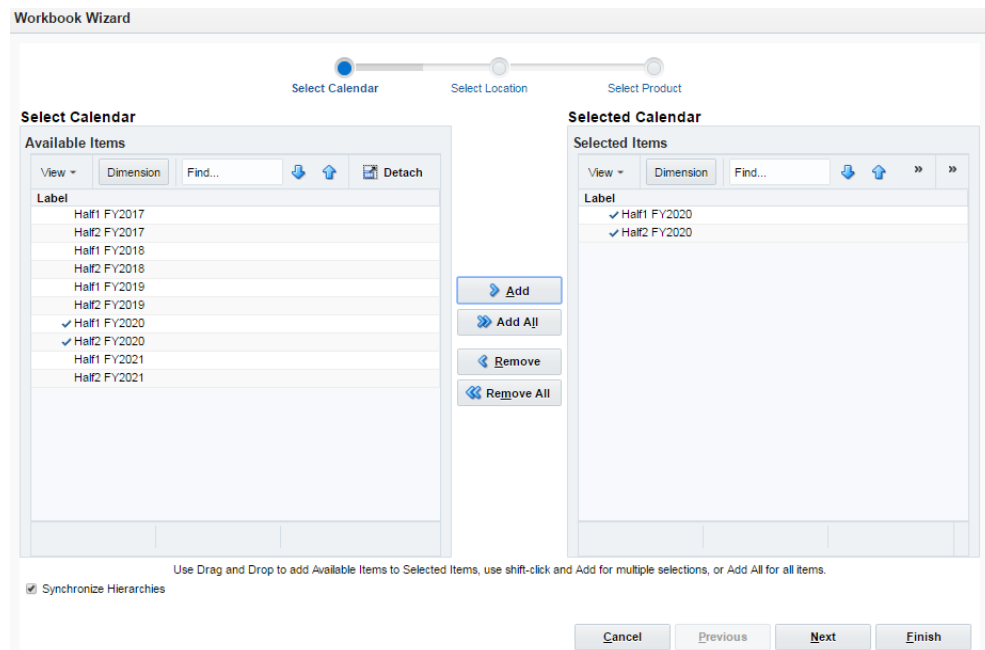

1. Click the **Create New Workbook** icon in the Create Merch Plan task.

**Figure 7–2 Create New Workbook Icon**

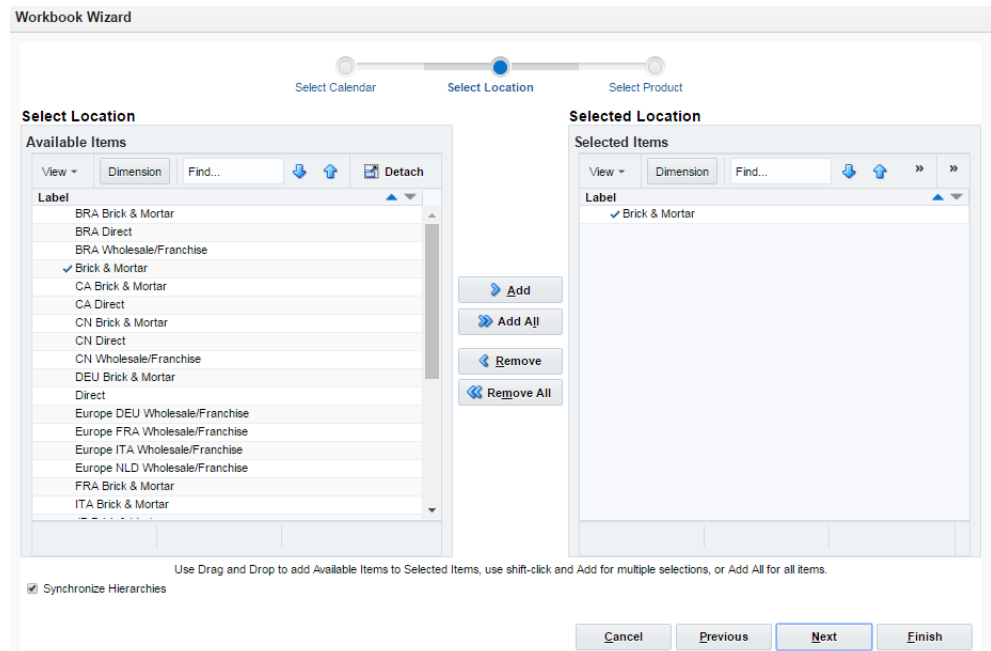

2. The workbook wizard opens at the Calendar Selection step. Select the halves that you want to plan and move them to the Selected Items box. Click **Next**.

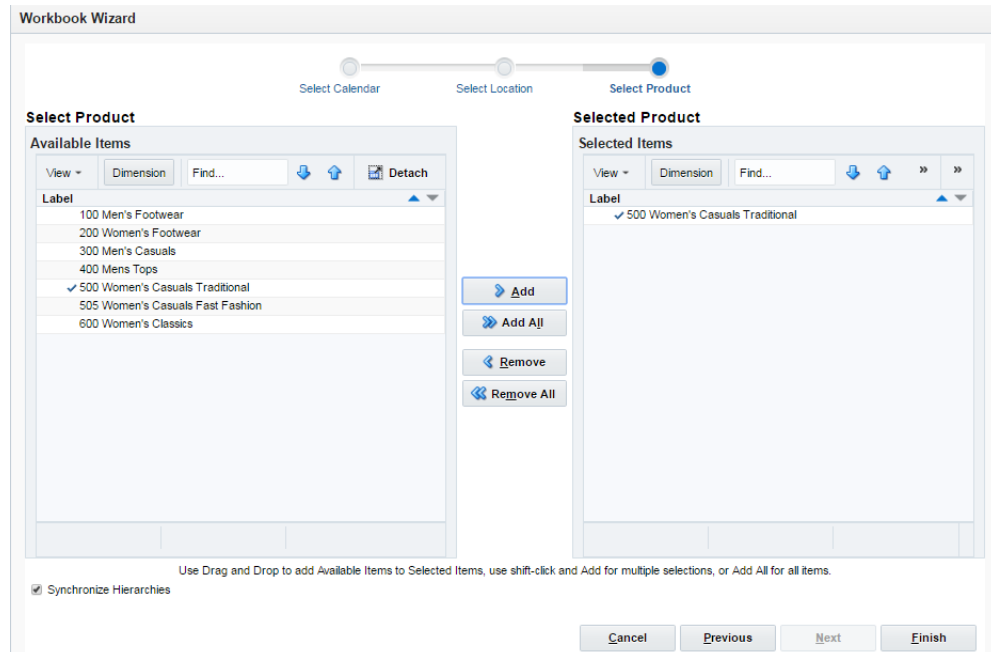

**Figure 7–3 Workbook Wizard: Calendar Selection**

3. The Location Selection step of the workbook wizard is displayed. Select the channels you want to plan and move them to the Selected Items box. Click **Next**.

**Figure 7–4 Workbook Wizard: Location Selection**

4. The Product Selection step of the workbook wizard is displayed. Select the department you want to plan and move it to the Selected Items box. Click **Finish**.

**Figure 7–5 Workbook Wizard: Product Selection**

The Merch Plan role workbook is built, and the Initialize view opens.

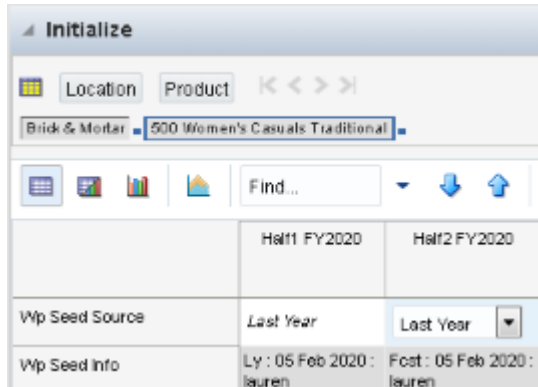

## Create Plan

This section provides details about plan creation.

## Seed Plan

The first action that the Merch Plan users complete when creating a new plan is to seed the plan with the Initialize view. This view is found under the first tab within the Create Targets Step, Seed Plan.

**Figure 7-6 Create Plan - Seed Plan: Initialize Plan View**

**Table 7-1 Merch Plan Measures**

Measure	Description
Seed Source	The seed source used to seed the working plan. Use this option to seed or not seed the working plan. You can seed with Last Year's (Ly) or Forecast (Fcst) data. Alternatively, choose the Blank option if you do not want to seed the working plan.
Seed Info	Includes a few pertinent facts about the last time that the Seed custom menu was executed: last seed source concatenated with last seeded date and the last user to seed. If blank, then the given intersection has never been seeded.

With this view, you can choose to seed your plan with Last Year (Ly) or Forecast (Fcst) data to create a demand curve on which to spread the new plan's initial targets. Or, you can instead choose to not seed the plan, which allows you to create a plan that is not influenced by last year's performance or forecast (plus last year's performance).

In the preceding example, both Half1 and Half2 have been selected to be seeded for the Brick & Mortar channel for the 500 Women's Casuals Traditional department.

### Seeding the Plan

When seeding the plan, you can choose which information is seeded. For instance, you can seed just one half or all halves in the task, as shown in [Figure 7-6](#). You can also choose what locations and products to seed.

There are two ways you can seed. You can seed each level individually, or you can seed several levels at once by changing the dimension level shown in the view.

**Seeding One Level at a Time** As shown in [Figure 7-6](#), only the Brick & Mortar channel and the 20 Menswear division have been selected to be seeded with Ly data. This means that the other product divisions have not been selected to be seeded yet. To seed the next division in the Product dimension within the Brick & Mortar channel, complete the following steps:

1. Click within the dimension field that you want to change, as shown in [Figure 7-7](#).

2. Click the **Next** or **Previous** arrow, as shown in [Figure 7-7](#).

**Figure 7-7 Changing a Dimension Level with Page Arrows**

3. The page refreshes and the next division in the Product dimension is displayed in the page edge. Note that the Seed Source measure is no longer populated.
4. Select the half that you want to seed with Last Year or Forecast data.
5. Click the **Next** arrow to view and seed the next division.
6. When you have selected all the data you want to seed, click **Seed** in the top right corner.

**Figure 7-8 Seed Button**

7. A confirmation message is displayed, stating that the data has been successfully seeded. Click **OK**.

**Figure 7-9 Seeding Success Message**

After you have seeded, the view refreshes and the Last Seed Source and Last Seed Date measures contain the source and date of the last seed.

**Seeding Several Levels at Once** If you want to seed several locations and several products at once, you may want to change the level of the dimensions shown in the page edge.

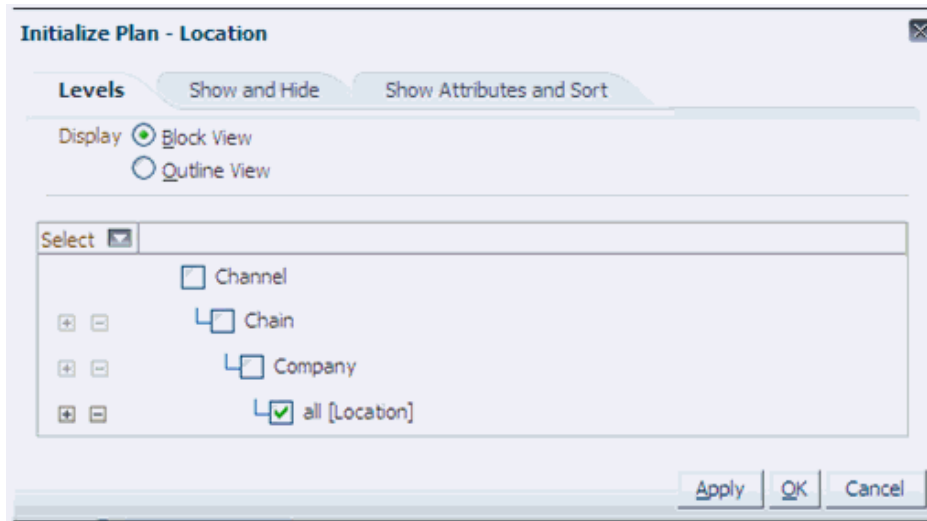

The default setting of the Initialize Plan view is set to show the Calendar dimension at the half level, the Location dimension at the channel level, and the Product dimension at the division level.

To change the dimension level shown in the page edge or grid, complete the following steps:

1. Click the dimension tile of the dimension level you want to change.

**Figure 7–10 Location Dimension Tile**

2. The dimension window is displayed. Select the level of the dimension that you want to appear in the page edge. If you want to view more than one level at a time in the page edge or grid, select multiple levels. In [Figure 7–11](#), Channel was deselected and all [Location] was selected instead.

**Figure 7–11 Location Dimension Window**

3. Click **OK** when finished.
4. Repeat steps 1 through 3 for other dimensions if desired.
5. After the dimensions are at the level you want, select the halves that you want to seed.

In [Figure 7–12](#), both the Location and Product dimensions are at All and the halves Half1 FY2020 and Half2 FY2020 have been set to seed from last year.

6. When you have selected all the data you want to seed, click **Seed** in the top right corner.

**Figure 7–12 Seeding Several Levels at Once**

	H1 TY	H2 TY
Wp Seed Source	Last Year	Last Year <input type="button" value="v"/>
Wp Seed Info	Ly : 05 Feb 2020 : adm	Ly : 05 Feb 2020 : adm

- The view refreshes and the Last Seeded Source and Last Seed Date measures contain the source and date of the last seed. A confirmation message is displayed, stating that the data has been successfully seeded. Click **OK**.

**Figure 7–13 Seeding Success Message**

After you have seeded the divisions, continue to the next tab: Sales/Markdowns.

## Sales/Markdowns

After you have seeded, develop the sales and markdown plan for those departments. The second tab within the Create Plan step, Sales and Markdowns, has one default view: Sales and Markdowns.

## Sales and Markdown Plan - Sales by Type

After you have seeded the groups and reviewed the Merch Target department targets, you can develop the sales and markdown plan for the subclasses within those departments using the Sales and Markdowns view.

Use the following best practices to plan the sales and markdowns.

1. Using the default measure profile, which is Sales and Markdowns, review and compare the total sales to the forecast.
2. Change the measure profile to Sales by Type.

**Figure 7–21 Plan Sales and Markdowns View, Sales by Type Measure Profile**

- In the Sales by Type measure profile, plan your sales by type. The sales types are Total Sales, Regular + Promo Sales, and Clearance Sales.

**Note:** Since sales and markdowns are both planned at the type level, you must first complete the sales by type planning before you can plan the markdowns by type.

Start by planning the regular sales. Then, using your marketing calendar as a guide, align the promotional sales to the calendar. Refer to the calendar again for the exit weeks for the products, and plan the clearance sales for those weeks.

The planned figures for these sales types populates the Wp Sales R measure.

- Return to the Sales and Markdowns measure profile.

8. After you have adjusted the sales and markdown plan, continue to the next tab, Inventory and Receipt Plan.

If the Wholesale Franchise or the Local Currency options are provisioned, then additional views support planning sales and markdowns specifically catered to those options.

- W/F - Sales and Markdowns
- Local - Sales and Markdowns

## Inventory and Receipt Plan

After you have developed the sales and markdown plan, develop a receipts and inventory plan that can support the sales and markdown plan. The purpose of this step is to ensure that you have a receipt and inventory plan that supports the sales that you are projecting.

Like the Plan Sales and Markdowns View, the Plan Receipts/Inventory view contains several Ly metrics that you can reference when setting your targets. There are also additional measures for adjusting your inventory targets. Note that the adjustments you made to the Wp Sales R measure in the Plan Sales and Markdowns view are visible in this view if you have calculated.

Use the following best practices to plan the receipts and inventory.

1. Plan the receipt flow and then evaluate the average inventory and turn.
2. Review the Wp CMU % measure. Cumulative markup rate (CMU %) is a blend of the beginning of period (BOP) inventory retail and cost with the future receipt retail and receipt cost. The Wp CMU % directly affects the cost of goods sold (COGS), which then affects the gross margin.
3. Adjust the Wp Stock to Sales R measure accordingly. These adjustments affect the receipts for both the current month and prior month. However, the total plan period receipts do not increase or decrease; they only shift from month to month.

## Review and Adjust Gross Margin Plan

Use the Gross Margin view to evaluate the gross margin created from your sales and markdown plan and receipts and inventory plan. Determine whether the planned gross margin meets your gross margin goal. If it does not, return to the Develop Sales and Markdown Plan and Develop Inventory and Receipt Plan steps to adjust your receipt markups and receipt flow. When you return to the Sales and Markdowns view, adjust the markdown plans, but do not change the sales. Continue this process until you are satisfied with the gross margin.

If the Wholesale Franchise or the Local Currency options are provisioned, then additional views support planning Gross Margin specifically catered to those options.

- W/F - Gross Margin
- Local - Gross Margin

Now that you have developed your gross margin plans, continue to Review and Reconcile.

## Review and Reconcile: Review with Targets

After you have seeded, you need to review the department targets that the Merch Target user has created for you. The purpose of reviewing the targets is to understand the goal that your plan should meet.

The Review with Target view contains the Merch Target (Tgt) measures as well as planning (Wp) measures. Use this view to compare the Tgt measures to the corresponding Wp measures. By comparing the Merch Target to the planning metrics, you can better understand what your plan needs to achieve.

Figure 7–26 Review with Target View

## Retrieving Updated Department Targets

If the Merch Target user updates the department targets after you have created your subclass plans, you will need to retrieve those new targets. You can retrieve them in one of two ways. You can build a new workbook that uses the updated department targets from the domain. Or, if you want to bring the new targets into one of your existing tasks, you can refresh the task.

### Refresh the Workbook

When refreshing a workbook, you can run a refresh rule group that has been configured to retrieve data from the master database.

To refresh a workbook, click **Refresh** in the toolbar. Or, choose the Refresh option from the Edit menu. Since only one rule group exists for this workbook template, there are no options to choose from. The one refresh rule group runs, and measures configured in that rule group are updated.

Figure 7–27 Refreshing a Workbook

For more information about the refresh option, see the *Oracle Retail Predictive Application Server User Guide for the Fusion Client*. For information about creating refresh rule groups, see the *Oracle Retail Predictive Application Server Configuration Tools User Guide*.

After you have reviewed and compared the Merch Targets targets to last year's metrics, continue to the next step: Develop Sales and Markdown Plan.

## Reconcile to Department Targets

After you have created your plan, use the default measure profile located on the Review with Target worksheet view to reconcile the Merch Plan to Department Targets.

**Figure 7–28 Review with Target View**

## Review and Submit Plan

When you are ready to submit your working plan to the Merch Target user for approval, continue to Review and Submit task.

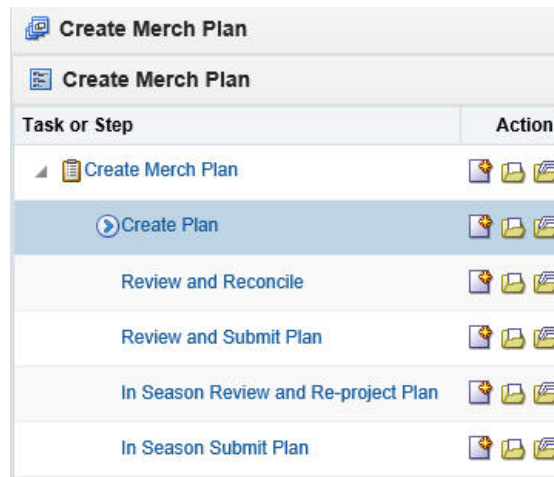

1. In the taskflow, click the **Open** icon in the Review and Submit task.

---

**Note:** You can either open a workbook or create a new workbook. If you have committed the workbook used in the previous task, you can build a new one and see the data you need. If you did not commit that one, you must open it to complete this process.

---

**Figure 7–31** Open Workbook Icon for Review and Submit Plan Task

2. The Open Workbook dialog box opens. Select the workbook that you want to submit and click **Open Workbook**.

**Figure 7–32** Open Workbook Dialog Box

3. The workbook opens at the Submit Plan view.

## Submit and Approve Plan

When you are ready to submit your working plan to the Merch Target user for approval, use the Submit Plan view.

**Note:** When the Op Approve Enabled measure is selected, you can submit a plan for the Op version. This measure is set by an administrator in the Enable OP Approval administration task. The administrator can select or deselect this option at any time. If the administrator deselects it during the in-season, you will not be able to submit a plan for the Op. The administrator may choose to do this after the planning process has been finalized in order to lock down the Op. If this occurs, you will be unable to submit a plan for the Op and the Merch Target user will be unable to approve a plan for the Op.

**Figure 7–33 Submit and Approve Plan View**

	Half1 FY2020	Half2 FY2020
Wp Submit	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Wp Submit Info	lauren : 05 Feb 2020 :	lauren : 05 Feb 2020 :
Wp Approval Status	Submitted	Submitted
Wp Copy Approved Plan	<input type="checkbox"/>	<input type="checkbox"/>

1. Submit the working plan by using the Wp Submit measure.
2. Optional: Enter information about the working plan in the Wp Submit Notes measure.
3. Click the **Submit** button at the top right of the view.
4. A success message is displayed. Click **OK** to close it.

**Figure 7–34 Success Message - Plan Submitted**

As a result of running the submit custom menu, the Wp Submit and Wp Submit Info measures are cleared and the Wp Approval Pending check boxes are checked. The Wa Submit By, Wa Submit Date, and Wa Submit Info measures are populated. In addition, your working plan is copied into a Waiting for Approval (Wa) plan.

After the Merch Targets user approves or rejects the Wa plan, you can see the approval or rejection information by accessing the Review Plan Approval Status view in the Original Plan Submit step.

**Figure 7–35 Submit and Copy Approved Plan View**

The screenshot shows a software interface with a table titled "Submitted and Approved Plan". The table has columns for "Measure | Label" and ten weeks of the year (W1 of TY to W10 of TY). The data is as follows:

## Next Steps

After you have submitted your plan to the Merch Targets user, the Merch Targets user approves or rejects your submitted plan.

If the plan is approved, you must run the custom menu, Copy Approved Plan, in order to move the approved Wa to the Cp/Op versions.

If the plan is rejected, adjust your plan using the steps described in this chapter and submit it again. Since you have already created a working plan, there is no need to seed the task again unless you want to start again with Ly (Last Year) data.

---

## Create Location Targets Task

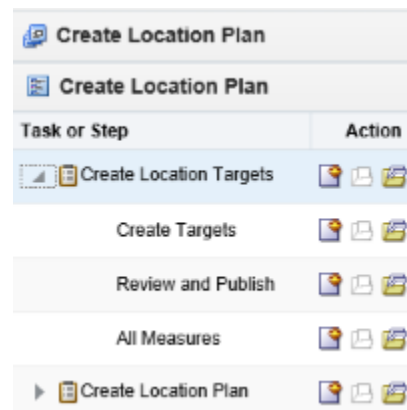

The Create Location Targets task is the process in which planners create the financial targets for the individual locations. These targets are then reconciled to the location plan to ensure proper execution.

### Building the Workbook

To build the Location Targets workbook, complete the following steps.

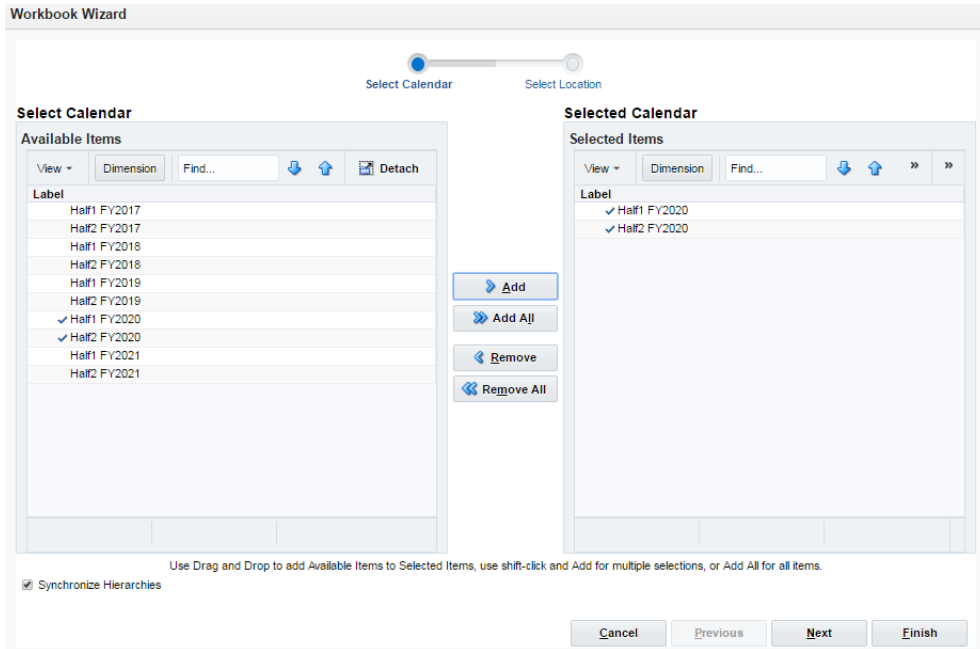

1. Click the **Create New Workbook** icon in the Create Location Targets task.

**Figure 8–1** Create Location Targets Task

2. The workbook wizard opens at the Calendar Selection step. Select the halves that you want to plan and move them to the Selected Items box. Click **Next**.

**Figure 8–2 Workbook Wizard: Calendar Selection**

3. The Location Selection step of the workbook wizard is displayed. Select the channels you want to plan and move them to the Selected Items box. Click **Finish**.

## Plan Sales/Markdowns View

After you have seeded, develop the sales and markdown targets for those locations.

**Figure 8–3 Plan Sales/Markdowns View**

If the Wholesale Franchise or Local Currency options are provisioned, then there are additional views to support planning sales and markdowns specifically catered to those options:

- W/F - Sales and Markdowns
- Local - Sales and Markdowns

## Review and Publish

In this step, review the targets you created. Use the Publish Targets custom menu when you are ready to publish the targets you created.

**Figure 8–4 Review and Publish Step**

At the Review Targets step, review the targets you created in the Create Targets step. Use the Location Plan measure profiles to reconcile your plan to the top down targets.

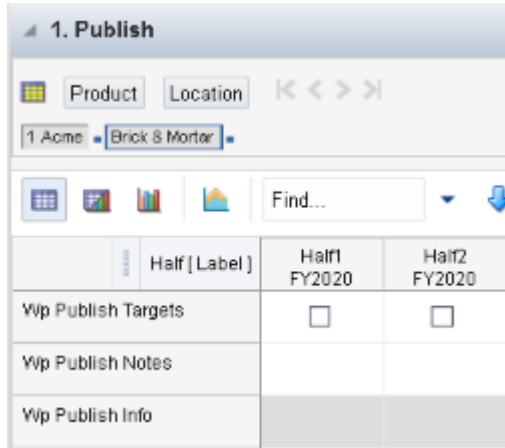

**Figure 8–5 Review & Reconcile View**

## Publish

Publishing a target copies the Wp measure information to the Tgt measures in your task and then it commits them to the database so that Location Plan users can retrieve those targets.

**Figure 8–6 Publish View**

## Review Targets

This view allows you to review your published Tgt measures.

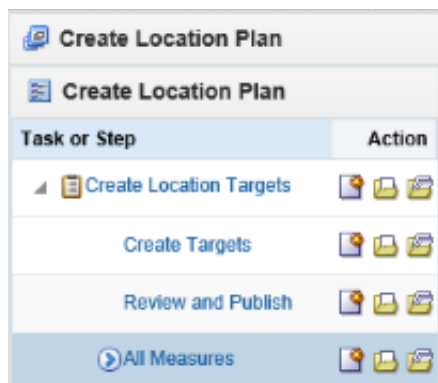

**Figure 8–7 Review Targets View**

## All Measures

The purpose of this step is to allow you to create a view of workbook measures that you may not be able to view at the same time in other views.

Figure 8–8 All Measures

## All Measures View

The All Measures view contains all the measures contained in the workbook; however, only the Wp Sales R measure is visible in the default measure profile.

Figure 8–9 All Measures View

	2/8/2020	2/15/2020	2/22/2020	2/29/2020	3/7/2020	3/14/2020	3/21/2020	3/28/2020	4/4/2020	4/11/2020
Wp Sales R	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00

## Create Location Plan Task

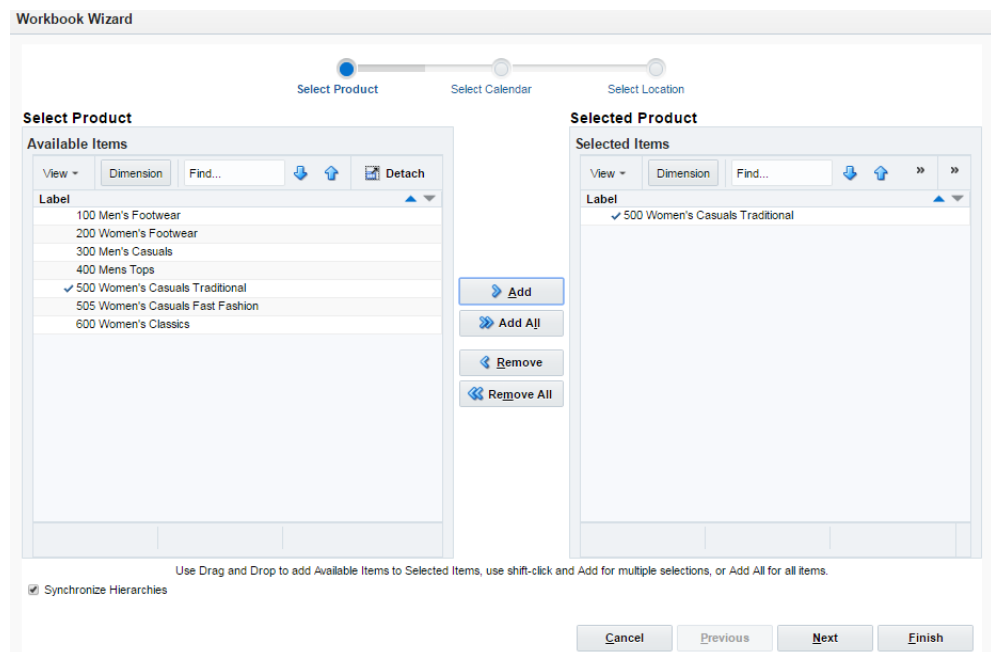

Location Planning is the process in which planners create the location plans at the store level. These plans are then compared to and reconciled against the Merch Plan.

### Building the Workbook

To build the workbook, complete the following steps.

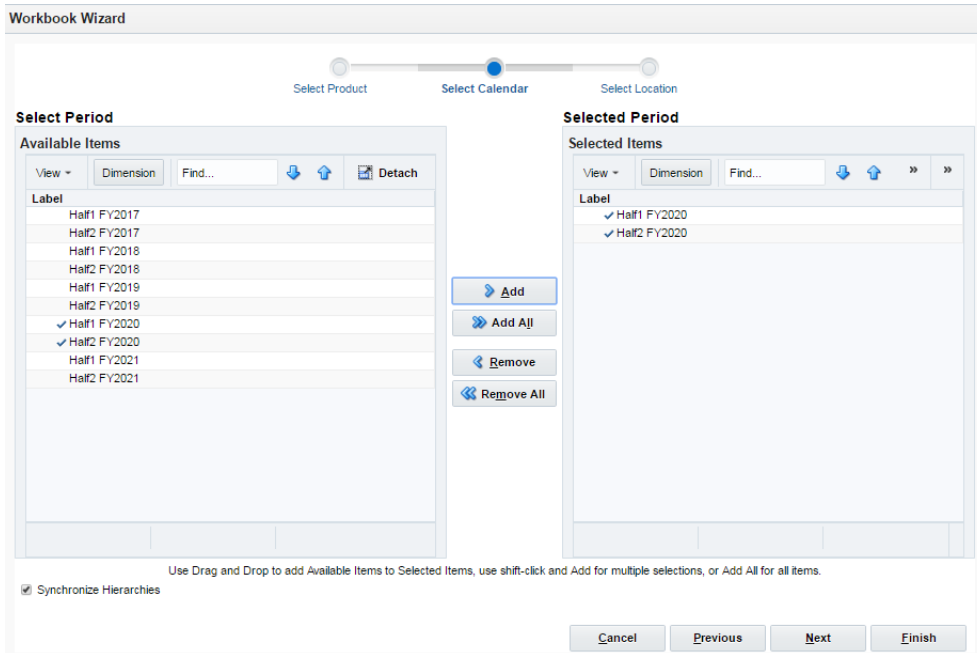

1. Click the **Create New Workbook** icon in the Create Location Plan step.
2. The Product Selection step of the workbook wizard is displayed. Select the department you want to plan and move it to the Selected Items box. Click **Next**.

**Figure 9–1 Workbook Wizard: Product Selection**

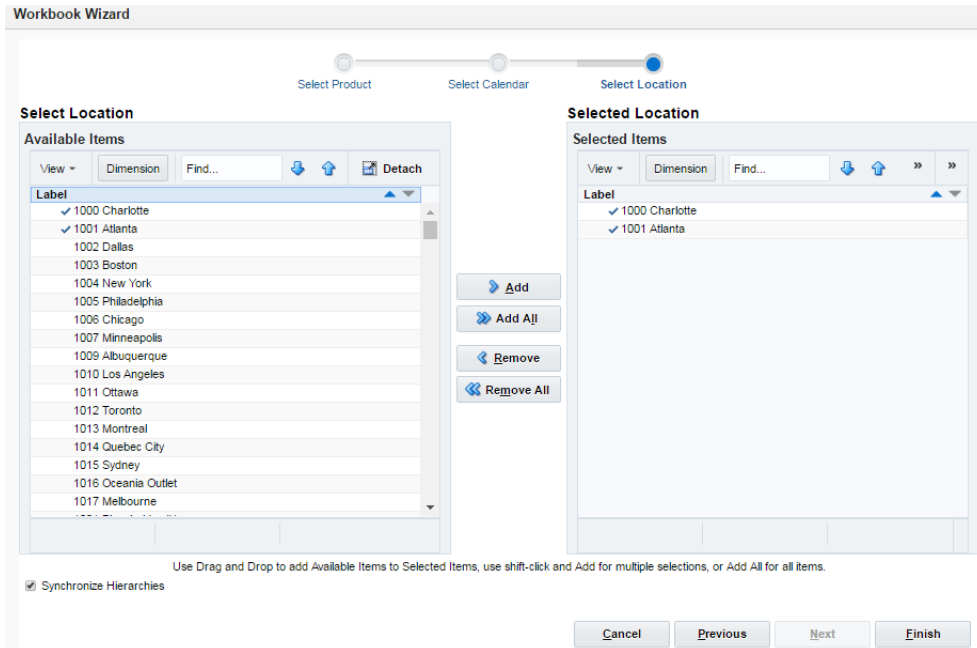

3. The workbook wizard opens at the Calendar Selection step. Select the halves that you want to plan and move them to the Selected Items box. Click **Next**.

**Figure 9–2 Workbook Wizard: Calendar Selection**

4. The Location Selection step of the workbook wizard is displayed. Select the channels you want to plan and move them to the Selected Items box. Click **Finish**.

**Figure 9–3 Workbook Wizard: Location Selection**

## Create Location Plan

This section describes location plan creation.

## Seed Plan

The first action that the location target users perform when creating a new plan is to seed the plan with the Seed Sales view. This view is found under the first tab within the Create Plan step, Seed Sales.

**Figure 9–4 Create Plan - Seed Sales: Initialize Plan View**

	Half1 FY2020	Half2 FY2020
Wp Seed Source	Last Year	Last Year
Wp Seed Info		

**Table 9–1 Top Down Initialize Plan Measures**

Measure	Description
Wp Seed Source	The seed source used to seed the working plan. Use this option to seed or not seed the working plan. You can seed with Last Year's (Ly) or Forecast (Fcst) data. Alternatively, choose the Blank option if you do not want to seed the working plan.
Wp Seed Info	Includes a few pertinent facts about the last time that the Seed custom menu was executed: last seed source concatenated with last seeded date and the last user to perform the Seed.  If blank, then the given intersection has never been seeded.

With this view, you can choose to seed your plan with Last Year (Ly), Forecast (Fcst), or Targets (Tgt) data to create a demand curve on which to spread the new plan's initial targets. Or, you can instead choose to not seed the plan, which allows you to create a plan that is not influenced by last year's performance or forecast (plus last year's performance).

In the preceding example, both Half1 and Half2 have been selected to be seeded for the Brick & Mortar channel.

See [Table 9–2](#) for the list of measures that are seeded for different seeding options.

**Table 9–2 Seeding Options**

## Plan Receipts/Inventory

The third tab within the Create Location Plan step, Inventory/Gross Margin, has two default views: Plan Receipts/Inventory and Gross Margin.

After you have developed the sales and markdown plan, develop a receipts and inventory plan that can support the sales and markdown plan. The purpose of this step is to ensure that you have a receipt and inventory plan that supports the sales that you are projecting. Like the Plan Sales and Markdowns View, the Plan Receipts/Inventory view contains several Ly metrics that you can reference when setting your targets. Additional measures can be used to adjust your inventory targets.

**Figure 9–9 Plan Receipts/Inventory View**

Use the Gross Margin view to evaluate the gross margin created from your sales and markdown plan and receipts and inventory plan. Determine whether the planned gross margin meets your gross margin goal. If it does not, return to the Plan Sales and Markdown Plan and Plan Inventory and Receipt Plan steps to adjust your receipt markups and receipt flow. When you return to the Plan Sales and Markdowns view, adjust the markdown plans, but do not change the sales. Continue this process until you are satisfied with the gross margin.

## Review and Reconcile to MFP

In this step, review and compare your targets to the top down targets to see if you meet the goals created by the top down user. Use the MFP OP and the MFP CP measure profiles to reconcile your location plan to the Merch Plan and Merch Targets.

## Review and Approve

In this step, the location planner can review and approve the created location plan. The Review and Approve step contains two views: Review Plan and Approve Plan.

### Review Plan

In this step, review the location plan you created. Use the Approve Plan custom menu when you are ready to approve the location plan you created. The purpose of reviewing the plan is so that you can understand the goals that your plan should meet.

**Figure 9–14 Review Plan**

	2/8/2020	2/15/2020	2/22/2020	2/29/2020	3/7/2020	3/14/2020	3/21/2020	3/28/2020	4/4/2020	4/11/2020

## Review and Re-Approve

Use this step to review the location plan during in-season for On Order and Open to Buy and to update the plan and reapprove if necessary. The Review and Re-Approve step has two views: Review and Re-Project Plan and Approve Plan.

**Figure 9–16 Review and Re-Approve**

## Review and Re-Project Plan

In this view, the user can review the On Order and Open To Buy during in-season and adjust planned inventory data as needed and re-approve the CP Plan.

## In-Season Management

Merch Targets and Merch Plan users can both use the Create Merch Plan Targets and Create Merch Plan activity during the in-season to review plans and compare those plans to the season actuals. Merch Targets users review the targets and the plans created by the lower level users and determine how those plans compare to actuals. Merch Plan users can review plans to actuals and also adjust the plans with the Update Department Plans task.

One of the key steps of in-season management is reviewing Open to Buy (OTB). OTB is the amount of money budgeted during the in-season to purchase goods that have not yet been received or ordered. The Merch Plan user can decide in-season how to spend this money to reach strategic targets.

Each role has its own task within the Create Merch Plan Targets and Create Merch Plan activity. The activities of each role are described in this chapter.

The Merch Plan Targets user can use the In Season Review and Re-project Targets task to review the targets and plans created by the lower level users and determine how those plans compare to actuals. The In Season Review and Re-project Targets has six tabs, two of which are used to re-approve an already submitted plan.

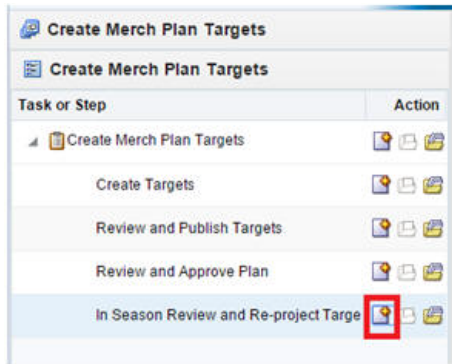

- Review and Re-project
- Open to Buy
- Publish Targets
- Projection
- Review Plan
- Approve View

### Building the Workbook

To build the In Season Review and Re-project Targets workbook, complete the following steps.

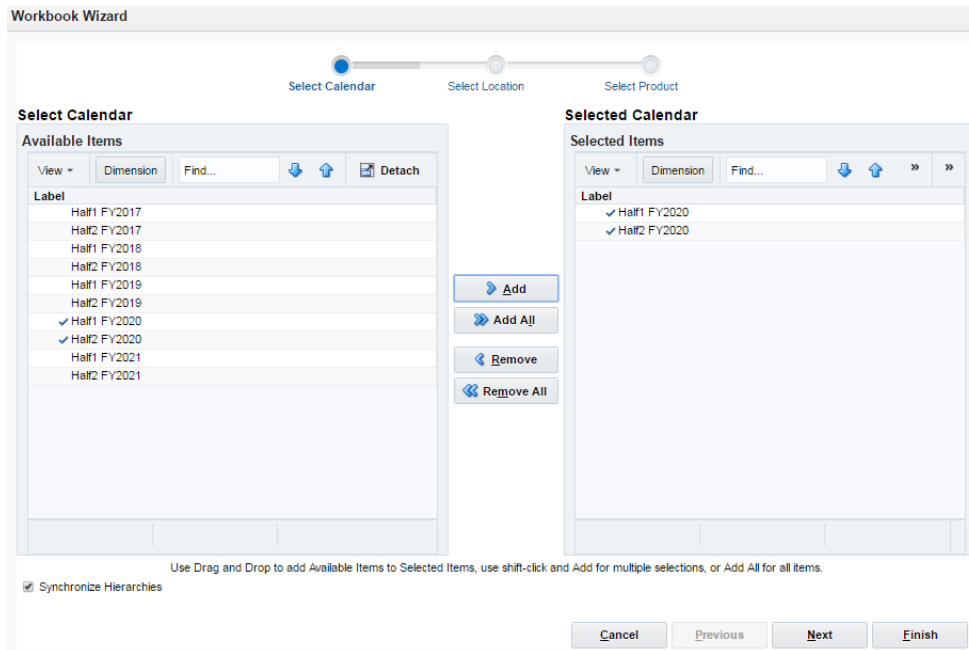

1. Click the **Create New Workbook** icon in the In Season Review and Re-project Targets task.

**Figure 10–1 Create New Workbook**

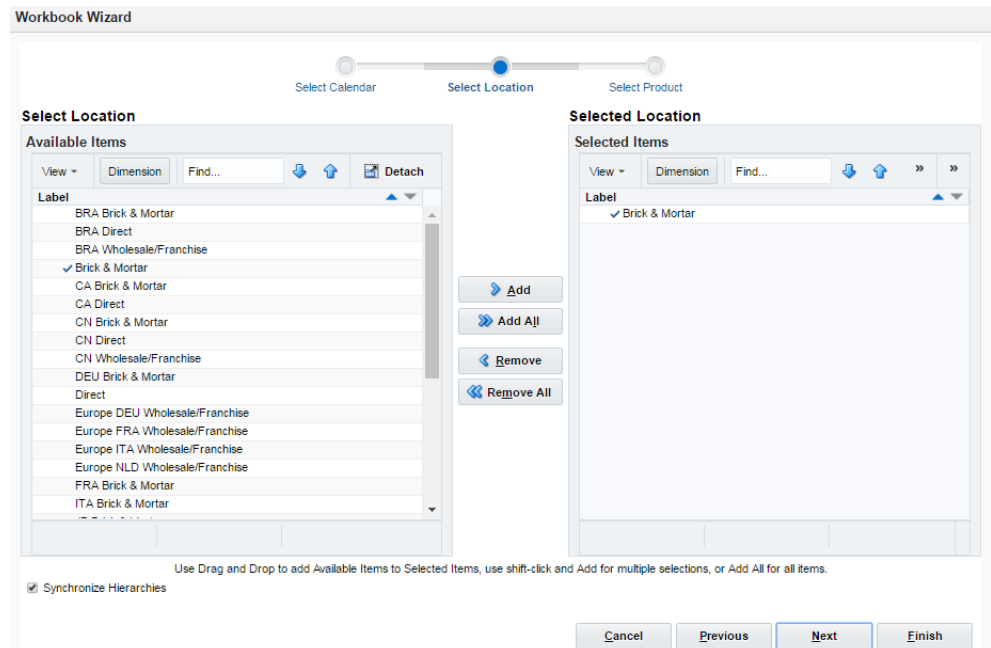

2. The workbook wizard opens at the Calendar Selection step. Select the halves that you want to plan and move them to the Selected Items box. Click **Next**.

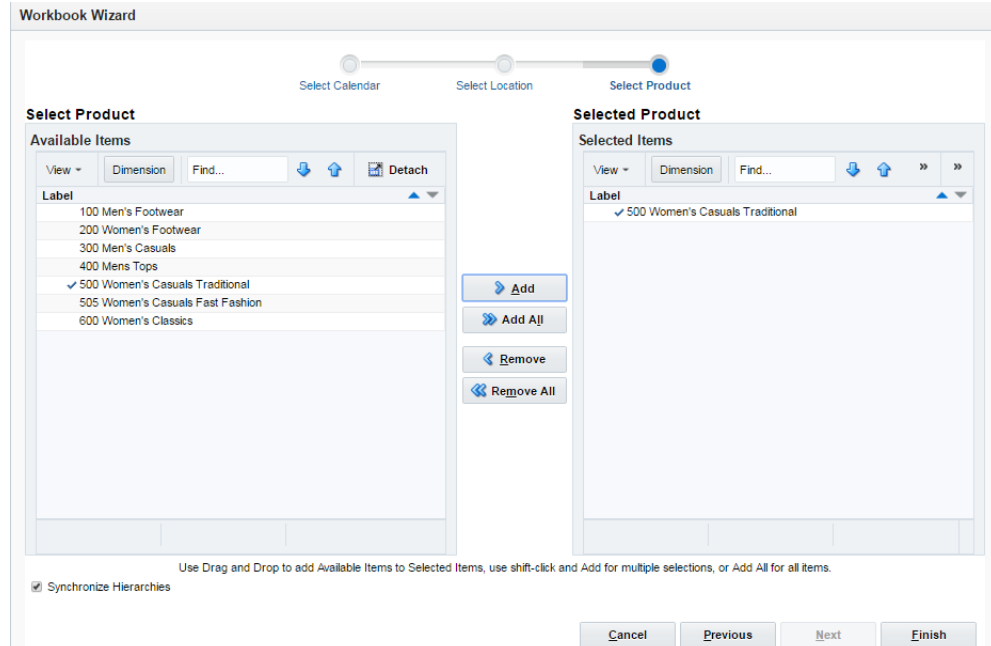

**Figure 10–2 Workbook Wizard: Calendar Selection**

3. The Location Selection step of the workbook wizard is displayed. Select the channels you want to plan and move them to the Selected Items box. Click **Next**.

**Figure 10–3 Workbook Wizard: Select Channel**

4. The Product Selection step of the workbook wizard is displayed. Select the product you want to plan and move it to the Selected Items box. Click **Finish**.

**Figure 10–4 Workbook Wizard: Select Product**

The workbook is built, and the Review and Re-project view is visible.

## Review and Pre-Project

Use the Review and Re-project view to compare your plan to the current plan, the original plan, and last year's actuals. Use the three measure profiles in this view to complete these tasks:

- Default

Figure 10–5 Review and Re-Project Default

- Tgt with Cp

Figure 10–6 Review and Re-Project Tgt with Cp

- Tgt with Op

**Figure 10–7 Review and Re-Project Tgt with Op**

The screenshot shows a software interface titled 'Review Targets'. At the top, there are tabs for 'Review and Re-project', 'Retail Targets', 'Review Plan', 'Approve', 'Open to Buy', and 'Reproject'. Below the tabs, there are fields for 'Location' and 'Product'. The main area is a data grid with columns representing dates from 2/19/20 to 6/10/20. The rows include:
 

- My Net R**: A row of numerical values representing net receipts.
- Op Net R**: A row of numerical values representing net receipts on order.
- My Net R %**: A row of percentage values representing the percentage of net receipts.
- Op Net R %**: A row of percentage values representing the percentage of net receipts on order.
- My EOP R**: A row of numerical values representing end-of-period receipts.
- Op EOP R**: A row of numerical values representing end-of-period receipts on order.
- My Receipts R**: A row of numerical values representing receipts.
- Op Receipts R %**: A row of percentage values representing receipts on order.

**Open to Buy**

The Open to Buy Tab has one view: Open to Buy. Use the Open to Buy view to understand the variance between the current planned receipts and their markup to the on order and any on order adjustments. This variance is shown in the Wp OTB R and Wp OTB MU% measures. These measures indicate how many additional receipts can be purchased as well as what markup to use in order to purchase these for the current approve receipt retail and markup plan. Users should understand if their planned receipts keep them on the overall Cp EOP inventory plan. To understand the variance between the Cp EOP inventory plan and the Wp EOP inventory plan, users can reference the measure Wp EOP R Var Cp%. Use this view to validate what OTB you have available and then start adjusting your plan. Then, confirm that your updates can be obtained given the OTB constraints you may have. Use the following best practices to adjust OTB.

- To understand the difference between the current approved receipts and the net on order, compare the Cp Receipts R plan to the Wp Net On Order R.

- Compare the Cp Receipts MU% plan to the Wp Net On Order MU%. If receipts are booked for non-elapsed periods, you can enter this Wp Receipt R and Wp Receipt MU% data into the Wp On Order Adj R and Wp On Order Adj MU% respectively to capture the Wp OTB measures. For example, this may occur if receipts book daily for the retailer, and OTB is completed on a Tuesday. By using the Wp On Order Adj measures, you can capture all receipts for comparing the Net On Order to the Cp receipt plan.

**Update Sales and Markdowns Targets**

Use the Review and Re-project tab under In Season Review and Re-project Targets step to adjust the sales and markdown targets for department. The view used in the In Season Review and Re-project Targets step is the Review and Re-project tab view. This view contains several metrics that you can reference when setting your plan. You can use the Ly measures as guidelines for entering data in the corresponding Wp measures.

**Figure 10–9 Update Sales and Markdowns Targets**

In this view, you typically complete the following steps to adjust the sales and markdown plan that reflects what you plan to achieve in the period you are planning.

1. Adjust the desired sales plan by week. You can enter amounts for each week. Or, if you know the aggregate amount for a month, quarter, half, or year, you can enter that amount at that level and then let it spread down to the weeks.
2. Focus on markdowns by validating the changes you must make.
3. If necessary, you can validate the unit plan by entering data in the average unit retail (AUR) or unit (U) measures.

After you have adjusted the sales and markdown plan, continue to the next step, "Update Receipts and Inventory Plan".

### Update Receipts and Inventory Plan

After you have adjusted the sales plan by setting the sales and markdown targets, adjust the inventory plan so that it can support the sales plan. An inventory plan is created by a value plan and a unit plan, which are both composed of inventory and receipt targets. First, adjust the value plan. After you have adjusted the value plan, review the unit plan. The unit plan is essentially the value plan translated into units, based on the appropriate average unit retail (AUR). Because of this, the unit plan is affected by the changes you made to the value plan. If the value plan has created an unachievable unit plan, adjust both as necessary to meet your goals. The purpose of this step is to ensure that you have a receipt plan and an inventory plan that support the sales that you are projecting.

Use the following best practices to plan the receipts and inventory.

- Plan the receipt flow and then evaluate the average inventory and turn.
- Review the Wp CMU% measure. Cumulative markup rate (CMU%) is a blend of the beginning of period (BOP) inventory retail and cost with the future receipt

retail and receipt cost. The Wp CMU% directly affects the cost of goods sold (COGS), which then affects the gross margin.

- Adjust the Wp Stock to Sales ratio R measure accordingly. These adjustments affect the receipts for both the current month and prior month. However, the total plan period receipts do not increase or decrease; they only shift from month to month.

Figure 10–10 Update Receipts and Inventory Plan

The screenshot displays the 'Review Targets' application window. At the top, there are tabs for 'Review and Re-project', 'Publish Targets', 'Review Plan', 'Approve', 'Open to Buy', and 'Projection'. Below the tabs, there are filters for 'Location' and 'Product'. The main area contains a grid with columns representing months from 2/0000 to 9/0000. The rows represent various metrics:

- Gross Sales R:** Values range from approximately 250,000 to 400,000.
- Net Sales R:** Values range from approximately 150,000 to 250,000.
- Inventory R:** Values range from approximately 10,000 to 20,000.
- Receipts R:** Values range from approximately 10,000 to 20,000.

Each cell in the grid contains a numerical value. The bottom of the window shows 'Review Targets' and navigation arrows.

After you have determined that the value and unit plans that you have created are achievable, continue to the ["Review and Update Gross Margin Plan"](#) step, where you can review the gross margin plan to see if your sales and inventory plans achieve your gross margin goal you have been given.

### Review and Update Gross Margin Plan

Use the Review and Re-project Targets view to review the gross margin plans that were created by the value and unit plans you developed. You should use the Review and Re-project Targets view to determine whether the gross margin plans meet the gross margin goal that you have been given. If the gross margin plans do not meet your goal, make the necessary adjustments to your sales and inventory targets. Continue this process until you are satisfied with the gross margin plans.

Figure 10–11 Review and Update Gross Margin Plan

## Publish Targets

Use the Publish Targets tab under In Season Review and Re-project step when you are ready to publish the targets you created (publish the updated targets). Publishing a target copies your Merch Target Wp measure information to the Tgt measures in your task and then it commits those target measures to the database so that Merch Plan users can retrieve those targets.

The Tgt measures are shown in the Published Targets view found in the Publish Targets tab. These measures initially have existing targeted values. After the targets are published in this step, these measures are populated with the updated target information.

To publish the targets, complete the following steps.

1. Enable the Wp Publish Targets measure check box to select the halves that you want to publish.
2. If necessary, enter relevant information in the Wp Publish Notes measure. This is optional.
3. Repeat steps 1 and 2 for other locations and products if necessary.
4. Click **Publish Targets**. This button is located in the top right corner, as shown in [Figure 10–11](#).
5. A success message is displayed. Click **OK** to close it.

**Figure 10–12 Success Message**

- The view refreshes and clears the data in Wp Publish Targets and Wp Publish Notes measures. It populates data for the Tgt Publish Info measure as name:date:Notes. The Tgt measures in this view are populated.

## Projection

The Projection view contains all the measures contained in the task; however, only the Wp Sales R measure is visible in the default measure profile. Use this task to create a view of task measures that you cannot view at one time in other views.

**Figure 10–15 Weekly In-Season Projection**

To see the other measures in this view, complete the following steps:

1. Click the Measure dimension tile. The All Measures - Measure window is displayed.
2. Move the measures you want to see in the view from the Hidden Measures box to the Visible Measures box.
3. When finished, click OK.

## In-Season Review and Re-Project

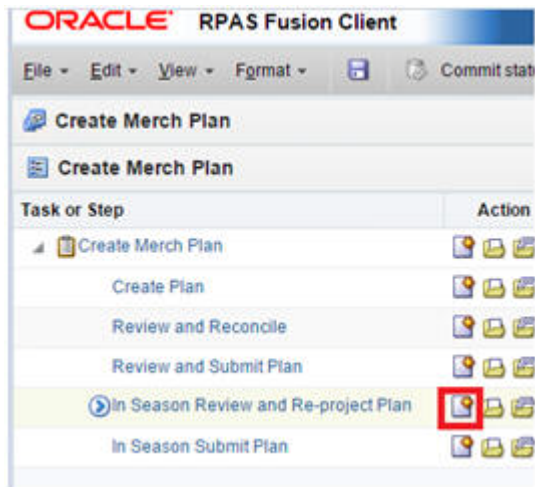

After you have published your targets and committed your task, the Merch Plan user can use the targets to re-project the plan. The Merch Plan user can use the In Season Review and Re-project Plan task to review the plan and the targets created by the higher level users and determine how those plans compare to actuals.

### Create

To build the In Season Review and Re-project Plan workbook, complete the following steps.

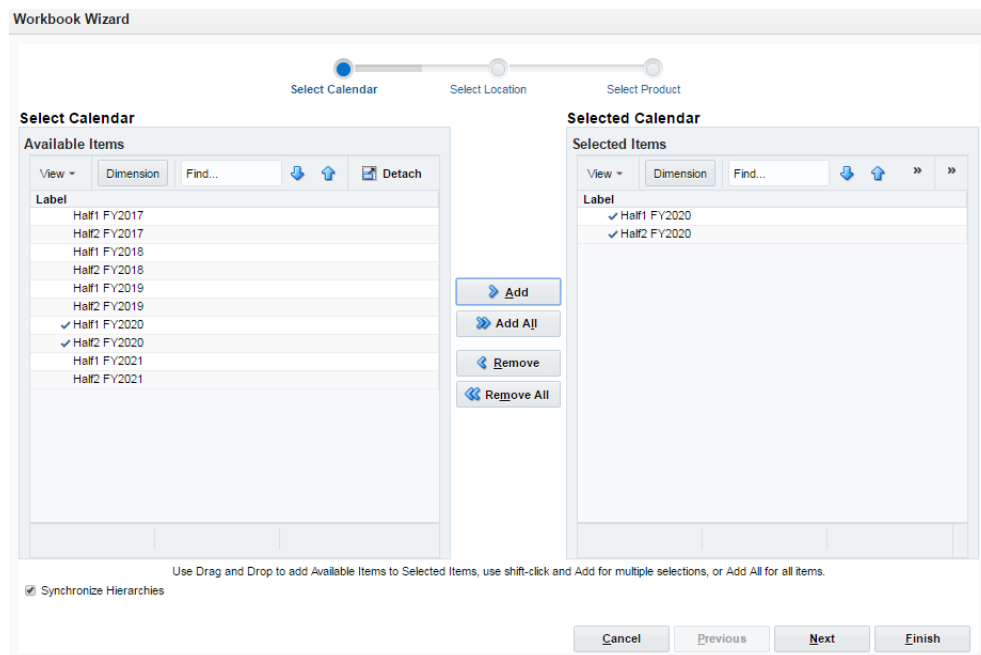

1. Click the **Create New Workbook** icon in the In Season Review and Re-project Plan task.

**Figure 10–16 In-Season Review and Re-Project Plan**

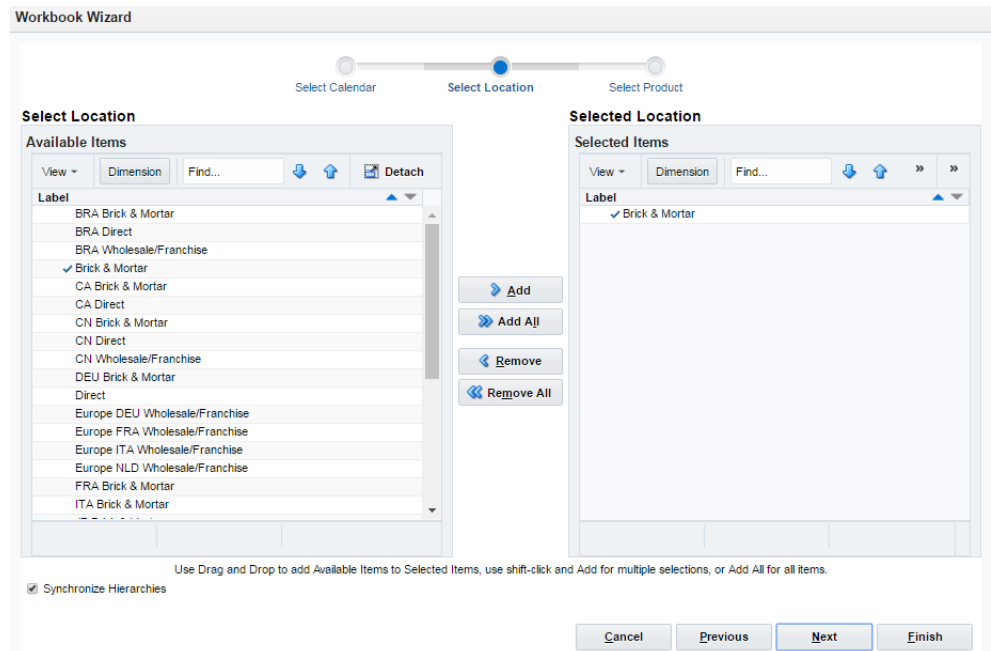

2. The workbook wizard opens at the Calendar Selection step. Select the halves that you want to plan and move them to the Selected Items box. Click **Next**.

**Figure 10–17 Workbook Wizard: Calendar Selection**

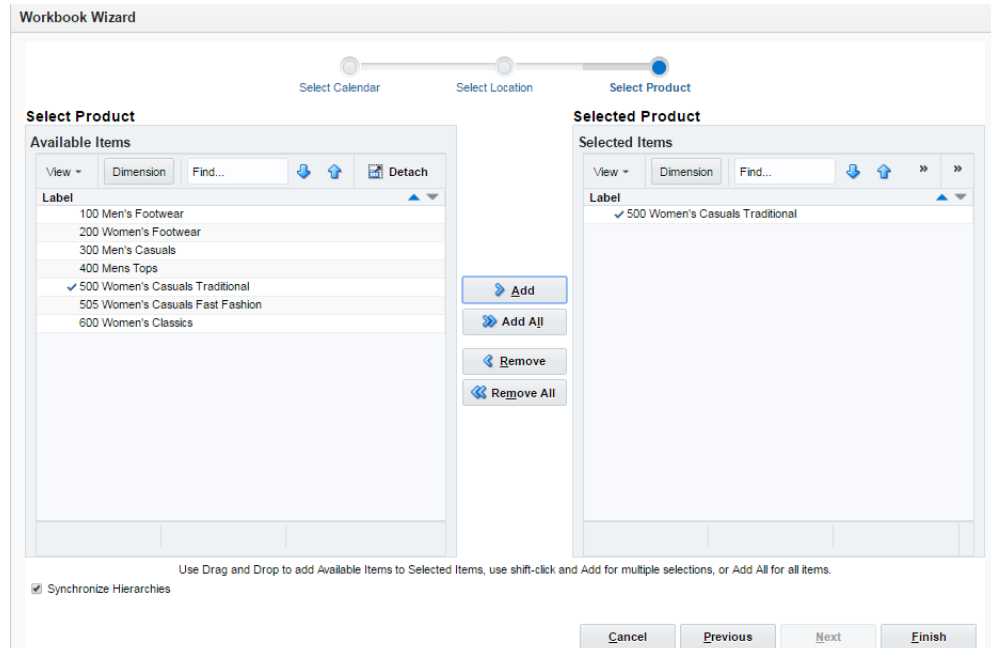

3. The Location Selection step of the workbook wizard is displayed. Select the channels you want to plan and move them to the Selected Items box. Click **Next**.

**Figure 10–18 Workbook Wizard: Channel Selection**

4. The Product Selection step of the workbook wizard is displayed. Select the product you want to plan and move it to the Selected Items box. Click **Finish**.

**Figure 10–19 Workbook Wizard: Product Selection**

The workbook is built, and the Review Plan view is visible.

The In Season Review and Re-project Plan Task has the following tabs:

- Review Plan
- Review with Targets

- Review with Location Plan
- Open to Buy
- Projection

## Review

Use the Review Plan to compare your plan to the current plan, the original plan, and last year’s actuals. Use the three measure profiles in this view to complete these tasks: Wp/Ly, Wp/Cp, and Wp/Op.

The next step for the planner is to review the plan with the re-projected targets.

## Review with Targets

After reviewing the plan, you must review the department targets that the Merch Targets user has created for you. In this way you can understand the goals that your plan should meet.

**Figure 10–23 Review with Targets**

	2/19/20	3/19/20	4/19/20	5/19/20	6/19/20	7/19/20	8/01

Rev Revenue R	0.00	0.00	1,424,216.27	0.00	0.00	0.00	1,535,588.35

Use the Review with Target view under In Season Review and Re-project Plan step to adjust the sales and markdown, inventory, and gross margin for subclasses within a department by considering the targets that have been re-projected by the Merch Target role users.

Figure 10–24 Update Sales, Markdowns, Inventory, and GM Measures

The screenshot shows the 'Review with Target' interface. The main data area contains a table with the following structure:

- Columns:** Months from 2/1/2020 to 1/31/2021.
- Rows:**
  - Sales:** Wp Sales R, Tp Sales R, Wp Sales R per Tp %.
  - Inventory:** Wp Inventory R, Tp Inventory R, Wp Inventory R per Tp %.
  - Markdowns:** Wp Markdown R, Tp Markdown R, Wp Markdown R per Tp %.
  - Results:** Wp Results R.

### Review with Locations

Use these two measure profiles to compare your plan: Wp/LPCp and Wp/LPOp.

Figure 10–25 Review with Location Plan, CP Value View

The screenshot shows the 'Review with Location Plan' interface. The main data area contains a table with the following structure:

- Columns:** Months from 2/1/2020 to 1/31/2021.
- Rows:**
  - Sales:** Wp Sales R, LP Cp Sales R, Wp Sales R per LP Cp %.
  - Inventory:** Wp Inventory R, LP Cp Inventory R, Wp Inventory R per LP Cp %.
  - Markdowns:** Wp Markdown R, LP Cp Markdown R, Wp Markdown R per LP Cp %.
  - Results:** Wp Results R.

**Figure 10–26 Review with Location Plan, OP Value View**

The screenshot shows the 'Review with Location Plan' window. The 'Open to Buy' tab is selected. The table displays data for various metrics across 24 time periods. The metrics include:

- My Sales R
- LP Co Sales R
- My Net Sales R
- My Net Sales R %
- LP Co Net Sales R
- LP Co Net Sales R %
- My Net Sales R for LP Co %
- My Net Sales R
- My Net Sales R %
- LP Co Net Sales R
- LP Co Net Sales R %
- My Net Sales R for LP Co %
- My Receipts R
- My Receipts R %
- Co Receipts R
- Co Receipts R %
- My Dr Order R
- My Dr Order R %
- My Dr Order Adj R
- My Dr Order Adj R %
- My Net Dr Order R

## Review Open to Buy

Use the Open to Buy view to review your adjusted plan. The primary in-season task for the Merch Plan user is to review the OTB and adjust receipts if necessary. You can do this only if you have open to buy available. In the Review OTB step, you may have adjusted the OTB. Use this view to confirm that your updates can be obtained, given the OTB constraints you may have.

**Figure 10–27 Review Open to Buy**

The screenshot shows the 'Open to Buy' window. The 'Open to Buy' tab is selected. The table displays data for various metrics across 24 time periods. The metrics include:

- My BOP R
- My Net Sales R
- My Receipts R
- My Receipts R %
- Co Receipts R
- Co Receipts R %
- My Dr Order R
- My Dr Order R %
- My Dr Order Adj R
- My Dr Order Adj R %
- My Net Dr Order R

## Review Projection

The Projection view contains all the measures contained in the task; however, only the Wp Sales R measure is visible in the default measure profile. Use this task to create a view of task measures that you cannot view at the same time in other views.

**Figure 10–28 Review Targets - All Measures**

Wp Sales R	10/20/10	10/27/10	11/03/10	11/10/10	11/17/10	11/24/10	12/01/10	12/08/10	12/15/10	12/22/10	12/29/10

To see the other measures in this view, complete the following steps:

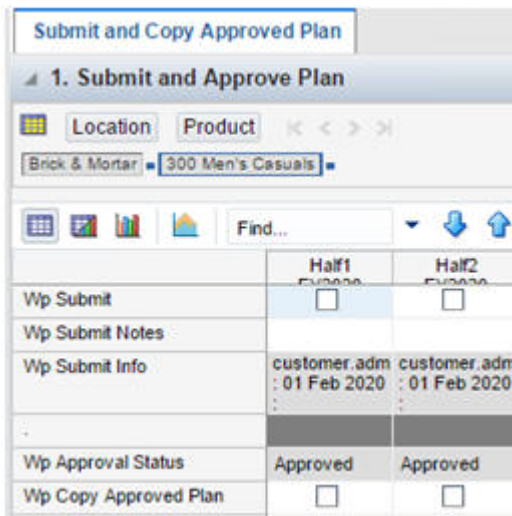

1. Click the Measure dimension tile. The All Measures - Measure window is displayed.
2. Move the measures you want to see in the view from the Hidden Measures box to the Visible Measures box.
3. When finished, click **OK**.

## Submit/Approval

When you are ready to submit your working plan to the Merch Plan user for approval, use the Submit and Copy Approved Plan view in the In Season Submit Plan step. This step has two views: Submit and Copy Approved Plan and Submitted and Approved Plan.

Note that when you select the Op Approve Enabled measure, you can submit a plan for the Op version. This measure is set by an administrator in the Enable OP Approval administration task. The administrator can select or deselect this option at any time. If the administrator deselects it during the in-season, you cannot submit a plan for the Op. The administrator may choose to do this after the planning process has been finalized in order to lock down the Op. If this occurs, you will be unable to submit a plan for the Op and the Merch Targets user will be unable to approve a plan for the Op.

**Figure 10–29 Submit and Copy Approved Plan**

1. Enable the Wp Submit measure check box for the select the halves the that you want to publish.
2. Optional: Enter information about the working plan in the Wp Submit Notes measure.
3. Click the **Submit** custom menu.
4. A success message is displayed. Click **OK** to close it.

**Figure 10–30 Success Message**

After the Submit custom menu is run, the Wp Submit and Wp Submit Info measures are cleared and the Wp Approval Pending check boxes are checked. The Wa Submit By, Wa Submit Date, and Wa Submit Info measures are populated. In addition, your working plan is copied into a Waiting for Approval (Wa) plan.

After the Merch Targets user approves or rejects the Wa plan, the Merch Plan user can see the approval or rejection information by accessing the Submit and Copy Approved Plan view in the Merch Plan - In Season Submit Plan step.

**Figure 10-31 In-Season Submit Plan**

	Half1	Half2
Wp Submit	<input type="checkbox"/>	<input type="checkbox"/>
Wp Submit Notes		
Wp Submit Info	customer.adm 01 Feb 2020	customer.adm 01 Feb 2020
Wp Approval Status	Submitted	Submitted
Wp Copy Approved Plan	<input type="checkbox"/>	<input type="checkbox"/>

Once the planner submits the plan, the data is copied from the Wp measures to the Wa measures.

## Next Steps

After you have submitted your plan to the Merch Targets user, the Merch Targets user approves or rejects your submitted plan. If the plan is rejected, you can adjust it using the steps described in this chapter and submit it again.

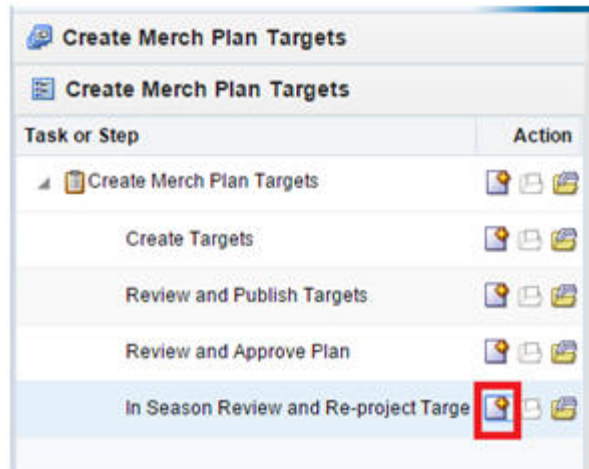

## Review Submitted

After the Merch Plan user submits a plan, the Merch Targets user can review the details of the plan in the Review Plan view under In Season Review and Re-project Targets step. This step has one view: Review Plan.

To build the In Season Review and Re-project Targets workbook, complete the following steps.

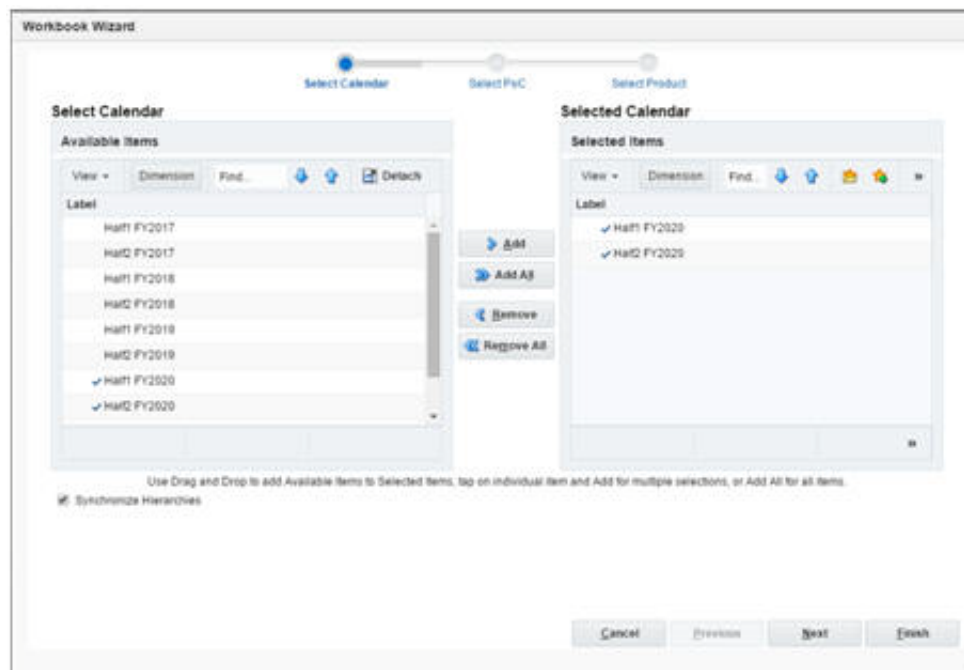

1. Click the **Create New Workbook** icon in the In Season Review and Re-project Targets task.

**Figure 10–33 Create New Workbook**

2. The workbook wizard opens at the Calendar Selection step. Select the halves that you want to plan and move them to the Selected Items box. Click **Next**.

**Figure 10–34 Workbook Wizard: Calendar Selection**

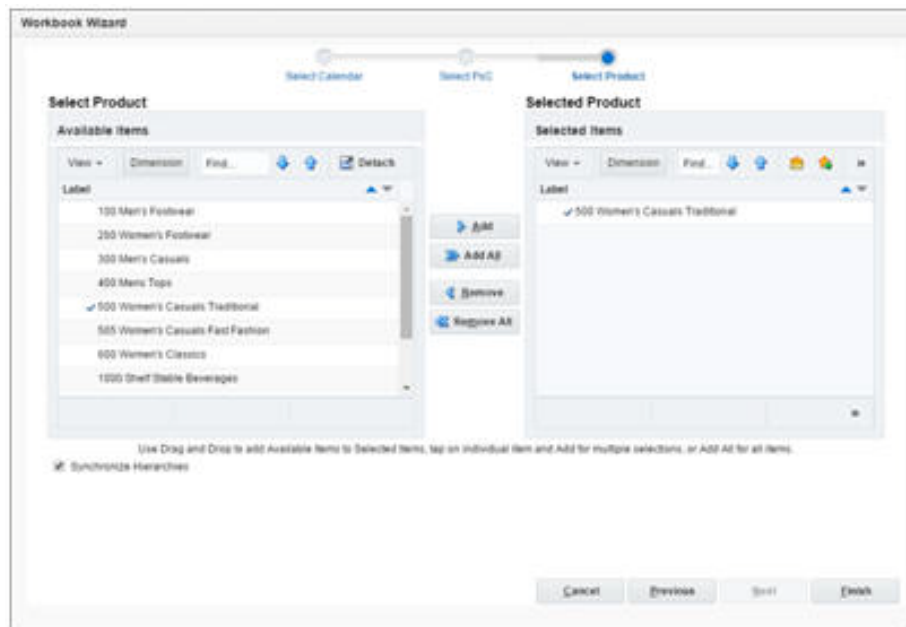

3. The Location Selection step of the workbook wizard is displayed. Select the channels you want to plan and move them to the Selected Items box. Click **Next**.

**Figure 10–35 Workbook Wizard: Location Selection**

4. The Product Selection step of the workbook wizard is displayed. Select the product you want to plan and move it to the Selected Items box. Click **Finish**.

**Figure 10–36 Workbook Wizard: Product Selection**

The workbook is built, and the Review and Re-project view is displayed.

## Review

Merch Target user can review the details of the plan in the Review Plan view under the In Season Review and Re-project Targets step. This step has one view: Review Plan.

You can use four measure profiles to review the plan: Default and Units.

After you have finished reviewing the Wa plan, continue to the last step of the task, Approve/Reject Plan. The Merch Target user can approve or reject the plan using Approve View.

1. In the Wp Approval measure, Select the Approved (or) Rejected option from the drop-down list.
2. Commit the data using the File menu (File > Commit).

After the Merch Targets user approves or rejects the Wa plan, the Merch Plan user can view the approval or rejection information by accessing the Submit and Copy Approved Plan view in the Merch Plan - In Season Submit Plan step.

## Approve

Use Approve view in In Season Review and Re-project Targets step to re-approve the plan.

Figure 10–38 Approve

2. The workbook wizard opens at the Calendar Selection step. Select the halves that you want to plan and move them to the Selected Items box. Click **Next**.

**Figure 10–40 Workbook Wizard: Calendar Selection**

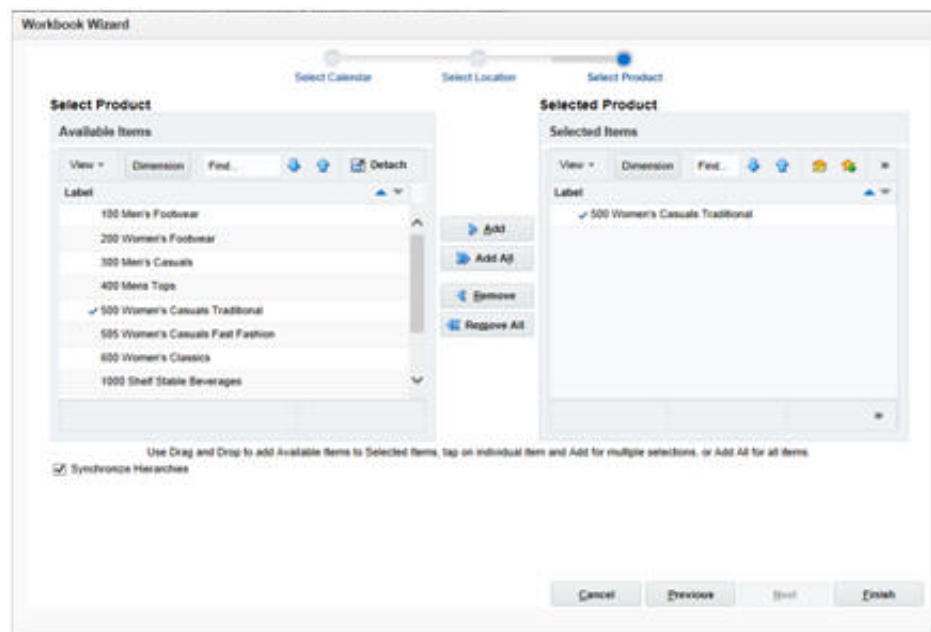

3. The Location Selection step of the workbook wizard is displayed. Select the channels you want to plan and move them to the Selected Items box. Click **Next**.

**Figure 10–41 Workbook Wizard: Location Selection**

4. The Product Selection step of the workbook wizard is displayed. Select the product you want to plan and move it to the Selected Items box. Click **Finish**.

Figure 10-42 Workbook Wizard: Product Selection

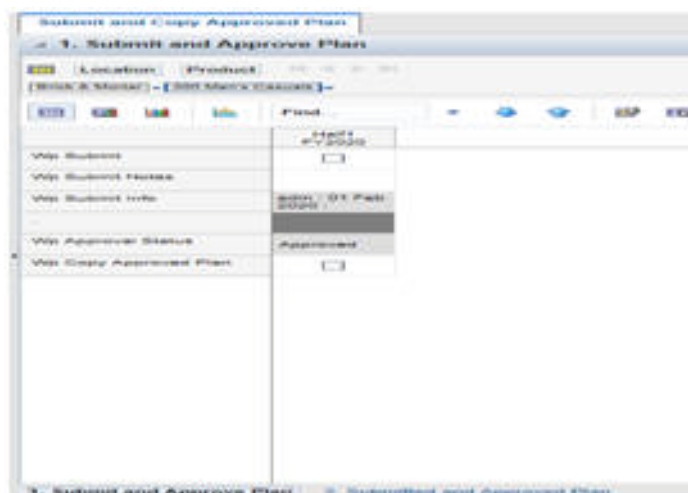

## Submit/Copy

This step has only one view, Submit and Copy Approved Plan View.

1. Verify the status of the Wp Approval Status measure.
2. Enable the Wp Copy Approved Plan check box and run the Copy Approved Plan custom menu to approve the plan.

Figure 10-43 Submit and Approve Plan

Once the planner re-approves the plan, the data is copied from the Wa measures to the Cp and Op measures.
