

**Oracle® Retail Merchandise Financial Planning  
Cloud Service**

Starter Kit

Release 16.0.2

**E92267-05**

May 2018

Oracle Retail Merchandise Financial Planning Cloud Service Starter Kit, Release 16.0.2

E92267-05

Copyright © 2018, Oracle and/or its affiliates. All rights reserved.

Primary Author: Eric Bloemeke

Contributing Author: Venkat Thiyagarajan, Melissa Artley

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

### **Value-Added Reseller (VAR) Language**

#### **Oracle Retail VAR Applications**

The following restrictions and provisions only apply to the programs referred to in this section and licensed to you. You acknowledge that the programs may contain third party software (VAR applications) licensed to Oracle. Depending upon your product and its version number, the VAR applications may include:

- (i) the **MicroStrategy** Components developed and licensed by MicroStrategy Services Corporation (MicroStrategy) of McLean, Virginia to Oracle and imbedded in the MicroStrategy for Oracle Retail Data Warehouse and MicroStrategy for Oracle Retail Planning & Optimization applications.
- (ii) the **Wavelink** component developed and licensed by Wavelink Corporation (Wavelink) of Kirkland, Washington, to Oracle and imbedded in Oracle Retail Mobile Store Inventory Management.
- (iii) the software component known as **Access Via**<sup>™</sup> licensed by Access Via of Seattle, Washington, and imbedded in Oracle Retail Signs and Oracle Retail Labels and Tags.
- (iv) the software component known as **Adobe Flex**<sup>™</sup> licensed by Adobe Systems Incorporated of San Jose, California, and imbedded in Oracle Retail Promotion Planning & Optimization application.

You acknowledge and confirm that Oracle grants you use of only the object code of the VAR Applications. Oracle will not deliver source code to the VAR Applications to you. Notwithstanding any other term or condition of the agreement and this ordering document, you shall not cause or permit alteration of any VAR

Applications. For purposes of this section, "alteration" refers to all alterations, translations, upgrades, enhancements, customizations or modifications of all or any portion of the VAR Applications including all reconfigurations, reassembly or reverse assembly, re-engineering or reverse engineering and recompilations or reverse compilations of the VAR Applications or any derivatives of the VAR Applications. You acknowledge that it shall be a breach of the agreement to utilize the relationship, and/or confidential information of the VAR Applications for purposes of competitive discovery.

The VAR Applications contain trade secrets of Oracle and Oracle's licensors and Customer shall not attempt, cause, or permit the alteration, decompilation, reverse engineering, disassembly or other reduction of the VAR Applications to a human perceivable form. Oracle reserves the right to replace, with functional equivalent software, any of the VAR Applications in future releases of the applicable program.

## Send Us Your Comments

Oracle Retail Merchandise Financial Planning Cloud Service Starter Kit, Release 16.0.2.

Oracle welcomes customers' comments and suggestions on the quality and usefulness of this document.

Your feedback is important, and helps us to best meet your needs as a user of our products. For example:

- Are the implementation steps correct and complete?
- Did you understand the context of the procedures?
- Did you find any errors in the information?
- Does the structure of the information help you with your tasks?
- Do you need different information or graphics? If so, where, and in what format?
- Are the examples correct? Do you need more examples?

If you find any errors or have any other suggestions for improvement, then please tell us your name, the name of the company who has licensed our products, the title and part number of the documentation and the chapter, section, and page number (if available).

---

---

**Note:** Before sending us your comments, you might like to check that you have the latest version of the document and if any concerns are already addressed. To do this, access the Online Documentation available on the Oracle Technology Network Web site. It contains the most current Documentation Library plus all documents revised or released recently.

---

---

Send your comments to us using the electronic mail address:

[retail-doc\\_us@oracle.com](mailto:retail-doc_us@oracle.com).

Please give your name, address, electronic mail address, and telephone number (optional).

If you need assistance with Oracle software, then please contact your support representative or Oracle Support Services.

If you require training or instruction in using Oracle software, then please contact your Oracle local office and inquire about our Oracle University offerings. A list of Oracle offices is available on our Web site at <http://www.oracle.com>.

---

---

# Preface

Oracle Retail Installation Guides contain the requirements and procedures that are necessary for the retailer to install Oracle Retail products.

## Audience

This Starter Kit is written for the following audiences:

- Integrators and implementation staff

## Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

### Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

## Related Documents

For more information, see the following documents in the Oracle Retail Merchandise Financial Planning Cloud Service Release 16.0.2 documentation set:

- *Oracle Retail Merchandise Financial Planning Cloud Service Starter Kit Guide*
- *Oracle Retail Merchandise Financial Planning Cloud Service Release Notes*

## Customer Support

To contact Oracle Customer Support, access My Oracle Support at the following URL:

<https://support.oracle.com>

When contacting Customer Support, please provide the following:

- Product version and program/module name
- Functional and technical description of the problem (include business impact)
- Detailed step-by-step instructions to re-create

- Exact error message received
- Screenshots of each step you take

## Improved Process for Oracle Retail Documentation Corrections

To more quickly address critical corrections to Oracle Retail documentation content, Oracle Retail documentation may be republished whenever a critical correction is needed. For critical corrections, the republication of an Oracle Retail document may at times not be attached to a numbered software release; instead, the Oracle Retail document will simply be replaced on the Oracle Technology Network Web site, or, in the case of Data Models, to the applicable My Oracle Support Documentation container where they reside.

This process will prevent delays in making critical corrections available to customers. For the customer, it means that before you begin installation, you must verify that you have the most recent version of the Oracle Retail documentation set. Oracle Retail documentation is available on the Oracle Technology Network at the following URL:

<http://www.oracle.com/technetwork/documentation/oracle-retail-100266.html>

An updated version of the applicable Oracle Retail document is indicated by Oracle part number, as well as print date (month and year). An updated version uses the same part number, with a higher-numbered suffix. For example, part number E123456-02 is an updated version of a document with part number E123456-01.

If a more recent version of a document is available, that version supersedes all previous versions.

## Oracle Retail Documentation on the Oracle Technology Network

Oracle Retail product documentation is available on the following web site:

<http://www.oracle.com/technetwork/documentation/oracle-retail-100266.html>

(Data Model documents are not available through Oracle Technology Network. You can obtain them through My Oracle Support.)

## Conventions

The following text conventions are used in this document:

Convention	Meaning
<b>boldface</b>	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

---

---

# Introduction

Welcome to the *Oracle Retail Merchandise Financial Planning Cloud Service Starter Kit*. This chapter outlines the contents of this guide, discusses the updated components with respect to the previous version, lists hardware and software requirements, and defines commonly used notations and terms.

## About This Document

This document contains information for installation of the Starter Kit components.

Read this entire guide before beginning the installation process to ensure you understand the installation process and have all the necessary documentation, hardware, and software available.

## Hardware and Software Requirements

[Table 1–1](#) describes the hardware and software requirements for the Starter Kit.

---

---

**Note:** Java can be acquired for Microsoft Windows at: [www.java.com](http://www.java.com).

---

---

**Table 1–1 Starter Kit Hardware and Software Requirements**

Requirement	Details
Supported Operating Systems for RPAS Configuration Tools	Microsoft Windows 7 Microsoft Windows 10 <b>Note:</b> Oracle Retail assumes that the retailer has ensured its Operating System has been patched with all applicable Windows updates. RPAS Configuration Tools requires 64-bit Java 1.8 or later.
Required Software	A Java 8 JRE is required to support the RPAS Configuration Tools. The specified Java versions or later patch releases are supported: <ul style="list-style-type: none"> <li>■ Microsoft Windows 7</li> <li>■ Microsoft Windows 10</li> </ul>

## Starter Kit Components

For information on installing the Starter Kit, refer to [Chapter 3, "Installing on a Windows Environment."](#)

## Hardware and Software Requirement Notes

The following notes pertain to the RPAS hardware and software requirements:

- An application for unzipping (.zip) components must be installed and used for extracting the RPAS Configuration Tools.
- You must install Cygwin to emulate UNIX commands (required for running some RPAS Configuration Tools utilities on Windows). You can find more information about downloading this product at: <http://www.cygwin.com>.

Table 1–2 indicates which software components are needed for each task.

**Table 1–2 Software Requirements Notes**

Item	Details
Task	Use the Configuration Tools to create or modify solutions.
Typical User	Solution/ Product Administrator
Platforms	Windows 7 or Windows 10
RPAS Server	Yes
RPAS Clients	No
Configuration Tools	Yes
Java	Yes

## Terms

The following table lists terms that are used in this guide:

Term	Definition
RPAS	The Oracle Retail Predictive Application Server provides the foundation for Oracle Retail solutions such as Oracle Retail Demand Forecasting (RDF), Merchandise Financial Planning (MFP), and Advanced Inventory Planning (AIP). RPAS does not include any business logic, but it enables the solutions to store, manipulate and retrieve data. It provides the solutions with a standard interface based on wizards, templates, workbooks, and batch processes.
RPAS solution	The software that uses RPAS. RPAS solutions are added on to RPAS domains as separate modules. All the business logic is encapsulated in the solution. An RPAS domain can support multiple solutions.
RPAS domain	The collection of server-side directories and files containing data and procedures that comprise the RPAS solution. For additional information, refer to either the Classic Client or Fusion Client version of the <i>Oracle Retail Predictive Application Server Administration Guide</i> .
RPAS Configuration Tools	The tools used to configure an RPAS solution. For more information, refer to the <i>Oracle Retail Predictive Application Server Configuration Tools User Guide</i> .

---

---

## Getting Started

This chapter provides overview of the MFP Cloud Service Starter Kit.

### MFP Cloud Service Starter Kit Overview

RPAS 16.0.2 Cloud Service is comprised of many components. In addition, there are solutions that have been developed using the RPAS 16.0.2 Cloud Service foundation. Examples of these solutions include Oracle Retail Merchandise Financial Planning (MFP) and Oracle Retail Demand Forecasting (RDF). Each application supported by the RPAS 16.0.2 Cloud Service Platform has a dedicated Starter Kit.

The components of the Starter Kit software include the following:

- RPAS Configuration Tools
- RPAS Server libraries used by the Configuration Tools
- A base configuration of the application
- Application specific extensions of the RPAS Configuration Tools
- Documentation

---

---

**Note:** The use of the RPAS Fusion Client and RPAS Classic Client simultaneously in the same environment is not supported in a production environment.

---

---

---

---

## Installing on a Windows Environment

This chapter describes how to install the MFP Cloud Service Starter Kit on a Windows environment.

### Starter Kit Installation on Windows

For the purposes of this section, a slash "/" is used to delineate directories and files in paths. Users in a Windows Command Prompt environment need to either use a backslash "\" as the delineation character or use double quotes around paths.

### RPAS Package Location

The RPAS package can be found on My Oracle Support.

1. Access the following URL: <https://support.oracle.com>
2. From the **Patches & Updates** tab, select the **Product or Family (Advanced Search)**.
3. In the Product search box, enter: *Oracle Retail Merchandise Financial Planning Cloud Service*.
4. The Release drop-down, provides all of the available releases for your product. Select the release that you wish to access and then click **Search**.

### Extracting the RPAS Package

Unzip the `MFP_Cloud_Starter_Kit-16_0_2_40_910.zip` to a newly created directory on the Windows machine. The `MFP_Cloud_Starter_Kit-16_0_2_40_910.zip` contains all the RPAS components.

Once extracted, the following directories appear:

Directory	Description
ConfigTools	This directory contains the components required to run the RPAS Configuration Tools.
configurations	This directory contains an example configuration for the MFP solution.

### Java Environment

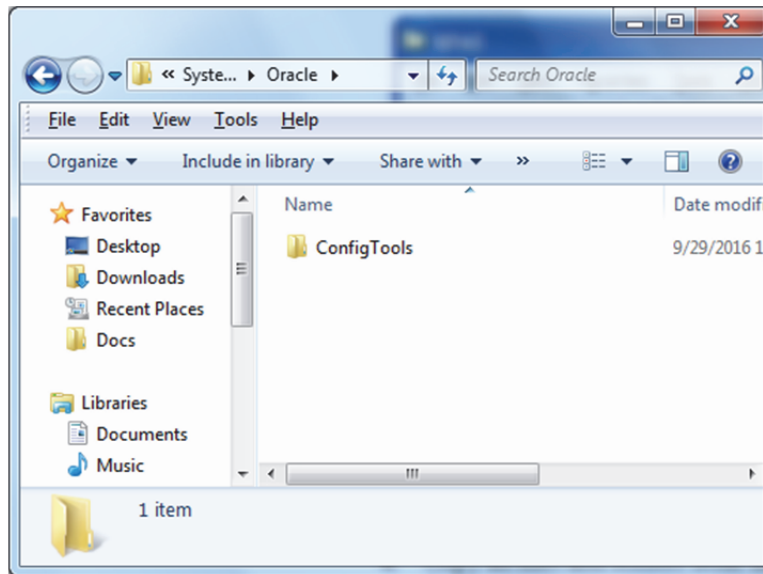

During the Java installation, a directory is created to store the Java software. This directory is referred to later in this document as `JAVA_HOME`. For information on setting `JAVA_HOME`., refer to "[Creating the Required Environment Variables](#)."

## Installing Configuration Tools

The following procedures provide information about creating the necessary folders on your Windows PC and copying the Configuration Tools components to them.

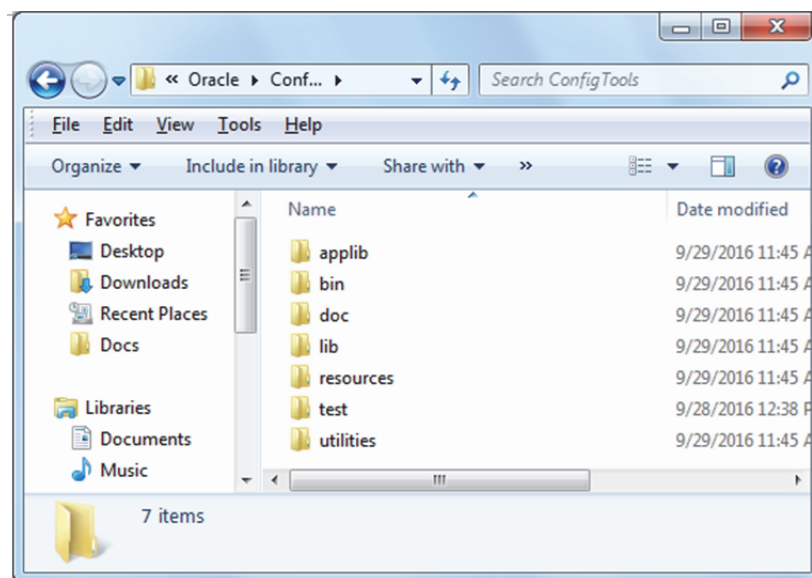

1. Using Windows Explorer, navigate to your C drive, create a folder named **Oracle**.
2. Open the **Oracle** folder and create a folder named **ConfigTools**.

**Figure 3–1 Example of ConfigTools Folder Path**

3. Copy all files and folders from the **ConfigTools** folder where you extracted the `MFP_Cloud_Starter_Kit-16_0_2_40_910.zip` to the `C:\Oracle\ConfigTools` folder.

**Figure 3–2 ConfigTools Folder with All Starter Kit Components**

This location is referred to as both **RPAS\_HOME** and **RIDE\_HOME**. Environment variables are defined on your Windows PC to point to this location so that RPAS will function correctly. Refer to "[Creating the Required Environment Variables](#)" for information on creating the necessary RPAS variables.

## Microsoft 2010 Runtime Libraries

Ensure that these Microsoft 2010 Runtime Libraries are installed to enable RPAS Configuration Tools and other RPAS utilities:

- MSVCR100.dll
- MSVCP100.dll

Download these libraries from this link:

<http://www.microsoft.com/en-us/download/details.aspx?id=5555>

---

**Note:** Use Microsoft Visual C++ 2010 or higher for use with RPAS Configuration Tools and other RPAS utilities.

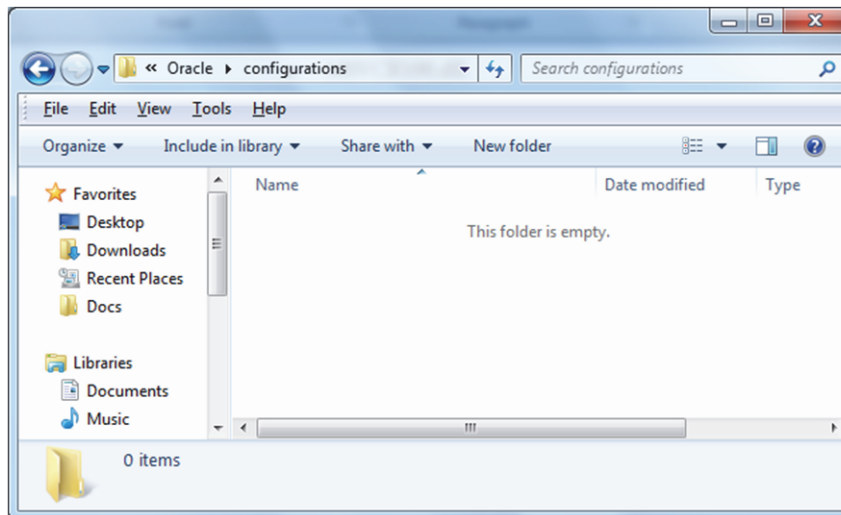

---

## Installing the Sample Configurations

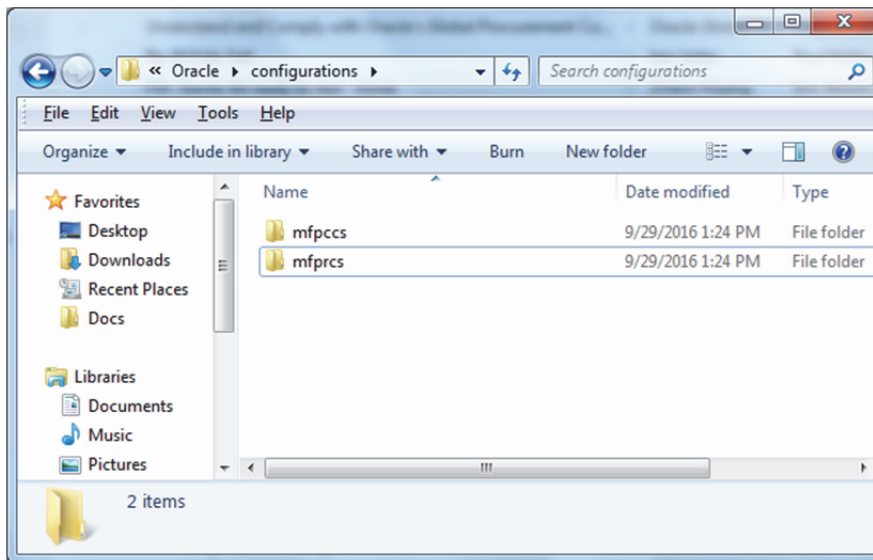

The following procedures provide information about creating the necessary folders on your Windows PC and copying the Configuration Tools components to them.

1. Using Windows Explorer, navigate to your C drive, create a folder named Oracle, which you created in the section, "[Installing Configuration Tools](#)".
2. Create a folder named **configurations**.

**Figure 3–3 Example of Configurations Folder Path**

3. Copy all files and folders from the **configurations** folder where you extracted the `MFP_Cloud_Starter_Kit-16_0_2_40_910.zip` to the **C:\Oracle\configurations** folder.

**Figure 3–4 Configurations Folder with Sample MFP Configuration**

## Generating the Configuration with Plug-in Options

MFP Cloud Service supports generating different configurations using plug-in automation for different configuration options.

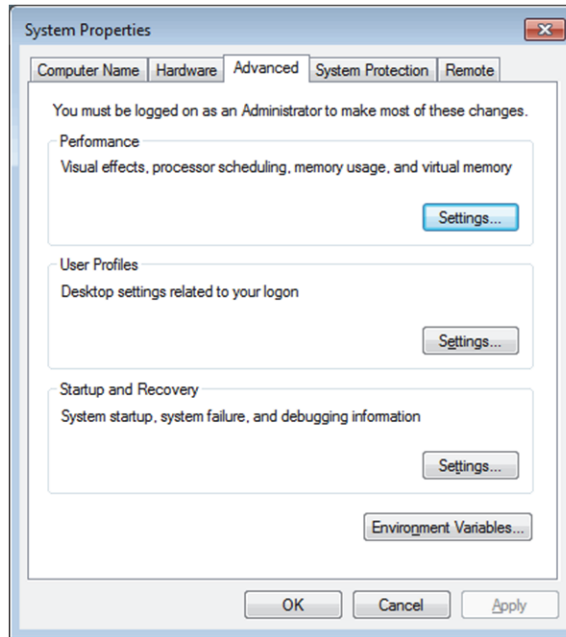

For details on creating a configuration using plug-ins, refer to “Appendix C: Generating the Configuration for Plug-in Options” in the *Oracle Retail Merchandise Financial Planning Cloud Service Implementation Guide*.

## Creating the Required Environment Variables

The following steps outline the process to follow and environment variables required to support the RPAS installation and domain install.

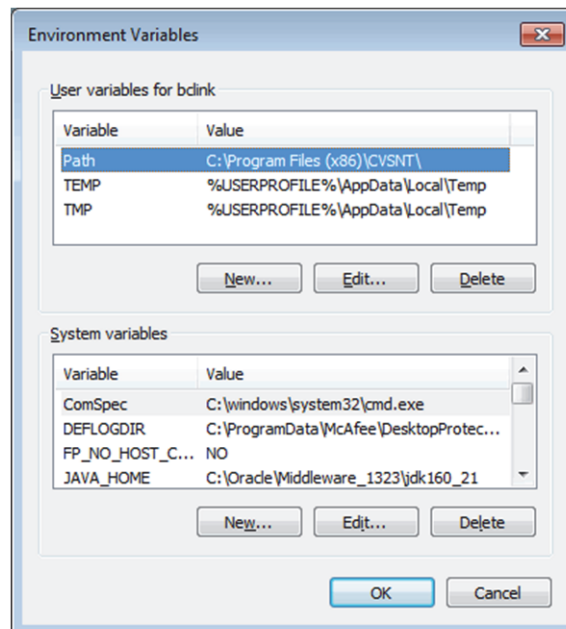

1. From the Control Panel, open the System window.
  - a. If your system is using Category view, from the Windows 7 Start menu, go to **Control Panel**, select **System and Security**, select **System**, and then select **Advanced System Settings**.  
The System Properties window opens on the Advanced tab.
  - b. Select the **Advanced** tab.
  - c. At the bottom of the window, click **Environment Variables**.

**Figure 3–5 System Properties - Advanced Tab**

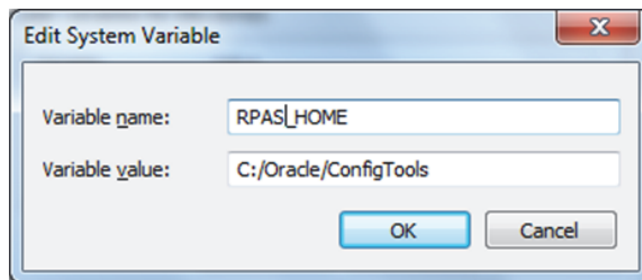

- d. The Environment Variables window opens.

**Figure 3–6 Environment Variables**

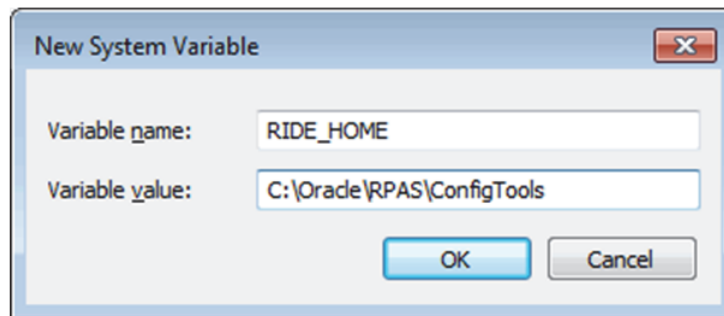

2. Create the **RPAS\_HOME** environment variable.
  - a. Under the System variables box, click **New**. The New System Variable dialog box opens.
  - b. Enter **RPAS\_HOME** in the **Variable name** field.
  - c. Enter the path the **RPAS Server** folder in the **Variable value** field.

**Figure 3–7 Example of RPAS\_HOME Variable**

- d. Click **OK**. **RPAS\_HOME** now appears in the Variable name box.
3. Create the **RIDE\_HOME** environment variable.
  - a. Under the System variables box, click **New**. The New System Variable dialog box opens.
  - b. Enter **RIDE\_HOME** in the **Variable name** field.
  - c. Enter the path the **ConfigTools** folder in the **Variable value** field.

**Figure 3–8 Example of RIDE\_HOME Variable**

- d. Click **OK**. **RIDE\_HOME** now appears in the Variable name box.
4. Create the **JAVA\_HOME** environment variable.
  - a. Under the System variables box, click **New**. The New System Variable dialog box opens.
  - b. Enter **JAVA\_HOME** in the **Variable name** field.
  - c. Enter the path the **Java** folder under Program Files in the **Variable value** field.

**Figure 3–9 Example of JAVA\_HOME Variable**

- d. Click **OK**. **JAVA\_HOME** now appears in the Variable name box.
5. Update the Path variable.
  - a. Under the System variables section, select the **Path** environment variable and click **Edit**.
  - b. Insert the complete paths for **RPAS\_HOME**, **RIDE\_HOME**, and **JAVA\_HOME** as shown:

```
%RPAS_HOME%\bin;%RPAS_HOME%\applib;%RPAS_HOME%\lib;
%JAVA_HOME%\bin;%JAVA_HOME%\bin\client;%JAVA_HOME%\lib;
%JAVA_HOME%\jre\bin\client
```

---

**Note:** Remember to separate all path statements with semicolons (;).

---

- c. Select **OK** to save your changes.

## RPAS\_JAVA\_CLASSPATH

The **RPAS\_JAVA\_CLASSPATH** is used to enable the MFP solution to execute extensions to RPAS written within the AAI framework. In order for the Configuration Tools to support these extensions, it is necessary to set the **RPAS\_JAVA\_CLASSPATH** environment variable so that the Configuration Tools can locate the libraries.

The value of the **RPAS\_JAVA\_CLASSPATH** variable should be the locations of the **aajni.jar** located in the **applib** subdirectory of the Starter Kit installation and the **oracleRpasUtils.jar** located in the **lib** subdirectory of the Starter Kit installation. Assuming the default location for Starter Kit installation, **RPAS\_JAVA\_CLASSPATH** should be set to:

```
C:/Oracle/ConfigTools/lib/oracleRpasUtils.jar;C:/Oracle/ConfigTools/applib/
aajni.jar
```

**Figure 3–10 Example of RPAS\_JAVA\_CLASSPATH Variable**

## Ride Options

The RIDE\_OPTIONS environmental variable has been defined to allow users to pass information into the ConfigTools process.

### For Java -Xmx Option

By default, the Java Virtual Machine requests on the order of 268 MB of RAM from the OS to allocate for its heap. Large domains that are built from complex configurations can potentially exhaust this limited amount of memory. This is even more of an issue when multiple configurations are open in the Configuration Tools and must be held in memory simultaneously.

By using the `-Xmx` option, you can instruct the Java Virtual Machine to request more memory from the OS to prevent situations when all allocated memory is exhausted. The syntax of the property is:

`-Xmx###m`, where `###` is the amount, in megabytes, of memory the JVM is to request. Common values for this argument are `-Xmx512m` or `-Xmx1024m`.

**Figure 3–11 Example of RIDE\_OPTIONS Variable**

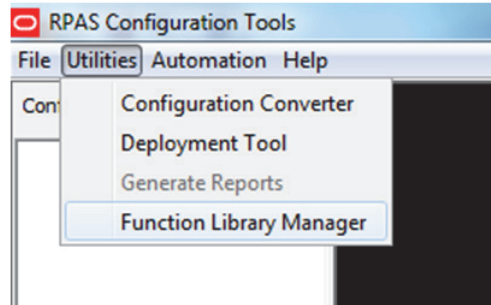

## Configuring Required Function Libraries for Starter Kit

The RPAS Configuration Tools provide validation of the content of a configuration. In order to provide validation for the rule content of a configuration, the set of function libraries used in the rules of a configuration must be set within the RPAS Configuration Tools.

Follow these steps to register the function libraries used by the MFP solution in the RPAS Configuration Tools:

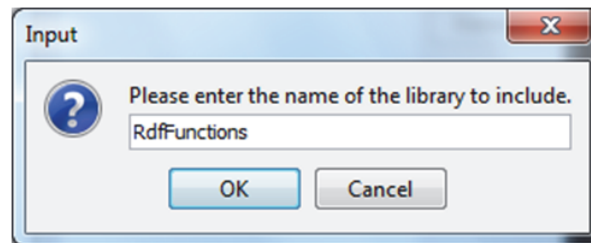

1. Launch the Configuration Tools.
2. From the Utilities Menu, select **Function Library Manager**.

**Figure 3–12 Function Library Manager**

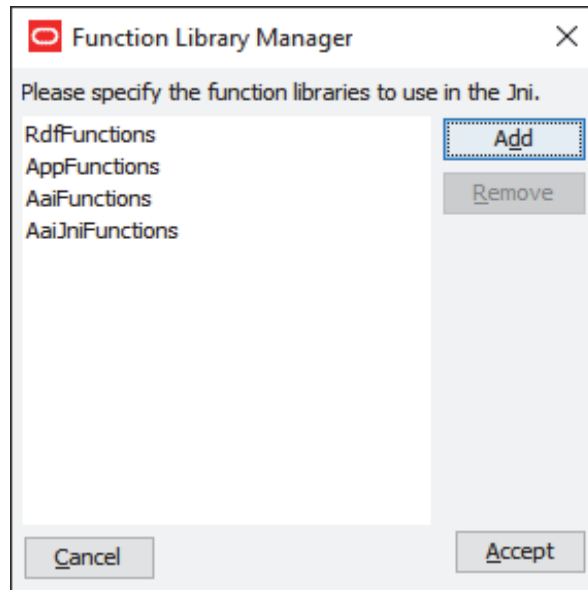

3. To add a new entry, click **Add**.
4. Enter the name of the function library to be registered.

**Figure 3–13 Library Name**

5. Click **OK** to add the entry.  
The set of libraries required by the MFP solution are:
  - RdfFunctions
  - AppFunctions
  - AaiFunctions
  - AaiJniFunctions
6. Once all libraries have been entered, click **Accept** to close the window.

**Figure 3–14 Accepting the Libraries**

7. Close and re-open the RPAS Configuration Tools for the changes to take effect.

## Using Multiple Versions of RPAS on the Same Windows Machine

If you have multiple versions of the Starter Kit installed on your PC, it is important to note that the environment variables will reference RPAS 16.0.2 after the installation process is complete.

To switch to a different version of RPAS that is installed on your machine, you will need to manually update the environment variables each time you want to switch.

## Updating the Starter Kit Installation

Each release of MFP Cloud Service will have a version-specific Starter Kit. As the product is enhanced in future versions, it will be necessary to update the Starter Kit to incorporate these enhancements. The following steps outline the process of updating the Starter Kit installation:

1. Download the new version of the MFP Cloud Service Starter Kit.
2. Delete the contents of the `C:/Oracle/ConfigTools` directory.
3. Delete the contents of the `C:/Oracle/configurations` directory.

---

**WARNING:** If you store the configuration generated in the older version of the MFP Cloud Service Starter Kit in the `C:/Oracle/configurations` directory, do not delete the configuration listed in this Step 3, so that it may be used with the new version of the MFP Cloud Service Starter Kit.

---

4. Follow the installation instructions for the new version of the MFP Cloud Service Starter Kit.

5. Run MFP Cloud Service plug-in automation on the existing configuration to create a version of the configuration for the selection configuration options. Follow the instructions in the *Oracle Retail Merchandise Financial Planning Cloud Service Implementation Guide*.
6. Apply the changes in the newly generated configuration to the MFP Cloud Service domain.

---

**Note:** For more information on using the RPAS Configuration Manager, refer to the *Oracle Retail Predictive Application Server Configuration Tools User Guide*.

---
