Primary Author: Nathan Young

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are “commercial computer software” pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Value-Added Reseller (VAR) Language

Oracle Retail VAR Applications

The following restrictions and provisions only apply to the programs referred to in this section and licensed to you. You acknowledge that the programs may contain third party software (VAR applications) licensed to Oracle. Depending upon your product and its version number, the VAR applications may include:

(i) the MicroStrategy Components developed and licensed by MicroStrategy Services Corporation (MicroStrategy) of McLean, Virginia to Oracle and imbedded in the MicroStrategy for Oracle Retail Data Warehouse and MicroStrategy for Oracle Retail Planning & Optimization applications.

(ii) the Wavelink component developed and licensed by Wavelink Corporation (Wavelink) of Kirkland, Washington, to Oracle and imbedded in Oracle Retail Mobile Store Inventory Management.

(iii) the software component known as Access Via™ licensed by Access Via of Seattle, Washington, and imbedded in Oracle Retail Signs and Oracle Retail Labels and Tags.

(iv) the software component known as Adobe Flex™ licensed by Adobe Systems Incorporated of San Jose, California, and imbedded in Oracle Retail Promotion Planning & Optimization application.

You acknowledge and confirm that Oracle grants you use of only the object code of the VAR Applications. Oracle will not deliver source code to the VAR Applications to you. Notwithstanding any other term or condition of the agreement and this ordering document, you shall not cause or permit alteration of any VAR Applications. For purposes of this section, “alteration” refers to all alterations, translations, upgrades, enhancements, customizations or modifications of all or any portion of the VAR Applications including all
reconfigurations, reassembly or reverse assembly, re-engineering or reverse engineering and recompilations or reverse compilations of the VAR Applications or any derivatives of the VAR Applications. You acknowledge that it shall be a breach of the agreement to utilize the relationship, and/or confidential information of the VAR Applications for purposes of competitive discovery.

The VAR Applications contain trade secrets of Oracle and Oracle’s licensors and Customer shall not attempt, cause, or permit the alteration, decompilation, reverse engineering, disassembly or other reduction of the VAR Applications to a human perceivable form. Oracle reserves the right to replace, with functional equivalent software, any of the VAR Applications in future releases of the applicable program.

Send Us Your Comments

Oracle® Retail Merchandising Cloud Services Administration Guide, Release 16.0.025

Oracle welcomes customers’ comments and suggestions on the quality and usefulness of this document.

Your feedback is important, and helps us to best meet your needs as a user of our products. For example:

- Are the implementation steps correct and complete?
- Did you understand the context of the procedures?
- Did you find any errors in the information?
- Does the structure of the information help you with your tasks?
- Do you need different information or graphics? If so, where, and in what format?
- Are the examples correct? Do you need more examples?

If you find any errors or have any other suggestions for improvement, then please tell us your name, the name of the company who has licensed our products, the title and part number of the documentation and the chapter, section, and page number (if available).

---

**Note:** Before sending us your comments, you might like to check that you have the latest version of the document and if any concerns are already addressed. To do this, access the Online Documentation available on the Oracle Technology Network Web site. It contains the most current Documentation Library plus all documents revised or released recently.

---

Send your comments to us using the electronic mail address: retail-doc_us@oracle.com

Please give your name, address, electronic mail address, and telephone number (optional).

If you need assistance with Oracle software, then please contact your support representative or Oracle Support Services.

If you require training or instruction in using Oracle software, then please contact your Oracle local office and inquire about our Oracle University offerings. A list of Oracle offices is available on our Web site at http://www.oracle.com.
This guide describes the administration tasks for Oracle Retail Merchandising Cloud Services.

Audience
This guide is intended for administrators.

Customer Support
To contact Oracle Customer Support, access My Oracle Support at the following URL:

https://support.oracle.com

When contacting Customer Support, please provide the following:

- Product version and program/module name
- Functional and technical description of the problem (include business impact)
- Detailed step-by-step instructions to re-create
- Exact error message received
- Screen shots of each step you take

Improved Process for Oracle Retail Documentation Corrections
To more quickly address critical corrections to Oracle Retail documentation content, Oracle Retail documentation may be republished whenever a critical correction is needed. For critical corrections, the republication of an Oracle Retail document may at times not be attached to a numbered software release; instead, the Oracle Retail document will simply be replaced on the Oracle Technology Network Web site, or, in the case of Data Models, to the applicable My Oracle Support Documentation container where they reside.

Oracle Retail documentation is available on the Oracle Technology Network at the following URL:

http://www.oracle.com/technetwork/documentation/oracle-retail-100266.html

An updated version of the applicable Oracle Retail document is indicated by Oracle part number, as well as print date (month and year). An updated version uses the
same part number, with a higher-numbered suffix. For example, part number E123456-02 is an updated version of a document with part number E123456-01. If a more recent version of a document is available, that version supersedes all previous versions.

Oracle Retail Documentation on the Oracle Technology Network

Oracle Retail product documentation is available on the following web site:

http://www.oracle.com/technetwork/documentation/oracle-retail-100266.html

(Data Model documents are not available through Oracle Technology Network. You can obtain these documents through My Oracle Support.)

Conventions

The following text conventions are used in this document:

<table>
<thead>
<tr>
<th>Convention</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>boldface</strong></td>
<td>Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.</td>
</tr>
<tr>
<td><em>italic</em></td>
<td>Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.</td>
</tr>
<tr>
<td><strong>monospace</strong></td>
<td>Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.</td>
</tr>
</tbody>
</table>
This chapter describes the processes for maintaining users and roles as well as batch processes. For information regarding standard end user activities like creating and viewing reports, please see the Oracle Retail Merchandising Cloud Services User Guide.

Oracle Support

It is considered to be a best practice to have all Oracle Retail Merchandising Cloud Services support requests submitted through a single point of contact for that customer environment; the client designated administrator is usually designated to perform this role.

The link to use when submitting Service Requests (SR) is:

https://support.oracle.com

User Creation

Before users can access the Oracle Retail Merchandising Cloud Services applications it is necessary to provision each user access to the system, and assign roles to each user to control what functionality will be available to them. The access provisioning is done using Oracle Identity Management (OIM). The following steps explain how to define users, assign roles and revoke access for users when needed. The OIM Application URL and the login with the required administrator access would be needed to execute the below steps:

1. Log into the OIM application.
2. Under Administration, click Users.
3. Under Actions, click **Create**.

Figure 1–2  **Select Create**

The Create User screen opens.

4. Under Basic Information, enter the following:
   - First Name
   - Last Name
   - For Organization, enter Retail
   - For User Type, enter *Full time employee*
   - For E-mail, enter the e-mail address of the employee

5. Under Account Settings, enter the following:
   - User Login: `<firstname>.<lastname>`
   - Password, enter a password
   - Confirm Password, reenter the password
Assigning Members to a Role

To assign members to a role, complete the following:

1. Log into the OIM application.
2. Click Users.

3. Click the oim.test user.
4. Click the Roles tab.

5. Click the Request Roles button.

6. Click the Add to Cart button next to the role you want to assign.
7. Click Next.

Figure 1–9  Add Access Request

8. Click Submit.

Figure 1–10  Submit Access Request

The role is now assigned to the User.
Retail Merchandising System (RMS) Security Implementation

If Data Level Security is enabled in RMS then for the users to have access to the data, the below must be setup through the Data Upload Utility available in the RMS application:

- Role Privileges
- Security Group Attribute
- Security User and Security User Role
- Security User and Security Group mapping information
- Merchandise Hierarchy LOV filtering access information

Setup Role Privileges

The setup of role privileges is required for purchase order approval.

1. Log into the RMS Application.
2. Navigate to Foundation Data > Data Loading > Download.
3. In the Download Data screen, select:
   - Template Type as 'Security'
   - Template as 'Role Privileges'
4. Click the **Download** button.

5. Save File to the local directory location when prompted.

---

**Figure 1–12  Download Security Privileges Template Spreadsheet**

---

6. Click the **Done** button.

7. Open the downloaded file.
8. Save As <file name>.

9. In the Security_Groups tab, enter/select the following:
   - Action: ‘Create’
   - Role: <Role>
   - Order Approve Amt: <Upper limit that the role will be able to approve on an order>
10. Save and Close the file.

11. In the RMS Application, navigate to Foundation Data > Data Loading > Upload.

12. In the Upload Data screen, select:
   - Template Type as 'Security'
   - Template as 'Role Privileges'
   - Enter new Process Description or retain as is
   - Browse and select the Source file that was created in Step 10

13. Click the **Upload** button.
14. Click the **Done** button.

15. View the newly created Role Privileges by downloading the Role privileges spreadsheet (Steps 2 - 7).

**Setup Security Group Attribute**

Perform the following procedure to define a Security Group in the system.

1. Navigate to Foundation Data > Data Loading > Download.

2. In the Download Data screen, select Template Type as 'Security' and Template as 'Security Groups'.
3. Click the Download button.

4. Save File to a local directory location when prompted.

5. Click the Done button.

6. Open the downloaded file.
Note: The application User IDs can be mapped to the seeded Security Group (for example, SYSTEM SUPER USER GROUP) or new Security Groups can be defined. In order to define new Security Groups follow below steps.

7. Save As < file name>.

8. In the Security_Groups tab, enter/select the following:
   - Action: 'Create'
   - Group ID: <Group ID>
   - Group Name: <Group Name>
   - Business Role: <role> (optional)
   - Comments: <comments> (optional)

Figure 1–24 Enter Security Groups information

10. Save and Close the file.

11. In the RMS Application, navigate to Foundation Data > Data Loading > Upload.

12. In the Upload Data screen, select:
   - Template Type as 'Security'
   - Template as 'Security Groups'
   - Enter new Process Description or retain as is
   - Browse and select the Source file that was created in Step 10

Figure 1–25 Upload Security Groups Information

13. Click the Upload button.
14. Click the Done button.

15. View the newly created Security Group by downloading the Security Groups spreadsheet (Steps 1 - 6).

**Note:** The system generated Group ID. This Group ID should be mapped to the Security Users.

**Setup Security User and Security User Role**

The LDAP User ID used to login to the RMS application must be defined as a Security User.

1. Navigate to Foundation Data > Data Loading > Download.

2. In the Download Data screen, select Template Type as ‘Security’ and Template as ‘Security Users’.
3. Click the Download button.

4. Save File to local directory location when prompted.

5. Click the Done button.

6. Open the downloaded file.
7. Save As <file name>.

8. In the Security_Users tab, enter/select the following:
   - Action: 'Create'
   - User Sequence: <number>
   - Application User ID: <Application User ID>
   - RMS User Ind: Yes
   - ReSA User Ind: Yes/No
   - ReIM User Ind: Yes/No
   - Allocation User Ind: Yes/No
9. In the Security_User_Roles tab, enter/select the following:

Note: Proceed to set up Security User Role, only if Role Privileges have been setup.

- Action: 'Create'
- User Sequence: <number>

Note: This must be the User Sequence provided in the Security_Users tab.

- Role: <Role>

10. Save and Close the file.

11. In the RMS Application, navigate to Foundation Data > Data Loading > Upload.

12. In the Upload Data screen, select:

- Template Type as 'Security'
- Template as 'Security Users'
- Enter Process Description or retain as is
- Browse and select the Source file that was created in Step 10

**Figure 1–34  Upload Security Users Information**

13. Click the **Upload** button.

**Figure 1–35  Upload Security Users Information Complete**

14. Click the **Done** button.

15. View the newly created Security User and Security User Role by downloading the Security Users spreadsheet (Steps 1 - 6).
Map Security User with Security Group

The security user must be assigned to a security group. This is achieved by associating the User Sequence assigned to the Application User ID with a Security User Group.

1. Navigate to Foundation Data > Data Loading > Download.
2. In the Download Data screen, select Template Type as 'Security' and Template as 'Associate Users to Groups'.

Note the system generated User Sequence. This Security User (User Sequence) will be mapped to the Security Group.
3. Click the **Download** button.
4. Save the file to a local directory location when prompted.

**Figure 1–39  Save File**

5. Click the **Done** button.
6. Open the downloaded file.
7. Save As <file name>.

8. In the User_Groups tab, enter/select the following:
   - Action: 'Create'
   - Group ID: <Group ID>
   - User ID: <User ID>

10. In the RMS Application, navigate to Foundation Data > Data Loading > Upload.

11. In the Upload Data screen, select:
   - Template Type as ‘Security’
   - Template as ‘Associate Users to Groups’
   - Enter new Process Description or retain as is
   - Browse and select the Source file that was created in Step 9

12. Click the **Upload** button.
13. Click the **Done** button.

14. View the newly created User Groups mapping by downloading the User Groups spreadsheet (Steps 1 - 6).

**Figure 1–45 View Newly Created User Group Association**

**Setup Merchandise Hierarchy LOV Filtering Access Information**

The security group can only access the merchandise hierarchies and organization hierarchies assigned to the user through Filter Groups. If a security group is not assigned to any Filter Group then the users in the group are considered 'super users' and will have access to all merchandise hierarchies or all organization hierarchies respectively.

1. Navigate to Foundation Data > Data Loading > Download.

2. In the Download Data screen, select Template Type as 'Security' and Template as 'Associate Users to Groups'.
3. Click the **Download** button.
4. Save File to local directory location when prompted.

**Figure 1–47  Save File**

5. Click the **Done** button.
6. Open the downloaded file.
7. Save As <file name>.

8. In the Filter_Group_Organization tab, enter/select the following:
   - Action: ‘Create’
   - Sec Group ID: <User Security group ID>
   - Filter Org Level: <Organization hierarchy level>
   - Filter Org ID: <ID of the Organization hierarchy level>
9. In the Filter_Group_Merchandise tab, enter/select the following:
   - Action: ‘Create’
   - Sec Group ID: <User Security group ID>
   - Filter Merch Level: <Organization hierarchy level>
   - Filter Merch ID: <ID of the Merchandise hierarchy level>
   - Filter Merch ID Class: <Class ID of the Merchandise hierarchy level> (optional depending on the selected Filter Merch Level)
   - Filter Merch ID Subclass: <Subclass ID of the Merchandise hierarchy level> (optional depending on the selected Filter Merch Level)

10. Save and close the file.

11. In the RMS Application, navigate to Foundation Data > Data Loading > Upload.

12. In the Upload Data screen, select:
   - Template Type as ‘Security’
   - Template as ‘Filter Groups’
- Enter new Process Description or retain as is
- Browse and select the Source file that was created in Step 10

**Figure 1–52  Upload Filter Groups Information**

13. Click the **Upload** button.

**Figure 1–53  Upload Filter Groups Information Complete**

14. Click the **Done** button.

**15.** View the newly created Filter Groups mapping by downloading the Filter Groups spreadsheet (Steps 1 - 6).
Retail Merchandising Cloud Services Default Enterprise Roles

Retail Merchandising Cloud Services is built with role-based access. Permissions are associated with roles. Assign these roles to the user following the steps in the section, "Assigning Members to a Role" as per your requirement.

The following roles are available for RMS and ReSA:

<table>
<thead>
<tr>
<th>Module</th>
<th>Default Enterprise Roles</th>
<th>Corresponding Application Roles</th>
</tr>
</thead>
<tbody>
<tr>
<td>Merchandising</td>
<td>Application Administrator</td>
<td>RMS Application Administrator</td>

</tbody>
</table>

**Note:** A new DATAPRIV_ADMINISTRATOR_REST_API_ROLE and DATA_PRIVACY_ADMINISTRATOR_JOB was created which are not associated to application users. These should be assigned to the users that invoke ReST services.

**Revoking Role Membership**

To revoke the membership of a member in a role:
1. Log into the OIM application.

2. Click **Users**.

   *Figure 1–56  Select Users*

3. Click the oim.test user.

   *Figure 1–57  Select Role to Revoke Users*

4. Click the Roles tab.
Figure 1–58 Roles Tab

5. Select the Role you want to revoke and click the Remove Role button.

Figure 1–59 Remove Roles Button

6. In the Remove Roles screen, click Submit.

Figure 1–60 Remove Roles Screen

Deleting a User or Disabling User Privileges

To delete or disable a user

1. Log into the OIM application.
2. Under Administration, click Users.
3. Select the user and click **Disable** or **Delete** as necessary.

**Figure 1–62  Delete and Disable**

4. You can also Lock or Unlock a particular user from the same screen if needed.

**Resetting a User Password**

To reset the password of a user:

1. Log into the OIM application.
2. Under Administration, click **Users**.
3. Click the **Search** tab and then select on the User you want to reset the password.

4. Click **Reset Password**.

5. In the Reset Password screen, make sure **Auto-generate the Password** is selected and then click **Reset Password**. (The system auto-generates the password and e-mails it to the user.)
Approve Requests from User

The users can also request for the Roles or revoke those that are available for him to access the RIS Service. Follow these steps to approve the request from the User.

1. Login into OIM Application.
2. Click Pending Approvals.

3. Click on the Action that is assigned to you.
4. Click the **Claim** button.

**Figure 1–68  Claim the Pending Approval**

5. Click **Approve** or **Reject**.

**Figure 1–69  Approve Pending Approval**

6. The request is complete.

**Approve Requests from User for Multiple Roles**

Users can also request for the multiple Roles or revoke them if they are available for him to access the RIS Service. Follow these steps to approve the request from the User:

1. Login into OIM Application.
2. Click **Pending Approvals**.
3. Click on the Action that is assigned to you.

**Figure 1–71  Pending Approvals Tab**

4. Click the **Claim** button.

**Figure 1–72  Claim the Pending Approval**
5. Click Approve or Reject.

*Figure 1–73  Approve Pending Approval*

6. Once done, if approved, the request is split into multiple requests, one for each role for each user. Approve all of them by following steps 3-5.

7. Once all the requests are approved, all the roles are assigned to users.

---

**Note:** The customer administrator can request multiple roles for multiple users. Once this request is made, the customer administrator is required to approve the request using the Approve Requests from User for Multiple Roles process.

---

**Importing a Batch of User Accounts**

If you have batch of users that have to be created, the Oracle team can bulk load the users into the OIM Application. When users are bulk loaded their initial password will be set to the current password of a template user. The new users are required to change their password on their first login.

To request the creation of accounts by bulk loading, perform the following steps.

1. Create a CSV file listing all of the users to create (see the example in step 3).

2. Create or identify a user whose password will be used as the initial password for all created users.

3. Open an SR with Oracle support and provide the CSV file and user from steps 1 and 2.

```plaintext
#filename.csv

```

---
Bulk Role Membership Update (Optional)

If you have quite a few users that have roles to be assigned to, the Oracle team can bulk update the role membership into the OIM Application.

To update the membership of the by bulk update, perform the following steps.

1. Create CSV file with the user role mapping. Please note that the user name must be in upper case format (see the example in step 3).
2. Open an SR with Oracle support and provide the CSV file and user from step 1.

```
# role.csv
UGP_NAME,USR_LOGIN
Role1,CE.ADMIN1
Role2,CE.ADMIN1
Role1,CE.ADMIN2
Role3,CE.ADMIN3
Role4,CE.ADMIN4
Role5,CE.ADMIN5
Role6,CE.ADMIN6

Role2,CE.ADMIN8
Role2,CE.ADMIN9
```

**Note:** If you want more than one role attached to a particular user, add one more row with the role that you want the user to have and the user name. Refer to the CE.ADMIN1 in above table for example.

Nightly Batch File Uploads

The following is the file upload process. The Private/Public Keys must be generated and the public Key must be associated with your SFTP Account for the file uploads. The **Adding Authorized Keys** section describes the step-by-step method to generate the Keys (2048 bit RSA Keys).

Adding Authorized Keys

Use this process to generate a 2048 bit RSA key and add the same to the SFTP server. With Windows, use the WinSCP tool or with Linux, use ssh-keygen.

1. Launch WinSCP and select Tools -> Run PuttyGen.
2. Select SSH-2 RSA for the type of key to generate and enter 2048 for the number of bits in a generated key field and click **Generate**.
3. Move the mouse over the blank space in the window until the key is generated.
4. Once the key is generated, click **Save public key** to save the public key to a file.

5. Click **Save private key** to save the Private key to a file. Confirm to save it with or without a passphrase.

6. Open an SR with Oracle Support, to associate the Public half of the Key with your SFTP account (attach the Key with the SR).

**Steps – Login to WinSCP**

These upload steps use the private key generated in section, Adding Authorized Keys.

1. Launch WinSCP and connect to `<SFTP Server>` using port 22.

2. Enter the username and then click **Advanced**.

3. Click **Authentication**.

4. In the Private Key File field, click **Browse** and select the private key created in the section, Adding Authorized Keys.
5. After loading the private key file, click **OK**.
6. Click **Login**. The window does not prompt for a password and logs into the SFTP server. Provide a passphrase if one has been set up.

---

**Note:** Login can only be performed using the authorized keys. Login with username / password is not supported.

---

**Steps to Upload the Batch File**

Login to the WinSCP by Following the **Steps – Login to WinSCP** section.

1. Transfer the file to be copied (e.g., test) to /<SFTP User>.

---

**Figure 1–78** <SFTP User> Directory

<table>
<thead>
<tr>
<th>Name</th>
<th>Type</th>
<th>Parent directory</th>
<th>Changed</th>
</tr>
</thead>
<tbody>
<tr>
<td>test</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

2. Transfer an empty file <filename>.complete (eg: test.complete) to the directory /<SFTP User>.
3. If multiple files have to be transferred, copy all the files to /<SFTP_user>.

4. Transfer all the corresponding <filename>.complete files to the /<SFTP_user> directory for the transfer to complete.

Export File Downloads

Login to the WinSCP by following the Steps – Login to WinSCP section. The following is the download file process.

1. Change the directory to /<SFTP User>/EXPORT.
2. Download all data files.
