This document highlights the major changes for Release 16.0.22 of Oracle Retail Foundation Cloud Service.

**Overview**

Retailers leverage Oracle Retail Merchandising Foundation Cloud Service (RMFCS) functionality to execute core merchandising activities, including merchandise management, inventory replenishment, purchasing, import processes, sales auditing, and financial tracking. Its Trade Management module is used to manage the import process, including automating the steps necessary to import goods, managing file exchanges with trading partners, and providing a central database of critical import order information.

Merchandising Foundation Cloud Service also includes Sales Audit and Pricing modules. The Sales Audit module evaluates sales transaction from all channels, identifying any missing, duplicate, or erroneous data and highlighting any suspicious transactions, to ensure errors are resolved so that downstream systems operate off the same cleansed sales information. The Pricing module provides the ability to define, maintain, and review price changes and clearances, as well as provides the ability to pass approved price events onto downstream selling systems for execution.

**Oracle Retail Cloud Services and Business Agility**

Oracle Retail Foundation Cloud Service is hosted in the Oracle Cloud with the security features inherent to Oracle technology and a robust data center classification, providing significant uptime. The Oracle Cloud team is responsible for installing, monitoring, patching, and upgrading retail software.

Included in the service is continuous technical support, access to software feature enhancements, hardware upgrades, and disaster recovery. The Cloud Service model helps to free customer IT resources from the need to perform these tasks, giving retailers greater business agility to respond to changing technologies and to perform more value-added tasks focused on business processes and innovation.

Oracle Retail Software Cloud Service is acquired exclusively through a subscription service (SaaS) model. This shifts funding from a capital investment in software to an operational expense. Subscription-based pricing for retail applications offers flexibility and cost effectiveness.

**Client System Requirements**

The following technology is supported:
Operating Systems
- Microsoft Windows 7
- Microsoft Windows 10

Browser Support
- Mozilla Firefox ESR 52
- Microsoft Internet Explorer 11
- Google Chrome (Desktop) 55+

Functional Enhancement
The functional enhancement below is included in this release.

Clearance Reset
Support for resetting a clearance price back to a regular price is being introduced in this release of Merchandising Foundation Cloud Service. This enhancement allows seasonal merchandise that is carried year over year to be reset to a new regular price, to prepare it for the next season’s selling, once the current season’s inventory has been cleared from inventory.

Integration Enhancement
The integration enhancement below is included in this release.

Oracle GoldenGate Support
Oracle GoldenGate, which is a comprehensive software package for real-time data integration and replication in heterogeneous IT environments, has been added as part of the Oracle Retail Foundation Cloud Service in this release. This capability allows retailers to replicate data in key RMFCS tables to a data access schema (DAS) in a hosted or on-premises environment, in order to support integration with third-party applications, RMFCS extensions, and operational reporting.

See also the Oracle Retail Data Access Schema GoldenGate Target Installation and Configuration White Paper for more details on installing and configuring the target environment.

Supplemental Documentation on My Oracle Support

Oracle Retail Data Access Schema GoldenGate Target Installation and Configuration (Document ID 2283998.1)
This white paper describes the steps you can take to install and configure Oracle GoldenGate on the target environments to replicate data in key RMFCS tables to a data
access schema (DAS) in hosted or on-premises environments to support integration with third party applications.

Documentation Accessibility

For information about Oracle’s commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info or visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs if you are hearing impaired.
