Oracle Retail VAR Applications

The following restrictions and provisions only apply to the programs referred to in this section and licensed to you. You acknowledge that the programs may contain third party software (VAR applications) licensed to Oracle. Depending upon your product and its version number, the VAR applications may include:

(i) the MicroStrategy Components developed and licensed by MicroStrategy Services Corporation (MicroStrategy) of McLean, Virginia to Oracle and imbedded in the MicroStrategy for Oracle Retail Data Warehouse and MicroStrategy for Oracle Retail Planning & Optimization applications.

(ii) the Wavelink component developed and licensed by Wavelink Corporation (Wavelink) of Kirkland, Washington, to Oracle and imbedded in Oracle Retail Mobile Store Inventory Management.

(iii) the software component known as Access Via™ licensed by Access Via of Seattle, Washington, and imbedded in Oracle Retail Signs and Oracle Retail Labels and Tags.

(iv) the software component known as Adobe Flex™ licensed by Adobe Systems Incorporated of San Jose, California, and imbedded in Oracle Retail Promotion Planning & Optimization application.

You acknowledge and confirm that Oracle grants you use of only the object code of the VAR Applications. Oracle will not deliver source code to the VAR Applications to you. Notwithstanding any other term or condition of the agreement and this ordering document, you shall not cause or permit alteration of any VAR
Applications. For purposes of this section, “alteration” refers to all alterations, translations, upgrades, enhancements, customizations or modifications of all or any portion of the VAR Applications including all reconfigurations, reassembly or reverse assembly, re-engineering or reverse engineering and recompilations or reverse compilations of the VAR Applications or any derivatives of the VAR Applications. You acknowledge that it shall be a breach of the agreement to utilize the relationship, and/or confidential information of the VAR Applications for purposes of competitive discovery.

The VAR Applications contain trade secrets of Oracle and Oracle’s licensors and Customer shall not attempt, cause, or permit the alteration, decompilation, reverse engineering, disassembly or other reduction of the VAR Applications to a human perceivable form. Oracle reserves the right to replace, with functional equivalent software, any of the VAR Applications in future releases of the applicable program.

Oracle Retail Import Management Cloud Service Letters of Credit User Guide, Release 16.0.030

Oracle welcomes customers’ comments and suggestions on the quality and usefulness of this document.

Your feedback is important, and helps us to best meet your needs as a user of our products. For example:

- Are the implementation steps correct and complete?
- Did you understand the context of the procedures?
- Did you find any errors in the information?
- Does the structure of the information help you with your tasks?
- Do you need different information or graphics? If so, where, and in what format?
- Are the examples correct? Do you need more examples?

If you find any errors or have any other suggestions for improvement, then please tell us your name, the name of the company who has licensed our products, the title and part number of the documentation and the chapter, section, and page number (if available).

**Note:** Before sending us your comments, you might like to check that you have the latest version of the document and if any concerns are already addressed. To do this, access the Online Documentation available on the Oracle Technology Network Web site. It contains the most current Documentation Library plus all documents revised or released recently.

Send your comments to us using the electronic mail address: retail-doc_us@oracle.com

Please give your name, address, electronic mail address, and telephone number (optional).

If you need assistance with Oracle software, then please contact your support representative or Oracle Support Services.

If you require training or instruction in using Oracle software, then please contact your Oracle local office and inquire about our Oracle University offerings. A list of Oracle offices is available on our Web site at [http://www.oracle.com](http://www.oracle.com).
This document describes the Oracle Retail Import Management Cloud Service user interface. It provides step-by-step instructions to complete most tasks that can be performed through the user interface.

Audience
This document is for users and administrators of Oracle Retail Import Management Cloud Service. This includes merchandisers, buyers, business analysts, and administrative personnel.

Documentation Accessibility

When contacting Customer Support, please provide the following:

- Product version and program/module name
- Functional and technical description of the problem (include business impact)
- Detailed step-by-step instructions to re-create
- Exact error message received
- Screen shots of each step you take

Review Patch Documentation

When you install the application for the first time, you install either a base release (for example, 13.1) or a later patch release (for example, 13.1.2). If you are installing the base release and additional patch releases, read the documentation for all releases that have occurred since the base release before you begin installation. Documentation for patch releases can contain critical information related to the base release, as well as information about code changes since the base release.

Improved Process for Oracle Retail Documentation Corrections

To more quickly address critical corrections to Oracle Retail documentation content, Oracle Retail documentation may be republished whenever a critical correction is needed. For critical corrections, the republication of an Oracle Retail document may at times not be attached to a numbered software release; instead, the Oracle Retail document will simply be replaced on the Oracle Technology Network Web site, or, in the case of Data Models, to the applicable My Oracle Support Documentation container where they reside.

This process will prevent delays in making critical corrections available to customers. For the customer, it means that before you begin installation, you must verify that you have the most recent version of the Oracle Retail documentation set. Oracle Retail documentation is available on the Oracle Technology Network at the following URL:

http://www.oracle.com/technetwork/documentation/oracle-retail-100266.html

An updated version of the applicable Oracle Retail document is indicated by Oracle part number, as well as print date (month and year). An updated version uses the same part number, with a higher-numbered suffix. For example, part number E123456-02 is an updated version of a document with part number E123456-01.

If a more recent version of a document is available, that version supersedes all previous versions.

Oracle Retail Documentation on the Oracle Technology Network

Oracle Retail product documentation is available on the following web site:

http://www.oracle.com/technetwork/documentation/oracle-retail-100266.html
(Data Model documents are not available through Oracle Technology Network. You can obtain these documents through My Oracle Support.)

Letters of credit (LCs) are a widely used form of payment when dealing with imported goods. They provide importers with a secure method to pay for merchandise and vendors as well as a secure method to receive payment for merchandise. Letters of credit can be created and applied to purchase orders. Activities against the letter of credit can also be tracked.

Letter of Credit Types

The following types of letters of credit can be created:

- **Normal**: The letter of credit is applied to one purchase order.
- **Master**: The letter of credit is applied to multiple purchase orders.
- **Revolving**: Purchase orders may be added until the agreed upon term of the LC is reached. The term is typically one to two years, at which point the letter of credit is closed. Revolving LC is used to support multiple shipments and payments/drawdowns over a period of time, either from a single PO or multiple POs. Adding a PO to a letter of credit after confirmation is a change in the “terms” of the letter of credit, which will result in an amendment to the letter of credit.
- **Open**: An open account is a way to pay a vendor without restrictions. When the goods are shipped, payment will be drawn out of the buyer’s account. Technically this is not a letter of credit, but the function is facilitated through the letter of credit dialog within Trade Management. This method of payment is not as secure as letters of credit. No details are added to this type of letter of credit in Trade Management, the amount to be paid is entered directly.

You can choose from two letter of credit formats.

- **Long**: The long form includes details at the purchase order and item level.
- **Short**: The short form includes details at the purchase order level.

Completed applications and amendments can be transmitted to bank partners. Confirmations, drawdowns, and charges can also be received from bank partners.
Create a Letter of Credit

To create a letter of credit, follow the steps listed below.

1. From the Tasks menu, select Import Management > Create Letter of Credit. The Letter of Credit window appears.

   **Note:** An open letter of credit does not require the existence of a purchase order. It can be opened to a beneficiary for a monetary amount.

2. The Letter of Credit ID is populated automatically. The status of the letter of credit is displayed in the top right corner of the window. The default status is Worksheet.

3. Enter, select or search for LC data in the individual sections. For more information about the individual sections, see the Letter of Credit Window section.

4. After you have entered all necessary LC data, choose one of the following options.
   - Select **Save** to save the LC.
   - Select **Save and Close** to save the LC and close the Letter of Credit window.
   - Select **Cancel** to reject all entries and close the Letter of Credit window.

**Letter of Credit Window**

The Letter of Credit window allows you to view, create and edit a letter of credit. The window contains the following sections:

- **Letter of Credit**
- **Partners**
- **Banks**
- **Conditions**
- **Dates**
- **LC Value**
- **Terms**
- **Comments**
- **Letter of Credit Toolbar**

Associate LCs with Orders Table

In this table you can associate LCs with orders. The table displays the following columns by default.

- Order No.
- Letter of Credit Group
- Supplier Site and Supplier Site Name
- Beneficiary and Beneficiary Name
- Earliest Ship Date
- Letter of Credit

In the Letter of Credit column you can search for the corresponding letter of credit, by Letter of Credit ID, Bank LC Reference and LC Type.

- Errors

The Errors column displays a checkbox, if checked the purchase order contains an error. To view the individual error message, add the Error Message column to the table and view the message.
