This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this software or related documentation is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

U.S. GOVERNMENT RIGHTS Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are "commercial computer software" or "commercial technical data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, duplication, disclosure, modification, and adaptation shall be subject to the restrictions and license terms set forth in the applicable Government contract, and, to the extent applicable by the terms of the Government contract, the additional rights set forth in FAR 52.227-19, Commercial Computer Software License (December 2007). Oracle USA, Inc., 500 Oracle Parkway, Redwood City, CA 94065.

This software is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications which may create a risk of personal injury. If you use this software in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure the safe use of this software. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software in dangerous applications.

Oracle is a registered trademark of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.

This software and documentation may provide access to or information on content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

Licensing Note: This media pack includes a Restricted Use license for Oracle Retail Predictive Application Server (RPAS) - Enterprise Engine to support Oracle® Retail Regular Price Optimization only.

Value-Added Reseller (VAR) Language

Oracle Retail VAR Applications

The following restrictions and provisions only apply to the programs referred to in this section and licensed to you. You acknowledge that the programs may contain third party software (VAR applications) licensed to Oracle. Depending upon your product and its version number, the VAR applications may include:

- (i) the software component known as **ACUMATE** developed and licensed by Lucent Technologies Inc. of Murray Hill, New Jersey, to Oracle and imbedded in the Oracle Retail Predictive Application Server - Enterprise Engine, Oracle Retail Category Management, Oracle Retail Item Planning, Oracle Retail Merchandise Financial Planning, Oracle Retail Advanced Inventory Planning, Oracle Retail Demand Forecasting, Oracle Retail Regular Price Optimization, Oracle Retail Size Profile Optimization, Oracle Retail Replenishment Optimization applications.
- (ii) the **MicroStrategy** Components developed and licensed by MicroStrategy Services Corporation (MicroStrategy) of McLean, Virginia to Oracle and imbedded in the MicroStrategy for Oracle Retail Data Warehouse and MicroStrategy for Oracle Retail Planning & Optimization applications.
- (iii) the **SeeBeyond** component developed and licensed by Sun Microsystems, Inc. (Sun) of Santa Clara, California, to Oracle and imbedded in the Oracle Retail Integration Bus application.
- (iv) the **Wavelink** component developed and licensed by Wavelink Corporation (Wavelink) of Kirkland, Washington, to Oracle and imbedded in Oracle Retail Mobile Store Inventory Management.
- (v) the software component known as **Crystal Enterprise Professional and/or Crystal Reports Professional** licensed by SAP and imbedded in Oracle Retail Store Inventory Management.
- (vi) the software component known as **Access Via™** licensed by Access Via of Seattle, Washington, and imbedded in Oracle Retail Signs and Oracle Retail Labels and Tags.
- (vii) the software component known as **Adobe Flex™** licensed by Adobe Systems Incorporated of San Jose, California, and imbedded in Oracle Retail Promotion Planning & Optimization application.
- (viii) the software component known as **Style Report™** developed and licensed by InetSoft Technology Corp. of Piscataway, New Jersey, to Oracle and imbedded in the Oracle Retail Value Chain Collaboration application.
- (ix) the software component known as **DataBeacon™** developed and licensed by Cognos Incorporated of Ottawa, Ontario, Canada, to Oracle and imbedded in the Oracle Retail Value Chain Collaboration application.

You acknowledge and confirm that Oracle grants you use of only the object code of the VAR Applications. Oracle will not deliver source code to the VAR Applications to you. Notwithstanding any other term or condition of the agreement and this ordering document, you shall not cause or permit alteration of any VAR Applications. For purposes of this section, "alteration" refers to all alterations, translations, upgrades, enhancements, customizations or modifications of all or any portion of the VAR Applications including all reconfigurations, reassembly or reverse assembly, re-engineering or reverse engineering and recompilations or reverse compilations of the VAR Applications or any derivatives of the VAR Applications. You acknowledge that it shall be a breach of the agreement to utilize the relationship, and/or confidential information of the VAR Applications for purposes of competitive discovery.

The VAR Applications contain trade secrets of Oracle and Oracle's licensors and Customer shall not attempt, cause, or permit the alteration, decompilation, reverse engineering, disassembly or other reduction of the VAR Applications to a human perceivable form. Oracle reserves the right to replace, with functional equivalent software, any of the VAR Applications in future releases of the applicable program.

Send Us Your Comments

Oracle Retail Regular Price Optimization User Guide, Release 13.1.2

Oracle welcomes customers' comments and suggestions on the quality and usefulness of this document.

Your feedback is important, and helps us to best meet your needs as a user of our products. For example:

- Are the implementation steps correct and complete?
- Did you understand the context of the procedures?
- Did you find any errors in the information?
- Does the structure of the information help you with your tasks?
- Do you need different information or graphics? If so, where, and in what format?
- Are the examples correct? Do you need more examples?

If you find any errors or have any other suggestions for improvement, then please tell us your name, the name of the company who has licensed our products, the title and part number of the documentation and the chapter, section, and page number (if available).

Note: Before sending us your comments, you might like to check that you have the latest version of the document and if any concerns are already addressed. To do this, access the new Applications Release Online Documentation CD available on My Oracle Support and <http://www.oracle.com>. It contains the most current Documentation Library plus all documents revised or released recently.

Send your comments to us using the electronic mail address: retail-doc_us@oracle.com.

Please give your name, address, electronic mail address, and telephone number (optional).

If you need assistance with Oracle software, then please contact your support representative or Oracle Support Services.

If you require training or instruction in using Oracle software, then please contact your Oracle local office and inquire about our Oracle University offerings. A list of Oracle offices is available on our Web site at <http://www.oracle.com>.

Preface

The Oracle Retail Regular Price Optimization User Guide describes the application's user interface and how to navigate through it.

Audience

This document is intended for the users and administrators of Oracle Retail Regular Price Optimization. This may include price managers and merchandise category managers.

Related Documents

For more information, see the following documents in the Oracle Retail Regular Price Optimization Release 13.1.2 documentation set:

- *Oracle Retail Regular Price Optimization Release Notes*
- *Oracle Retail Regular Price Optimization Installation Guide*
- *Oracle Retail Regular Price Optimization Implementation Guide*

Customer Support

To contact Oracle Customer Support, access My Oracle Support at the following URL:

<https://support.oracle.com>

When contacting Customer Support, please provide the following:

- Product version and program/module name
- Functional and technical description of the problem (include business impact)
- Detailed step-by-step instructions to re-create
- Exact error message received
- Screen shots of each step you take

Review Patch Documentation

When you install the application for the first time, you install either a base release (for example, 13.1) or a later patch release (for example, 13.1.2). If you are installing the base release, additional patch, and bundled hot fix releases, read the documentation for all releases that have occurred since the base release before you begin installation. Documentation for patch and bundled hot fix releases can contain critical information related to the base release, as well as information about code changes since the base release.

Oracle Retail Documentation on the Oracle Technology Network

Documentation is packaged with each Oracle Retail product release. Oracle Retail product documentation is also available on the following Web site:

http://www.oracle.com/technology/documentation/oracle_retail.html

(Data Model documents are not available through Oracle Technology Network. These documents are packaged with released code, or you can obtain them through My Oracle Support.)

Documentation should be available on this Web site within a month after a product release.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
<code>monospace</code>	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Getting Started

About Oracle Retail Regular Price Optimization

Oracle Retail Regular Price Optimization (RPO) assists retail price managers in pricing hard-line and grocery items. It is suited for long lifecycle items with infrequent price changes. It recommends permanent prices based on initial estimates of an item's total sales volume over a planning period and on price-related sales of items and related items.

RPO includes grouping in its pricing analysis because it considers cross-item elasticities; that is, RPO considers how price changes for one item may affect the sales volume of other items that belong to the same demand group. Users can input objective functions and pricing constraints that define the optimization problem. Once these inputs are defined, the pricing optimizer recommends prices and associated volumes. What-if cases can also be created and evaluated side by side within the context of a pricing scenario. Once an analysis of the what-if cases and recommended prices is complete, the user can make a final decision to submit the recommended prices for the given set of merchandise items and locations.

Demand Group Optimization

A demand group of merchandise is defined as a set of similar items that have their prices determined by cross-item elasticities between items within the group. Price optimization is done at the demand group level. RPO recommends prices at the item level for all the items in a demand group after fully understanding the cross-item elasticities, halo relationships, and cannibalistic relationships between these items.

Goals and Constraints

As part of the RPO planning process, the price manager is trying to achieve a category goal. The category goal is a strategic understanding of the category in the larger plan for the year. RPO can be used to support the category objective. A price manager can run different scenarios (such as maximizing gross margin versus maximizing revenue) to support the category objective. This initial strategy could be optimized in detail as part of the RPO process. RPO is also very cognizant of how prices affect consumers and supports extensive business constraints on item prices.

Another important component of the RPO planning process is to strategize against the competition. In this regard, RPO supports price constraints at the item level and also supports optimization goals to maximize the gains against the competition for the entire category.

RPO in the Overall Life Cycle of Price Planning

RPO fits at the intersection of category planning and price planning in hard-line and grocery implementation. It is a key step in the category planning process after the assortment for the current season has been planned. RPO optimizes the price of all the items towards the category objective.

RPO is also the first in a three-step lifecycle pricing process. It is possible to start with RPO and arrive at demand for the planning horizon by item/store/week. This demand can serve as the baseline demand for the promotion process. Once the pricing plan is approved at the end of the RPO process, the demand estimate can be sent to a replenishment system or used as the baseline for the promotion planning process.

Figure 1–1 Life Cycle Price Planning Process

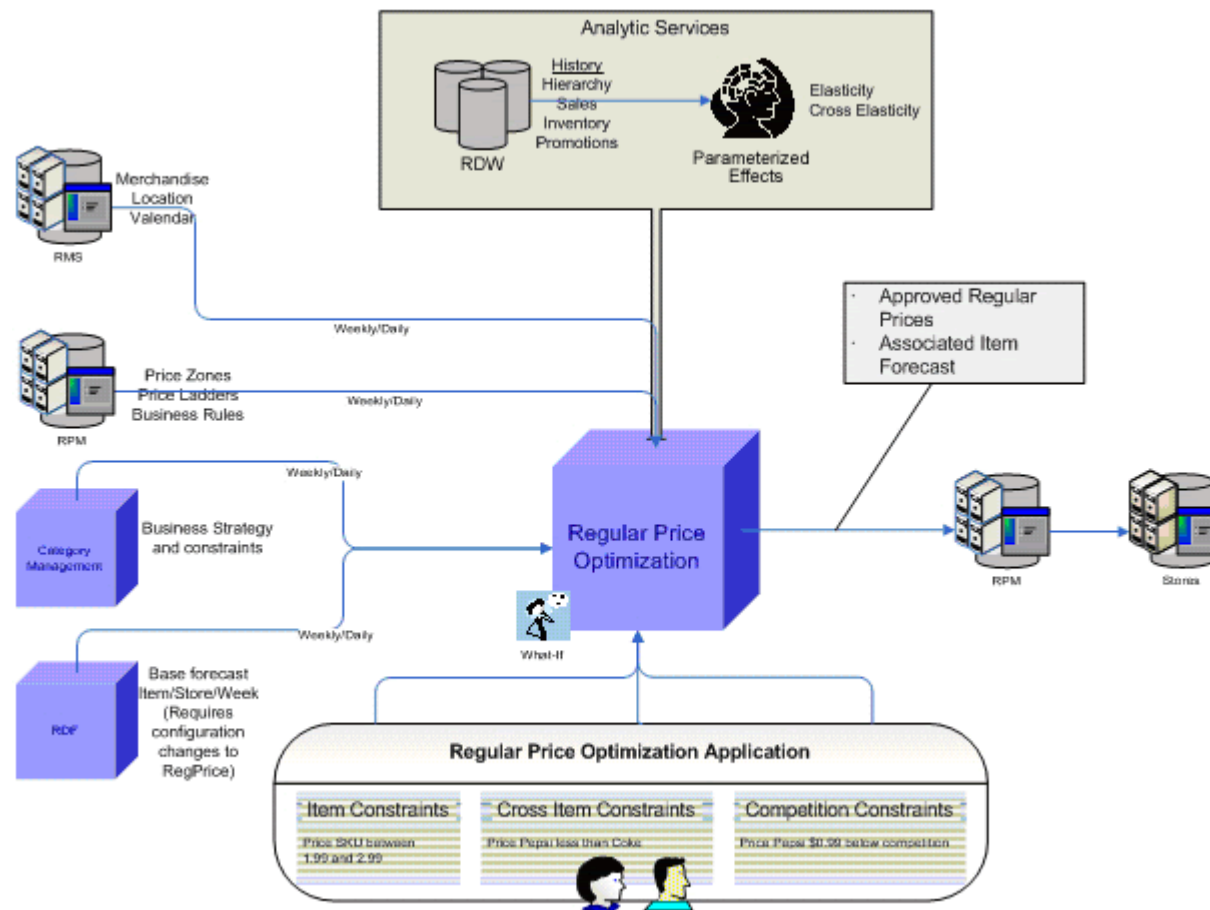

Application Workflow

The following steps describe the workflow of the RPO application:

1. Create a demand group.
2. Create a planning scope.
3. Create a scenario.
4. Using the demand group, planning scope, and scenario, perform a price analysis, including what-if scenario experimentation if desired.
5. Using the what-if scenarios and the scenarios created by the optimizer, perform a scenario comparison. Select a scenario and submit it for pricing.

Data Workflow

Figure 1–2 Regular Price Optimization Workflow Diagram

Users

RPO users may be category managers, price managers, planners, buyers, and merchandisers. In most organizations, price planning is managed by a price manager. The price manager consults the category manager for an overall goal. The price manager then creates a detailed scenario plan and makes a recommendation to the category manager for approval. The boundaries of each of their functions vary by organization; therefore, RPO is flexible to support different roles and functions associated with these roles.

The price planning approach is strategic and varies by organizational goal, competition, and category goals, especially in respect to chain or zone level pricing. RPO supports a flexible notion of this plan and allows the user to manage pricing at one, many, or all price zones.

Demand Group Management Workbook

This chapter contains information about managing demand groups. Demand groups are sets of items that have their prices determined by cross-item elasticities between items within the group. Use the Demand Group Management workbook to examine, create, and alter demand group definitions.

The Demand Group Management workbook contains two tabs:

- [Create/Modify/Delete Worksheet Tab](#)
- [Item - Demand Group Assignment Tab](#)

Building the Demand Group Management Workbook

To build the Demand Group Management Workbook, begin by starting the Demand Group Management wizard as follows:

1. From the File menu, click **New**, or click the **New** toolbar button.
2. From the Reg Price Optimization tab, select the **Demand Group Management** workbook and click **OK**. The Demand Group Management wizard opens.
3. Select demand group(s). Click **Next**.
4. Select categories to add to your demand group.
5. Click **Finish** to build the workbook.

Create/Modify/Delete Worksheet Tab

This tab contains one worksheet, the Create/Modify/Delete worksheet. Use this worksheet to create, modify, or delete a demand group with the use of DPM.

Figure 2–1 Create/Modify/Delete Demand Group Worksheet

Measure	Description	Optimization Level	Total Items	Active
001	yogurt	item_przn	18	<input checked="" type="checkbox"/>
002	dairy	class_str	11	<input checked="" type="checkbox"/>
003	canned goo	class_przn	8	<input checked="" type="checkbox"/>
004	paper good:	item_przn	10	<input checked="" type="checkbox"/>
005	beauty	item_przn	1	<input checked="" type="checkbox"/>

Demand Group

Table 2–1 Create/Modify/Delete Demand Group Worksheet Measures

Measure(s)	Description
Description	Stores the description for the demand group.
Optimization Level	Stores the optimization level for the demand group.
Total Items	A read-only, calculated measure. Stores the total number of items in the demand group.
Active	Select the check box if you want the demand group to be available in other workbooks.

Creating a Demand Group

To create a demand group:

1. From the Create/Modify/Delete worksheet, right-click the Demand Group hierarchy. In the right-click menu, select **Maintain Positions**, and then select **Add Position**.
2. In the Dynamic Position Maintenance window, click in the **Demand Group** field. The Position Description window appears. Enter a position label and position name. The position name must be unique; the position label is a useful description of the demand group. Click **OK**.
3. In the **Optimization Level** field, double-click the field and choose an optimization level from the list.
4. Select **Active** to make the demand group available in other workbooks.
5. Click **Calculate**.
6. From the File menu, select **Commit Now**.

Modifying a Demand Group

You can modify the optimization level for existing demand groups. To edit this field, perform the following:

Note: If you modify a demand group that is referenced in saved workbooks, those workbooks become invalid.

1. From the Create/Modify/Delete worksheet, click the **Optimization Level** field.
2. Use the list to select a new level.
3. Click **Calculate**.
4. From the File menu, select **Commit Now**.

Deleting a Demand Group

Note: If you delete a demand group that is referenced in saved workbooks, those workbooks become invalid.

You may only delete demand groups that were added using DPM.

To delete a demand group:

1. From the Create/Modify/Delete worksheet, right-click the Demand Group hierarch. In the right-click menu, select **Maintain Positions**, and then select **Delete Position**.
2. Select a demand group to remove. Click **OK**.

Item - Demand Group Assignment Tab

This tab contains one worksheet, the Item - Demand Group Assignment worksheet. Use this worksheet to examine or modify item assignment for all existing demand groups.

Table 2–2 *Item - Demand Group Assignment Worksheet Measures*

Measure	Description
Item - Demand Group Assignment	Used to associate items with demand groups.

Associating Items with Demand Groups

To associate an item with a demand group:

1. Open the Item - Demand Group Assignment worksheet.
2. You can associate items individually to a demand group or you can use the Select Rollup feature available in the right-click menu.
 - To select items individually, select the check boxes located next to the items you want to include in your demand group.
 - To use the rollup feature, right-click the Merchandise hierarchy. Click **Select Rollup** and then select the merchandise hierarchy level at which to assign items.
3. Click **Calculate**.
4. From the File menu, select **Commit Now**.

Planning Scope Management Workbook

The Planning Scope Management workbook is used to define a planning scope for which the user intends to perform price analysis. A planning scope identifies the beginning and end dates of the time period for which price optimization is performed. It also identifies the price zone or stores associated with the price analysis.

This workbook is used to create planning scopes. A planning scope is defined by its combination of demand groups, price zones, and selling period. Items within a demand group may be sold across multiple price zones. Therefore, the optimization goals, constraints, price zones, and selling periods may all differ as well. A planning scope must be defined for a demand group in order to begin the price analysis and scenario comparison process.

The Planning Scope Management workbook contains two worksheets:

- [Create/Modify/Delete Planning Scopes Worksheet](#)
- [Price Zone Assignment Worksheet](#)

Building the Planning Scope Management Workbook

To build the Planning Scope Management workbook, begin by using the Planning Scope Management wizard as follows:

1. Select **New** from the File menu, or click the **New** toolbar button.
2. From the Reg Price Optimization tab, select the **Planning Scope Management** workbook.
3. Click **OK**. The Planning Scope Management wizard opens.
4. Select a demand group. Click **Next**.
5. Select a planning scope.
 - If a planning scope does not exist, a sample planning scope called Example is provided. Select this planning scope to continue. After entering the Planning Scope worksheet, you must to create your own planning scope using DPM. The example planning scope is not usable.
 - If one or more planning scopes exist for the selected demand group, the wizard displays all of the associated planning scopes. Select at least one.
6. Click **Finish**.

Create/Modify/Delete Planning Scopes Worksheet

This worksheet is used to create a planning scope with the use of DPM. All planning scopes created within this worksheet are automatically assigned to the demand group in context.

Table 3–1 Create/Modify/Delete Planning Scope Worksheet Measures

Measure	Description
Description	User-defined description of the planning scope.
Planning Begin Date	The begin date for the planning scope.
Planning End Date	The end date for the planning scope.
Active	Select the check box if you want the planning scope to be available in other workbooks.

Creating a Planning Scope

To create a planning scope:

1. From the Create/Modify/Delete worksheet, right-click in the Planning Scope hierarchy. In the right-click menu, select **Maintain Positions**, and then select **Add Position**.
2. In the Dynamic Position Maintenance window, double-click the **Planning Scope** field. The **Position Description** window appears. Enter a position label and position name. The position name must be unique; the position label is a useful description of the planning scope. Click **OK** to return to the worksheet.
3. In the **Planning Begin Date** field, enter a begin date for the planning scope.
4. In the **Planning End Date** field, enter an end date for the planning scope.
5. Select **Active** to make the planning scope available in other workbooks.
6. Click **Calculate**.
7. From the File menu, select **Commit Now**.

Modifying an Existing Planning Scope

Note: If you modify a planning scope that is referenced within saved workbooks, those workbooks become invalid.

To modify an existing planning scope:

1. From the Create/Modify/Delete worksheet, locate the planning scope you want to modify.
2. Click any of the following fields to change their values: **Begin Date**, **End Date**, or **Description**.
3. For example, to change the planning scope's name or label:
 - a. Right-click the Planning Scope hierarchy. Select **Maintain Positions**, and then select **Modify Positions**.
 - b. From the list of planning scopes, select the planning scope for which you would like to change the name. Click **OK**.
 - c. Click once on the Planning Scope field. The **Position Label** and **Position Name** fields open.
 - d. In the **Position Label** and **Position Name** fields, enter a new name for the planning scope. Click **OK** to return to the worksheet.
4. Click **Calculate**.
5. From the File menu, select **Commit Now**.

Deleting a Planning Scope

Notes:

- You can only delete planning scopes that were created using DPM.
 - If you modify a planning scope that is referenced within saved workbooks, those workbooks become invalid.
-
-

To delete a planning scope:

1. From the Create/Modify/Delete worksheet, right-click the Planning Scope hierarchy.
2. Select **Maintain Positions**, and then select **Delete Position**.
3. In the Select Planning Scope window, select the planning scope you want to delete and click **OK**.
4. Click **Calculate**.
5. From the File menu, select **Commit Now**.

Price Zone Assignment Worksheet

This worksheet is used to assign price zones to planning scopes.

Figure 3–2 Price Zone Assignment Worksheet

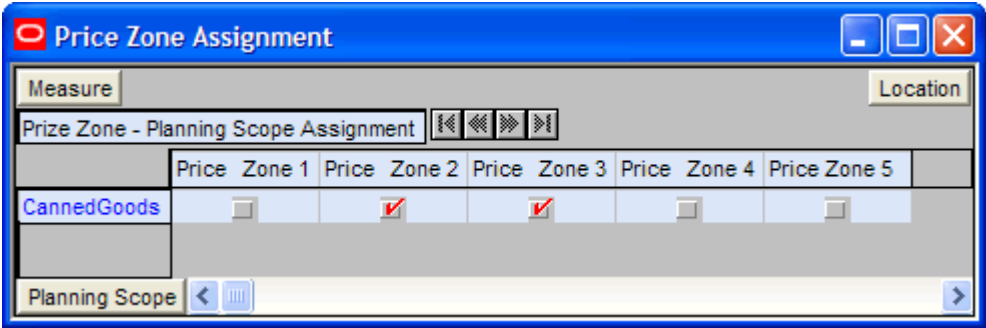

Table 3–2 Price Zone Assignment Worksheet Measures

Measure	Description
Price Zone - Planning Scope Assignment	Specifies the price zones that are associated with each planning scope.

Assigning Price Zones to a Planning Scope

To assign a price zone to a planning scope:

1. From the Planning Scope Management workbook, select the **Price Zone** worksheet.
2. Locate the planning scope you recently added in the previous section or make adjustments to an existing planning scope.
3. From the available price zones, select the check boxes of the price zones you wish to include in your planning scope.
4. Click **Calculate**.
5. From the File menu, select **Commit Now**.

Scenario Management Workbook

This chapter contains information regarding the Scenario Management workbook. A scenario is an analysis of a pricing problem. In a scenario, the user proceeds toward a particular optimization goal by following certain business constraints. Using the Scenario Management workbook, a price manager can create one or many scenario for a given demand group and planning scope and then compare these scenarios.

The Scenario Management workbook contains two tabs:

- [Create / Modify / Delete Tab](#)
- [Copy Tab](#)

Building the Scenario Management Workbook

To build the Scenario Management workbook, begin by starting the Scenario Management wizard:

1. Select **New** from the File menu, or click the **New** button from the toolbar.
2. From the Reg Price Optimization tab, select **Scenario Management** and click **OK**. The Scenario Management wizard opens.
3. Select a demand group. Click **Next**.

Note: If no demand groups exist, the wizard closes.

4. Select a planning scope. Click **Next**.

Note: If no planning scopes exist, the wizard closes and inform you that you first need to create and commit a planning scope before using the workbook.

5. Create or select a scenario.
 - If a scenario does not exist for the chosen demand group and planning scope, a sample scenario called Example is provided. Select this position to continue building the workbook.

Note: After entering the workbook, you must create your own scenario. This scenario is required to build the Price Analysis workbook later.

- If one or more scenarios exist for the selected demand group and planning scope, the wizard displays another wizard that lists the scenarios associated with the selected demand group and planning scope. Select at least one scenario to continue.
6. Click **Finish**.

Create / Modify / Delete Tab

This tab includes one worksheet, the Create / Modify / Delete worksheet. This worksheet is used to create, modify, or delete a scenario with the use of DPM.

Figure 4–1 Create/Modify/Delete Scenarios Worksheet

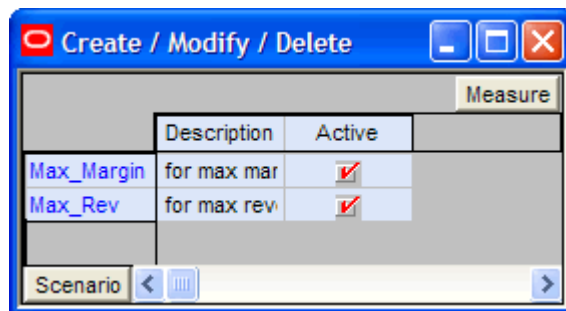

Table 4–1 Create/Modify/Delete Scenarios Worksheet Measures

Measures	Description
Description	User-defined description of the scenario.
Active	Select the check box if you want the scenario to be available in other workbooks.

Creating Scenarios

To create a scenario:

1. From the Create/Modify/Delete worksheet, right-click the Scenario hierarchy. Select **Maintain Position**, and then select **Add Position**.
2. In the Dynamic Position Maintenance window, click the **Scenario** field. The **Position Description** window appears. Enter a position label and position name. The position name must be unique; the position label is a useful description of the scenario. Click **OK** to return to the worksheet.
3. In the Create/Modify/Delete worksheet, enter a description of the new scenario.
4. Select **Active** to make the scenario available.
5. Click **Calculate**.
6. From the File menu, select **Commit Now**.

Modifying Existing Scenarios

Note: If you modify a scenario that is referenced within saved workbooks, those workbooks become invalid.

To modify a scenario:

1. From the Create/Modify/Delete worksheet, locate the scenario you wish to modify.
2. Click the **Description** field to enter a new description.
3. To change the scenario's name or label:
 - a. Right-click the Scenario hierarchy. Select **Maintain Positions**, and then select **Modify Positions**.
 - b. From the list of scenarios, select the scenario you wish to modify. Click **OK**.
 - c. In the Dynamic Position Maintenance window, click in the **Scenario** field. The Position Description window appears.
 - d. Enter a position label and position name. The position name must be unique; the position label is a useful description of the scenario.
 - e. Click **OK** to return to the worksheet.
4. Click **Calculate**.
5. From the File menu, select **Commit Now**.

Deleting Scenarios

Notes:

- You may only delete scenarios that were created using DPM.
 - If you delete a scenario that is referenced within saved workbooks, those workbooks become invalid.
-
-

To delete a scenario:

1. From the Create/Modify/Delete worksheet, right-click the Scenario hierarchy.
2. From the right-click menu, select **Maintain Positions**, and then select **Delete Position**.
3. In the Select Scenario window, select the scenario you wish to delete. Click **OK** to return to the worksheet.
4. Click **Calculate**.
5. From the File menu, select **Commit Now**.

Copy Tab

The Copy tab includes one worksheet, the Copy worksheet. This worksheet is used to perform a deep copy from one scenario to another.

Figure 4–2 *Copy Scenario Worksheet*

Table 4–2 *Copy Scenario Worksheet Measures*

Measures	Description
Copy From	The source scenario you wish to copy.
Copy To	The destination scenario.

Copying Scenarios

Note: You cannot use the Example scenario as either a source or destination scenario.

To copy a scenario:

1. Click the **Copy From** field. In the Select Scenario window that appears, select a source scenario. Click **OK**.
2. Click the **Copy To** field. In the Select Scenario window that appears, select a source scenario. Click **OK**.
3. Click **Calculate**.
4. From the File menu, select **Commit Now**.

Price Analysis Workbook

The Price Analysis workbook is used to analyze a scenario. The workbook provides the ability to specify pricing constraints, optimize prices, override optimizer recommendations, specify a business goal, and analyze the effect of price changes on decision variables such as gross margin and revenue.

The tabs contained within the Price Analysis workbook are outlined below.

- [Global Goals and Constraints Tab](#)
- [Priority Setting](#)
- [Item Groups Tab](#)
- [Item Constraints Tab](#)
- [Inter-Item Constraints Tab](#)
- [Competition Constraints Tab](#)
- [Price Ladders Tab](#)
- [Diagnostics Tab](#)
- [Recommendations and What-If Tab](#)

Building the Price Analysis Workbook

In order to build the Price Analysis workbook, you must use the Price Analysis wizard. To use the wizard:

Note: You must have a demand group, planning scope, and scenario created in order to build a Price Analysis workbook.

1. Select **New** from the File menu, or click the **New** toolbar button.
2. From the Reg Price Optimization tab, select **Price Analysis**. Click **OK** to open the Price Analysis wizard. The Price Analysis wizard opens.
3. Select a demand group. Click **Next**.
4. Select a planning scope. Click **Next**.
5. Select a scenario.
6. Click **Finish** to open the Price Analysis workbook.

Global Goals and Constraints Tab

Use this tab to specify the global goals and constraints for a scenario by defining the variables for the objective function. On the Global Goals and Constraints tab, the Global Goals and Constraints worksheet can be used to enter the various parameters used to define the optimization goals for a given scenario.

Global Goals and Constraints Worksheet

Figure 5–1 Global Goals and Constraints Worksheet

Measure	Value
Optimization Capacity	Full Optimization
Goal for Full Optimization	Combination
Goal Weight - Gross Margin	60%
Goal Weight - Revenue	20%
Goal Weight - Volume	10%
Goal Weight - CPI	10%
Min Gross Margin (Absolute)	\$1,000,000.00
Min Gross Margin (% of Original)	5.00%
Min Revenue (Absolute)	\$5,000,000.00
Min Revenue (% of Original)	5.00%
Min Volume (Absolute)	100,000.00
Min Volume (% of Original)	10.00%
CPI (Absolute)	150.00
CPI (% of Original)	3.00%
Max # Price Changes (Absolute)	100
Max # Price Changes (% of Total Prices)	5%
Reset Run	<input type="checkbox"/>
Original Gross Margin	\$4,351.77
Original Gross Margin %	14.46%
Original Revenue	\$30,092.12
Original Volume	27,188.00
Original CPI	136.30

Table 5–1 Global Goals and Constraints Worksheet Measures

Measure	Description
Optimization Capacity	Options are Full Optimization, Price Simulation, and Rule Management.
Goal for Full Optimization	When Full Optimization is chosen for the Optimization Capacity measure, use this measure to select the goal. Options are Highest Item Price, Gross Margin, Revenue, Volume, CPI, and Combination.
Goal Weight - Gross Margin	This is only used if Combination is selected as the option in the Goal for Full Optimization measure. It stores the weight for the Gross Margin objective function component in case a combination is being used. If the Combination option is not used, the value is ignored.

Table 5–1 (Cont.) Global Goals and Constraints Worksheet Measures

Measure	Description
Goal Weight - Revenue	This is only used if Combination is selected as the option in the Goal for Full Optimization measure. It stores the weight for the Revenue objective function component. If the Combination option is not used, the value is ignored.
Goal Weight - Volume	This is only used if Combination is selected as the option in the Goal for Full Optimization measure. It stores the weight for the Volume objective function component. If the Combination option is not used, the value is ignored.
Goal Weight - CPI	This is only used if Combination is selected as the option in the Goal for Full Optimization measure. It stores the weight for the CPI objective function component. If the Combination option is not used, the value is ignored.
Min Gross Margin (Absolute)	Store the entry for the minimum gross margin dollars that the user wants the optimizer to achieve.
Min Gross Margin (% of Original)	Stores the entry for the minimum gross margin that the user wants the optimizer to achieve. The minimum percentage is expressed to the base of 100%, where 100% is calculated using the current price. If a 10% improvement is desired, the user should enter 110%.
Min Revenue (Absolute)	Stores the entry for the minimum revenue that the user wants the optimizer to achieve.
Min Revenue (% of Original)	Stores the entry for the minimum revenue that the user wants the optimizer to achieve. The minimum percentage is expressed to the base of 100%, where 100% is calculated using the current price. If a 10% improvement is desired, the user should enter 110%.
Min Volume (Absolute)	Stores the entry for the minimum volume that the user wants the optimizer to achieve.
Min Volume (% of Original)	Stores the entry for the minimum volume that the user wants the optimizer to achieve. The minimum percentage is expressed to the base of 100%, where 100% is calculated using the current price. If a 10% improvement is desired, the user should enter 110%.
CPI (Absolute)	CPI represents the revenue that would be generated by a pricing scenario's pricing to the average pricing of competitor items. CPI is expressed as a dollar amount difference between your revenue and the revenue based on your competitor's price.
CPI (% of Original)	CPI represents the ratio of revenue that would be generated by a pricing scenario's pricing to the average pricing of competitor items. CPI is expressed to the base of 100%, where 100% represents the current ratio. For example, for a 10% improvement against a competitor, enter 110%.
Max # of Price Changes (Absolute)	Stores the entry for the maximum number of price change recommendations that the optimizer is allowed to make.
Max # of Price Changes (% of Total Prices)	Stores the entry for the maximum number of price change recommendations that the optimizer is allowed to make. This value is treated as a percent and should never be greater than 100.

Table 5–1 (Cont.) Global Goals and Constraints Worksheet Measures

Measure	Description
Reset Run	If selected, the solver does not consider the current recommended price when calculating the price. If not selected, the solver starts from the current recommended price to find a better solution.
Original Gross Margin	The gross margin based on the current prices. This is a read-only field.
Original Gross Margin %	The gross margin expressed as a percentage ratio of (revenue - cost)/cost, based on the current prices. This is a read-only field.
Original Revenue	The revenue based on the current prices. This is a read-only field.
Original Volume	The volume based on the current prices. This is a read-only field.
Original CPI	The current CPI (Competitor Price Index). This is a read-only field.

Priority Setting

The Priority Settings tab allows you to set the priority for rules and competitors.

There are two worksheets contained within this tab:

- [General Priority Worksheet](#)
- [Competition Priority Worksheet](#)

General Priority Worksheet

The General Priority worksheet allows you to set the priority for each type of rule. The default rule priorities are set at the scenario level. However, the priority level can be overwritten for an individual constraint. Note that multiple constraint types can have the same priority.

Figure 5–2 General Priority

	Price Zone 2	Price Zone 3
Inter Item Rule Priority	Priority 3	Priority 3
Margin Rule Priority	Priority 1	Priority 1
Max Percentage Price Change Priority	Priority 4	Priority 4
Max/Min Price Priority	Priority 2	Priority 2
Price Family Priority	Priority 2	Priority 2
Price Hold Priority	No Priority	No Priority

Table 5–2 General Priority Worksheet Measures

Measure	Description
Inter Item Rule Priority	Used to set the priority for the inter-item rule.
Margin Rule Priority	Used to set the priority for the margin rule.
Max Percentage Price Change Priority	Used to set the priority for the max percentage price change.
Max/Min Price Priority	Used to set the priority for the max/min price.
Price Family Priority	Used to set the priority for the price family.
Price Hold Priority	Used to set the priority for the price hold.

Competition Priority Worksheet

The Competition Priority worksheet allows you to specify which competitor takes priority in the price optimization.

Figure 5–3 *Competition Priority Worksheet*

The screenshot shows a software window titled "Competition Priority". Inside the window, there is a "Location" field at the top left and a "Competition" field at the top right. Below these, there is a "Price Zone 2" field followed by four navigation buttons (back, forward, etc.). The main area of the window contains a table with two columns. The first column is labeled "Competition Priority" and the second column is labeled "Competition". The table has two rows: the first row shows "J Mart" and "Smith", and the second row shows "Priority 1" and "Priority 2". At the bottom of the window, there is a "Measure" field followed by a left arrow, a list icon, and a right arrow.

Table 5–3 *Competition Priority Worksheet Measures*

Measure	Description
Competition Priority	Allows you to specify which competitor takes priority in the price optimization.

Item Groups Tab

Item groups are logical groupings of items within a demand group. The item groups tab allows users to create, modify, or delete item groups. There are two worksheets contained within this tab:

- [Create/Modify/Delete Worksheet](#)
- [Item Assignment Worksheet](#)

Create/Modify/Delete Worksheet

This worksheet is used to create and delete item groups with the use of DPM. You may also use this worksheet to add, modify or delete descriptions of item groups.

Figure 5–4 *Create/Modify/Delete Item Groups Worksheet*

	Item Group Description	Price Family Indicator
Example		<input type="checkbox"/>
peaches 14.5oz	peaches, 14.5oz, all brands	<input checked="" type="checkbox"/>
peaches 8.5 oz	peaches, 8.5oz, all brands	<input checked="" type="checkbox"/>
yogurt 4oz	yogurt, 4oz, all brands	<input checked="" type="checkbox"/>

Table 5–4 *Create/Modify/Delete Item Groups Worksheet Measures*

Field	Description
Item Group Description	Stores the description of an item group.
Price Family Indicator	Select this check box if the item group should be treated as a price family.

Item Assignment Worksheet

This worksheet is used to assign items to item groups. Price managers can manually select items by selecting the item group check boxes next to the items.

Figure 5–5 Item Assignment Worksheet

The screenshot shows a software window titled "Item Assignment". It contains a table with columns for item names and checkboxes for assignment to different item groups. The "Item Group" column at the top lists "peaches 14.5oz", "peaches 8.5 oz", and "yogurt 4oz". The table lists various items, with checkboxes marked with red checkmarks indicating assignment.

Item	Example	peaches 14.5oz	peaches 8.5 oz	yogurt 4oz
Private Label Cranberry Sauce Whole B	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Private Label Diced Peaches 14.5 oz	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Private Label Diced Peaches 8.5 oz	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Private Label Halved Peaches 14.5 oz	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Private Label Halved Peaches 8.5 oz	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Private Label Ketchup 14 oz	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Private Label Ketchup 32 oz	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Private Label Pumpkin 15 oz	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Private Label Sliced Peaches 14.5 oz	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Private Label Sliced Peaches 8.5 oz	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Private Label Tomato Paste 5 oz	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Private Label Tomato Sauce 15.5 oz	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Private Label Tomato Sauce 8 oz	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Private Label Tomatoes 14.5 oz	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Private Label Tomatoes 28 oz	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Private Label Whole Tomatoes 28 oz	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Table 5–5 Item Assignment Worksheet Measures

Measure	Description
Item - Item Group Assignment	Stores the mapping between an item group and items in the form of a Boolean mask.

Item Constraints Tab

This tab is used to create, delete, and modify item constraints related to individual items. This tab contains two worksheets:

- [Item Level Worksheet](#)
- [Item Group Level Worksheet](#)

Item Level Worksheet

This worksheet is used to enter constraints for individual items.

Figure 5–6 *Item Level Worksheet*

The screenshot shows a software window titled 'Item Level' with a blue title bar. Inside, there's a 'Location' dropdown set to 'Price Zone 2' and a 'Merchandise' dropdown. Below these are two columns for item details. The first column is for 'Private Label Cranberry Sauce Whole Berry 15 oz' and the second is for 'Private Label Diced Peaches 14.5 oz'. The main area is a table of constraints for each item.

	Private Label Cranberry Sauce Whole Berry 15 oz	Private Label Diced Peaches 14.5 oz
Label		
Active Item?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Original Price	\$1.39	\$1.09
Price Ladder	Price Ladder with \$0.2 ste	Price Ladder with \$0.1 st
Price Hold	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Apply Min/Max Price	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Min Price		\$0.99
Max Price		\$1.19
Treat Min/Max Price as %	<input type="checkbox"/>	<input type="checkbox"/>
Price Constraint Priority	Default	Priority 1
Apply Min/Max Margin	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Original Cost	\$1.14	\$0.91
Min Margin		10.00%
Max Margin		99.00%
Margin Constraint Priority	Default	Default
Max % Price Change		20.00%
Max % Price Change Priority	Default	Default
Message		* Price Range Constraint

At the bottom, there's a 'Measure' section with navigation buttons.

Table 5–6 *Item Level Worksheet Measures*

Measure	Description
Label	User-defined description of the item constraint.
Active Item?	Displays whether an item is being considered for optimization.
Original Price	This is read-only field for your reference.
Price Ladder	The user's choice of price ladder. All items should be assigned a price ladder.
Price Hold	Select this if there is a price hold constraint on the current price.

Table 5–6 (Cont.) Item Level Worksheet Measures

Measure	Description
Apply Min/Max Price	Select this option to allow the price range constraints to be applied. If selected, the user must enter values for the Min and Max prices.
Min Price	The minimum price for an item.
Max Price	The maximum price allowed for an item.
Treat Min/Max Price as %	Select this option if the minimum and maximum prices should be treated as a percentage rather than an absolute value.
Price Constraint Level	Defines the priority level for the price range constraint.
Apply Min/Max Margin	Select this option to allow the margin constraints to be applied.
Original Cost	This is read-only field for your reference
Min Margin	The minimum margin allowed for an item.
Max Margin	The maximum margin allowed for an item.
Margin Constraint Priority	Defines the priority level for the margin constraint.
Max% Price Change	The maximum price change allowed as a percent of the current price.
Message	Describes the item constraint violation that has occurred.

Item Group Level Worksheet

This worksheet is used to enter constraints for item groups.

Figure 5–7 *Item Group Level Worksheet*

	Example	ketchup	peaches
Label			
Price Hold	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Treat as Price Family	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Apply Min/Max Price	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Max % Price Change		50.00%	
Max % Price Change Priority	Default	Default	Default
Message		* Price Ran	

Table 5–7 *Item Group Level Worksheet Measures*

Measure	Description
Label	User-defined description of the item constraint.
Price Hold	Flag if there is a price hold constraint on the current price.
Treat as Price Family	Flag if the item group is to be treated as a price family.
Apply Min/Max Price	Select this option to allow the price constraints to be applied. If selected, the user must enter values for the Min and Max prices.
Min Price	The minimum price allowed for an item.
Max Price	The maximum price allowed for an item.
Treat Min/Max Price as %	Select this option if the minimum and maximum prices should be treated as a percentage rather than an absolute value.
Price Constraint Priority	Defines the priority level for the price range constraint.
Apply Min/Max Margin	Select this option to allow the margin constraints to be applied.
Min Margin	The minimum margin allowed for an item.
Max Margin	The maximum margin allowed for an item.
Margin Constraint Priority	Defines the priority level for the margin constraint.

Table 5–7 (Cont.) Item Group Level Worksheet Measures

Measure	Description
Apply Max % Price Change	Select this option to allow the price constraints to be applied.
Max% Price Change	The maximum price change allowed as a percent of the current price.
Max % Price Change Priority	Defines the priority level for the price change constraint.
Message	Describes the item constraint violation that has occurred.

Inter-Item Constraints Tab

This tab provides three worksheets that are used to create, modify, and delete inter-item constraints at the item and item group levels. These worksheets also provide the ability to disable constraints without having to delete them.

- [Item Group Level Worksheet](#)
- [Item Level Worksheet](#)
- [Item Link Group Overrides Worksheet](#)

Item Group Level Worksheet

This worksheet is used to enter inter-item constraints at the item group level. Constraints that are placed between item groups are later translated to the item level using the item link groups. Similar to item level constraints, multiple constraints can be entered that have the same item group on the LHS (left hand side) and/or the RHS (right hand side).

Figure 5–8 Item Group Level Worksheet

	Apply Constraint	LHS Multiplier	LHS Item Group	Operator	RHS Multiplier	RHS Item Group	RHS Constant	Item Link Group to Use	Reset Constraint Overrides to Item Link Group	Constraint Type	Type	Message
C00001	<input checked="" type="checkbox"/>	100.00%	peaches 14.5	>=	100.00%	peaches 8.5	\$0.20	Item Link C	<input checked="" type="checkbox"/>	Default	Item	* Price
C00002	<input type="checkbox"/>	100.00%		<=	100.00%				<input type="checkbox"/>	Default	Item	
C00003	<input type="checkbox"/>	100.00%		<=	100.00%				<input type="checkbox"/>	Default	Item	
C00004	<input type="checkbox"/>	100.00%		<=	100.00%				<input type="checkbox"/>	Default	Item	
C00005	<input type="checkbox"/>	100.00%		<=	100.00%				<input type="checkbox"/>	Default	Item	
C00006	<input type="checkbox"/>	100.00%		<=	100.00%				<input type="checkbox"/>	Default	Item	
C00007	<input type="checkbox"/>	100.00%		<=	100.00%				<input type="checkbox"/>	Default	Item	
C00008	<input type="checkbox"/>	100.00%		<=	100.00%				<input type="checkbox"/>	Default	Item	

Table 5–8 Item Group Level Worksheet Measures

Measure	Description
Label	The user-defined description of the constraint.
Apply Constraint	Select this option to allow the item group constraints to be applied.
LHS Multiplier	The LHS Unit of Measure (UOM) multiplier for the inter-item constraint.
LHS Item Group	The item identifier for the LHS item group in the inter-item constraint.
Operator	The operator that relates the LHS with the RHS.
RHS Multiplier	The RHS Unit of Measure (UOM) multiplier for the inter-item constraint.
RHS Item Group	The item identifier for the RHS item group in the inter-item constraint.
RHS Constant	The RHS constant in the inter-item constraint.
Item Link Group to Use	Specifies the item link group (and therefore that item group's constraints) that the item will adhere to. The item group's constraints are aggregated to the item level.
Reset Constraint Override	If selected, overrides are removed when the worksheet is calculated.
Constraint Priority	Defines the priority level for the item group constraint.
Type	Specifies the constraint type. This field determines how relationships are handled between items. Relationships can be defined according to item, UOM, or EUOM. Item: item to related item (Brand X pen to Brand Y pen) UOM: unit of measures (24-pack to 6-pack) EUOM: equivalent units (24.6 oz. to 32.8 oz.)
Message	Describes the item constraint violation that has occurred.

Item Level Worksheet

This worksheet is used to enter inter-item constraints at the item level. Managers can enter multiple constraints that have the same item on the LHS (left hand side) and/or the RHS (right hand side).

Figure 5–9 Item Level Worksheet

Label	Apply Constraint	LHS Multiplier	LHS Item	Operator	RHS Multiplier	RHS Item	RHS Constant	Constraint Priority	Type	Message
C00001	<input checked="" type="checkbox"/>	100.00%	Private L	=	100.00%	Private I	\$1.00	Default	Item	* Price
C00002	<input type="checkbox"/>	100.00%		<=	100.00%			Default	Item	
C00003	<input type="checkbox"/>	100.00%		<=	100.00%			Default	Item	
C00004	<input type="checkbox"/>	100.00%		<=	100.00%			Default	Item	

Table 5–9 Item Group Level Worksheet Measures

Measure	Description
Label	The user-defined description of the constraint.
Apply Constraint	Select this option to allow the inter-item constraints to be applied.
LHS Multiplier	The LHS Unit of Measure (UOM) multiplier for the inter-item constraint.
LHS Item	The item identifier for the LHS item in the inter-item constraint.
Operator	The operator that relates the LHS with the RHS.
RHS Multiplier	The RHS Unit of Measure (UOM) multiplier for the inter-item constraint.
RHS Item	The item identifier for the RHS item in the inter-item constraint.
RHS Constant	The RHS constant in the inter-item constraint.
Constraint Priority	Defines the priority level for the item constraint.

Table 5–9 (Cont.) Item Group Level Worksheet Measures

Measure	Description
Type	<p>Specifies the constraint type. This field determines how relationships are handled between items. Relationships can be defined according to item, UOM, or EUOM.</p> <p>Item: item to related item (Brand X pen to Brand Y pen)</p> <p>UOM: unit of measures (24-pack to 6-pack)</p> <p>EUOM: equivalent units (24.6 oz. to 32.8 oz.)</p>
Message	Describes the item constraint violation that has occurred.

Item Link Group Overrides Worksheet

This worksheet is used to examine and override item linkages for inter-item constraints at the item group level. Inter-item link groups define the item to item relationship between two item groups. This relationship determines the item interconnections where the constraint will be applied.

For each constraint at each location, a cross grid shows the LHS items and RHS items with check marks establishing the linkage between items on both sides. Users can override relationships by removing the checks between items. Relationships can be reestablished by adding a check to the check box.

Figure 5–10 Item Link Group Overrides Worksheet

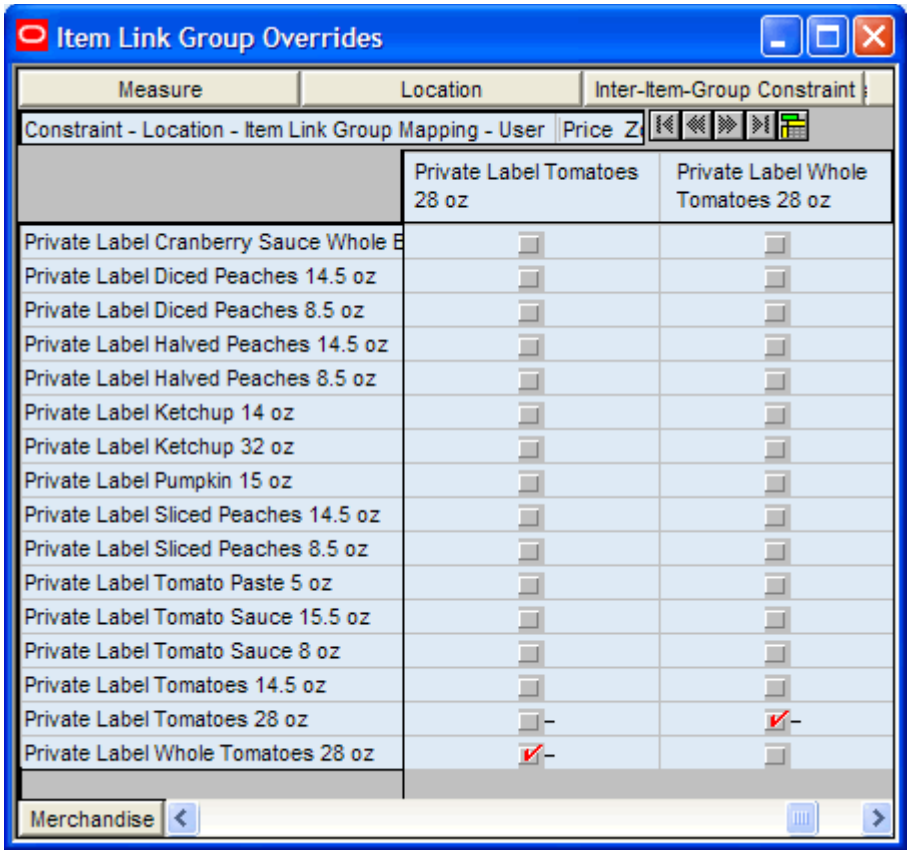

Table 5–10 Item Link Group Overrides Worksheet Measures

Measure	Description
Constraint – Location – Item Link Group Mapping – User	The mapping between LHS items and RHS items for each item link group for a given constraint at a particular location. This mapping is used to translate item group level constraints to the item level for the optimizer.

Competition Constraints Tab

This tab is used to specify competition constraints. Competition constraints can be specified at the item level or at the item group level. This tab contains five worksheets:

- [Item Level Worksheet](#)
- [Item Group Level Worksheet](#)
- [Item - Competition Item Linkage Worksheet](#)
- [Competition Item Metrics Worksheet](#)
- [Linked Competition Prices Worksheet](#)

Item Level Worksheet

This worksheet is used to specify item level competition constraints. Multiple constraints can be written between the same item and the same competitor.

Figure 5–11 Item Level Worksheet

	Label	Apply Constraint	Item	Operator	Competitor	Multiplier	Constant	Constraint Priority	Message
C00001		<input checked="" type="checkbox"/> -	Diced Peach	<=	J Mart	80.00%		Default	* Price
C00002		<input checked="" type="checkbox"/> -	Ketchup	>=	Smith	100.00%	\$0.20	Default	
C00003		<input type="checkbox"/>		<=		100.00%		Default	

Table 5–11 Item Level Worksheet Measures

Measure	Description
Label	User-defined description of the item.
Apply Constraint	Indicates whether the constraint is applicable for the optimization run.
Item	The LHS Item for the item level competition constraint.
Operator	The comparison operator to relate a retailer's item to the competition.
Competitor	The competitor with whom the particular item is competing.
Multiplier	The RHS multiplier for the competition price.
Constant	The RHS constant.
Constraint Priority	Defines the priority level for the competition item constraint.
Message	Describes the item constraint violation that has occurred.

Item Group Level Worksheet

This worksheet is used to specify competition constraints at an item group level. Constraints are specified using the same parameters as those that are at the item level.

Figure 5–12 Item Group Level Worksheet

Label	Apply Constraint	Item Group	Operator	Multiplier	Competitor	Constant	Constraint Priority	Message
C00001	<input checked="" type="checkbox"/>	peache:	<=	90.00%	J Mart		Default	
C00002	<input checked="" type="checkbox"/>	peache:	>=	100.00%	Smith	\$0.10	Default	* Price
C00003	<input type="checkbox"/>		<=	100.00%			Default	

Table 5–12 Item Group Level Worksheet Measures

Measure	Description
Label	User-defined description of the item.
Apply Constraint	Indicates whether the constraint is applicable for the optimization run.
Item Group	The LHS item for the item level competition constraint.
Operator	The comparison operator to relate retailer's item to the competition.
Multiplier	The RHS multiplier for the competition price.
Competitor	The competitor with whom the particular item is competing.
Constant	The RHS constant.
Constraint Priority	Defines the priority level for the item group constraint.
Message	Describes the item constraint violation that has occurred.

Item - Competition Item Linkage Worksheet

This worksheet is used to examine the linkage between the retailer’s items and the competition’s items. This worksheet cannot be used to modify or override linkages.

Figure 5–13 Item Competition Item Linkage Worksheet

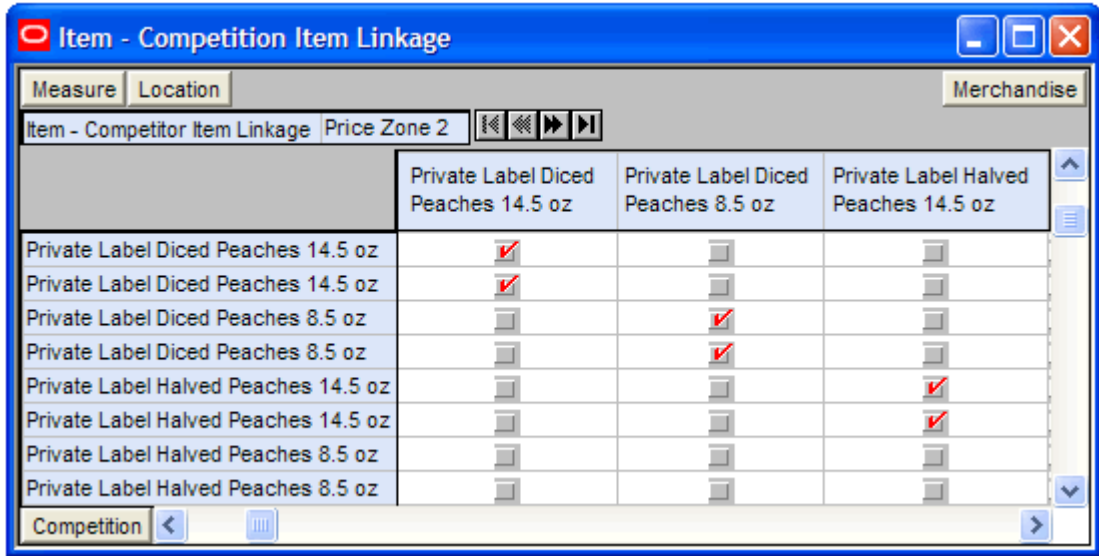

Table 5–13 Item—Competition Item Linkage Worksheet Measures

Measure	Description
Item - Competitor Item Linkage	The linkage between competitor’s item(s) and retailer’s item.

Competition Item Metrics Worksheet

This worksheet is used to examine pricing metrics for competitor items according to current price, the last date when the current price was checked, and the type of price.

Figure 5–14 *Competition Item Metrics Worksheet*

	Competitor Current Price	Competitor Price Type	Date of Last Price Check	Commit Competitor Price
Private Label Diced Peaches 14.5 oz	\$1.32	Regular Price	2/10/2009	<input type="checkbox"/>
Private Label Diced Peaches 14.5 oz	\$1.00	Regular Price	2/10/2009	<input type="checkbox"/>
Private Label Diced Peaches 8.5 oz		Regular Price	2/10/2009	<input type="checkbox"/>
Private Label Diced Peaches 8.5 oz	\$0.72	Regular Price	2/10/2009	<input type="checkbox"/>
Private Label Halved Peaches 14.5 oz		Regular Price	2/10/2009	<input type="checkbox"/>
Private Label Halved Peaches 14.5 oz	\$1.32	Regular Price	2/10/2009	<input type="checkbox"/>
Private Label Halved Peaches 8.5 oz		Regular Price	2/10/2009	<input type="checkbox"/>
Private Label Halved Peaches 8.5 oz		Regular Price	2/10/2009	<input type="checkbox"/>
Private Label Ketchup 14 oz	\$1.00	Regular Price	2/10/2009	<input type="checkbox"/>
Private Label Ketchup 14 oz		Regular Price	2/10/2009	<input type="checkbox"/>
Private Label Ketchup 32 oz		Regular Price	2/10/2009	<input type="checkbox"/>
Private Label Ketchup 32 oz	\$1.60	Regular Price	2/10/2009	<input type="checkbox"/>
Private Label Pumpkin 15 oz	\$1.30	Regular Price	2/10/2009	<input type="checkbox"/>
Private Label Pumpkin 15 oz	\$1.42	Regular Price	2/10/2009	<input type="checkbox"/>
Private Label Sliced Peaches 14.5 oz		Regular Price	2/10/2009	<input type="checkbox"/>
Private Label Sliced Peaches 14.5 oz		Regular Price	2/10/2009	<input type="checkbox"/>

Table 5–14 *Competition Item Metrics Worksheet Measures*

Measure	Description
Competitor Current Price	The current price of the competitor item at a particular location. You may update this by editing the field.
Competitor Price Type	User this field to note the price type for the current price (promotional, regular price, etc.).
Date of Last Price Check	The last date the price was checked.
Commit Competitor Price	Select this option to override the previous competitor price with the price you entered in the Competitor Current Price field.

Linked Competition Prices Worksheet

This worksheet is used to compare the retailer's item's original price with the linked items of other competitors. Since each retailer's item could be linked with more than one item of the same competitor, this worksheet displays the range of competitor prices by listing both a minimum and maximum price.

Figure 5–15 Linked Competition Prices Worksheet

	J Mart				Smith			
	Our Current Cost	Our Current Price	Competitor Min. Price	Competitor Max. Price	Our Current Cost	Our Current Price	Competitor Min. Price	Competitor Max. Price
Private Label Diced Peaches 1	\$0.91	\$1.09	\$1.00	\$1.00	\$0.91	\$1.09	\$1.32	\$1.32
Private Label Diced Peaches 8	\$0.59	\$0.69			\$0.59	\$0.69	\$0.72	\$0.72
Private Label Halved Peaches 8	\$1.02	\$1.19			\$1.02	\$1.19	\$1.32	\$1.32
Private Label Halved Peaches 8	\$0.61	\$0.69			\$0.61	\$0.69		
Private Label Ketchup 14 oz	\$0.95	\$1.09	\$1.00	\$1.00	\$0.95	\$1.09		
Private Label Ketchup 32 oz	\$1.48	\$1.69	\$1.60	\$1.60	\$1.48	\$1.69		
Private Label Pumpkin 15 oz	\$1.22	\$1.39	\$1.30	\$1.30	\$1.22	\$1.39	\$1.42	\$1.42
Private Label Sliced Peaches 4	\$1.01	\$1.19			\$1.01	\$1.19		
Private Label Sliced Peaches 4	\$0.60	\$0.69	\$0.70	\$0.70	\$0.60	\$0.69		
Private Label Tomato Paste 5	\$0.57	\$0.69	\$0.50	\$0.50	\$0.57	\$0.69	\$0.62	\$0.62
Private Label Tomato Sauce 1	\$0.75	\$0.89	\$0.70	\$0.70	\$0.75	\$0.89	\$0.72	\$0.72
Private Label Tomato Sauce 8	\$0.59	\$0.69	\$0.50	\$0.50	\$0.59	\$0.69		
Private Label Tomatoes 14.5 oz	\$0.92	\$1.09	\$0.90	\$0.90	\$0.92	\$1.09	\$0.92	\$0.92
Private Label Tomatoes 28 oz	\$1.39	\$1.59	\$1.40	\$1.40	\$1.39	\$1.59	\$1.42	\$1.42

Table 5–15 Linked Competition Prices Worksheet Measures

Measure	Description
Our Current Cost	Item's cost to the retailer.
Our Current Price	Retailer's current price.
Competitor Min. Price	Competitor's minimum price for all linked items.
Competitor Max. Price	Competitor's maximum price for all linked items.

Price Ladders Tab

This tab is used to manage price ladders. Price ladders created in this tab are independent of scenarios and can be used with any scenario. Price point - price ladders are expressed as a list of prices in RPO. Items can be assigned to only one price ladder at a time.

Price Points Worksheet

This worksheet is used to examine, create, modify or delete price point - price ladders.

Figure 5–16 Price Points Worksheet

Measure	001	002	003	004
Price Ladder with \$0.1 step from 0.09 to 9.99	\$0.09	\$0.19	\$0.29	\$0.39
Price Ladder with \$0.2 step from 0.19 to 19.99	\$0.19	\$0.39	\$0.59	\$0.79
Price Ladder with \$0.5 step from 0.39 to 48.89	\$0.39	\$0.89	\$1.39	\$1.89
Price Ladder with \$1 step from 0.99 to 99.99	\$0.99	\$1.99	\$2.99	\$3.99

Table 5–16 Price Points Worksheet Measures

Measures	Description
Price Points - Price Ladder	The list of price points for a given price ladder.

Diagnostics Tab

This tab is used after a price optimization or price validation run. It indicates the response of the optimizer and which constraints are relaxed to make the solution feasible or which constraint makes the solution infeasible.

This tab contains eight worksheets:

- Optimization/Verification Response Worksheet
- Violated/Relaxed Items Worksheet
- Violated/Relaxed Item Group Level Item-Specific Constraints Worksheet
- Violated/Relaxed Item Level Item-Specific Constraints Worksheet
- Violated/Relaxed Item Level Inter-Item Constraints Worksheet
- Violated/Relaxed Item Group Level Inter-Item Constraints Worksheet
- Violated/Relaxed Item Level Competition Constraints Worksheet
- Violated/Relaxed Item Group Level Competition Constraints Worksheet

Optimization/Verification Response Worksheet

This worksheet indicates the response of the optimizer after running the price optimization or validation using the Find Constraint Violations or Optimize Prices options in the RegPrice menu. It indicates success or failure, the date and time when the last run was completed, and any recommendations, errors, or other response messages from the optimizer.

Figure 5–17 Optimization Verification Response Worksheet

		Optimizer/Validator Message	Last Run Date Time
Price Zone 2	Original		
	Recommended	Range infeasibility	3/1/2010
	User		
Price Zone 3	Original		
	Recommended	Feasible	3/1/2010
	User		

Table 5–17 Optimization/Verification Response Worksheet Measures

Measure(s)	Description
Optimizer/Validator Message	This measure always displays any error or recommendation message from the optimizer or the validator.
Last Run Date Time	Indicates the last date and time when an optimization or validation was run for the price validation.

Violated/Relaxed Items Worksheet

For each validation or optimization run, this worksheet displays the item locations for which constraints were violated or relaxed. For each item location, the worksheet indicates the type of constraint, ranging constraint, and/or inter-SKU constraint that could not be satisfied or has been relaxed.

Figure 5–18 *Violated/Relaxed Items Worksheet*

Location	Item	Violated/Relaxed Constraint Type
Original	Private Label Cranberry Sauce Whole Berry 15 oz	None
	Private Label Diced Peaches 14.5 oz	None
	Private Label Diced Peaches 8.5 oz	None
	Private Label Halved Peaches 14.5 oz	None
	Private Label Halved Peaches 8.5 oz	None
Recommended	Private Label Cranberry Sauce Whole Berry 15 oz	None
	Private Label Diced Peaches 14.5 oz	Range Only
	Private Label Diced Peaches 8.5 oz	None
	Private Label Halved Peaches 14.5 oz	None
	Private Label Halved Peaches 8.5 oz	None
User	Private Label Cranberry Sauce Whole Berry 15 oz	None
	Private Label Diced Peaches 14.5 oz	None
	Private Label Diced Peaches 8.5 oz	None

Table 5–18 *Violated/Relaxed Item Worksheet Measures*

Measure(s)	Description
Violated/Relaxed Constraint Type	<p>This measure indicates whether a constraint was relaxed or violated for a given SKU. Options are</p> <p>None - No constraints were violated or relaxed.</p> <p>Range Only - A range constraint was violated or relaxed.</p> <p>Inter-SKU Only - An inter-item constraint was violated or relaxed.</p>

Violated/Relaxed Item Group Level Item-Specific Constraints Worksheet

This worksheet displays all item group level item-specific constraints that are related to the SKUs that have violated or relaxed constraints. Such constraints include minimum and maximum price, minimum and maximum margin, price hold, the maximum price change allowed on the item, and the treatment of an item group as a price family.

These constraints are displayed with the same values as in the [Item Group Level Worksheet](#) in the Item Constraints tab of the Price Analysis workbook. All other constraints display the measure's N/A value. This worksheet is read-only and cannot be used to modify constraints.

Note: The Return Type measure in this workbook displays whether constraints were violated or relaxed:

None - No constraints were violated or relaxed.

Range Only - A range constraint was violated or relaxed.

Inter-SKU Only - An inter-item constraint was violated or relaxed.

The Message measure further describes the violation that has occurred.

Figure 5–19 *Violated/Relaxed Item Group Level Item-Specific Constraints*

Violated/Relaxed Item Level Item-Specific Constraints Worksheet

This worksheet displays all item level item-specific constraints that are related to the SKUs that have violated or relaxed constraints. Such constraints include minimum and maximum price, minimum and maximum margin, price hold, and the maximum price change allowed on the item.

These constraints are displayed with the same values as in the [Item Level Worksheet](#) in the Item Constraints tab of the Price Analysis workbook. All other constraints display the measure's N/A value. This worksheet is read-only and cannot be used to modify constraints.

Note: The Return Type measure in this workbook displays whether constraints were violated or relaxed:

None - No constraints were violated or relaxed.

Range Only - A range constraint was violated or relaxed.

Inter-SKU Only - An inter-item constraint was violated or relaxed.

The Message measure further describes the violation that has occurred.

Figure 5–20 *Violated/Relaxed Item Level Item-Specific Constraints*

	Private Label Cranberry S	Private Label Diced Peaches 14.5 oz

Max % Price Change Priority	Default	Default
Return Type	None	Violated
Message		* Price Range Constraint is violated.

Violated/Relaxed Item Level Inter-Item Constraints Worksheet

This worksheet displays all item level inter-item constraints that are related to the SKUs that had violated or relaxed constraints.

These constraints are displayed with the same values as in the [Item Level Worksheet](#) in the Inter-Item Constraints tab of the Price Analysis workbook. All other constraints display the measure's N/A value. This worksheet is read-only and cannot be used to modify constraints.

Note: The Return Type measure in this workbook displays whether constraints were violated or relaxed:

None - No constraints were violated or relaxed.

Range Only - A range constraint was violated or relaxed.

Inter-SKU Only - An inter-item constraint was violated or relaxed.

The Message measure further describes the violation that has occurred.

Figure 5-21 Violated/Relaxed Item Level Inter-Item Constraints Worksheet

Label	Apply Constraint	LHS Multiplier	LHS Item	Operator	RHS Multiplier	RHS Item	RHS Constant	Constraint Priority	Type	Return Type	Message
C00001	<input type="checkbox"/>	100.00%		<=	100.00%			Default	Item	None

Competition Item Group Constraint

Recommendations and What-If Tab

This tab is used to analyze price recommendations from the optimizer side by side with the what-if price overrides. These metrics include gross margin dollars, volume, revenue, and CPI. The workbook also includes the percent change from the original and recommended prices and the total number of price changes made in each case.

The Recommendations and What-if tab contain five worksheets:

- [Constraint Verification Console](#)
[Global Metrics Worksheet](#)
- [Detail Metrics Worksheet](#)
- [Price Entry Worksheet](#)
- [What-If Selection for Scenario Worksheet](#)

Constraint Verification Console

The Constraint Verification Console worksheet is used to determine if any prices entered in the Price Entry worksheet are valid for the constraints established at the global, item, and item group levels.

Figure 5–25 *Constraint Verification Console Worksheet*

Table 5–19 *Constraint Verification Console Worksheet Measures*

Measures	Description
Validation What-if	Allows the user to select the what-if case in order to check the price validation.

Global Metrics Worksheet

This worksheet is used to compare demand group level metrics for the original, recommended, and what-if cases. These metrics include gross margin amount, volume, revenue, and CPI.

Figure 5–26 Global Metrics Worksheet

	Original	Recommended	User
GM Amount	\$4,351.77	\$7,096.88	
GM %	14.46%	28.64%	
Revenue	\$30,092.12	\$24,782.42	
Volume	27,188.00	18,901.30	
CPI	136.30	163.08	
# Price Changes		25	
% Change. Orig. GM Amount		63.08%	
% Change. Orig. GM %		98.02%	
% Change. Orig. Revenue		-17.64%	
% Change. Orig. Volume		-30.48%	
% Change. Orig. CPI		19.65%	
% Change. Rec. GM Amount	16.48		
% Change. Rec. GM %	-53.54		
% Change. Rec. Revenue	150.73		
% Change. Rec. Volume	43.84		
% Change. Rec. CPI	73.02		-100.00

Table 5–20 Global Metrics Worksheet Measures

Measure	Description
GM Amount	Demand group level gross margin amount.
GM%	Demand group level gross margin percent.
Revenue	Demand group level revenue.
Volume	Demand group level volume.
CPI	Demand group level CPI.
# Price Changes	Total number of price changes made.
% Chg Orig. GM Amount	The percent change in gross margin for the original price.
% Chg Orig. GM%	The percent change in gross margin rate for the original price.
% Chg Orig. Revenue	The percent change in revenue for the original price.
% Chg Orig. Volume	The percent change in volume for the original price.
% Chg Orig. CPI	The percent change in CPI for the original price.
% Chg Rec. GM Amount	The percent change in gross margin for the recommended price.
% Chg Rec. GM%	The percent change in gross margin rate for the recommended price.

Table 5–20 (Cont.) Global Metrics Worksheet Measures

Measure	Description
% Chg Rec. Revenue	The percent change in revenue for the recommended price.
% Chg Rec. Volume	The percent change in volume for the recommended price.
% Chg Rec. CPI	The percent change in CPI for the recommended price.

Detail Metrics Worksheet

This worksheet allows the user to observe the item level decision variables for each what-if case side by side. These variables include the item cost, anchor price, original price, recommended price, and the prices for each what-if case side by side with a percent ratio indicating how each what-if case differs from the original and from the optimizer recommendation. These variables also include each item contribution to the gross margin dollars, volume, and revenue and how each what-if case compares to the values with original and recommended prices.

Figure 5–27 Detail Metrics Worksheet

	Original	Recommended	User
Cost	\$0.61	\$0.61	
Price	\$0.69	\$0.69	
GM Amount	\$76.21	\$76.21	
GM %	12.15%	12.15%	
Revenue	\$627.21	\$627.21	
Volume	909.00	909.00

% Change. Rec. Volume			-100.00
% Change. Rec. CPI			

Table 5–21 Detail Metrics Worksheet Measures

Measure	Description
Cost	Item cost.
Price	Item price.
GM Amount	Item gross margin amount.
GM%	Item gross margin rate.
Revenue	Item revenue.
Volume	Item volume.
CPI	Item cost per item.
% Change Orig. Price	The percent change in price for the original price.
% Change Orig. GM Amount	The percent change in gross margin for the original price.
% Change Orig. GM%	The percent change in gross margin rate for the original price.
% Change Orig. Revenue	The percent change in revenue for the original price.
% Change Orig. Volume	The percent change in volume for the original price.
% Change Rec. Price	The percent change in price for the recommended price.
% Change Rec. GM Amount	The percent change in gross margin for the recommended price.
% Change Rec. GM%	The percent change in gross margin rate for the recommended price.
% Change Rec. Revenue	The percent change in revenue for the recommended price.
% Change Rec. Volume	The percent change in volume for the recommended price.
% Change Rec. CPI	The percent change in CPI for the recommended price.

What-If Selection for Scenario Worksheet

Use this worksheet to select and commit a what-if case to the domain for scenario comparison.

Figure 5–28 What-If Selection for Scenario Worksheet**Table 5–22 What-If Selection for Scenario Worksheet Measures**

Measures	Description
Submit	The what-if case to submit.

Price Entry Worksheet

This worksheet is used by the manager to override prices. Even though the user is allowed to edit the original and the recommended prices in this worksheet, these edits are discarded for all calculations.

Figure 5–29 Price Entry Worksheet

	Cost	Price
Private Label Cranberry Sauce Whole Berry 15 oz	\$1.14	\$1.39
Private Label Diced Peaches 14.5 oz	\$0.91	\$1.09
Private Label Diced Peaches 8.5 oz	\$0.59	\$0.69
Private Label Halved Peaches 14.5 oz	\$1.02	\$1.19
Private Label Halved Peaches 8.5 oz	\$0.61	\$0.69
Private Label Ketchup 14 oz	\$0.95	\$1.09
Private Label Ketchup 32 oz	\$1.48	\$1.69
Private Label Pumpkin 15 oz	\$1.22	\$1.39
Private Label Sliced Peaches 14.5 oz	\$1.01	\$1.19
Private Label Sliced Peaches 8.5 oz	\$0.60	\$0.69
Private Label Tomato Paste 5 oz	\$0.57	\$0.69
Private Label Tomato Sauce 15.5 oz	\$0.75	\$0.89
Private Label Tomato Sauce 8 oz	\$0.59	\$0.69
Private Label Tomatoes 14.5 oz	\$0.92	\$1.09
Private Label Tomatoes 28 oz	\$1.39	\$1.59
Private Label Whole Tomatoes 28 oz	\$1.29	\$1.59

Table 5–23 Price Entry Worksheet Measures

Measures	Description
Cost	A display-only measure to help guide the user in deciding price overrides.
Price	The user-defined price for an item.

Cross-Item Elasticities Tab

This tab is used to maintain cross-item elasticities which represent the effect of price on volume for items whose demand is correlated with a certain item. Cross-item elasticities are usually loaded and are used during the optimization.

Cross-Item Elasticities Worksheet

This worksheet is used to examine cross-item elasticities.

Figure 5–30 Cross-Item Elasticities Worksheet

	Private Label Cranberry Sauce Whole Berry 15 oz	Private Label Diced Peaches 14.5 oz
Private Label Cranberry Sauce Whole Berry 15 oz	-1.91	
Private Label Diced Peaches 14.5 oz		-1.93
Private Label Diced Peaches 8.5 oz		0.06
Private Label Halved Peaches 14.5 oz		0.09
Private Label Halved Peaches 8.5 oz		0.10
Private Label Ketchup 14 oz		
Private Label Ketchup 32 oz		
Private Label Pumpkin 15 oz	0.03	
Private Label Sliced Peaches 14.5 oz		0.03
Private Label Sliced Peaches 8.5 oz		0.08
Private Label Tomato Paste 5 oz		
Private Label Tomato Sauce 15.5 oz		
Private Label Tomato Sauce 8 oz		
Private Label Tomatoes 14.5 oz		
Private Label Tomatoes 28 oz		
Private Label Whole Tomatoes 28 oz		

Table 5–24 Cross-Item Elasticities Worksheet Measure

Measure	Description
Cross Item Elasticities	Displays the cross-item elasticities for all items.

Price Analysis Sample Workflow

The following sections provide a sample workflow for the Price Analysis workbook.

Creating a What-If Case

By default, the Recommendations and What-if tab has one what-if case already defined which is named User. To create additional what-if cases, perform the following:

1. After building the Price Analysis workbook, go to the Recommendations and What-if tab. Open the Global Metrics worksheet.
2. Right-click the What-if hierarchy.
3. Select **Maintain Positions**, and then select **Add Position**.
4. In the Dynamic Position Maintenance window, double-click the What-If field. The Position Description window appears.
5. In the **Position Name** field, enter a position name.
6. In the **Position Label** field, enter a position label.
7. Click **OK**.

Optimizing Prices for the Recommended Scenario

Before entering prices for the what-if cases you created above, it is recommended that you run the optimizer to optimize prices for the recommended scenario.

To optimize prices:

1. From the RegPrice menu, select **Optimize Prices**.
2. A notification window opens displaying a success message. Click **OK**.

Entering Prices

After creating a what-if case, you can enter prices for that case within the Price Entry worksheet.

In the Price Entry worksheet, you have the ability to enter prices for the default user what-if case or any other what-if case you have created. Use the arrow buttons at the top of the window to navigate past the original and recommended what-if cases (as shown in [Figure 5–31](#)).

Figure 5–31 Entering Prices for a What-If Scenario Using the Price Entry Worksheet

	Cost	Price
BrandA Carb Control:Blueberry:8 OZ	\$1.95	\$2.25
BrandA Carb Control:Cherry:8 OZ	\$2.35	\$2.25
BrandA Carb Control:Raspberry:8 OZ	\$2.35	\$2.25
BrandA Fruit in the Bottom LF 8 oz:Blueberry:8 OZ	\$4.50	\$2.75
BrandA Fruit in the Bottom LF 8 oz:Cherry:8 OZ	\$2.49	\$2.75
BrandA Fruit in the Bottom LF 8 oz:Raspberry:8 OZ	\$1.88	\$2.75
BrandA Light 'n Fit NF 8 OZ:Blueberry	\$1.25	\$2.50
BrandA Light 'n Fit NF 8 OZ:Cherry	\$2.67	\$2.50
BrandA Light 'n Fit NF 8 OZ:Raspberry	\$1.78	\$2.50
BrandB Yogurt Svelte:Banana	\$3.18	\$2.50
BrandB Yogurt Svelte:Blueberry	\$2.43	\$2.50
BrandB Yogurt Svelte:Cherry	\$1.69	\$2.50
BrandB Yogurt Svelte:Peach	\$2.00	\$2.50
BrandB Yogurt Svelte:Plain	\$1.95	\$2.50
BrandC Yogurt:Banana	\$2.40	\$2.29
BrandC Yogurt:Blueberry	\$1.45	\$2.29
BrandC Yogurt:Cherry	\$2.80	\$2.29
BrandC Yogurt:Peach	\$3.80	\$2.29
BrandC Yogurt:Plain	\$2.15	2.99

To enter prices:

1. From the Recommendations and What-if tab, open the Price Entry worksheet. Use the arrows to navigate to the User what-if case or to a what-if case you have created.
2. Using the Price column, enter prices by clicking into the cell of the product whose price you wish to modify.
3. After entering prices, click **Calculate**.
4. From the File menu, select **Commit Now**.

Finding Constraint Violations Using the Constraint Verification Console

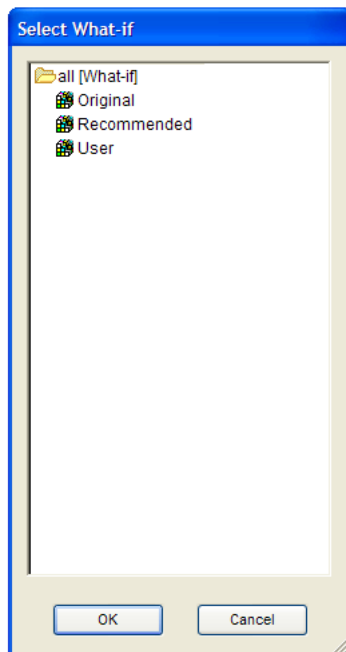

Use the Constraint Verification Console worksheet within the Recommendations and What-if tab to determine if any of the prices you entered in the previous section are valid for the constraints that you established at the global, item, and item group levels.

Before using the constraint verification console, you must first select a what-if case for use within the verification console. The verification console checks for constraint violations using one what-if case at a time. If you have created multiple what-if cases, you will need to repeat this process for each of them.

To select a what-if case:

1. From the Price Analysis workbook, select the Recommendation and What-if tab.
2. Open the Constraint Verification Console worksheet.
3. Click the **Validation What-if** field. The Select What-If dialog box opens as shown in [Figure 5-32](#).

Figure 5-32 Select What-If Dialog Box

4. Click a what-if case to select it. Click **OK**.
5. From the RegPrice menu, select **Find Constraint Violations**.
6. To view constraint violations, open the Optimization/Verification Response worksheet in the Diagnostics tab.
7. For the constraints that you established, review the corresponding worksheets within the Diagnostics tab to review the violations.

Selecting a What-If Case for the Scenario Comparison Workbook

After creating what-if cases and validating those cases using the Find Constraint Violations feature, you can select a what-if case to use later within the Scenario Comparison workbook.

Note: Only one what-if case can be submitted for use in the Scenario Comparison workbook. If you select a different what-if case and submit it after previously submitting another, the previous what-if selection is overwritten with the new one.

To select a what-if case for a scenario:

1. From the Recommendations and What-if tab, open the What-if Selection for Scenario worksheet.
2. From the axis labeled Submit, click once on a what-if case. The Select What-if window opens listing all available what-if cases.
3. Click once on the desired what-if case to select it. Click **OK**.
4. Click **Calculate**.
5. From the File menu, select **Commit Now**.

Scenario Comparison Workbook

The Scenario Comparison workbook is used to compare scenarios side by side. For example, a retailer may wish to determine the impact on gross margin dollars when it competes aggressively versus unaggressively. Once different scenarios have been compared, this workbook can be used to submit final prices from a particular scenario.

This workbook contains the following worksheets:

- [Global Goals and Constraints Worksheet](#)
- [Global Metrics Worksheet](#)
- [Item Level Metrics Worksheet](#)
- [Competition Worksheet](#)
- [Submit Prices Worksheet](#)

Building the Scenario Comparison Workbook

To build a Scenario Comparison workbook, begin by using the Scenario Comparison wizard. To open the wizard:

1. Select **New** from the File menu, or click the **New** toolbar button.
2. From the Reg Price Optimization tab, select the **Scenario Comparison** workbook, and click **OK** to open.
3. Select a demand group. Click **Next**.
4. Select a planning scope. Click **Next**.
5. Select one or multiple scenarios. The scenario labeled “Original” represents current prices.
6. Click **Finish** to build and open the workbook.

Global Goals and Constraints Worksheet

This worksheet is used to compare the context of the scenario according to the following:

- The last time the optimization was run. This is used to indicate if the scenario has been optimized or not.
- Objective function type and weights of each component.
- Scenario level constraints (for example, limits on gross margins, volume, and revenue).

Note: This worksheet uses the same measures used within the [Global Goals and Constraints Worksheet](#) of the Price Analysis workbook.

Figure 6–1 *Global Goals and Constraints Worksheet*

	Scenario
	max margin
Optimization Capacity	Full Optimization
Goal for Full Optimization	Highest Item Price
Goal Weight - Gross Margin	100%
Goal Weight - Revenue	0%
Goal Weight - Volume	0%
Goal Weight - CPI	0%
Min Gross Margin (% of Original)	100.00%
Min Gross Margin (Absolute)	\$0.00
Min Revenue (% of Original)	100.00%
Min Revenue (Absolute)	\$0.00
Min Volume (% of Original)	100.00%
Min Volume (Absolute)	0.00
CPI (% of Original)	0.00%
CPI (Absolute)	0.00
Max # Price Changes (Absolute)	0
Max # Price Changes (% of Total Prices)	100%

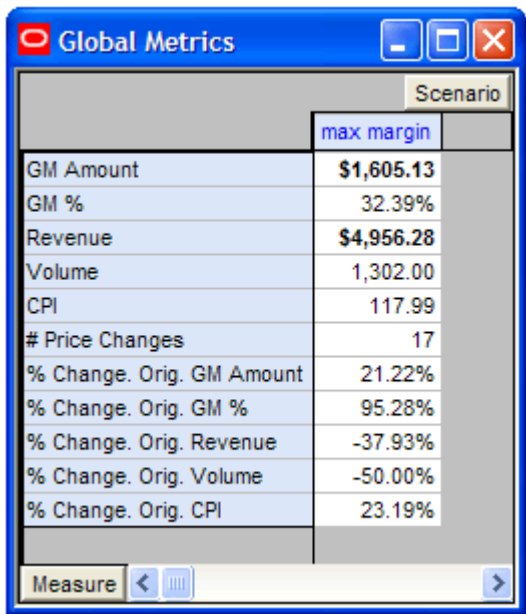

Measure < [Icons] >

Global Metrics Worksheet

This worksheet is used to compare the overall scenario performance.

Note: This worksheet uses the same measures within the [Global Metrics Worksheet](#) of the Recommendations and What-if tab of the Price Analysis workbook.

Figure 6–2 Global Metrics Worksheet

The screenshot shows a window titled "Global Metrics" with a standard Windows interface. Inside the window is a table with two columns: "Measure" and "Scenario". The "Scenario" column contains the text "max margin". The "Measure" column lists various metrics, and the corresponding values are displayed in the "Scenario" column. The metrics include GM Amount, GM %, Revenue, Volume, CPI, # Price Changes, and percentage changes for each of these metrics relative to original values.

Measure	Scenario
GM Amount	\$1,605.13
GM %	32.39%
Revenue	\$4,956.28
Volume	1,302.00
CPI	117.99
# Price Changes	17
% Change. Orig. GM Amount	21.22%
% Change. Orig. GM %	95.28%
% Change. Orig. Revenue	-37.93%
% Change. Orig. Volume	-50.00%
% Change. Orig. CPI	23.19%

Item Level Metrics Worksheet

This worksheet is used by the manager for comparing the scenario performance at the item level.

Note: The measures used within this worksheet are the same as those used in the [Recommendations](#) and [What-If Tab](#) worksheets in the Price Analysis workbook.

Figure 6–3 *Item Level Metrics Worksheet*

Location		Merchandise		
Price Zone 1		24 X 16 oz Cola Crate	Cola 2 ltr: Cherry Cola	Cola 2 ltr: Cola
max margin	Price			
	GM Amount			
	GM %			
	Revenue			
	Volume			
	CPI			
	% Change. Orig. Price			
	% Change. Orig. GM Amount			
	% Change. Orig. GM %			
	% Change. Orig. Revenue

	% Change. Orig. CPI			

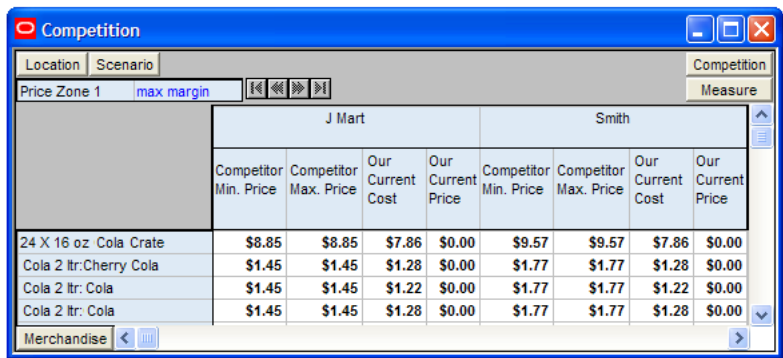

Scenario Measure

Competition Worksheet

This worksheet is used to compare each scenario's price with that of the competition. To assist with decision making, each item's cost to retailer is also available for side by side comparison.

Note: The measures used within this worksheet are the same as those listed in the [Linked Competition Prices Worksheet](#) in the Competition Constraints tab of the Price Analysis workbook.

Figure 6–4 Competition Worksheet

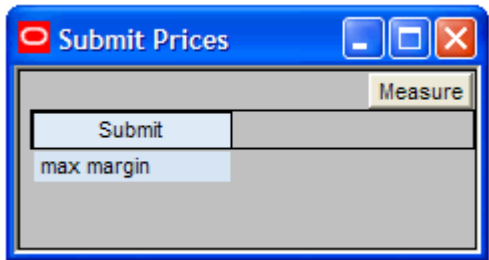

Location	Scenario	Price Zone 1	max margin	J Mart				Smith			
				Competitor Min. Price	Competitor Max. Price	Our Current Cost	Our Current Price	Competitor Min. Price	Competitor Max. Price	Our Current Cost	Our Current Price
24 X 16 oz Cola Crate				\$8.85	\$8.85	\$7.86	\$0.00	\$9.57	\$9.57	\$7.86	\$0.00
Cola 2 ltr: Cherry Cola				\$1.45	\$1.45	\$1.28	\$0.00	\$1.77	\$1.77	\$1.28	\$0.00
Cola 2 ltr: Cola				\$1.45	\$1.45	\$1.22	\$0.00	\$1.77	\$1.77	\$1.22	\$0.00
Cola 2 ltr: Cola				\$1.45	\$1.45	\$1.28	\$0.00	\$1.77	\$1.77	\$1.28	\$0.00

Submit Prices Worksheet

This worksheet is used to select a scenario and invokes the Submit Prices operation.

Figure 6–5 Submit Prices Worksheet

Measure	Description
Submit	The scenario that must be submitted.

Table 6–1 Submit Prices Worksheet Measures

Measure	Description
Submit	The scenario that must be submitted.

Submitting Prices of a Scenario

To submit prices of a scenario:

1. From the Scenario Comparison workbook, open the Submit Prices worksheet.
2. Click once on the name of any scenario listed on the Submit hierarchy.
3. The Select Scenario window opens. Click once on the name of the desired scenario, and click **OK**.
4. From the RegPrice menu, select **Submit Scenario**.

Item Link Group Management Workbook

This workbook can be used to create, modify, or delete item link groups. These item link groups can be used later in inter-item constraints.

This workbook contains one worksheet:

- [Item Links Worksheet](#)

Building the Item Link Group Management Workbook

To build the Item Link Management workbook, begin by starting the Item Link Group Management wizard.

1. Select **New** from the File menu, or click the **New** toolbar button.
2. From the Reg Price Optimization tab, select the **Item Link Group Management** workbook, and click **OK** to open the Item Link Group Management wizard.
3. Select a demand group. Click **Next**.
4. Select item link groups. Click **Finish** to open the Item Link Group Management workbook.

Item Links Worksheet

This worksheet is used to examine or modify linkages for item link groups.

Figure 7–1 Item Links Worksheet

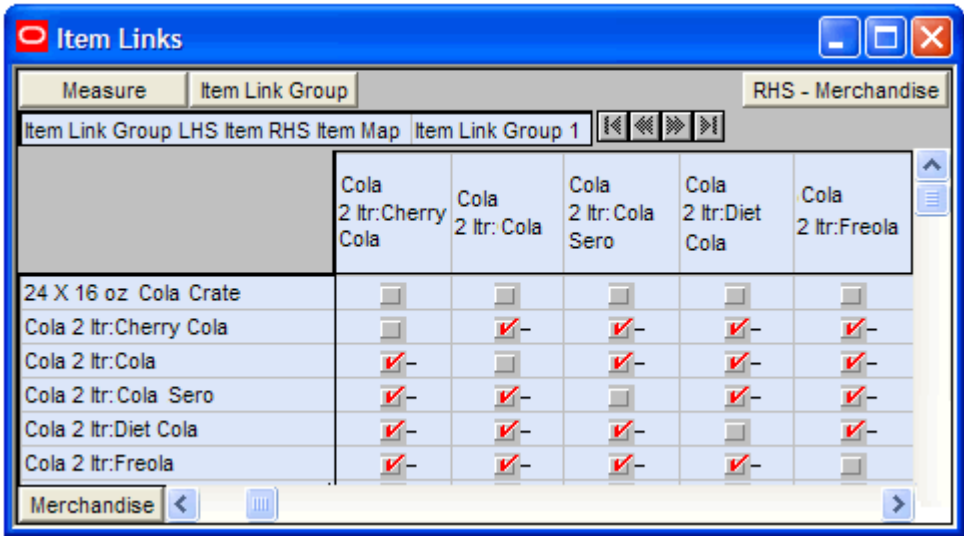

Table 7–1 Edit Item Linkage for Item Link Groups Worksheet Measures

Measure	Description
Item Link Group LHS Item and RHS Item Map	Mapping between LHS items and RHS items for each item link groups.

Modifying Item Link Groups

To modify an item link group:

1. From the Item Links worksheet, locate the item links you wish to modify.
2. Use the check boxes to select or deselect an item.
3. When finished, click **Calculate**.
4. From the File menu, select **Commit Now**.

Optimizer Administration Workbook

This workbook is used to examine optimizer parameters (such as minimum number of optimization passes allowed). Parameters listed within this workbook are read-only.

The Optimizer Administration workbook contains one worksheet:

- [Optimizer Administration Worksheet](#)

Building the Optimizer Administration Workbook

To build the Optimizer Administration workbook, begin by starting the Optimizer Administration wizard.

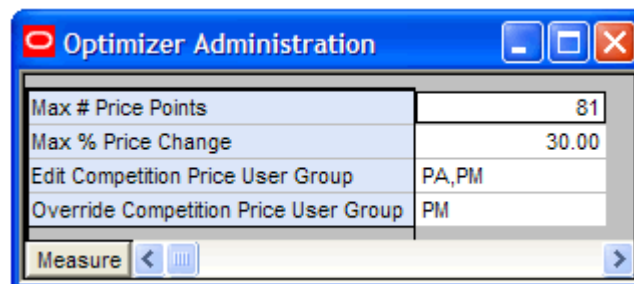

1. Select **New** from the File menu, or click the **New** toolbar button.
2. From the Reg Price Administration tab, select the **Optimizer Administration** workbook, and click **OK**.

The Optimizer Administration workbook opens at the Optimizer Administration worksheet.

Optimizer Administration Worksheet

This worksheet is used to examine tuning parameters for the price optimization algorithm.

Figure 8–1 *Optimizer Administration Worksheet*

The screenshot shows a dialog box titled "Optimizer Administration" with a blue header bar. It contains a table with four rows of parameters and their values. At the bottom, there is a "Measure" button and navigation arrows.

Max # Price Points	81
Max % Price Change	30.00
Edit Competition Price User Group	PA,PM
Override Competition Price User Group	PM

Measure < [icon] >

Table 8–1 Optimizer Administration Worksheet Measures

Measure	Description
Max# of Price Points	Limits the number of price points. This parameter is used to control the optimizer's computation time.
Max% Price Change	Stores the user entry for the maximum default price change allowed on any item. If a maximum price change percentage is not given for an item, this value is used as default.
Edit Competition Price User Group	Displays the users who are allowed to change the competition item prices for what-if.
Override Competition Price User Group	Displays the users who are allowed to change and commit competition item prices.

Like Items

The Like Item workbook is used to give parameters to new items by assigning like items. When a new item is assigned a like item, the user can selectively copy demand, cost, and price information from the like item.

This workbook contains one worksheet:

- [Like-Items Worksheet](#)

Building the Like-Items Workbook

In order to build the Like-Item workbook, you must use the Like-Item wizard. To use the wizard:

1. Select **New** from the File menu, or click the **New** toolbar button.
2. From the Reg Price Administration tab, select the **Like Item** workbook, and click **OK**. The Like Item wizard opens.
3. Select the items that you wish to include in the workbook. These items should include both the new items and the like items that you wish to associate the new items with. Click **Next**.
4. Select the price zones or stores for which you want the demand parameters to apply to. Click **Next**.
5. Select the weeks that you wish to include. The weeks you select do not have to be consecutive. Click **Finish** to open the Like Item workbook

Like-Items Worksheet

This worksheet allows you to select a like item and choose which parameters you would like to apply to the new item: cost, price, base demand, demand group, or price elasticity.

Figure 9–1 Like-Items Worksheet

	Like-Item	Copy Base Demand	Copy Cost	Copy Price	Copy Price Elasticity	In Demand Group?	Assigned Like-Item	Assigned On	Assigned By	Copy Demand Groups
24 X 16 oz Cola Crate		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>				<input checked="" type="checkbox"/>
Cola 2 ltr: Cherry Cola	Cola 2 ltr: Coke	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>				<input checked="" type="checkbox"/>
Cola 2 ltr: Cola	Cola 2 ltr: Coke	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>				<input checked="" type="checkbox"/>
Cola 2 ltr: Cola Sero	Cola 2 ltr: Coke	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>				<input checked="" type="checkbox"/>
Cola 2 ltr: Diet Cola	Cola 2 ltr: Coke	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>				<input checked="" type="checkbox"/>
Cola 2 ltr: Freola	Cola 2 ltr: Coke	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>				<input checked="" type="checkbox"/>

Table 9–1 Submit Prices Worksheet Measures

Measure	Description
Like-Item	Identifies the like item you wish associate with the new item.
Copy Base Demand	Select the check box next to this item to indicate that you want to use the like item's base demand.
Copy Cost	Select the check box next to this item to indicate that you want to use the like item's cost.
Copy Price	Select the check box next to this item to indicate that you want to use the like item's price.
Copy Price Elasticity	Select the check box next to this item to indicate that you want to use the like item's price elasticity.
In Demand Group?	This check box indicates that the item belongs to some demand group(s).
Assigned By	The person who assigned the like item to the item.

Table 9–1 (Cont.) Submit Prices Worksheet Measures

Measure	Description
Assigned Like-Item	The like item that was assigned to the item.
Assigned On	The date that the like item is assigned to the item.
Copy Demand Groups	Select the check box next to this item to indicate that you want to use the like item's demand group(s).

To assign like items:

1. In the Like-Items worksheet, locate the item that you would like to assign a like item to. In Like-Item column for that item's row, click the cell. The Select Item window will appear. Select the item that you would like to use as the like item. Click **OK**.
2. Select the attributes of the like item that you want to use for the item. You may choose Copy Base Demand, Copy Cost, Copy Demand Groups, Copy Price, and/or Copy Price Elasticity.
3. In the RegPrice menu, select **Copy Items**.
4. From the File menu, select **Commit Now**.

The next time you open the Like Item worksheet, it will display the username of the person who assigned the like item assignment, the like item assigned, and the date that it was assigned.

Analyst - Category Assignment Workbook

This workbook is used to map price managers to their categories. Price managers can only change prices for categories that have been assigned to them using this workbook. Price managers cannot build the Price Analysis workbook if the selected demand group includes an item that belongs to a category to which the manager does not have permission.

This workbook contains one worksheet:

- [Analyst - Category Assignment Worksheet](#)

Building the Analyst - Category Assignment Workbook

To build the Analyst - Category Assignment workbook, begin by using the Analyst - Category Assignment wizard. To open the wizard:

1. Select **New** from the File menu, or click the **New** toolbar button.
2. From the Reg Price Administration tab, select **Analyst - Category Assignment**, and click **OK** to open the Analyst - Category Assignment wizard.
3. Select the managers to whom you want to assign categories. Click **Next**.
4. Select a category to assign to the manager.
5. Click **Finish**. The Analyst - Category Assignment workbook opens. The manager selected from the wizard appears within the workbook.

Analyst - Category Assignment Worksheet

This worksheet allows the user to manually assign categories to price managers. The worksheet does not check to see if the same category has been assigned to more than one price manager.

Figure 10–1 Analyst - Category Assignment Worksheet

Table 10–1 Analyst - Category Assignment Worksheet Measures

Measure	Description
Category Analyst Management	Stores a mask that specifies the categories that a user can alter the prices for.

Adding or Removing Categories Assigned to an Analyst

To change the categories assigned to an analyst:

1. From the Analyst - Category Assignment worksheet, locate the column where the analyst's name is listed.
2. Select or deselect items from the merchandise hierarchy as desired to change the categories assigned to the analyst.
3. When finished, click **Calculate**.
4. From the File menu, select **Commit Now**.

Glossary

competition

Competition refers to the competitor's pricing for a given item. Competition is definable by item.

demand group

A demand group is a collection of items that should be optimized together.

item

An item in Regular Price Optimization is merchandise that is being optimized. Items are located on the same level within the product hierarchy where the demand and cross-item elasticities are produced.

item link groups

Item link groups are definitions that link one item to another. They are primarily used for inter-item constraints.

item group

Item groups are logical groupings of items within a demand group.

planning scope

Identifies the begin and end dates for the planning season and price zones for which planning is being performed.

price zone

Price zones are store clusters that have been created to support different pricing groups by merchandise division. Pricing zones are established so all stores within the pricing zones have the same price for any single item.

scenario

A configuration of constraints and objectives. In Regular Price Optimization, a user can create many scenarios for a given demand group and compare these scenarios side by side in terms of the decision variables to choose a set of prices that best achieve the objectives.
