1.0 INTRODUCTION

1.1 PURPOSE AND SCOPE

This document defines the procedure that is executed to activate the Gateway Location Application (GLA) feature on a DSR network element (NE). This procedure may be run either 1) as part of a new DSR installation, after the standard DSR installation is complete but before the NE is in service, or 2) on an in-service DSR NE, where the GLA feature is activated during a planned maintenance window to minimize the impact to network traffic.

This document also provides a procedure to deactivate GLA after it has been activated. Please see Section 3.0 for a discussion of deactivation. Configuration of GLA following successful activation is beyond the scope of this document. After successful activation, the crafts person is expected to configure GLA for proper operation of GLA.

No additional software installation is required prior to executing this procedure. The standard DSR installation procedure has loaded all of the required software, even if the GLA feature is activated at a later time.

1.5 GENERAL PROCEDURE STEP FORMAT

Where it is necessary to explicitly identify the server on which a particular step is to be taken, the server name is given in the title box for the step (e.g. “ServerX” in Figure 1. Example of a procedure step.

Each step has a checkbox for every command within the step that the technician should check to keep track of the progress of the procedure.

The title box describes the operations to be performed during that step.

Each command that the technician is to enter is in **10 point bold Courier font**.

2.0 FEATURE ACTIVATION OVERVIEW

This section lists the required materials and information needed to execute the feature activation. In addition, Table 4, Pre-Feature Activation Overview through Table 9, Post-Feature Deactivation Overview provide estimates of the time required to execute the procedure. These tables can be used to estimate the total time necessary to complete the feature activation. The timing values shown are estimates only – use these tables to plan the timing of the activation, not to execute the procedure. The detailed procedure steps to be executed begin in Section 5.0.
2.1 DEFINITION OF ACTIVATION FOR THE GLA FEATURE

The precise meaning of activation varies from feature to feature. This section briefly defines what activation means with respect to the GLA feature.

The main components of a GLA system include the GLA (DSR) application, the binding database (hosted by the Policy Subscriber Binding Repository, i.e. pSBR), and finally the ComAgent which provides an interface and means to enable the GLA MPs and the pSBR MPs communicating to each other via reliable ComAgent routing services. Subscriber data concerning binding and session information is populated in the pSBR-B by the Policy Diameter Routing Agent (Policy DRA).

PDRA/PCA DSR application requires configuration of pSBR-Binding as well as pSBR-Session servers and comAgent connections to these pSBR servers. GLA will simply use rely on the configuration and comAgent connectivity, provided by PDRA. Please note that PDRA/PCA must be pre-activated and pre-configured in order for GLA to be activated. Refer to Table 3: PCA Activation/Configuration Procedure Reference Table for the appropriate DSR PCA release feature activation and configuration reference.

All software required to run GLA is available by default as part of a DSR release installation or upgrade. The process of activating the feature simply makes proper use of software elements and file system files that are already present, to change the behavior of the DSR NE.

Prior to GLA feature activation, there are no GLA menu items visible on the SOAM GUI or NOAM GUI and there is no GLA-related processing taking place on the DA- MP(s).

After feature activation, all selectable GLA menu items are present on the SOAM GUI or NOAM GUI, allowing full GLA configuration and provisioning. Specifically, for GLA application, the top-level GLA folder is visible on the Main Menu, and a new entry is added to the Diameter>Maintenance>Applications table, showing GLA and its state.

After activation:

The DA-MP(s) are prepared to act on GLA and ComAgent configuration and provisioning information entered at and replication from the NOAM (in case of comAgent configuration/provisioning) and SOAM (in case of GLA configuration/provisioning).

Important: once the GLA feature is activated, it is not automatically enabled. Activation simply means the mechanism for provisioning GLA behavior is in place. But the DA-MP(s) will act on GLA provisioning information only after GLA has been enabled (via the Diameter>Maintenance>Applications screen). GLA should not be enabled until after the appropriate provisioning data has been entered. GLA provisioning is beyond the scope of this document. Furthermore, for proper operation of GLA, Communication Agent and GLA application assumes that the Remote Servers IP addresses corresponding to the comAgent HA service (for Binding Resource) are routable/reachable. However these networking setup/concerns are beyond the scope of the activation procedure.
2.2 FEATURE ACTIVATION OVERVIEW

2.2.1 Pre-Feature Activation Overview
The pre-activation procedures shown in the following table may be executed outside a maintenance window if desired. Procedure completion times shown here are estimates. Times may vary due to differences in database size, network configuration and loading, user experience, and user preparation.

Table 4. Pre-Feature Activation Overview

<table>
<thead>
<tr>

<td></td>
<td>• Log all current alarms.</td>
<td></td>
</tr>
</tbody>
</table>
2.2.2 Feature Activation Execution Overview

The procedures shown in the following table are executed inside a single maintenance window. Procedure completion times shown here are estimates. Times may vary due to differences in database size, network configuration and loading, user experience, and user preparation.

<table>
<thead>
<tr>
<th>Procedure</th>
<th>Elapsed Time (Hours: Minutes)</th>
<th>Activity</th>
<th>Impact</th>
</tr>
</thead>
</table>
| Perform Health Check (Procedure 3) | 0:01-0:05 Cum. 0:01-0:05 | • Verify DSR Release.  
• Verify proper GLA feature state.  
• Verify proper PDRA feature state  
• Verify Server status.  
• Verify server and server group configurations.  
• Log all current alarms. | None                     |
| Feature Activation (Procedure 4) | 0:10-0:40 Cum. 0:11-0:45 | • Log out of NOAM/SOAM GUI.  
• SSH to Active NOAM.  
• Log in as admusr.  
• Change directory to /usr/TKLC/dsr/prod/maint/loaders/.  
• Execute the feature activation script.  
• Log into NOAM or SOAM GUI  
• Verify the GLA Folder.  
• Verify Maintenance screen.  
• Log into NOAM GUI (Optional).  
• Restart each active DA-MP server.  
• Verify Maintenance screen. | GLA is activated |

2.2.3 Post-Feature Activation Overview

The procedures shown in the following table are executed inside a maintenance window. Procedure completion times shown here are estimates. Times may vary due to differences in database size, network configuration and loading, user experience, and user preparation.

<table>
<thead>
<tr>
<th>Procedure</th>
<th>Elapsed Time (Hours: Minutes)</th>
<th>Activity</th>
<th>Impact</th>
</tr>
</thead>
</table>
| Perform Health Check (Procedure 5) | 0:01-0:05 Cum. 0:01-0:05 | • Establish GUI Session on the SOAM VIP  
• Verify Server status.  
• Log all current alarms.  
• Verify the KPIs  
• Verify the Measurements | GLA has been activated on DSR |
3.0 FEATURE DEACTIVATION OVERVIEW

3.1.1 Pre-Feature Deactivation Overview

The procedures shown in the following table are executed inside a maintenance window. Deactivation procedure times are only estimates as the reason to execute a deactivation has a direct impact on any additional deactivation preparation that must be done. Times may vary due to differences in database size, network configuration and loading, user experience, and user preparation.

Table 7. Pre-Feature Deactivation Overview

<table>
<thead>
<tr>
<th>Procedure</th>
<th>Elapsed Time (Hours or Minutes)</th>
<th>Activity</th>
<th>Impact</th>
</tr>
</thead>
<tbody>

</tbody>
</table>
### 4.0 FEATURE ACTIVATION PREPARATION

This section provides detailed procedures to prepare a system for GLA feature activation. These procedures are executed outside a maintenance window.

### 4.1 SYSTEM TOPOLOGY CHECK

This procedure is part of feature activation preparation and is used to verify the system topology of the DSR network and servers.

**Procedure 1: System Topology Check**

<table>
<thead>
<tr>
<th>STEP #</th>
<th>Description</th>
</tr>
</thead>
</table>
| 1 | **NOAM VIP GUI:**  
Login Establish a GUI session on the NOAM server by using the VIP IP address of the NOAM server. Open the web browser and enter a URL of:  
```plaintext
http://<Primary_NOAM_VIP_IP_Address>
```
Login as the `guiadmin` user: |
## Procedure 1: System Topology Check

<table>
<thead>
<tr>

<th>NOAM VIP GUI: Verify Server Configuration</th>
<th>Navigate to <strong>Main Menu -&gt; Configuration -&gt; Server Groups</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td></td>
<td>![Main Menu]</td>
</tr>
<tr>
<td></td>
<td>Click the <strong>Report</strong> button.</td>
<td>![Insert]</td>
</tr>
<tr>
<td></td>
<td>Verify the configuration data is correct for your network. <strong>Save</strong> or <strong>Print</strong> this report, keep copies for future reference.</td>
<td></td>
</tr>
</tbody>
</table>
**Procedure 1: System Topology Check**

<table>
<thead>
<tr>
<th>Step</th>
<th>Task Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
<td><strong>Analyze and plan DA-MP restart sequence</strong></td>
</tr>
</tbody>
</table>

Analyze system topology and plan for any DA-MPs which will be out-of-service during the feature activation sequence.

Analyze system topology gathered in Steps 2 and 3.

Determine exact sequence which DA-MP servers will be restarted (with the expected out-of-service periods).

**Note:** It is recommended that no more than 50% of the MPs be restarted at once.
4.2 PERFORM HEALTH CHECK

This procedure is part of feature activation preparation and is used to determine the health and status of the DSR release network and servers. This may be executed multiple times but must also be executed at least once within the time frame of 24-36 hours prior to the start of the maintenance window in which the feature activation will take place.

Procedure 2: Perform Health Check (Feature Activation Preparation)

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>STEP #</strong></td>
<td>This procedure provides steps to perform needed health checks.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>If this procedure fails, contact Appendix A. My Oracle Support (MOS) and ask for assistance.</td>
<td></td>
</tr>
</tbody>
</table>

1. **NOAM VIP GUI:** Establish a GUI session on the NOAM server by using the VIP IP address of the NOAM server. Open the web browser and enter a URL of:

   \[http://<Primary_NOAM_VIP_IP_Address>\]

   Login as the *guiadmin* user:

   ![Login Screen]

   - Welcome to the Oracle System Login.
   - Enter your username and password to log in.
   - Session timed out at 11:21:32 am.
   - Username: guiadmin
   - Password: 
   - Change password
   - Login
Procedure 2: Perform Health Check (Feature Activation Preparation)

<table>
<thead>
<tr>
<th></th>
<th>NOAM VIP GUI: Verify Server Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>Navigate to <strong>Main Menu -&gt; Status &amp; Manage -&gt; Server</strong></td>
</tr>
</tbody>
</table>

Verify all Server Status is Normal (Norm) for: Alarm (Alm), Database (DB), Reporting Status, and Processes (Proc).

<table>
<thead>
<tr>
<th>Status</th>
<th>Alm</th>
<th>DB</th>
<th>Reporting Status</th>
<th>Proc</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal</td>
<td>Norm</td>
<td>Norm</td>
<td>Norm</td>
<td>Norm</td>
</tr>
<tr>
<td>Enabled</td>
<td>Norm</td>
<td>Norm</td>
<td>Norm</td>
<td>Norm</td>
</tr>
<tr>
<td>Enabled</td>
<td>Norm</td>
<td>Norm</td>
<td>Norm</td>
<td>Norm</td>
</tr>
</tbody>
</table>

Do not proceed to feature activation if any of the above states are not Norm. If any of these are not Norm, corrective action should be taken to restore the non-Norm status to Norm before proceeding with the feature activation.

If the Alarm (Alm) status is not Norm but only Minor alarms are present, it is acceptable to proceed with the feature activation. If there are Major or Critical alarms present, these alarms should be analyzed prior to proceeding with the feature activation. The activation may be able to proceed in the presence of certain Major or Critical alarms. Contact Appendix A. My Oracle Support (MOS) for assistance as necessary.
**Procedure 2: Perform Health Check (Feature Activation Preparation)**

<table>
<thead>
<tr>
<th></th>
<th>NOAM VIP GUI: Log Current Alarms</th>
<th>Navigate to Main Menu -&gt; Alarms &amp; Events -&gt; View Active</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td></td>
<td>![Diagram of Alarms &amp; Events hierarchy]</td>
</tr>
</tbody>
</table>

Click on the Report button

**Save** or **Print** this report, keep copies for future reference.
5.0 FEATURE ACTIVATION

Before feature activation, perform the system health check in Section 4.2. This check ensures that the system is ready for feature activation. Performing the system health check determines which alarms are present in the system and if feature activation can proceed with alarms.

**** WARNING ****

If there are servers in the system which are not in Normal state, these servers should be brought to the Normal or the Application Disabled state before the feature activation process is started.

If alarms are present on the server, contact Appendix A. My Oracle Support (MOS)

MOS (https://support.oracle.com) is your initial point of contact for all product support and training needs. A representative at Customer Access Support (CAS) can assist you with MOS registration.

Call the CAS main number at 1-800-223-1711 (toll-free in the US), or call the Oracle Support hotline for your local country from the list at http://www.oracle.com/us/support/contact/index.html. When calling, there are multiple layers of menus selections. Make the selections in the sequence shown below on the Support telephone menu:

1. For the first set of menu options, select 2, “New Service Request”. You will hear another set of menu options.
3. In the third set of options, select 2, “Non-technical issue”. Then you will be connected to a live agent who can assist you with MOS registration and provide Support Identifiers. Simply mention you are a Tekelec Customer new to MOS.

Please read the following notes on feature activation procedures:

- Where possible, command response outputs are shown as accurately as possible. EXCEPTIONS are as follows:
  - Session banner information such as time and date.
  - System-specific configuration information such as hardware locations, IP addresses and hostnames.
  - ANY information marked with “XXXX” or “YYYY.” Where appropriate, instructions are provided to determine what output should be expected in place of “XXXX or YYYY”
  - Aesthetic differences unrelated to functionality such as browser attributes: window size, colors, toolbars and button layouts.

- After completing each step and at each point where data is recorded from the screen, the technician performing the feature activation must initial each step. A check box should be provided. For procedures which are executed multiple times, the check box can be skipped, but the technician must initial each iteration the step is executed. The space on either side of the step number can be used (margin on left side or column on right side).

- Captured data is required for future support reference.
5.1 PRE-ACTIVATION PROCEDURES

5.1.1 Perform Health Check

This procedure is used to determine the health and status of the network and servers. This must be executed at the start of every maintenance window.

Note: The Health Check procedure below is the same as the Health Check procedure described in Section 4.2 when preparing for feature activation, but it is repeated here to emphasize that it is being re-executed if Section 4.2 was performed outside the maintenance window.

Procedure 3: Perform Health Check (Pre Feature Activation)

<table>
<thead>
<tr>
<th>STEP #</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>SOAM VIP GUI: Establish a GUI session on the SOAM server by using the VIP IP address of the SOAM server. Open the web browser and enter a URL of: <strong>http://&lt;Primary_SOAM_VIP_IP_Address&gt;</strong>. Login as the guiadmin user:</td>
</tr>
<tr>
<td>2</td>
<td>NOAM VIP GUI: Under <strong>Main Menu</strong>, verify the GLA folder is NOT present.</td>
</tr>
</tbody>
</table>

If this procedure fails, contact Appendix A. My Oracle Support (MOS) and ask for assistance.
### Procedure 3: Perform Health Check (Pre Feature Activation)

<table>
<thead>
<tr>
<th></th>
<th>NOAM VIP GUI: Login</th>
</tr>
</thead>
<tbody>
<tr>
<td>Login</td>
<td></td>
</tr>
</tbody>
</table>

Establish a GUI session on the NOAM server by using the VIP IP address of the NOAM server. Open the web browser and enter a URL of:

```
http://<Primary_NOAM_VIP_IP_Address>
```

Login as the `guiadmin` user:
Procedure 3: Perform Health Check (Pre Feature Activation)

<table>
<thead>
<tr>
<th>Step</th>
<th>NOAM VIP GUI: Verify Server Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
<td><strong>Navigate to</strong> <strong>Main Menu -&gt; Status &amp; Manage -&gt; Server</strong></td>
</tr>
</tbody>
</table>

Verify all Server Status is Normal (Norm) for:
Alarms (Alm), Database (DB), Reporting Status, and Processes (Proc).

<table>
<thead>
<tr>
<th>App State</th>
<th>Alm</th>
<th>DB</th>
<th>Reporting Status</th>
<th>Proc</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enabled</td>
<td>Norm</td>
<td>Norm</td>
<td>Norm</td>
<td>Norm</td>
</tr>
<tr>
<td>Enabled</td>
<td>Norm</td>
<td>Norm</td>
<td>Norm</td>
<td>Norm</td>
</tr>
<tr>
<td>Enabled</td>
<td>Norm</td>
<td>Norm</td>
<td>Norm</td>
<td>Norm</td>
</tr>
<tr>
<td>Enabled</td>
<td>Norm</td>
<td>Norm</td>
<td>Norm</td>
<td>Norm</td>
</tr>
</tbody>
</table>

Do not proceed to feature activation if any of the above states are not Norm. If any of these are not Norm, corrective action should be taken to restore the non-Norm status to Norm before proceeding with the feature activation.

If the Alarm (Alm) status is not Norm but only Minor alarms are present, it is acceptable to proceed with the feature activation. If there are Major or Critical alarms present, these alarms should be analyzed prior to proceeding with the feature activation. The activation may be able to proceed in the presence of certain Major or Critical alarms. Contact Appendix A. My Oracle Support (MOS) for assistance as necessary.
### Procedure 3: Perform Health Check (Pre Feature Activation)

<table>
<thead>
<tr>
<th>Step</th>
<th>Description</th>
</tr>
</thead>
</table>
| 5    | **NOAM VIP GUI:** Verify Server Configuration  
    Navigate to **Main Menu -> Configuration -> Server Groups**  
    Verify the configuration data is correct for your network. |
| 6    | **NOAM VIP GUI:** Log Current Alarms  
    Navigate to **Main Menu -> Alarms & Events -> View Active**  
    Click on the **Report** button  
    Save or Print this report, keep copies for future reference. |
5.1.2 Activation Procedures
This section provides the detailed procedure steps of the feature activation execution. These procedures are executed inside a maintenance window.

5.1.3 Feature Activation
Detailed steps for GLA feature activation are given in the procedure below.

Procedure 4: Feature Activation

<table>
<thead>
<tr>
<th>STEP #</th>
<th>This procedure provides steps to Activate GLA.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</td>
</tr>
<tr>
<td></td>
<td>If this procedure fails, contact Appendix A. My Oracle Support (MOS) and ask for assistance.</td>
</tr>
<tr>
<td>1</td>
<td>NOAM/SOAM VIP GUI: Logout</td>
</tr>
<tr>
<td>2</td>
<td>NOAM VIP: Establish an SSH session</td>
</tr>
<tr>
<td>3</td>
<td>NOAM VIP: Navigate to the Feature Activation Directory</td>
</tr>
<tr>
<td></td>
<td>$ cd /usr/TKLC/dsr/prod/maint/loaders/</td>
</tr>
</tbody>
</table>
### Procedure 4: Feature Activation

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
<td><strong>NOAM VIP:</strong> Execute the Feature Activation Script</td>
</tr>
</tbody>
</table>

Run the feature activation script by executing the following command:

```
$ ./featureActivateDeactivate
```

**Choose Activate**

You want to Activate or Deactivate the Feature:
1. Activate
2. Deactivate

Enter your choice:

**Choose GLA**

List of Feature you can Activate:
1. SBAR
2. FABR
3. Mediation
4. LeadGen
5. GLA
6. HAP Interworking
7. DMTS
8. DCA Framework
9. DCA Application

Enter the choice:

Choose the SOAM site for which the application will be activated:

**Note:** As an alternative, you can also activate on all SOAM sites:

The Active SO server configured in the Topology are:
1. E3811SSRJ50M
2. E3811SSRJ50MS1
3. ALL SOs

Refer to **Section 7.1** for output Example.
### Procedure 4: Feature Activation

#### 5 Active SOAM GUI: Login

Establish a GUI session on the active SOAM server by using IP address of the SOAM server. Open the web browser and enter a URL of:

```
http://<Active_SOAM_IP_Address>
```

Login as the *guiadmin* user:

![Login Interface](image_url)

#### 6 Active SOAM GUI: Verify the GLA Folder is Visible

Locate and verify the GLA folder from Main Menu is visible and the configuration folder items are present:

- GLA
  - Configuration
    - Exceptions
    - System Options
    - Alarm Settings
**Procedure 4: Feature Activation**

<table>
<thead>
<tr>
<th>Step</th>
<th>Description</th>
</tr>
</thead>
</table>
| 7    | **Active SOAM GUI:** Verify Application Maintenance Screen is Visible  
      Navigate to **Main Menu -> Diameter -> Maintenance -> Applications.**  
      Verify the GLA Application is present in the Application Status screen  
      Verify GLA status is uninitialized.  
      Admin State = Disabled  
      Operational State = Unk  
      Operational Reason = Unk  
      Congestion Level = Unk  
      Select GLA and Click the **Enable** Button |
| 8    | **Standby SOAM GUI:** Repeat Verification Steps  
      Repeat Steps 5-7 for the Standby SOAM  
      **Note:** If the verifications for the standby SOAM differ from the Active SOAM, stop and contact Appendix A. My Oracle Support (MOS) |
| 9    | **Spare SOAM GUI:** Verify and Activate  
      Repeat Steps 5-7 for any spare SOAMs present.  
      For DSR 5.1, 6.0, and 7.0, you will have to run the following command to activate GLA on each spare SOAM:  
      **Note:** For DSR 7.1 or later, skip this step.  
      ```bash  
      $ cd /usr/TKLC/dsr/prod/maint/loaders/activate  
      $ ./load.glaActivateBsourced  
      ``` |
Procedure 4: Feature Activation

<table>
<thead>
<tr>
<th></th>
<th>SOAM VIP GUI: Login</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Establish a GUI session on the SOAM server by using the VIP IP address of the SOAM server. Open the web browser and enter a URL of:</td>
</tr>
<tr>
<td></td>
<td><code>http://&lt;Primary_SOAM_VIP_IP_Address&gt;</code></td>
</tr>
<tr>
<td></td>
<td>Login as the <code>guiadmin</code> user:</td>
</tr>
</tbody>
</table>
Procedure 4: Feature Activation

12 | SOAM VIP GUI: Restart DA-MPs

Multiple iterations of this step may be executed during the feature activation procedure. This is dependent on the number of DA-MP servers within your system. Make a written record of the number of times the step was performed. It is recommended that no more than 50% of the DA-MPs be restarted at once.

Navigate to **Main Menu -> Status & Manage -> Server**

Select the desired DA-MPs, you can use ‘Ctrl’ to select multiple DA-MPs at once.

Click the **Restart** button.

Verify the Server changes to the Err state and wait until it returns to the Enabled/Norm state.

Repeat for the additional DA-MPs.

13 | SOAM VIP GUI: Verify Application Maintenance Screen is Visible

Navigate to **Main Menu -> Diameter -> Maintenance -> Applications**

Verify GLA status is initialized. The following data should be displayed:

- Admin State = Enabled
- Operational State = Available
- Operational Reason = Normal
- Congestion Level = Normal
### 5.2 POST-ACTIVATION PROCEDURES

#### 5.2.1 Perform Health Check
This procedure is used to determine the health and status of the DSR release network and servers.

**Procedure 5: Perform Health Check (Post-Feature Activation)**

<table>
<thead>
<tr>
<th>STEP #</th>
<th>Description</th>
</tr>
</thead>
</table>
| **1** | NOAM VIP GUI: Establish a GUI session on the NOAM server by using the VIP IP address of the NOAM server. Open the web browser and enter a URL of:  

```plaintext
http://<Primary_NOAM_VIP_IP_Address>
```

Login as the *guiadmin* user:

![Login to NOAM GUI](image)
Procedure 5: Perform Health Check (Post-Feature Activation)

<table>
<thead>
<tr>

<tr>
<td>Enabled</td>
<td>Norm</td>
<td>Norm</td>
<td>Norm</td>
<td>Norm</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th></th>
<th>NOAM VIP GUI:</th>
<th>Navigate to Main Menu -&gt; Alarms &amp; Events -&gt; View Active</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
<td>Log Current Alarms</td>
<td><img src="image2.png" alt="Diagram" /></td>
</tr>
</tbody>
</table>

Click on the **Report** button

**Save** or **Print** this report, keep copies for future reference.

Compare this alarm report with those gathered in the pre-activation procedures.
Contact Appendix A: My Oracle Support (MOS) if needed.
## Procedure 5: Perform Health Check (Post-Feature Activation)

<table>
<thead>
<tr>
<th>Step</th>
<th>Task</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>5</td>
<td><strong>SOAM VIP GUI:</strong> Login</td>
<td>Establish a GUI session on the SOAM server by using the VIP IP address of the SOAM server. Open the web browser and enter a URL of: &lt;http://&lt;Primary_SOAM_VIP_IP_Address&gt;&gt;&lt;br&gt;&lt;br&gt;Login as the <em>guiadmin</em> user:</td>
</tr>
<tr>
<td>6</td>
<td><strong>SOAM VIP GUI:</strong> Verify GLA KPI Screen</td>
<td>Navigate to Main Menu -&gt; Status &amp; Manage -&gt; KPIs, and Click on Filter Icon&lt;br&gt;&lt;br&gt;Verify the GLA is present in Filter Group</td>
</tr>
</tbody>
</table>
### Procedure 5: Perform Health Check (Post-Feature Activation)

<table>
<thead>
<tr>
<th>Step</th>
<th>SOAM VIP GUI: Verify GLA Measurement Group</th>
</tr>
</thead>
<tbody>
<tr>
<td>7</td>
<td>Navigate to &quot;Main Menu -&gt; Measurements -&gt; Report&quot; and Verify that GLA Measurement groups are displayed in the Report Group Drop Down List.</td>
</tr>
</tbody>
</table>

![Diagram showing GLA Measurement groups in the Report Group Drop Down List.](image-url)
6.0 FEATURE DEACTIVATION

Execute this section only if there is a problem and it is desired to revert back to the pre-activation version of the software. In general, as long as there are no Application Routing Rules using the GLA application, it will have no impact on the system and does not need to be deactivated. The deactivation procedure will cause all the GLA related configuration data (including the Application Routing Rules using GLA) to be removed.

6.1 PRE-DEACTIVATION PROCEDURES

Before beginning the feature deactivation, complete the Pre-Deactivation procedure below.
6.1.1 **Perform Health Check**

This procedure is used to determine the health and status of the DSR network and servers.

**Procedure 6: Perform Health Check (Pre-Feature Deactivation)**

<table>
<thead>
<tr>
<th>STEP #</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>SOAM VIP GUI: Login</td>
</tr>
</tbody>
</table>

Establish a GUI session on the SOAM server by using the VIP IP address of the SOAM server. Open the web browser and enter a URL of:

```
http://<Primary_SOAM_VIP_IP_Address>
```

Login as the `guiadmin` user:

![Oracle System Login](image)

Check off (\(\checkmark\)) each step as it is completed. Boxes have been provided for this purpose under each step number.

If this procedure fails, contact Appendix A. My Oracle Support (MOS) and ask for assistance.
Procedure 6: Perform Health Check (Pre-Feature Deactivation)

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
</table>
| 2 | **SOAM VIP GUI:** Verify the GLA Folder is Visible | Locate and verify the GLA folder from Main Menu is visible and the configuration folder items are present.  
   ![GLA Folder](image)  
   - Configuration
   - Exceptions
   - System Options
   - Alarm Settings

**Note:** It should only be present after feature activation, so if it is not present, then the feature is already deactivated and there is no need to complete this deactivation procedure.

<table>
<thead>
<tr>
<th></th>
<th><strong>NOAM VIP GUI:</strong> Login</th>
<th>Establish a GUI session on the NOAM server by using the VIP IP address of the NOAM server. Open the web browser and enter a URL of:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td><strong>http://&lt;Primary_NOAM_VIP_IP_Address&gt;</strong></td>
</tr>
</tbody>
</table>

Login as the *guiadmin* user:
Procedure 6: Perform Health Check (Pre-Feature Deactivation)

4  NOAM VIP GUI: Verify Server Status

Navigate to Main Menu -> Status & Manage -> Server

Verify all Server Status is Normal (Norm) for:
Alarm (Alm), Database (DB), Reporting Status, and Processes (Proc).

5  NOAM VIP GUI: Log Current Alarms

Navigate to Main Menu -> Alarms & Events -> View Active

Click on the Report button

Save or Print this report, keep copies for future reference.

Compare this alarm report with those gathered in the pre-activation procedures.
Contact Appendix A. My Oracle Support (MOS) if needed.
6.2 DEACTIVATION PROCEDURES

6.2.1 Feature Deactivation

This section provides the detailed steps of the GLA De-Activation procedures

Procedure 7: Feature Deactivation

<table>
<thead>
<tr>
<th>STEP #</th>
<th>SOAM VIP GUI: Login</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Establish a GUI session on the SOAM server by using the VIP IP address of the SOAM server. Open the web browser and enter a URL of:</td>
</tr>
<tr>
<td></td>
<td>http://&lt;Primary_SOAM_VIP_IP_Address&gt;</td>
</tr>
<tr>
<td></td>
<td>Login as the guiadmin user:</td>
</tr>
</tbody>
</table>

Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.

If this procedure fails, contact Appendix A. My Oracle Support (MOS) and ask for assistance.
### Procedure 7: Feature Deactivation

<table>
<thead>
<tr>
<th>Step</th>
<th>Description</th>
</tr>
</thead>
</table>
| 2 | **Active SOAM GUI:** Disable GLA Application  
   Navigate to **Main Menu -> Diameter -> Maintenance -> Applications**  
   Select the GLA applications to disable.  
   Click the **Disable** button. |
| 3 | **NOAM/NOAM VIP GUI:** Logout  
   Logout of any active NOAM and/or SOAM GUI Sessions. |
| 4 | **NOAM VIP:** Establish an SSH session  
   Navigate to the **Feature Activation Directory** by executing the following command:  
   ```bash  
   $ cd /usr/TKLC/dsr/prod/maint/loaders/  
   ``` |
| 5 | **NOAM VIP:** Navigate to the Feature Activation Directory  
   Establish an SSH session to the NOAM VIP. Login as **admusr**. |
### Procedure 7: Feature Deactivation

**NOAM VIP:** Execute the Feature Activation Script

Run the feature activation script by executing the following command:

```
$ ./featureActivateDeactivate
```

Choose **Deactivate**

You want to Activate or Deactivate the Feature:
1. Activate
2. Deactivate

Enter your choice:

Choose **GLA**

Which Feature you want to DeActivate:
1. PBAR
2. FABR
3. Mediation
4. LoadScn
5. GLA
6. MAP Interworking
7. DTLS
8. DCA Framework
9. DCA Application

Enter your choice:

Choose the SOAM site for which the application will be deactivated:

**Note:** As an alternative, you can also deactivate on all SOAM sites:

The Active SO server configured in the Topology are:

```text
1. Vertex-50-2
2. M1S 50u
```

Enter your choice on which SO you want to Activate or Deactivate the Feature:

Refer to **Section 7.2** for output Example.
### Procedure 7: Feature Deactivation

<table>
<thead>
<tr>
<th></th>
<th>Active SOAM GUI: Login</th>
<th>Establish a GUI session on the active SOAM server by using IP address of the SOAM server. Open the web browser and enter a URL of:</th>

APPENDIX A. MY ORACLE SUPPORT (MOS)

MOS (https://support.oracle.com) is your initial point of contact for all product support and training needs. A representative at Customer Access Support (CAS) can assist you with MOS registration.

Call the CAS main number at 1-800-223-1711 (toll-free in the US), or call the Oracle Support hotline for your local country from the list at http://www.oracle.com/us/support/contact/index.html. When calling, there are multiple layers of menus selections. Make the selections in the sequence shown below on the Support telephone menu:

4. For the first set of menu options, select 2, “New Service Request”. You will hear another set of menu options.
6. In the third set of options, select 2, “Non-technical issue”. Then you will be connected to a live agent who can assist you with MOS registration and provide Support Identifiers. Simply mention you are a Tekelec Customer new to MOS.
