This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this software or related documentation is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

U.S. GOVERNMENT RIGHTS Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are "commercial computer software" or "commercial technical data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, duplication, disclosure, modification, and adaptation shall be subject to the restrictions and license terms set forth in the applicable Government contract, and, to the extent applicable by the terms of the Government contract, the additional rights set forth in FAR 52.227-19, Commercial Computer Software License (December 2007). Oracle USA, Inc., 500 Oracle Parkway, Redwood City, CA 94065.

This software is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications which may create a risk of personal injury. If you use this software in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure the safe use of this software. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software in dangerous applications.

Oracle is a registered trademark of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.

This software and documentation may provide access to or information on content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

Value-Added Reseller (VAR) Language

Oracle Retail VAR Applications

The following restrictions and provisions only apply to the programs referred to in this section and licensed to you. You acknowledge that the programs may contain third party software (VAR applications) licensed to Oracle. Depending upon your product and its version number, the VAR applications may include:

- (i) the software component known as **ACUMATE** developed and licensed by Lucent Technologies Inc. of Murray Hill, New Jersey, to Oracle and imbedded in the Oracle Retail Predictive Application Server – Enterprise Engine, Oracle Retail Category Management, Oracle Retail Item Planning, Oracle Retail Merchandise Financial Planning, Oracle Retail Advanced Inventory Planning, Oracle Retail Demand Forecasting, Oracle Retail Regular Price Optimization, Oracle Retail Size Profile Optimization, Oracle Retail Replenishment Optimization applications.
- (ii) the **MicroStrategy** Components developed and licensed by MicroStrategy Services Corporation (MicroStrategy) of McLean, Virginia to Oracle and imbedded in the MicroStrategy for Oracle Retail Data Warehouse and MicroStrategy for Oracle Retail Planning & Optimization applications.
- (iii) the **SeeBeyond** component developed and licensed by Sun Microsystems, Inc. (Sun) of Santa Clara, California, to Oracle and imbedded in the Oracle Retail Integration Bus application.
- (iv) the **Wavelink** component developed and licensed by Wavelink Corporation (Wavelink) of Kirkland, Washington, to Oracle and imbedded in Oracle Retail Mobile Store Inventory Management.
- (v) the software component known as **Crystal Enterprise Professional and/or Crystal Reports Professional** licensed by SAP and imbedded in Oracle Retail Store Inventory Management.
- (vi) the software component known as **Access Via™** licensed by Access Via of Seattle, Washington, and imbedded in Oracle Retail Signs and Oracle Retail Labels and Tags.
- (vii) the software component known as **Adobe Flex™** licensed by Adobe Systems Incorporated of San Jose, California, and imbedded in Oracle Retail Promotion Planning & Optimization application.
- (viii) the software component known as **Style Report™** developed and licensed by InetSoft Technology Corp. of Piscataway, New Jersey, to Oracle and imbedded in the Oracle Retail Value Chain Collaboration application.
- (ix) the software component known as **DataBeacon™** developed and licensed by Cognos Incorporated of Ottawa, Ontario, Canada, to Oracle and imbedded in the Oracle Retail Value Chain Collaboration application.

You acknowledge and confirm that Oracle grants you use of only the object code of the VAR Applications. Oracle will not deliver source code to the VAR Applications to you. Notwithstanding any other term or condition of the agreement and this ordering document, you shall not cause or permit alteration of any VAR Applications. For purposes of this section, “alteration” refers to all alterations, translations, upgrades, enhancements, customizations or modifications of all or any portion of the VAR Applications including all reconfigurations, reassembly or reverse assembly, re-engineering or reverse engineering and recompilations or reverse compilations of the VAR Applications or any derivatives of the VAR Applications. You acknowledge that it shall be a breach of the agreement to utilize the relationship, and/or confidential information of the VAR Applications for purposes of competitive discovery.

The VAR Applications contain trade secrets of Oracle and Oracle’s licensors and Customer shall not attempt, cause, or permit the alteration, decompilation, reverse engineering, disassembly or other reduction of the VAR Applications to a human perceivable form. Oracle reserves the right to replace, with functional equivalent software, any of the VAR Applications in future releases of the applicable program.

Preface

The Oracle Retail Sales Audit User Guide describes the application user interface and how to navigate through it.

Audience

This document is intended for the users and administrators of Oracle Retail Sales Audit. This may include merchandisers, buyers, and business analysts.

Related Documents

For more information, see the following documents in the Oracle Retail Sales Audit Release 13.0.3 documentation set:

- *Oracle Retail Merchandising System Installation Guide*
- *Oracle Retail Merchandising System Release Notes*
- *Oracle Retail Merchandising System Operations Guide (three volumes)*

Customer Support

- To contact Oracle Customer Support, access My Oracle Support at the following URL:

<https://metalink.oracle.com>

- When contacting Customer Support, please provide the following:
- Product version and program/module name
- Functional and technical description of the problem (include business impact)
- Detailed step-by-step instructions to re-create
- Exact error message received
- Screen shots of each step you take

Review Patch Documentation

If you are installing the application for the first time, you install either a base release (for example, 13.0) or a later patch release (for example, 13.0.2). If you are installing a software version other than the base release, be sure to read the documentation for each patch release (since the base release) before you begin installation. Patch documentation can contain critical information related to the base release and code changes that have been made since the base release.

Oracle Retail Documentation on the Oracle Technology Network

In addition to being packaged with each product release (on the base or patch level), all Oracle Retail documentation is available on the following Web site (with the exception of the Data Model which is only available with the release packaged code):

http://www.oracle.com/technology/documentation/oracle_retail.html

Documentation should be available on this Web site within a month after a product release. Note that documentation is always available with the packaged code on the release date.

Conventions

Navigate: This is a navigate statement. It tells you how to get to the start of the procedure and ends with a screen shot of the starting point and the statement “the Window Name window opens.”

Note: This is a note. It is used to call out information that is important, but not necessarily part of the procedure.

This is a code sample
It is used to display examples of code

System Variables

System Variables Overview

Users gain the most value from software when the system is optimized to meet their needs. The system variables module provides a means of maintaining the relatively static information about a retailer's business.

Business process

After you have added the sales audit maintenance information, you can define the information above as appropriate for your company. The systems variable module allows to set up the following information for Sales Audit:

- **System options:** System validation methods, including escheatment, voucher options, and information related to the automated clearing house.
- **Error code definitions:** Error codes that will appear, and where in Sales Audit that you can fix them.
- **References:** References that you may attach to a transaction in order to better explain what occurred.
- **Field level access:** Allows you to define the fields a user may access.

Reports

There are no reports pertaining to system administration.

System administration

The topics discussed in this module pertain to system administration.

Add an Error Code

Navigate: From the main menu, select Action > Sales Audit > Control > System > Error Code Maintenance > Edit. The Error Definition window opens.

Error Definition Window

1. Click **Add** to enable the apply area.
2. In the Error field, enter the error code ID.
3. Enter a description of the error, or click the comments  button and enter the description.
4. In the Rec Solution field, enter a recommended solution, or click the comments  button and enter a solution.
5. In the Form field, select the window name where the error may be fixed.
6. If you select the Transaction Detail window, in the Tab field, select the tab where the error may be fixed.

The screenshot shows the 'Transaction Detail' window with the following fields and sections:

- Header Fields:** ReSA, Tran. No. (99000001), Chain, Business Day, POS Tran. No. (0), Status (Present), Store, Tran. Type, Balance, Value (0.00), Tran. Date/Time, Sub-Tran. Type, Reason Code, Currency, Transaction Uploaded from POS? (checkbox), Transaction Reference Info Exists (checkbox).
- Transaction Level Customer Order Attribs:** Banner Id, Customer Order No, Customer Order Date.
- Navigation Tabs:** Items, Tender, Tax, Customer, Exported, Employees, Paid Out Details.
- Table:** A table with columns: Item Type, Item, Description, Unit Retail, Selling UOM, Qty., UOM Qty., Item Status, Total Discount, Total Retail, Catch Vt., Drop Ship, Price Override?, Disc., Ref.
- Buttons:** Add, Item Detail, Voucher Detail, Return Reason, Price Override, Disc. Detail, Item Ref., Cust Ord Attr, Delete, OK, Comments, Previous, OK+Next, Errors, Reference, Audit Trail, Refresh Errors, Refresh, Cancel.

Transaction Detail Window

7. If a store employee can override the error, select the Store Override check box.
8. If a headquarters employee can override the error, select the HQ Override check box.
9. Click **Apply**. The new error code record is added to the table.
10. Add impacted systems as necessary.
11. Click **OK** to save your changes and close the windows.

Add an Impacted System

Navigate: From the main menu, select Action > Sales Audit > Control > System > Error Code Maintenance > Edit. The Error Definition window opens.

Select an error code from the table.

Click **System Impact**. The System Impact window opens.

System Impact Window

1. Click **Add**.
2. On the next available line, enter the system name, or click the LOV  button and select one from the list.
3. If the system is required, select the System Required check box.
4. Click **OK** to save your changes and close the window.

Add Escheatment Details

Navigate: From the main menu, select Action > Sales Audit > Control > System > System Options. The Sales Audit System Options window opens.

The screenshot shows the 'Sales Audit System Options' window with the following sections and controls:

- System Validation Constraints:**
 - Balancing Level:
 - Unit of Work:
 - Max No. Days Sales Audit Data Stored:
 - Max No. Days Post-Dated Trans. Allowed:
 - Execute Automated Audit After Import
 - Store/Days Must be Worked in Order
 - Check for Duplicate and Missing Trans
 - Auto Validate Tran. Employee IDs
 - Max No. Days to Compare Duplicates:
 - Default Chain:
- Do you have Fuel Merchandise?:**
 - Yes No
 - Fuel Department:
- Compare Store Criteria:**
 - Date to Determine Comp. Store Status:
 - No. Elapsed Days to Determine Comp. Status:
- Total View Option:**
 - View System Calculated Total:
- Escheatment Indicator:**
 - Escheat to Governmental Authorities
- Retailer Details for Income Adjustment:**
 - Partner Type:
 - Partner:

Buttons at the bottom:

Sales Audit System Options Window

1. In the Escheatment Indicator area, select the Escheat to Governmental Authorities check box.
2. In the Retailer Details for Income Adjustment area:
 - a. In the Partner Type field, enter the ID of the partner type that escheats the money to the state or country, or click the LOV  button and select a partner.
 - b. In the Partner field, enter the ID of the partner, or click the LOV  button and select a partner.
 - c. Click **Escheatment**. The Escheatment window opens.

Escheatment Window

- d. Click **Add**. The apply area is enabled.
3. Select Country or State in the Escheat To field.
 - If you selected country, in the Country field, enter the country code, or click the LOV buttons to select the country.
 - If you selected state, in the Country and State fields, enter the country and state codes, or click the LOV buttons to select them.
4. Select the appropriate escheatment check boxes.
5. Click **OK** to save your changes and close the window.

Add Field Level Access by Role

Navigate: From the main menu, select Action > Sales Audit > Control > System > Field Level Access > Edit. The Field Level Access window opens.

Field Level Access Window

Add a role to the system

1. Click **Add Role** to enable the apply block.
2. In the Role field, enter a role ID, or click the LOV  button and select a role.
3. To display the role, select the Display check box.
4. To enable the role, select the Enable check box.
5. Click **Apply**.
6. Click **OK** to save your changes and close the window.

Add a field to the role

1. Select the role from the table.
2. Click **Add Field**.
3. In the Field field, enter a field name, or click the LOV  button and select the field.
4. To display the field, select the Display check box.
5. To enable the field, select the Enable check box.
6. Click **Apply**.
7. Click **OK** to save your changes and close the window.

Add Reference Codes

Navigate: From the main menu, select Action > Sales Audit > Control > System > Reference Maintenance > Edit. The Reference Maintenance window opens.

The screenshot shows the 'Reference Maintenance' window with a table of existing reference codes and a form for adding a new one. The table has columns for Tran. Type, Sub-Tran. Type, Reason Code, Ref. No., and Ref. Label Description. The form below the table has fields for Tran. Type, Sub-Tran. Type, Reason Code, Ref. No., and Ref. Label, along with buttons for Apply, Delete, OK, Add, and Cancel.

Tran. Type	Sub-Tran. Type	Reason Code	Ref. No.	Ref. Label Description
Daily Store Conditions			1	Weather
Daily Store Conditions			2	Temperature
Daily Store Conditions			3	Traffic
Daily Store Conditions			4	Construction
Even Exchange	Employee		3	Employee No.
Even Exchange			1	Receipt Indicator
Meter Reading for Fuel			1	Reading Type
Meter Reading for Fuel			5	Open Meter Reading
Meter Reading for Fuel			6	Close Meter Reading
Meter Reading for Fuel			7	Open Meter Value
Meter Reading for Fuel			8	Close Meter Value

Form fields:

- Tran. Type: Meter Reading for Fuel
- Sub-Tran. Type: (empty)
- Reason Code: (empty)
- Ref. No.: 6
- Ref. Label: CMR
- Ref. Label Description: Close Meter Reading

Buttons: Apply, Delete, OK, Add, Cancel

Reference Maintenance Window

1. Click **Add** to enable the apply area.
2. In the Type field, select a transaction type.
3. In the Sub-Tran Type field, select a sub-transaction type.
4. In the Reason Code field, select a reason code.
5. In the No field, select a reference number.
6. In the Ref Label field, enter a reference label, or click the LOV  button and select a reference label.
7. Click **Apply**. The reference information is added to the table.
8. Click **OK** to save your changes and close the window.

Add Voucher Options

Navigate: From the main menu, select Action > Sales Audit > Control > System > System Options. The Sales Audit System Options window opens.

Click **Vouch Opts**. The Voucher Options window opens.

Voucher Options Window

1. Click **Add**.
2. On the highlighted line, enter the tender type ID number, or click the LOV  button and select the tender type.
3. In the Escheat No Days field, enter the desired number of escheatment days.
4. In the Purge No Days field, enter the number of days a voucher will be valid before it is purged from RMS.
5. Click **OK** to save your changes and close the window.

Sales Audit Maintenance

Sales Audit Maintenance Overview

The sales audit maintenance module allows you to define the following information for Sales Audit:

- **Employee information:** Identify who the user is and what permissions they have in Sales Audit.
- **Company closings:** Indicate when the company is closed and create exceptions at the store level to the closing.
- **General ledger account maintenance:** Create accounts to which ReSA will report the results of the store day.

Business process

1. Add users to the system so that they may use ReSA. You may create two types of users store employees or headquarter (HQ) employees.
2. Indicate which dates the company is closed and why.
3. Select the stores that remain open when the company is closed and what functions for which the store is open.
4. Select the store and general ledger accounts associated with the store.
5. Define the levels that the accounts roll up to.

Reports

There are no reports pertaining sales audit maintenance.

System administration

There are no system administration functions pertaining to system administration.

Sales Audit Item Summary Window [saitsumm]

The Sales Audit Item Summary window allows you to view item level information for a selected store/day, store, and item type.

Audit Fields Window [audittbl]

The Audit Fields window allows you to select the fields to be audited for the current table. Before and after values as well as the standard audit information (primary key from the driving table, date/time stamp, and user ID) are recorded for the audited fields. Note that auditing of primary key fields is not recommended.

Sales Audit System Options Window [sasysopt]

The System Parameter Maintenance window allows you to customize various parameters, defaults, and constants that are used throughout the system. Normally, these elements are set when ReSA is installed by the system or database administrator. They

tend to remain fixed unless a business practice is changed which necessitates a change in ReSA.

Sales Audit Mass Item Change Window [saitsumm]

The Item Summary Mass Change window is used to make mass changes to an item for a given store day.

Edit Sales Audit System Options

Navigate: From the main menu, select Action > Sales Audit > Control > System > System Options. The Sales Audit System Options window opens.

System Validation Constraints

Balancing Level:

Unit of Work:

Max No. Days Sales Audit Data Stored:

Max No. Days Post-Dated Trans. Allowed:

Execute Automated Audit After Import

Store Days Must be Worked in Order

Check for Duplicate and Missing Trans

Auto Validate Tran. Employee IDs

View System Calculated Total:

Escheatment Indicator

Escheat to Governmental Authorities

Retailer Details for Income Adjustment

Partner Type:

Partner:

Buttons:

Sales Audit System Options Window

1. Make changes to system variable constraints as needed.
2. In the Fuel Merchandise field, select Yes or No and click the LOV button to select a Fuel Department, if enabled.
3. If desired, enter values to compare store criteria.
4. If desired, limit the total view by selecting an appropriate level in the View System Calculated Total field.
5. Click **OK** to save your changes and close the window.

Edit the escheatment area

1. Add the escheatment details as necessary.
2. To edit existing escheatment information for a specific partner, in the Partner and the Partner Type fields, enter the appropriate IDs or click the LOV  button and select the partner information.
3. Click **Escheatment**. The Escheatment window opens.

Escheatment Window

4. Enter or edit the enabled fields as necessary.
5. Click **OK** to save your changes and close the window.

Edit voucher options

1. Add voucher options details as necessary.
2. To edit existing voucher options, click **Vouch Opts**.
3. Enter or edit the enabled fields as necessary.
4. Click **OK** to save your changes and close the window.

Edit Automated Clearinghouse information

1. Click **ACH Info**. The Automated Clearing House Information window opens.

The screenshot shows a window titled "Automated Clearing House Information" with the user name "(sasysopt)". Inside the window, there is a section labeled "ACH Information" containing five text input fields:

- Sender ID: FGFGHF
- Company ID: HJHJ
- Consolidating Bank Name: gjh
- Consolidating Routing No.: 7878
- Consolidating Account No.: 8787

At the bottom of the window, there are three buttons: "OK", "Delete", and "Cancel".

Automated Clearing House Information Window

Note: You must select a Fuel Department or enter Compare Store Criteria values to access the Automated Clearinghouse Information window.

2. Enter or edit fields as necessary.
3. Click **OK** to save your changes and close the window.

System Impact Window [saerrcd]

The System Impact window lists the names of systems that are impacted by the error currently selected on the Error Definition window. In some cases, you can use this window to add system names to this list.

Currency Rounding Rules Header Maintenance Window [sarrulhd]

The Currency Rounding Rules Header Maintenance window is used to set rules for currency.

Audit Trail Field Selection Window [audittbl]

The Audit Trail Field Selection window allows you maintain a list of tables to be included in an audit trail. To audit specific fields on a table, you can access the Audit Fields window.

When a table is designated to be audited, an audit table and database trigger are created. The trigger is on the driving table (audited table). It will fire, writing a record to the audit table, whenever a record is added, changed, or deleted on the driving table. The audit table maintains the following information for each modification to the driving table: the primary key from the driving table, date/time stamp, and user ID.

Delete an Impacted System

Navigate: From the main menu, select Action > Sales Audit > Control > System > Error Code Maintenance > Edit. The Error Definition window opens.

Select an error code from the table.

Click **System Impact**. The System Impact window opens.

System Impact Window

1. Select a system name.
2. Click **Delete**. You are prompted to delete the impacted system.

Note: If the System Required check box is selected, the impacted system cannot be deleted.

3. Click **Yes**.
4. Click **OK** to save your changes and close the window.

Perform a Mass Change for an Item Summary

Navigate: From the RMS main menu, select Action > Sales Audit > Additional Operations > Summary > Item Summary > Edit. The Sales Audit Item Summary window opens.

Search for and retrieve an item summary. Select a transaction record to be changed.

Click **Mass Change**. The Mass Change window opens.

Sales Audit Item Summary Window

1. From the New Item Type field, select an item type.
2. In the Change To field, enter the Item or Ref Item ID, or click the LOV  button and select the item or ref item.
3. Click **OK** to save changes and close the windows.

View Sales Audit System Options

Navigate: From the main menu, select Action > Sales Audit > Control > System > System Options. The Sales Audit System Options window opens.

The screenshot shows the 'Sales Audit System Options' window with the following sections and controls:

- System Validation Constraints:**
 - Balancing Level:
 - Unit of Work:
 - Max No. Days Sales Audit Data Stored:
 - Max No. Days Post-Dated Trans. Allowed:
 - Execute Automated Audit After Import
 - Store/Days Must be Worked in Order

- Total View Option:**
 - View System Calculated Total:
- Escheatment Indicator:**
 - Escheat to Governmental Authorities
- Retailer Details for Income Adjustment:**
 - Partner Type:
 - Partner:

Buttons at the bottom:

Sales Audit System Options Window

1. You may view any of the additional options pertaining to system options:
2. To view the escheatment details, click **Escheatment**. The Escheatment window opens.

Escheatment Window

3. To view the voucher details, click **Vouch Opts**. The Voucher Options window opens.

Voucher Options Window

4. To view automated clearinghouse information, click **ACH Info**. The Automated Clearing House Information window opens.

Automated Clearing House Information (sasysopt)

ACH Information

Sender ID: FGFGHF

Company ID: HJHJ

Consolidating Bank Name: gjh

Consolidating Routing No.: 7878

Consolidating Account No.: 8787

OK Delete Cancel

Automated Clearing House Information Window

5. Click **OK** to close the window.

Edit Field Level Access by Role

Navigate: From the main menu, select Action > Sales Audit > Control > System > Field Level Access Maintenance > Edit. The Field Level Access window opens.

Field Level Access Window

1. Select a role in the table.
2. Select or clear the Display check box.
3. Select or clear the Enable check box.
4. Click **Apply**.
5. Click **OK** to save your changes and close the window.

Delete a field

1. Select the field in the table to be deleted.
2. Click **Delete Field**. You are prompted to delete the record.
3. Click **Yes**. The field access for that role is deleted.
4. Click **OK** to save your changes and close the window.

Delete a role

1. Select the role to be deleted.
2. Click **Delete Role**. You are prompted to delete the role.
3. Click **Yes**. All fields associated with the role are deleted.
4. Click **OK** to save your changes and close the window.

SCAC Maintenance Window [scac]

The SCAC Maintenance window allows you to edit and view standard carrier alpha codes (SCAC). The SCAC codes are informational; they are not used in processing. SCAC codes are used to further identify the vessels and containers in which goods are shipped.

System Impact Window [saerrlst]

The System Impact window is used to view the name of the external application that this type of error affects. Defining the relationship between the external application and the error prevents data from being exported to that system until the error is overridden or corrected.

Escheatment Window [sasysopt]

The Escheatment window is used to view the specific escheatment details for the retailer. Escheatment is the process of sending money from vouchers (gift certificate and credit vouchers) back to the state after a defined period of time.

Export Revision History Window [satraudt]

The Export Revision History window allows you to view the revisions made to exports. You can access this window by clicking **Export Rev** on the Export tab of the Transaction Audit Trail window.

Store Day Import and Export Log Window [saimpexp]

The Store Day Import and Export Log window allows you to view the import and export logs for a selected store day to determine if all data for that store day was imported and/or exported.

Item Price Overrides Window [satraudt]

The Item Price Overrides window allows you to view the reason for a price override on an item in a transaction. This window is only accessible for an item that has the price override check box selected.

Return Reason Window [satraudt]

The Return Reason window allows you to view the reason an item was returned in a transaction.

Return Reason Window [satrdetl]

The Return Reason window allows you to view and enter a return reason for a selected item record in a transaction.

Item Revision History Window [satraudt]

The Item Revision History window allows you to view the revisions associated with an item and all revisions of the transaction.

Tax Reference Window [satraudt]

The Tax Reference window allows you to view user-defined reference information associated with a tax on the transaction.

Tax Revision History Window [satraudt]

The Tax Revision History window allows you to view revisions associated with a tax on the transaction.

Customer Attributes Window [satrdetl]

The Customer Attributes window allows you to view and maintain customer information for a selected transaction.

Customer Order Attributes Window [satrdetl]

The Customer Order Attributes window allows you to view customer order information for a transaction.

Item Detail Window [satrdetl]

The Item Detail window allows you to view item information, merchandise hierarchy information, standard unit of measure conversion, and information on how the item is handled at a specific location for a selected item in a transaction.

Maintain a Merchandiser

Navigate: From the main menu, select Control > Merchandiser > Edit. The Merchandiser Maintenance window opens.

The screenshot shows a window titled "Merchandiser Maintenance (merch)". The window has a standard Windows-style title bar with minimize, maximize, and close buttons. Below the title bar is a toolbar with several icons. The main area of the window contains three text input fields. The first field is labeled "Merchandiser" and contains the value "1001". To the right of this field is a small icon representing a list or lookup. Below this are two more text input fields labeled "Merchandiser Phone" and "Merchandiser Fax". At the bottom of the window, there are four buttons: "OK", "OK + Repeat", "Delete", and "Cancel".

Merchandiser Maintenance Window

Edit a merchandiser

1. In the Merchandiser field, enter the merchandiser's ID, or click the LOV  button and select the merchandiser.
2. Edit the merchandiser's name, phone, and fax number as necessary.
3. Click **OK** to save your changes and close the window.

Delete a merchandiser

1. In the Merchandiser field, enter the merchandiser's ID, or click the LOV  button and select the merchandiser.
2. Click **Delete**.
3. When prompted to delete the record, click **Yes**.
4. Click **OK** to save your changes and close the window.

Maintain a Partner

Navigate: From the main menu, select Control > Partner. The Partner Find window opens.

Search for and retrieve a partner in Edit mode. The Partner Maintenance window opens.

The screenshot shows the 'Partner Maintenance' window for a partner named '(partner)'. The window contains the following fields and sections:

- Agent:** 1 (with a LOV button showing 'Agent')
- Principal Country:** US (with a LOV button showing 'United States')
- Currency:** USD (with a LOV button showing 'US Dollar')
- Language:** 1 (with a LOV button showing 'English')
- Status:** Active (dropdown menu)
- Terms:** 1 (with a LOV button showing '01 002.50% 030 060')
- VAT Region:** 1000 (with a LOV button showing 'Vat Region 1000')
- Contact Section:**
 - Name: susan
 - Phone: 987-098-9876
 - Fax: (empty)
 - Telex: (empty)
 - Email: (empty)
- Details Section:**
 - Manufacturer ID: (empty)
 - Tax ID: (empty)

At the bottom of the window are buttons for **OK**, **Comments**, **Delete**, and **Cancel**.

Partner Maintenance Window

Edit a partner

1. Edit the enabled fields as necessary.
2. Update the address information as necessary.
3. Click **OK** to save your changes and close the window.

Delete a partner

1. Click **Delete**.
2. When prompted to delete the record, click **Yes**.
3. Click **OK** to save your changes and close the window.

Item Reference Window [satrdetl]

The Item Reference window allows you to view and maintain user-defined reference information for a selected item in a transaction.

Price Override Window [satrdetl]

The Price Override window allows you to view and override price information for a selected item record in a transaction.

Tax Reference Window [satrdetl]

The Tax Reference window allows you to view user-defined reference information associated with a tax on the transaction.

Credit Card Details Window [satrdetl]

The Credit Card Details window allows you to view and maintain credit card authorization information for a selected tender record in a transaction.

Customer Order Attributes Window [satrdetl]

The Customer Order Attributes window allows you to view and edit the customer order attributes associated with an item on a transaction.

Edit Reference Codes

Navigate: From the main menu, select Action > Sales Audit > Control > System > Reference Maintenance > Edit. The Reference Maintenance window opens.

The screenshot shows the 'Reference Maintenance' window with the following table:

Tran. Type	Sub-Tran. Type	Reason Code	Ref. No.	Ref. Label Description
Daily Store Conditions			1	Weather
Daily Store Conditions			2	Temperature
Daily Store Conditions			3	Traffic
Daily Store Conditions			4	Construction
Even Exchange	Employee		3	Employee No.
Even Exchange			1	Receipt Indicator
Meter Reading for Fuel			1	Reading Type
Meter Reading for Fuel			5	Open Meter Reading
Meter Reading for Fuel			6	Close Meter Reading
Meter Reading for Fuel			7	Open Meter Value
Meter Reading for Fuel			8	Close Meter Value

Below the table is a form with the following fields:

- Tran. Type: Meter Reading for Fuel
- Sub-Tran. Type: (empty)
- Reason Code: (empty)
- Ref. No.: 6
- Ref. Label: CMR
- Close Meter Reading (LOV button)
- Buttons: Apply, Delete, OK, Add, Cancel

Reference Maintenance Window

1. Select the reference to be edited.
2. In the Apply block, edit the contents of the Ref Label field, or click the LOV  button and select a reference label.
3. Click **Apply**.
4. Click **OK** to save your changes and close the window.

Delete a reference code

1. Select the reference code you want to delete.
2. Click **Delete**. You are prompted to delete the record.
3. Click **Yes**.
4. Click **OK** to save your changes and close the window.

Field Level Access Window [safldacs]

The Field Level Access window allows you to enter, maintain, and display field level access for various roles within an organization. There are nine pre-set fields that the Sales Audit system will enable/disable or display on/off based on the information entered within this window. The nine fields are:

- Store Override check box on the Error List form
- HQ Override check box on the Error List form
- Store Reported field on the Over/Short Totals form
- HQ Reported field on the Over/Short Totals form

- Actual Over/Short field on the Over/Short Totals form
- Trial Over/Short field on the Over/Short Totals form
- Store Reported field on the Misc. Totals form
- HQ Reported field on the Misc. Totals form
- Over/Short Value field on the Balance Level Summary form

These nine fields are required for each Oracle role. When a new role is added, these nine fields will be automatically added to the role. These nine fields cannot be deleted from the role. If you wish to add additional fields to the Sales Audit role level access, you must add values to the field level access code type. These new, user-created fields can be deleted from a role.

Expense Profile Maintenance Window [expprof]

The Expense Profile Maintenance window allows you to maintain default expense profiles. Expense profiles are maintained for the unique combinations at the following levels:

- **Country:** Lading port and discharge port.
- **Supplier/country:** Origin country, lading port, and discharge port. If there is more than one expense profile, select one profile as the default.
- **Supplier/cost zone:** Discharge port, cost zone group, and cost zone. If there is more than one expense profile, select one profile as the default.

After defining a unique combination of locations, you can enter the details for the selected expense profile.

Miscellaneous Totals Window [samisctl]

The Miscellaneous Totals window allows you to enter and maintain the totals in the system for a particular Store Day. This window allows you to enter your version of the total. This window contains a list of the Total Categories and a corresponding list of the totals that are contained in a selected Total Category.

If transaction details are later modified and the system value recalculated, it will not take precedence over an existing HQ or Store reported value. An audit rule needs to be defined to alert a user of any difference between these values if this is required by a retailer.

Over/Short Window [saovrsht]

The Over/Short Totals window is used to enter and maintain total amounts that make up the over/short amount for a selected store day. Depending on how you access the window, you can either edit or view the over/short amounts. The last reported version of the totals is used in the calculation of over/short.

This window is a worksheet. Before you commit any changes in this window, you can enter your version of the total and view how this change will affect the overall over/short value.

Based on the defined balancing level, you can set the overage/shortage tolerances to be checked for a particular period.

Edit Over/Short Totals

Navigate: From the main menu, select Action > Sales Audit > Store/Close Audit. The Store Day Find window opens.

Search for and retrieve a store in Edit mode. Select a store/day.

From the Options menu, select Store Day Summary, Cashier Summary, or Error List.

From the Options menu, select Over/Short Totals. The Over/Short Totals window opens.

- Edit the totals in the Store Reported column, or the HQ Reported column as necessary. The Store Reported column displays total updates from the store. The HQ Reported column displays total updates from the corporate office.

Add a comment to a record

1. Select a record.
2. Click **Comments**. The Comments window opens.
3. Enter your comments.
4. Click **OK** to save your changes and close the window.

Change the query used to calculated the totals

1. To change the balancing level query, from the Options menu, select Status.
2. Select the method by which you would like to search for totals.
3. The totals are recalculated and displayed on the table.

View the error associated with the total

1. Select a record.
2. Click **Errors**. The Error List window opens.
3. Click **OK** to close the window.

Reference Maintenance Window [sarefmt]

Use the Reference Maintenance window to enter, maintain and display reference code information that will be used in creating the errors for transactions. You can define the reference field contents for transaction types, transaction type/sub transaction type combinations, or transaction type/reason code combinations.

Stores

Store Data Window [sastdata]

The Store Data window allows you to enter and display the data files that are expected for each store. This window is accessed via the Store File Maintenance window in the Control folder.

Store Day Find Window [sastfind]

The Store Day Find window allows you to search for store/day combinations. You may search by:

- Chain
- Store
- Business Date or a range of dates

- The current status of detailed data for a store/day

The default view for the Store Day Find window opens when you open the window for the first time. You can also create a custom view.

Store Day Summary Window [sastrday]

The Store Day Summary window displays status information for the selected store day. The Store Day Summary window allows store managers to set the store day to Closed. This window is also used to start the interactive audit process in order to eliminate all errors for the store day.

Store ACH Maintenance Window [sastrach]

The Store ACH Maintenance window allows you to view ACH (Automated Clearing House) transactions for all store days. In addition, you can add manual adjustment values that will override the ACH amount. Once the amounts go through the ACH for a particular store day, you can no longer modify the transactions.

Competitors

Competitive Shopper Maintenance Window [cmpshopr]

The Competitor Shopper Maintenance window allows you to enter or maintain basic information about your company's competitive shoppers. This information includes shopper name, ID, and phone and fax numbers.

Competitor Price History Window [cmphist]

The Competitor Price History window allows you to view information about competitor's prices, by competitor, competitor store, item, and date. This helps you to make more informed decisions when setting prices for your own products. You can also use this window to edit competitor price information that was entered in error, including retail price, price type, and price start or end date.

A search function for this window allows you to search for price history information to display, according to price dates, price type, item numbers, merchandising store, competitor, or competitor store number. All competitor prices are stored in the competitor store's local currency.

Competitor Price Entry Window [cmplsted]

The Competitive Price Entry window allows you to record prices for items at competitor stores. Prices may be entered for single unit and multi-unit items. Prices are recorded in the local currency of the competitor store. You indicate whether the price is a regular, promotional, or clearance price.

To display fields that are specific to promotions or reference items, select the appropriate option from the View menu. Select View > Custom in order to customize the fields that appear in the table.

Competitor Store Maintenance Window [cmpstore]

The Competitor Store Maintenance window allows you to enter or maintain basic information about competitor's stores. This information includes store name, address,

phone and fax numbers, store total and selling area, and store open and close dates. Each competitor store is associated with a competitor through the competitor number.

Competitor Store Association Window [cmpstst]

The Competitor Store Association window allows you to create associations between your company's merchandising stores and the stores of competitors. These associations enable the efficient reporting, reviewing, and comparison of pricing information.

Note: If one of your own stores competes with a second store, you can create an association between these two stores, setting them up as competitors.

Competitor Window [cmptitor]

The Competitor Maintenance window allows you to enter or maintain basic information about competitors, such as name, address, phone and fax numbers, and Web site address. After you enter the information required on this window, you can enter information about individual stores for the competitor.

Competitor Shop Request Window [cmpshprq]

The Competitor Shop Request window allows you to create a shopping list (based on an RMS item list) and to specify the stores where the shopping should be performed. This window also allows you to associate a specific shopper with certain competitor stores. The competitive shopper then uses the shopping list to collect pricing information from the competitor stores.

Employee

Edit a Store Employee Record

Navigate: From the main menu, select Action > Sales Audit > Control > Setup > Employee Maintenance > Edit. The Employee Maintenance window opens.

The screenshot shows a window titled "Employee Maintenance (saempmnt)". It contains several input fields and buttons. At the top, there is an "Employee" field with a LOV (List of Values) button. Below it is an "Employee Type" dropdown menu with three radio button options: "Manager", "Cashier", and "Salesperson". Further down are text input fields for "Name", "Phone", "E-mail" (with a LOV button), and "Oracle User-id". At the bottom, there are two buttons: "Store Emp. Detail" and "HQ Emp. Detail". The very bottom row contains four buttons: "OK", "OK+Repeat", "Delete", and "Cancel".

Employee Maintenance Window

1. In the Employee field, enter the employee ID, or click the LOV  button and select the employee.
2. Edit the Employee type, Name, Phone, Email, and Oracle User ID fields as necessary.

Note: If you change the employee type, you will be notified that all associated employee details will be deleted.

3. Click **Store Emp Detail**. The Store Employee Details window opens.

Store Employee Details Window

4. Edit the POS ID field as necessary.
5. Click **Add** to add a store or POS ID to an employee record.
6. To delete a store ID, Store Name, and POS ID from the employee record:
 - a. Select the store record.
 - b. Click **Delete**. You are prompted to delete the record.
 - c. Click **Yes**.
7. Click **OK** to save your changes and close the window.

Edit the Employee Information in a Transaction

Navigate: From the main menu, select Action > Sales Audit > Additional Operations > Transaction Maintenance. The Transaction Find window is displayed.

Search for and retrieve a transaction in Edit mode. The Transaction Detail window opens.

The screenshot shows the 'Transaction Detail' window with the following fields and sections:

- Header Fields:** ReSA, Tran. No. (33000001), Chain, POS Tran. No. (0), Status (Present), Business Day, Tran. Type, Balance, Store, Sub-Tran. Type, Value (0.00), Tran. Date/Time, Reason Code, Transaction Uploaded from POS?, Transaction Reference Info Exists, Currency.
- Transaction Level Customer Order Attribs:** Banner Id, Customer Order No, Customer Order Date.
- Navigation Tabs:** Items, Tender, Tax, Customer, Exported, Employees, Paid Out Details.
- Table:** A table with columns: Item Type, Item, Description, Unit Retail, Selling UOM, Qty., UOM Qty., Item Status, Total Discount, Total Retail, Catch Wt., Drop Ship, Price Override?, Disc., Ref.
- Buttons:** Partial View, Agd, Item Detail, Voucher Detail, Return Reason, Price Override, Disc. Detail, Item Ref., Cust Ord Attr, Delete, OK, Comments, Previous, OK+Next, Errors, Reference, Audit Trail, Refresh Errors, Refresh, Cancel.

Transaction Detail Window

1. On the Transaction Detail window, click on the Employee tab.
2. In the Salesperson field, enter the salesperson ID and name, or click the LOV  button and select the salesperson.
3. In the Register field, enter the register ID, or click the LOV  button and select the register.
4. In the Cashier field, enter the cashier ID, or click the LOV  button and select the cashier.
5. Click OK to save your changes and close the window.

HQ Employee Details Window [saempmnt]

The HQ Employee Details window allows you to enter, maintain, and display corporate employee information.

Add a Headquarters Employee Record

Navigate: From the main menu, select Action > Sales Audit > Control > Setup > Employee Maintenance > New. The Employee Maintenance window opens.

The screenshot shows a window titled "Employee Maintenance (saempmnt)". It contains several input fields and buttons. At the top, there is a search bar labeled "Employee" with a list icon. Below it is a dropdown menu for "Employee Type" with three radio button options: "Manager", "Cashier", and "Salesperson". There are five text input fields: "Name", "Phone", "E-mail" (with a speech bubble icon), and "Oracle User-id". At the bottom, there are two buttons: "Store Emp. Detail" and "HQ Emp. Detail". At the very bottom, there are four buttons: "OK", "OK+Repeat", "Delete", and "Cancel".

Employee Maintenance Window

1. In the Employee field, enter the employee's ID number or name and press the Enter key.
2. In the Employee Type field, select Headquarters.
3. In the Name field, enter the employee's name.
4. Enter a phone number and email address.
5. In the Oracle User ID field, enter the employee's user ID.
6. Click **HQ Emp Detail**. The HQ Employee Details window opens.

The screenshot shows a software window titled "HQ Employee Details". At the top, there are two input fields: "Employee" containing "AMDJ" and "Antonette Diamzon". Below this is a table with two columns: "Location Trait" and "Description". The table has a dark blue header row and four empty rows below it. To the left of each empty row is a small icon representing a list or lookup. At the bottom of the window, there are four buttons: "OK", "Add", "Delete", and "Cancel".

HQ Employee Details Window

- a. In the Location Trait field, enter the location trait ID for the employee, or click the LOV  button and select the trait.
 - b. Click **Add** to assign additional location traits to this employee.
7. Click **OK** to save your changes and close the window.

Employee Maintenance Window [saempmnt]

The Employee Maintenance window allows you to enter, maintain, and display employee information. The Employee Maintenance window has three different modes: New, View, and Edit. If you have edit authority, you can use New and Edit.

Store Employee Details Window [saempmnt]

The Store Employee Details window allows you to enter, maintain, and display store employee information.

Edit a Headquarters Employee Record

Navigate: From the main menu, select Action > Sales Audit > Control > Setup > Employee Maintenance > Edit. The Employee Maintenance window opens.

The screenshot shows a window titled "Employee Maintenance (saempmnt)". It contains the following fields and controls:

- Employee:** A text input field with a LOV (List of Values) button to its right.
- Employee Type:** A dropdown menu with three radio button options: Manager, Cashier, and Salesperson.
- Name:** A text input field.
- Phone:** A text input field.
- E-mail:** A text input field with a speech bubble icon to its right.
- Oracle User-id:** A text input field.
- Buttons:** Two buttons labeled "Store Emp. Detail" and "HQ Emp. Detail" are positioned above a row of four buttons: "OK", "OK+Repeat", "Delete", and "Cancel".

Employee Maintenance Window

1. In the Employee field, enter the employee ID, or click the LOV  button and select the employee.
2. Edit the Employee Type, Name, Phone, Email, and Oracle User ID fields as necessary.

Note: If you change the employee type, you will be notified that all associated employee details will be deleted.

3. Click **HQ Emp Detail** or **Store Emp Detail**. The relevant Employee Details window is displayed.
4. Click **Add** to add new location traits to the employee record.
5. To delete a location trait from the employee record:
 - a. Select the location trait.
 - b. Click **Delete**. You are prompted to delete the record.
 - c. Click **Yes**.
6. Click **OK** to save your changes and close the windows.

Add a Store Employee Record

Navigate: From the main menu, select Action > Sales Audit > Control > Setup > Employee Maintenance > New. The Employee Maintenance window opens.

The screenshot shows a window titled "Employee Maintenance (saempmnt)". It contains several input fields and buttons. At the top is an "Employee" field with a search icon. Below it is an "Employee Type" dropdown menu and three checkboxes for "Manager", "Cashier", and "Salesperson". Further down are text boxes for "Name", "Phone", "E-mail" (with a speech bubble icon), and "Oracle User-id". At the bottom, there are two buttons: "Store Emp. Detail" and "HQ Emp. Detail". At the very bottom are four buttons: "OK", "OK+Repeat", "Delete", and "Cancel".

Employee Maintenance Window

1. In the Employee field, enter the employee's ID number and press the Enter key.
2. In the Employee Type field, select Store.
3. Select the Manager check box, or the Cashier and/or Salesperson check boxes.
4. In the Name field, enter the employee's name.
5. Enter a phone number and email address.
6. In the Oracle User ID field, enter the Oracle user ID of the employee.
7. Click **Store Emp Detail**. The Store Employee Details window opens.

Store	Store Name	POS ID	Home Store
1000000000	Fargo	adj	<input checked="" type="checkbox"/>
			<input type="checkbox"/>
			<input type="checkbox"/>
			<input type="checkbox"/>
			<input type="checkbox"/>

Store Employee Details Window

- a. In the Store field, enter the store ID, or click the LOV  button and select the store.
 - b. In the POS ID field, enter the employee's point of sale ID.
 - c. Select the Home Store check box, to indicate the store is the employee's home store.
8. Click **OK** to save your changes and close the window.

View an Employee Record

Navigate: From the main menu, select Action > Sales Audit > Control > Setup > Employee Maintenance > View. The Employee Maintenance window opens.

The screenshot shows the 'Employee Maintenance' window with the following fields and controls:

- Employee:** A text input field with a list-of-values (LOV) icon to its right.
- Employee Type:** A dropdown menu with three radio button options: Manager, Cashier, and Salesperson.
- Name:** A text input field.
- Phone:** A text input field.
- E-mail:** A text input field with a speech bubble icon to its right.
- Oracle User-id:** A text input field.
- Buttons:** 'Store Emp. Detail', 'HQ Emp. Detail', 'OK', 'OK+Repeat', 'Delete', and 'Cancel' are located at the bottom of the window.

Employee Maintenance Window

1. Click the Employee LOV  button and select the employee.
2. The selected employee information opens.

Note: Depending on the Employee Type, you can click either **Store Emp Detail**, or **HQ Emp Detail** to see the stores and location traits associated with the employee.

3. Click **OK** to close the window.

General ledgers

General Ledger Search Form Window [saglfnd]

The General Ledger Search Form window is used to search for a total to associate with an account code. After a successful search, the General Ledger Account Maintenance window can be displayed. Use the search window to find the cross reference window and map merchandise hierarchy levels from Sales Audit to the appropriate general ledger accounts within Oracle.

This window can be accessed through the Sales Audit Control – Setup folder.

The default view for the General Ledger Search Form window opens when you open the window for the first time. You can also create a custom view.

Edit General Ledger Account Totals

Navigate: From the main menu, select Action > Sales Audit > Control > Setup > GL Account Maintenance. The General Ledger Search Form window is displayed.

Search for and retrieve a general ledger total in Edit mode. The GL Account Maintenance window opens.

GL Account Maintenance Window

1. Select the desired total.
2. Click **OK**. The GL Account Maintenance window opens.
3. In the Debit CCID field, enter or edit the number, or click the LOV  button and select the number. The Sequence fields are filled in with the information specific to the code combination.
4. In the Credit CCID field, enter or edit the number, or click the LOV  button and select the number. The Sequence fields are filled in with the information specific to the code combination.
5. To delete a general ledger debit or credit:
 - a. Select a debit or credit CCID.
 - b. Click **Delete**. You are prompted to delete the record.
 - c. Click **Yes**.
6. Click **OK** to save your changes and close the window.

View General Ledger Account Totals

Navigate: From the main menu, select Action > Sales Audit > Control > Setup > GL Account Maintenance. The General Ledger Search Form window opens.

Search for and retrieve a general ledger total in View mode. The GL Account Maintenance window opens.

GL Account Maintenance Window

1. Select the desired total.
2. Click **OK**. The GL Account Maintenance window opens.
3. Click **OK** to close the window.

View the General Ledger Cross Reference

Navigate: From the main menu, select Finance > General Ledger. The General Ledger Search window opens.

Search for and retrieve a cross reference in View mode. The GL Cross Reference window opens.

GL Cross Reference Window

- Click **OK** to close the window.

GL Account Maintenance window [saglcros]

The GL Account Maintenance window is used as a cross reference to map merchandise hierarchy levels from Oracle Retail Sales Audit to the appropriate general ledger accounts within Oracle. The window allows the accounting user to enter the appropriate accounting fields for a specific total and location.

Once a valid total is selected:

1. You are prompted to select a location.
2. You select a valid pre-defined Code Combination Identifier (CCID) from the Oracle GL database.
3. The appropriate accounts and descriptions appear, as defined in the Oracle GL database.
4. You are prompted to enter valid segment accounts, as defined in the Oracle GL database.

Search for a General Ledger Total

Navigate: From the main menu, select Action > Sales Audit > Control > Setup > GL Account Maintenance. The General Ledger Search Form window opens.

General Ledger Search Form Window

1. In the Action menu, select either Edit or View.
2. Enter additional criteria as desired to make the search more restrictive.
3. Click **Search**. The window displays the totals that match the search criteria in a table.

Note: To view the GL Account Maintenance window, select a total and click **OK**.

4. Click **OK** to close the window.

Vouchers

Voucher Detail Window [satrdetl]

The Voucher Detail window allows you to view the voucher information for a selected item record in a transaction. The window displays the store and date that the voucher was assigned, issued and redeemed.

Voucher Options Window [sasysopt]

The Voucher Options window is used to view and maintain voucher credit and gift certificate information as it relates to the escheatment process.

View the Voucher Details in a Transaction

Navigate: From the main menu, select Action > Sales Audit > Additional Operations > Summary > Tender Summary. The Tender Summary window opens.

Search for and retrieve a tender summary with a Tender Type Group of Voucher (gift cert. or credit).

1. Select a row in the table.
2. Click **Tran Detail**. The Transaction Detail window opens.
3. If necessary, click on the Tender tab.
4. Select a row of data.
5. Click **Voucher Details**. The Voucher Details window opens.
6. Click **OK** to close the window.

Discounts

Discount Reference Window [satraudt]

The Discount Reference window allows you to view the discount references and details associated with the selected promotion items on the transaction.

Discount Window [satraudt]

The Discount window allows you to view the details of the discount associated with an item on the transaction.

Discount Reference Window [sattrdetl]

The Discount Reference window allows you to view and add discount reference information for a selected item record in a transaction. You can access this window by clicking **Reference** on the Discount Detail window.

Discount Detail Window [sattrdetl]

The Discount Detail window allows you to view and maintain discount information for a selected item in a transaction.

Discount Revision History Window [satraudt]

The Discount Revision History window allows you to view the discount revisions and details associated with the selected promotion items on the transaction.

Closing date

Company Close Window [cmpcls]

The Company Close window allows you to view and maintain the dates on which the company is closed. When you specify a date on which the company is closed, all stores and warehouses in the company are closed on that date by default. However, using the Location Exceptions window, you can specify exceptions to the closing date. You can indicate which locations are open on that date and for what activities they are open.

Add a Closing Date for a Company

Navigate: From the main menu, select Action > Sales Audit > Control > Setup > Company Closings > Edit. The Company Close window opens.

Company Close Window

1. Click **Add**. A blank row is highlighted.
2. In the Close Date field, enter a date, or click the calendar  button and select a date.
3. In the Close Description field, enter a reason for the close.

Add exceptions to a company close

1. Click **Exceptions**. The Location Exceptions window open.

Location Exceptions (cmclsexp)

Close Date: 21-AUG-2009 Reason: Company close

Group Type: [Dropdown] Group Value: [Text] [LOV]

Open For: Receiving Or Shipping Or Sales [Search]

Location Type	Location	Location Name	Receiving	Shipping	Sales
[Dropdown]			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Group Type: [Dropdown] Group Value: [Text] [LOV]

Open For: Receiving and Shipping and Sales [Apply] [Delete]

[OK] [Add] [Refresh] [Cancel]

Location Exceptions Window

2. Click **Add** to enable the apply area.
3. In the Group Type field, select the type of group for which you are creating exceptions.
4. In the Type field, enter the ID of the group for which you are creating exceptions, or click the LOV [LOV] button and select a group.
5. In the Open For area, select the types of activities the store is open for.
6. Click **Apply**. The information is added to the table.

Complete the company closing

1. Click **OK** to save the changes and close the windows.
2. You are prompted to confirm the new closing date and warned of any impact this change will have.
3. Click **Yes** to save the new close date.

Edit a Closing Date for a Company

Navigate: From the main menu, select Action > Sales Audit > Control > Setup > Company Closings > Edit. The Company Close window opens.

Company Close Window

1. Select the date to be edited.

Note: The close date cannot be changed. To change the date, delete the date and enter a date.

2. In the Close Description field, enter a description.
3. Click **OK** to save your changes and close the window.

Delete a closing date for a company

1. Select the close date to delete.
2. Click **Delete**. You are prompted to confirm deletion of the record.
3. Click **Yes**.
4. Click **OK** to save your changes and close the window.

Delete a location exception from a closing date

1. Select a close date. Click **Exceptions**. The Location Exceptions window opens.

Location Exceptions (cmclsexp)

Close Date: 21-AUG-2009 Reason: Company close

Group Type: [Dropdown] Group Value: [Text]

Open For: Receiving Or Shipping Or Sales Search

Location Exceptions to Company Close

Location Type	Location	Location Name	Receiving	Shipping	Sales
[Dropdown]			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Group Type: [Dropdown] Group Value: [Text]

Open For: Receiving and Shipping and Sales Apply Delete

OK Add Refresh Cancel

Location Exceptions Window

2. Select the location exception to be deleted.
3. Click **Delete**. You are prompted to delete the record.
4. Click **Yes**.
5. Click **OK** to save your changes and close the window.

View Closing Dates for a Company

Navigate: From the main menu, select Action > Sales Audit > Control > Setup > Company Closings > View. The Company Close window opens.

Company Close Window

1. Click the scroll arrows to see all of the company closing dates.
2. Click **OK** to close the window.

View the location exceptions to a company closing

1. Select a close date. Click the **Exceptions** button. The Location Exceptions window opens.

The screenshot shows the 'Location Exceptions' window with the following details:

- Close Date: 21-AUG-2009
- Reason: Company close
- Group Type: (dropdown)
- Group Value: (text field)
- Open For: Receiving Or Shipping Or Sales
- Search button

Location Type	Location	Location Name	Receiving	Shipping	Sales
(dropdown)			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(dropdown)			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(dropdown)			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(dropdown)			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(dropdown)			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(dropdown)			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(dropdown)			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(dropdown)			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(dropdown)			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(dropdown)			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Below the table, there are additional controls:

- Group Type: (dropdown)
- Group Value: (text field)
- Open For: Receiving and Shipping and Sales
- Apply button
- Delete button

At the bottom of the window are buttons for OK, Add, Refresh, and Cancel.

Location Exceptions Window

- Click OK to close the window.

Errors

Error Definition Window [saerrcd]

The Error Definition window allows you to create, maintain, and display error code information.

The error codes created and maintained in this window are used in the Automated and Interactive Audit modules of the Sales Audit system. If a user-defined audit rule does not pass validation, the error code associated with that audit rule is generated.

Edit an Error Code

Navigate: From the main menu, select Action > Sales Audit > Control > System > Error Code Maintenance > Edit. The Error Definition window opens.

Error Definition Window

1. Select an error definition record.
2. Enter or edit the Error Description, or click the comments  button and enter the description.
3. Edit the Rec Solution, Form, Tab, Store Override, and HQ Override fields as necessary.
4. Click **Apply**. The edits to the error code record are saved.
5. Click **OK** to save your changes and close the window.

Delete an error code

1. Select an error code.
2. Click **Delete**. You are prompted to delete the record.
3. Click **Yes**.

Note: Error codes for an error that currently exists in the system will not be deleted.

4. Click **OK** to save your changes and close the window.

Sales Audit Errors Window [fm error]

The Sales Audit Errors window allows you to view the errors that have occurred during a store day. The window displays the description of the error, and the recommended solution for resolving the error.

Error List Window [saerrlst]

The Error List window is used to view any existing errors in the system for a particular store/day. This window is the focal point of the Interactive Audit and VBO Close processes. The window allows you to fix or override errors where appropriate.

Transactions

Transaction Find Window [satrfnd]

The Transaction Find window allows you to enter criteria to search for transactions and view the results of the search.

Depending on the type of search, you can edit or view transaction details. This window also serves as a gateway; you can use it to navigate to the Transaction Details window to create a new transaction.

If you select Post Void in the Action field, you can post void a transaction. This cancels the original transaction and creates a new one.

The default view for the Transaction Find window opens when you open the window for the first time. You can also create a custom view.

Transaction Audit Trail Find Window [satrafnd]

The Transaction Audit Trail Find window allows you to search for transactions that have been revised and to view the results. To further refine your search, you can sort the results by transaction number or transaction date/time. You can use the Options menu to save or restore default values.

After a successful search, you can view the transaction details on the Transaction Audit Trail window.

Override a Price in a Transaction

Navigate: From the main menu, select Action > Sales Audit > Additional Operations > Transaction Maintenance. The Transaction Find window is displayed.

Search for and retrieve a transaction in Edit mode. The Transaction Detail window opens.

1. On the Transaction Detail window, click on the Items tab.
2. Click **Price Override**. The Return Reason window opens.
3. In the Override Reason field, enter the override reason, or select one from the list.
4. In the New Unit Retail Price field, enter the new price.
5. Click **OK** to save your changes and close the window.

Transaction Item Reference Window [satraudt]

The Transaction Item Reference window allows you to view reference information defined by the user for a selected item that has the Ref check box selected in a transaction.

View Item Details in a Transaction

Navigate: From the main menu, select Action > Sales Audit > Additional Operations > Transaction Maintenance. The Transaction Find window is displayed.

Search for and retrieve a transaction in View mode. The Transaction Detail window opens.

1. Click **Item Detail**. The Item Detail window opens.
2. View item details.

3. Click **OK** to close the window.

View Transaction Details of an Item Summary

Navigate: From the main menu, select Action > Sales Audit > Additional Operations > Summary > Item Summary > View.

The Sales Audit Item Summary window opens.

Search for and retrieve an item summary. Select a transaction record to view.

1. Click **Tran Detail**. The Transaction Detail window opens.
2. Click **OK** to close the window.

View Transaction Level Discounts for a Purchase Order

Navigate: From the main menu, select Ordering > Orders. The Order Selection window opens.

Search for and retrieve a purchase order in View mode. The PO Header Maintenance window opens.

The screenshot shows the 'PO Header Maintenance' window with the following data:

Field	Value
Order No.	90003679

Options menu:

- Import Order
- Include On-Order
- QC Required
- EDI PO
- Revisions Exist
- Pre Mark
- Customer Order
- Prepack

Buttons: Apply Process, Recalc Totals, OK, Comments, Items, Summary, Print, Cancel

PO Header Maintenance Window

1. From the Options menu, select Txn-Level Discounts. The Order Transaction-Level Discounts window opens.

Transaction Data Detail Window

- b. Click **Prev** or **Next** to view the details of the previous or next transaction on the list.
 - c. Click **Fin Drill Back Rpt** to print the Accounting Entry Detail Report (Transaction History).
6. Click **Drill to Finance** to view the Oracle Accounting Entry application.
7. Click **Close** to close the window.

View Tender Level Information by Store Day

Navigate: From the main menu, select Action > Sales Audit > Additional Operations > Summary > Tender Summary. The Tender Summary window opens.

1. Select one of the following options to search for a store:
 - a. In the Chain field, enter the ID of a chain, or click the LOV  button and select a chain.
 - b. In the Store field, enter the ID of a store, or click the LOV  button and select a store. This field is optional.
 - c. In the Business day, enter the business date, or click the calendar  button and select a date.
2. Click **Search**. The transaction types for the specified store day appear.
3. To filter the list of transactions by tender type group, tender type ID, or tender amount, enter a value in the correct filter fields, and click the filter  button.
4. To view more details about the transaction, select the transaction and click **Tran Detail**. The Transaction Detail window opens.
5. Click **OK** to close the window.

Transaction Reference Window [satrdetl]

The Transaction Reference window allows you to view and maintain any reference information that pertains to the transaction.

Transaction Detail Window [satrdetl]

The Transaction Detail window allows you to view, edit, and create new transactions. You can create a transaction to account for a missing transaction. You can view and edit the errors in a transaction. After you correct the errors, the status of a transaction becomes Passed. Passed transactions are exported to external systems.

A transaction in Post Void status cancels out the original transaction. In Post Void mode, you can change the status of a transaction to Post Void.

Missing Transaction Summary Window [samisstr]

The Missing Transaction Summary window allows you to view and update missing transactions. Missing transactions can occur when a transaction number, but no details, is generated at the POS. Missing transactions may represent transactions that were not properly polled, so you may need to add the details. Another possibility is that the transaction numbers were polled erroneously from the POS and do not represent actual transactions. You may need to delete such transaction numbers.

Post Void a Transaction

Navigate: From the main menu, select Action > Sales Audit > Additional Operations > Transaction Maintenance. The Transaction Find window is displayed.

Search for and retrieve a transaction in Post Void mode. The Transaction Detail window opens.

1. Click **OK**. You are prompted to post void the transaction.
2. Click **Yes**.
3. Click **OK** to save your changes and close the window.

View Customer Order Information for a Transaction

Navigate: From the main menu, select Action > Sales Audit > Additional Operations > Transaction Maintenance. The Transaction Find window opens.

Search for and retrieve a transaction in Edit mode. The Transaction Detail window opens.

1. On the Items tab, select an item that has the Drop Ship checkbox checked.
2. To view the customer order information, click **Cust Ord Attr**. The Customer Order Attributes window opens.
3. Click **OK** to close the window.

View Export Information for a Transaction

Navigate: From the main menu, select Action > Sales Audit > Additional Operations > Transaction Maintenance. The Transaction Find window is displayed.

Search for and retrieve a transaction in View mode. The Transaction Detail window opens.

1. On the Transaction Detail window, click on the Exported tab. The Exported tab displays the names and times any transactions were exported to outside systems.
2. Click **OK** to close the window.

Tenders

Tender Revision History Window [satraudt]

The Tender Revision History window allows you to view all revisions associated with a tender on the transaction. You can access this window by selecting a tender on the Audit Trail window and clicking **Tender Rev.**

Tender Reference Window [satraudt]

The Tender Reference window allows you to view reference information defined by the user for a selected tender in a transaction.

Tender Credit Card Details Window [satraudt]

The Tender Credit Card Details window allows you to view the authorization details of credit card transactions.

Tender Reference Window [sattrdetl]

The Tender Reference window allows you to view and maintain user-defined reference information for a selected tender record in a transaction. You can access this window by clicking **Reference** on the Tender tab of the Transaction Detail window.

Tender Summary Window [satdsumm]

The Tender Summary window allows you to view tender level information for a particular store day.

Totals

Totals Export Window [satlexpt]

The Totals Export window allows you to view export information for a particular total.

Total Value Revision Error Window [satlaudt]

The Total Value Revision Error window displays all revised errors for totals. The window displays the error description and the ID of the person who revised the total.

Sales Audit Totals Audit Trail Window [satlaudt]

The Sales Audit Totals Audit Trail window allows you to view any changes made to totals and the corresponding errors and exports for a particular cashier/register and store day, or for an entire store day. You can display totals in the primary currency or the local currency.

Edit a Totals Calculation Definition

Navigate: From the main menu, select Action > Sales Audit > Control > Totals Definition Maintenance. The Total Search window opens.

Search for and retrieve the totals calculation definition in Edit mode. The Total Calculation Definition Wizard window opens.

Total Calculation Definition Wizard Window

1. In the Skip to Page field, select the panel you want to edit.
2. Click **Finish** to save your changes and close the window.

Delete a Totals Calculation Definition

Navigate: From the main menu, select Action > Sales Audit > Control > Totals Definition Maintenance. The Total Search window opens.

Search for and retrieve a totals definition in Edit mode. Restrict the search to total definitions in Submitted or Worksheet status. The Totals Calculation Definition Maintenance window opens.

1. From the Options menu, select Status > Delete. You are prompted to confirm the deletion.
2. Click **Yes**. The status is changed to Deleted.
3. Click **OK** to save your changes and close the window.

Totals Calculation Definition Wizard Window [satotal]

The Totals Calculation Definition Wizard allows you to define the totals you will use in your sales auditing process. These total definitions determine the values used in your auditing process and the values exported to external systems (RDW, ACH, UAR). These total definitions allow the audit rules you set up to work properly.

To start the totaling process, use the Totals Search window to open the Totals Calculation Definition wizard.

The values calculated by totals are:

- Used throughout the system to determine the accuracy of transaction data.
- Exported to external systems.
- Used for Sales Audit reporting.

Disable a Totals Calculation Definition

Navigate: From the main menu, select Action > Sales Audit > Control > Totals Definition Maintenance. The Total Search window opens.

Search for and retrieve a totals definition in Edit mode. Totals Calculation Definition Maintenance window opens.

1. From the Options menu, select Status > Disable. You are prompted to confirm that you are disabling the totals definition.
2. Click **Yes**. The status is changed to Disabled.
3. Click **OK** to save your changes and close the window.

Totals Audit Trail Find Window [satlafnd]

The Totals Audit Trail Find window allows you to search for audit trail totals for a particular cashier/register and store day, or for an entire store day.

Location Trait Details Window [satotal]

The Location Trait Details window allows you to view traits of the locations used for a totals definition rule. The location traits added to a totals definition rule at set up determines the locations for which the rule is evaluated.

Display Group Details Window [satotal]

The Display Group Details window is used to view and edit the details of the display order group and to see the totals that comprise other groups.

Total Search Window [satlfind]

The Total Search window is used to search for and retrieve selected records based on totals and parameters that are defined in the Totals Calculation Definition Wizard. When you select View or Edit from the Action menu, you can retrieve an existing set of calculated totals. To create a new calculation using the Totals Calculation Definition Wizard, select New from the Action menu.

The default view for the Total Search window opens when you open the window for the first time. You can also create a custom view.

Rule Wizards

Rule Definition Wizard [sarule]

The Rule Calculation Definition Wizard is used to define the audit rules you will be using in your sales auditing process.

You also use this window to indicate how a rule failure impacts the system. The system continues to process rule data unless you specify that a rule failure is fatal. A fatal error stops all processing of rule data for a store, or for a store day. Errors are defined in terms of the system impacted. All errors for a system must be corrected before the transaction can be passed to an external system.

Create an Audit Rule Calculation Definition

Navigate: From the main menu, select Action > Sales Audit > Control > Audit Rule Maintenance. The Audit Rule Search window opens.

Audit Rule Search Window

1. From the Action menu, select New to set up a new audit rule definition in the wizard.
2. Click **OK**. The Rules Calculation Definition Wizard window opens.

Rules Calculation Definition Wizard Window

Define the audit rules

1. In the Rule field, enter the ID and description of the total definition.
2. In the Start Date and End Date fields, enter the dates the total definition is effective, or click the calendar  button and select dates.

Note: If you leave the End Date field blank, the total is calculated indefinitely.

3. Click **Next** to navigate through the wizard. Help for selected fields and buttons is displayed in the section on the right side of the screen.

Review the audit rules

1. If you need to make any changes to the definition, click **Back** to return to the appropriate area.
2. Click **Finish**. The Totals Definition is saved.

Submit an Audit Rule Calculation Definition for Approval

Navigate: From the main menu, select Action > Sales Audit > Control > Audit Rule Maintenance. The Audit Rule Search window opens.

Search for and retrieve an audit rule definition in Edit mode. Restrict the search to audit rule definitions in Worksheet status. The Rules Calculation Definition Wizard window opens.

Rules Calculation Definition Wizard Window

1. From the Options menu, select Status > Submit . You are prompted to confirm the submission.
2. Click **Yes**. The status is changed to Submitted.
3. Click **OK** to save your changes and close the window.

Approve an Audit Rule Calculation Definition

Navigate: From the main menu, select Action > Sales Audit > Control > Audit Rule Maintenance. The Audit Rule Search window opens.

Search for and retrieve an audit rule definition in Edit mode. Restrict the search to audit rule definitions in Submitted status. The Rules Calculation Definition Wizard window opens.

Rules Calculation Definition Wizard Window

1. From the Options menu, select Status > Approve. You are prompted to confirm the approval.
2. Click Yes. The status is changed to Approved.
3. Click OK to save your changes and close the window.

Search for an Audit Rule

Navigate: From the main menu, select Action > Sales Audit > Control > Audit Rule Maintenance. The Audit Rule Search window opens.

Audit Rule Search Window

1. In the Action field, select either Edit or View.
2. Enter additional criteria as desired to make the search more restrictive.
3. Click **Search**. The Audit Rule Search window displays rules that match search criteria.
4. Select a task:
5. To perform another search, click **Refresh** or click **Back**.
6. To display the rule information, select a record and click **OK**. The Rules Calculation Definition Wizard window opens.

Rules Calculation Definition Wizard Window

7. Click **Cancel** to close the window.

Create a Totals Calculation Definition

Navigate: From the main menu, select Action > Sales Audit > Control > Totals Definition Maintenance. The Total Search window opens.

The screenshot shows the 'Total Search Window' with the following fields and controls:

- Action:** A dropdown menu.
- Total:** A text input field with a search icon and a help icon.
- Revision Number:** A text input field with a search icon.
- Update ID:** A text input field with a search icon.
- Effective from:** A date input field with a calendar icon.
- Through:** A date input field with a calendar icon.
- Total Category:** A dropdown menu.
- Total Type:** A dropdown menu.
- Data Source:** A dropdown menu.
- Status:** A dropdown menu.
- Buttons:** OK, Search, Refresh, Back, Close.

Total Search Window

1. In the Action menu, select New.
2. Click **OK**. The Total Calculation Definition Wizard window opens.

The screenshot shows the 'Total Def. Wizard' window with the following details:

- Title Bar:** Total Def. Wizard (satotal)
- Total Overview Section:**
 - Total:** ACS70683
 - Status:** Worksheet
 - Version:** 23
 - Start Date:** 01-MAR-2001
 - End Date:** 31-MAR-2001
 - User ID:** RMSSEDEV121USER
 - Update Date/Time:** 14-NOV-2007 15:18:31
- Total Category:** Sales
- Is this total a component of Over/Short or a Miscellaneous total?**
 - Over/Short
 - Miscellaneous
- Over/Short Section:**
 - Over/Short Group:** [Dropdown]
 - Operator:** [Dropdown]
- Is this total based on 'raw' data or an existing total?**
 - Raw Data
 - Existing Total
- Right Panel:** The Total Definition Wizard allows you to define the totals you will be using in your sales auditing process. This is a complicated process that requires familiarity with ReSA. In this screen, you define the overview information for the total.

 - Skip to Page:** [Dropdown]
 - Page 1 of 11.**
 - Buttons:** < Back, Next >, Finish, Cancel

Total Calculation Definition Wizard Window

Define the totals calculation

1. In the Total field, enter the ID and description of the total definition.
2. In the Start Date and End Date fields, enter the dates the total definition is effective, or click the calendar  button and select dates.

Note: If you leave the End Date field blank, the total is calculated indefinitely.

3. Click **Next** to navigate through the wizard. Help for selected fields and buttons is displayed in the section on the right side of the screen.

Note: Select Raw Data or Existing Total on the Total Overview panel to indicate how the total will be defined. If you select Raw Data, you are creating a completely new rule. You need a thorough knowledge of the tables and columns in the database. If you select Existing Data, you are creating a sum of existing totals.

Review the totals calculation

1. If you need to make any changes to the definition, click **Back** to return to the appropriate area.
2. Click **Finish**. The Totals Definition is saved.

View the Location Trait Details for an Audit Rule

Navigate: From the main menu, select Action > Sales Audit > Control > Audit Rule Maintenance. The Audit Rule Search window opens.

Search for and retrieve the rules definition in View or Edit mode. The Rules Calculation Definition Wizard window opens.

Rules Calculation Definition Wizard Window

1. Navigate to page 7 of the wizard.
2. Click **Location Trait Details**. The Location Trait Details window opens.

Location Trait Details Window

3. Click **OK** to close the window.

Submit a Totals Calculation Definition for Approval

Navigate: From the main menu, select Action > Sales Audit > Control > Totals Definition Maintenance. The Total Search window opens.

Search for and retrieve a totals definition in Edit mode. Restrict the search to total definitions in Worksheet status. The Total Calculation Definition Wizard window opens.

Total Calculation Definition Wizard Window

1. From the Options menu, select Status > Submit. You are prompted to confirm the submission.
2. Click **Yes**. The status is changed to Submitted.
3. Click **OK** to save your changes and close the window.

Approve a Totals Calculation Definition

Navigate: From the main menu, select Action > Sales Audit > Control > Totals Definition Maintenance. The Total Search window opens.

Search for and retrieve a totals definition in Edit mode. Restrict the search to total definitions in Submitted status. The Totals Calculation Definition Maintenance window opens.

Totals Calculation Definition Maintenance Window

1. From the Options menu, select Status > Approve. You are prompted to confirm the approval.
2. Click Yes. The status is changed to Approved.
3. Click OK to save your changes and close the window.

Search for a Totals Calculation Definition

Navigate: From the main menu, select Action > Sales Audit > Control > Totals Definition Maintenance. The Total Search window opens.

Total Search Window

1. In the Action menu, select either Edit or View.
2. Enter additional criteria as desired to make the search more restrictive.
3. Click **Search**. The totals that match the search criteria appear.
4. Click **OK** to close the window.

View the Total Value Revision Errors

Navigate: From the main menu, select Action > Sales Audit > Additional Operations > Audit Trail > Total Audit Trail.

Search for and retrieve a totals audit trail. The Totals Audit Trail Find window opens.

Select a total from the table. Click **OK**. The Sales Audit Totals Audit Trail window opens.

Sales Audit Totals Audit Trail Window

1. Select a revision that contains errors.
2. Click the red exclamation point. The Total Value Revision Errors window opens.
3. Click **OK** to close the windows.

Edit an Audit Rule Calculation Definition

Navigate: From the main menu, select Action > Sales Audit > Control > Audit Rule Maintenance. The Audit Rule Search window opens.

Search for and retrieve the audit rule definition in Edit mode. The Rules Calculation Definition Wizard window opens.

Rules Calculation Definition Wizard Window

1. Follow the directions on the right side of the wizard to complete the rule definition.
2. Click **OK** to save your changes and close the window.

View the Totals Calculation Definitions

Navigate: From the main menu, select Action > Sales Audit > Control > Totals Definition Maintenance. The Total Search window opens.

Search for and retrieve a totals definition in View mode. The Total Calculation Definition Wizard window opens.

The Total Definition Wizard allows you to define the totals you will be using in your sales auditing process. This is a complicated process that requires familiarity with ReSA. In this screen, you define the overview information for the total.

Total Calculation Definition Wizard Window

1. Select the desired total description.
2. Click **OK**. The Total Calculation Definition Wizard window opens.
3. Click **OK** to close the window.

Set the Rules for Currency Rounding

Navigate: From the main menu, select Action > Sales Audit > Control > Setup > Currency Rounding Rules Maintenance > Edit. The Currency Rounding Rules Maintenance window opens.

**Currency Rounding Rules Header Maintenance window**

1. Enter the currency rounding information.
2. Click **Detail**. The Currency Rounding Rules Detail Maintenance window opens.

Rules Calculation Definition Wizard Window

3. Click OK to close the window.

Disable an Audit Rule Calculation Definition

Navigate: From the main menu, select Action > Sales Audit > Control > Audit Rule Maintenance. The Audit Rule Search window opens.

Search for and retrieve an audit rule definition in Edit mode. The Rules Calculation Definition Wizard window opens.

1. From the Options menu, select Status > Disable. You are prompted to confirm that you are disabling the totals definition.
2. Click Yes. The status is changed to Disabled.
3. Click OK to save your changes and close the window.

Delete an Audit Rule Calculation Definition

Navigate: From the main menu, select Action > Sales Audit > Control > Audit Rule Maintenance. The Audit Rule Search window opens.

Search for and retrieve an audit rule definition in Edit mode. Restrict the search to audit rule definitions in Submitted or Worksheet status. The Rules Calculation Definition Wizard window opens.

Rules Calculation Definition Wizard Window

1. From the Options menu, select Status > Delete. You are prompted to confirm the deletion.
2. Click Yes. The status is changed to Deleted.
3. Click OK to save your changes and close the window.

Enter Total Levels into a General Ledger Account

Navigate: From the main menu, select Action > Sales Audit > Control > Setup > GL Account Maintenance. The General Ledger Search Form window opens.

Search for and retrieve a general ledger total in New mode. The GL Account Maintenance window opens.

GL Account Maintenance Window

1. In the Total field, enter a total ID, or click the LOV  button and select a total.
2. In the Store field, enter a store ID, or click the LOV  button and select a store.
3. In the Roll-Up Level fields, enter rollover levels 1, 2 and 3.
4. In the Debit CCID field, enter a debit code, or click the LOV  button and select the code.
5. In the Credit CCID field, enter a credit code, or click the LOV  button and select the code.
6. Click OK to save your changes and close the window.

Execute Details Window [sarule]

The Execute Details window is used to view the other rules in the selected execute order group. You can also see the selected execute order group in relation to the other execute order groups.

Location Trait Details Window [sarule]

The Location Trait Details window allows you to view traits of the locations used for an audit rule. The location traits added to a audit rule definition at rule set up determines the locations for which the rule is evaluated.

View the Display Group Details

Navigate: From the main menu, select Action > Sales Audit > Control > Totals Definition Maintenance. The Total Search window opens.

Search for and retrieve a totals definition in View or Edit mode. The Total Calculation Definition Wizard window opens.

Store/day Close Audit

Store Day Close Audit Overview

The store / day close audit module allows you access to all the stores that you must audit. The information opens at the store day level.

Business process

You can access the following windows, which allow you to audit the results of the sales audit processing.

- **Cashier Summary window:** Indicates which cashier processed a transaction, how many transactions were processed, the number of errors per cashier, and the amount the cashier was over or short by.
- **Error List window:** Displays all errors that ReSA has associated with the store / day.
- **Over / Short window:** Displays the stores that are bringing in more or less money than reported. This audit can be used to monitor theft, fraud or poor management in a store.

Reports

There are no reports pertaining to store / day close audits.

System Administration

There are no system administration functions pertaining to store / day close audits.

Create Store/Day Reports

Navigate: From the main menu, select Action > Sales Audit > Store/Close Audit. The Store Day Find window opens.

Search for and retrieve a store in Edit mode. Select a store/day.

From the Options menu, select Store Day Summary. The Store Day Summary window opens.

Create a Flash Totals report

1. From the Options menu, select Reports > Flash Totals Report.
2. The Report Parameters web page opens.
3. In the Destination Type field, select where you want the finished report to be sent. Select Cache to view the report online.
4. If you are prompted for parameters to further define the report, enter the data in the appropriate fields.
5. Click **Submit Query**. The report is generated and sent to the destination that you selected.

Create a Flash Sales Prior Year Comparison report

1. From the Options menu, select Reports > Flash Sales Prior Year Comparison Report.
2. The Report Parameters web page opens.
3. In the Destination Type field, select where you want the finished report to be sent. Select Cache to view the report online.
4. If you are prompted for parameters to further define the report, enter the data in the appropriate fields.
5. Click **Submit Query**. The report is generated and sent to the destination that you selected.

Search for a Store/Day

Navigate: From the main menu, select Action > Sales Audit > Store Close/Audit. The Store Day Find window opens.

Store Day Find Window

1. In the Action field, select either Edit or View.
2. In the store field, select a store.
3. In the Business Day range, select a date.
4. In the status area, select varying status criteria. Valid store statuses are:
 - **Worksheet** – When a store is defined as a multi-level audit store, the store is entered in as a Worksheet status. The store/day can be deleted in this status.
 - **Fuel Closed** – This status is only used for fuel stores that will be exporting to Oracle Site Fuels Management (SFM). Stores are entered in a Worksheet status; however, the audit cannot begin until the day is closed in SFM first. When this is done, the system updates the status to Fuel Closed. The store/day can be deleted in this status.

Note: SFM will send back a file signifying that the store transactions have been processed and reconciled. This will signify Fuel Closed and enable the data to be worked.

- **Closed** – In a multi-level audit scenario, the store employee must close the store day once all errors have been corrected or overridden. This updates the store status to Closed and makes the store/day available to the HQ auditor. In a single level audit scenario where only HQ auditors are using ReSA, the store is entered in a Closed status. The store/day cannot be deleted in this status.
 - **Not Fully Closed** – Not a valid Store Status, but rather a combination of store statuses to use as a query mechanism on the Store Day Find form. It is a combination of the Worksheet and Fuel Closed statuses.
5. Enter additional criteria as desired to make the search more restrictive.
 6. Click **Search**. A list of selected stores opens by business date.
 7. To search for other locations, click **Refresh**.
 8. Click **Close** to close the window.

Maintain a Store/Day

Navigate: From the main menu, select Action > Sales Audit > Store/Close Audit. The Store Day Find window opens.

Search for and retrieve a store in Edit mode. Select a store/day.

From the Options menu, select Store Day Summary. The Store Day Summary window opens.

The screenshot shows the 'Store Day Summary' window with the following details:

- Chain:** 3333333333 Oracle Retail Chain
- Business Day:** 10-OCT-2008
- Store:** 1 First Store
- Currency:** USD
- Store Status:** Worksheet
- Store Closed Date/Time:** (empty)
- Headquarter Status:**
 - Audit Status: Unaudited
 - Audit Changed Date/Time: (empty)
 - Data Status: Ready for Import
- Transaction Information:**
 - No. Trans.: 0
 - Outstanding Errors: 0
 - Over/Short: 0.00
 - No. Files Loaded: (empty)
 - No. Files Expected: Unknown

Buttons at the bottom: OK, Total/Audit, Close Store, Comments, Cancel.

Store Day Summary window

Delete a store day

1. From the Options menu, select Delete Store Day.
2. You are prompted to confirm the deletion. Click **Yes**.

Change the data status

1. From the Options menu, select Manually Update Data Status > Set Partially Loaded. You may begin updating information related to the store/day.

OR

From the Options menu, select Manually Update Data Status > Set Fully Loaded. No additional transactions may be imported for the store/day.

2. You are prompted to approve the change in data status. Click **Yes**.
3. Click **OK** to close the window.

Change the audit status

1. To reset the audit status, from the Options menu, select Reset Audit Status.
2. To audit the store day, click **Total/Audit**.

Close a store day

Note: All outstanding store/day issues must be resolved before you can close the store.

3. Click **Close/Store**. You are prompted to confirm the close.
4. Click **Yes**.

Maintain the Balancing Level

Navigate: From the main menu, select Action > Sales Audit > Store/Close Audit. The Store Day Find window opens.

Search for and retrieve a store in Edit mode. Select a store/day.

From the Options List, select Cashier/Register Summary. The Balancing Level Summary window opens.

Change the balancing level query

1. From the Options menu, select Status.
2. Select the method by which you would like to search for the balancing level.
3. The balancing levels are recalculated and displayed on the table.

Search for balancing levels by a cashier/register ID

1. In the Cashier/Register field, enter a full or partial ID.
2. Click the filter  button. Matching results appear in the table.
3. Click **OK** to close the window.

Maintain the Error List

Navigate: From the main menu, select Action > Sales Audit > Store/Close Audit. The Store Day Find window opens.

Search for and retrieve a store in Edit mode. Select a store/day that contains errors.

From the Options menu, select Error List. The Error List window opens.

1. Select the error from the list.
2. Select Store Override or HQ Override check box to override the error. The definition of each error indicates whether it can be overridden at the store level or at the headquarter level.

Note: The check box that is enabled will depend on your employee setup.

Fix an error

1. Select an error from the list.
2. Click **Fix Error**. The Transaction Detail window opens.
3. Correct the error.
4. Click **OK** to save your changes and close the window.

Change the error list query

1. From the Options menu, select Status.
2. Select the method by which you would like to search for the errors.
3. The errors are required and displayed on the table.

Edit a Missing Transaction

Navigate: From the main menu, select Action > Sales Audit > Store/Close Audit. The Store Day Find window opens.

Search for and retrieve a store/day in Edit mode. From the Options menu, select Store Day Summary or Error List.

From the Options menu, select Missing Transactions. The Missing Transaction Summary window opens.

Add details to a missing transaction

1. Select a POS transaction that requires added details.
2. From the Options menu, select Add Details. The Transaction Detail window opens.
3. Enter the details of the transaction in the appropriate fields.
4. Click **OK** to save your changes and close the window.

Delete missing transactions

1. Select the missing transaction.
2. Click **Delete** to delete one transaction. Click **Delete All** to remove all missing transactions.

3. You are prompted to confirm the deletion. Click **Yes**.
4. Click **OK** to save your changes and close the window.

View Additional Store/Day Summary Information

Navigate: From the main menu, select Action > Sales Audit > Store/Close Audit. The Store Day Find window opens.

Search for and retrieve a store. Select a store/day.

From the Options menu, select Store Day Summary. The Store Day Summary window opens.

View missing transactions

1. From the Options menu, select Missing Transactions. The Missing Transactions Summary window opens.
2. Click **OK** to close the window.

View the import/export log

1. From the Options menu, select Import/Export Log. The Store Day Import and Export Log window opens.
2. Click on the Import Log tab. The Import Log opens.
3. Click on the Export Log tab. The Export Log opens.
4. Click **OK** to close the window.

View Additional Miscellaneous Totals Information

Navigate: From the main menu, select Action > Sales Audit > Store/Close Audit. The Store Day Find window opens.

Search for and retrieve a store/day in View mode.

From the Options menu, select Store Day Summary, Cashier/Register Summary, or Error List.

From the Options menu, select Miscellaneous Totals. The Miscellaneous Totals window opens.

View totals export information

1. From the Options menu, select Exports. The Totals Export window appears.
2. Click **OK** to close the window.

View the combined totals detail

1. Select a record.
2. Click **Comb Total Detail**. The Combined Total Detail window opens.
3. Click **OK** to close the window.

View audit trail information

1. From the Options menu, select Audit Trail. The Sales Audit Totals Audit Trail window appears.
2. Click **OK** to close the window.

View Additional Over/Short Totals Information

Navigate: From the main menu, select Action > Sales Audit > Store/Close Audit. The Store Day Find window opens.

Search for and retrieve a store/day in View mode.

From the Options menu, select Store Day Summary, Cashier/Register Summary, or Error List.

From the Options menu, select Over/Short Totals. The Over/Short window opens.

View totals export information

1. From the Options menu, select Exports.
 - **Select Accounted For:** The Totals Export window appears.
 - **Select Accountable For:** The Totals Export window appears.
2. Click **OK** to close the window.

View audit trail information

1. From the Options menu, select Audit Trail.
 - **Select Accounted For:** The Sales Audit Totals Audit Trail window appears.
 - **Select Accountable For:** The Sales Audit Totals Audit Trail window appears.
2. Click **OK** to close the window.

View the details of the totals

1. Select a record.
2. Click **Details**. The Combined Total Detail window opens.
3. Click **OK** to close the window.

View Additional Store Information

Navigate: From the main menu, select Action > Organizational Hierarchy. The Organization Hierarchy Main Form window opens.

1. Select Store on the tree structure. The stores appear in the table.
2. Select a store and click **View**. The Store Maintenance window opens.

The screenshot shows the 'Store Maintenance Window' for a 'Company' store type. The window contains the following fields and options:

Location Close Window

- **Geocodes.** The Geocodes window opens.

Geocodes Window

4. Click **OK** to close the windows.

View Additional Error List Information

Navigate: From the main menu, select Action > Sales Audit > Store/Close Audit. The Store Day Find window opens.

Search for and retrieve a store in Edit mode. Select a store/day that contains errors.

From the Options menu, select Error List. The Error List window is displayed.

View error details

1. Select an error from the list.
2. Click **Detail**. The Error Detail window opens.
3. Click **OK** to close the window.

View systems impacted by an error

1. Select an error from the list.
2. From the Options menu, select System Impact. The System Impact window opens.
3. Click **OK** to close the window.

Edit a Miscellaneous Total

Navigate: From the main menu, select Action > Sales Audit > Store/Close Audit. The Store Day Find window opens.

Search for and retrieve a store in Edit mode. Select a store/day.

From the Options menu, select Store Day Summary, Cashier Summary, or Error List.

From the Options menu, select Miscellaneous Totals. The Miscellaneous Totals window opens.

- Edit the totals in the enabled column as necessary.

Note: The Store Reported column displays total updates from the store. The HQ Reported column displays total updates from the corporate office.

Add a comment to a record

1. Select a record.
2. Click **Comments**. The Comments window opens.
3. Enter your comments.
4. Click **OK** to save your changes and close the window.

Change the query used to calculate the totals

1. To change the balancing level query, from the Options menu, select Status.
2. Select the method by which you would like to search for totals.
3. The totals are recalculated and displayed on the table.

View the error associated with the total

1. Select a record.
2. Click **Errors**. The Error List window opens.
3. Click **OK** to close the window.

Bank Store Relationship Window [sbnkstr]

The Bank/Store Relationship window is used to enter and maintain the store/bank relationships and bank attributes. The bank attributes are exported to external ACH (Automated Clearinghouse) and UAR (Universal Account Reconciliation) systems.

Balancing Level Summary Window [sablsumm]

The Balance Level Summary window allows you to view transaction totals at the balancing level you define for the store day.

If your Balance Level Indicator in the Sales Audit System Options window is set to Cashier, all cashiers working at that store on that business date will be displayed on this window. If this indicator is set to Register, all registers on which transactions were rung for that store/day appear.

Combined Total Detail Window [sacombtl]

The Combined Total Detail window is used to view the component totals that comprise a given combined total.

Comments Window [sacommnt]

The Comments window is used to enter or view comments about the store day status from the Store Day Summary window.

Enter Store/Day Comments

Navigate: From the main menu, select Action > Sales Audit > Store/Close Audit. The Store Day Find window opens.

Search for and retrieve a store in Edit mode. Select a store/day.

From the Options menu, select Store Day Summary. The Store Day Summary window opens.

1. Click the comments  button. The Comments window opens.
2. Click **Add**.
3. On the next available line, enter a comment about the store day.
4. Click **OK** to save your changes and close the window.

Audit Trail

Audit Trail Overview

The Audit Trail module allows you to view changes made to the store/day and gives you an overview of item and tender transactions that occurred for a store/day.

Audit trails allow you to view the revisions made to a transaction or a total. Summaries allow you to view the transactions that occurred on a store/day.

Business process

After modifying the information for a store/day, you may view the information through audit trails or summaries. After you view the summaries, you may return to the Transaction Maintenance area to update any outstanding issues you may have found while reviewing the store/day.

Reports

There are no reports directly associated with transaction audit trail or sales audit totals functionality in Sales Audit.

System administration

There are no system administrative functions directly related to transaction audit trail or sales audit totals functionality in Sales Audit.

Create an Audit Trail

Navigate: From the main menu, select Control > System > Audit Trail > New. The Audit Trail Field Selection window opens.

Audit Fields Window

6. In the Fields to be Audited field, enter the name of the field, or click the LOV  button and select the field.
7. Click **OK** to save your changes and close the window.

Maintain an Import/Export Data File for a Store

Navigate: From the main menu, select Action > Organizational Hierarchy. The Organizational Hierarchy main window opens.

Select Store on the tree structure. The stores appear in the table.

Select a store and click **Edit**. The Store Maintenance window opens.

From the Options menu, select Store Data. The Store Data window opens.

Store Data Window

Add an import/export data file for a store

1. Click **Add**.
2. From the Import/Export field, select either Import or Export.
 - **If you selected Import:** In the Import field, enter an import ID, or click the LOV  button and select an import.
 - **If you selected Export:** In the Export field, enter an export ID, or click the LOV  button and select an export.
3. Click **OK** to save your changes and close the window.

Delete an import/export data file for a store

1. Select the data to be deleted.
2. Click **Delete**. You are prompted to delete the record.
3. Click **Yes**.
4. Click **OK** to save your changes and close the window.

View the Audit Trail for a Contract

Navigate: From the main menu, select Ordering > Contracts. The Contract Search window opens.

Search for and retrieve a contract in View mode. The Contract Header window opens.

From the Options menu, select Dates. The Contract Header Dates window opens.

Contract Header - Dates (cntrhead)

Raised By	<input type="text"/>	Raised Date	<input type="text"/>
Submitted By	<input type="text"/>	Submitted Date	<input type="text"/>

3. Click **OK** to close the window.

View the Audit Trail for a Tax Code Associated with an Item

Navigate: Search for and retrieve an item in View mode. The Item Maintenance window opens.

Select the Apply Tax Codes option. The Item Tax Codes window opens.

**Item Tax Codes Window**

1. Select a tax code on the table.
2. Click **Audit**. The Audit window opens.

Audit Window

3. Click **OK** to close the window.

View the Audit Trail for an Item Associated with a Tax Code

Navigate: From the main menu, select Control > Sales Tax > Tax Rate Maintenance > View. The Tax Hierarchy window opens.

Tax Hierarchy Window

1. On the Tax Jurisdictions tab, select a tax jurisdiction.
2. Click on the Tax Codes & Rates tab.
3. Select a tax type in the tax type table.
4. Click **Item/Geocode**. The Tax Codes Form window opens.

Transaction Audit Trail Find Window

Note: You can view the default, saved, custom, or reference information for the revisions. Select the appropriate command from the View menu.

1. Select a total from the table.
2. To view the details of a revised transaction:
 - a. Select the revision record.
 - b. Click **Revision Details**. The details appear on the tabs.
 - Click on the Items tab for item details.
 - Click on the Tender tab for tender details.
 - Click on the Tax tab for tax details.
 - Click on the Export tab for export details.
 - Click on the Employees tab for employee details.
 - Click on the Paid Out Details tab for details about vendor payments.
3. To view all revisions at a level of detail:
 - **Item level:** On the Items tab, select an item and click **Item Rev's**. The Item Revision window opens.

- **Tax level:** On the Tax tab, select a tax and click **Tax Rev.** The Tax Revisions window opens.

**Tax Revisions Window**

- **Export level:** On the Export tab, click **Export Rev.** The Export Revision History window opens.

**Export Revision History Window**

4. Click **OK** to close the window.

Transaction Audit Trail Window [satraudt]

The Transaction Audit Trail window allows you to view the revisions made to a transaction and the auditors responsible for the revisions. After selecting a revision, you can view the detailed information associated with the revision. You can also view revision detail information for records at the item, tender, tax, export, employee and paid out level.

You can also customize the Transaction Audit Trail view menu.

The Transaction Audit Trail window has six tabs:

- Items

- Tender
- Tax
- Export
- Employees
- Paid Out Details

View the Totals Audit Trail

Navigate: From the main menu, select Action > Sales Audit > Additional Operations > Audit Trail > Total Audit Trail.

Search for and retrieve a totals audit trail. The Totals Audit Trail Find window opens.

Select a total from the table. Click **OK**. The Sales Audit Totals Audit Trail window opens.

Totals Audit Trail Find Window

Note: You can also reach the Sales Audit Totals Audit Trail window via the Over/Short and the Miscellaneous Totals window.

1. To display the Total Value Revision Error window, click the error flag, which opens as a red exclamation point beside any total that has an error for that revision.
2. From the Options menu, select Exported Revisions. The Exported Revision window opens.

Exported Revision Window

3. Click **OK** to close the windows.

Search for a Totals Audit Trail

Navigate: From the main menu, select Action > Sales Audit > Additional Operations > Audit Trail > Totals Audit Trail. The Totals Audit Trail Find window opens.

Totals Audit Trail Find Window

1. In the Chain field, enter the chain number, or click the LOV  button and select a chain.

Note: If a default chain was specified in the System Options window, a default chain will be displayed in the Chain field.

2. Enter additional criteria to make the search more restrictive.
3. Click **Search**. The Totals Audit Trail Find window opens.
4. Select a total.
5. Click **OK** to close the window.

Note: You can also access the Sales Audit Totals Audit Trail window via the Options menu on the Over/Short and Miscellaneous Totals window.

Search for a Transaction Audit Trail

Navigate: From the main menu, select Action > Sales Audit > Additional Operations > Audit Trail > Transaction Audit Trail. The Transaction Audit Trail Find window opens.

Transaction Audit Trail Find Window

1. In the Chain field, enter the ID of the chain, or click the LOV  button and select the chain.

Note: If a default chain was specified in the System Options window, a default chain will be displayed in the Chain field.

2. Enter additional search criteria as desired to make the search more restrictive.
3. Click **Search**. The Transaction Audit Trail Find window displays the transaction records that match the search criteria in a table.

Note: You can sort the transactions by transaction number or by transaction date and time by clicking the sort buttons.

4. Select a transaction.
5. Click **OK** to close the window.

Search for an Item Summary

Navigate: From the RMS main menu, select Action > Sales Audit > Additional Operations > Summary > Item Summary > Edit. The Sales Audit Item Summary window opens.

Sales Audit Item Summary Window

1. In the Business Day field, enter a business day, or click the calendar  button and select the date.
2. In the Store field, enter a store number, or click the LOV  button and select a store.
3. In the Item Type field, select an item type.
4. In the Item field, enter an item number or click the LOV  button and select the item.
5. Click **Search**. The table displays the items that match the search criteria.
6. Click **OK** to save your changes and close the window.

Search for Tender Summary Information

Navigate: From the main menu, select Action > Sales Audit > Additional Operations > Summary > Tender Summary. The Tender Summary window opens.

The screenshot shows the 'Tender Summary' window with the following fields and controls:

- Search Criteria:** Chain, Store, Business Day, Tender Type Group (dropdown), Tender Type ID, Card Number, and Tender Amount Range (From Amount and To Amount).
- Filter By:** Tender Type Group, Tender Type ID, and Tender Amount.
- Table:** A table with columns: POS Tran. No., Tran. Type, Tender Type Group, Tender Type ID, Tender Type Desc., Tender Amount, and CC Entry Mode.
- Buttons:** Search, OK, Tran. Detail, and Refresh.

Tender Summary Window

1. In the Chain field, enter a valid chain ID, or click the LOV  and select a chain.
2. In the Store field, enter a valid store ID, or click the LOV  and select a store.
3. In the Business Day field, enter a valid business day, or click the calendar  button and select a business day.
4. To narrow your search, enter or select values in additional search fields.
5. Click **Search**. The data matching your search criteria opens.
6. To view details on any row, select the row and click **Tran Detail**.
7. Click **OK** to close the window.

Delete an Employee Record

Navigate: From the main menu, select Action > Sales Audit > Control > Setup > Employee Maintenance > Edit. The Employee Maintenance window opens.

The screenshot shows a window titled "Employee Maintenance (saempmnt)". It contains the following fields and controls:

- Employee:** A text input field with a LOV (List of Values) button to its right.
- Employee Type:** A dropdown menu with three radio button options: Manager, Cashier, and Salesperson.
- Name:** A text input field.
- Phone:** A text input field.
- E-mail:** A text input field with a speech bubble icon to its right.
- Oracle User-id:** A text input field.
- Buttons:** "Store Emp. Detail", "HQ Emp. Detail", "OK", "OK+Repeat", "Delete", and "Cancel".

Employee Maintenance Window

1. In the Employee field, enter the employee ID, or click the LOV  button and select the desired employee.
2. Click **Delete**. You are prompted to delete the record.

Note: If the employee record has pending transactions, the record cannot be deleted.

3. Click **Yes**.
4. Click **OK** to save your changes and close the window.

View the Exported Revisions

Navigate: From the main menu, select Action > Sales Audit > Additional Operations > Audit Trail > Totals Audit Trail.

Search for and retrieve a totals audit trail. The Totals Audit Trail Find window opens.

Select a total from the table.

Click **OK**. The Sales Audit Totals Audit Trail window opens.

Sales Audit Totals Audit Trail Window

1. Select a total revision.
2. From the Options menu, select Exported Revision. The Exported Revision window opens.

Exported Revision Window

3. Click **OK** to close the windows.

Transaction Maintenance

Transaction Maintenance Overview

The transaction maintenance module allows you to investigate and correct errors in the POS transactions. You can review the transactions that were flagged by the Automated Audit process.

The corporate auditor must review any errors that were not correctable and were overridden by the store. The auditor can choose to correct or override each error. For errors that are overridden, Sales Audit will set the Store/Day Audit status to Audited. The Store/Day Audit is then available for export to external systems.

Transactions may have many types of errors, which are reviewed and corrected manually. In addition, it is also possible to review and edit the data from missing transactions or transactions that have passed the Automated Audit. Invalid or missing transactions may be deleted from the system. Corrected transactions are exported to external systems by a batch program.

Business process

You can use interactive audit to:

- Correct transaction errors and edit data of individual transactions.
- Investigate and correct missing transactions by store or balancing level.
- Delete transactions that meet certain criteria.

The usual process flow for auditing is as follows:

1. At the end of the day, transactions are transmitted from the store to the head office.
2. The transmitted transactions are loaded to the database, totaled, audited, and then reviewed.
3. Any errors that are generated as part of the validation process must be either corrected or overridden by both the store employee performing the review and by a corporate auditor.
4. Reviewed data can only be viewed by the corporate auditor, until it is closed.
5. When the store employee has completed the correction process, the store/day status to Closed.
6. Once the store/day status has been changed to Closed, the data is editable by the corporate auditor, but only viewable by the store employee.
7. The data is exported.

Reports

- **Sales Audit Voucher Details:** Displays voucher information for given business day and voucher type (credit voucher, manual credit, manual imprint, gift certificate).
- **Sales Audit Flash Sales:** Displays Flash sales information.
- **Sales Audit Credit Card Summary:** Displays credit card transaction information for given card type and business day. Store and date range are optional parameters that can limit the query further.

- **Sales Audit Flash Totals:** Overview of the sales totals for a given business day, at the store level.

System administration

There are no system administration functions specifically related to interactive auditing.

Create a Sales Audit Transaction

Navigate: From the RMS main menu select Action > Sales Audit > Additional Operation > Transaction Maintenance. The Transaction Find window opens.

The screenshot shows the 'Transaction Find' window with the following fields and controls:

- Action:** A dropdown menu.
- ReSA Tran. No.:** A text input field.
- Chain:** A text input field with a magnifying glass icon.
- Store:** A text input field with a magnifying glass icon.
- Register:** A text input field.
- Cashier:** A text input field.
- Status:** A dropdown menu.
- Tran. Type:** A dropdown menu.
- Sub-Tran. Type:** A dropdown menu.
- Reason:** A text input field with a magnifying glass icon.
- Business Day Range:** Two date pickers with a 'to' separator.
- Tran. Date/Time Range:** Two date pickers with a 'to' separator.
- POS Tran. No. Range:** Two text input fields with a 'to' separator.
- Buttons:** OK, Search, Back, Refresh, and Close.

Transaction Find Window

1. Select Action > New.
2. Click **OK**. The Transaction Detail window opens.

The screenshot shows the 'Transaction Detail' window with the following fields and sections:

- Header Fields:** ReSA, Tran. No. (59000001), Chain, Business Day, POS Tran. No. (0), Status (Present), Store, Tran. Type, Balance, Value (0.00), Tran. Date/Time, Sub-Tran. Type, Reason Code, Currency, Transaction Uploaded from POS?, Transaction Reference Info Exists.
- Transaction Level Customer Order Attribs:** Banner Id, Customer Order No, Customer Order Date.
- Navigation Tabs:** Items, Tender, Tax, Customer, Exported, Employees, Paid Out Details.
- Table:** A table with columns: Item Type, Item, Description, Unit Retail, Selling UOM, Qty., UOM Qty., Item Status, Total Discount, Total Retail, Catch Vt., Drop Ship, Price Override?, Disc., Ref.
- Buttons:** Add, Item Detail, Voucher Detail, Return Reason, Price Override, Disc. Detail, Item Ref., Cust Ord Attr, Delete, OK, Comments, Previous, OK+Next, Errors, Reference, Audit Trail, Refresh Errors, Refresh, Cancel.

Transaction Detail Window

3. In the Chain field, enter a chain number, or click the LOV  button and select a chain.
4. In the Business Day field, enter a date, or click the calendar  button and select a date.
5. In the Tran Date/Time field, enter the date and time the transaction occurred.
6. In the POS Tran Number field, enter the point of sale ID where the transaction occurred.
7. In the Tran Type field, enter the type of transaction you are creating.

Note: Depending on the type of transaction you select, additional fields may be enabled. Enter the appropriate information in the enabled fields.

8. Add any of the following details to the transaction as needed:
 - Add items to a transaction
 - Add a discount to the item on a transaction
 - Add tender records to a transaction
 - Add tax information to a transaction
 - Add customer information to a transaction
 - Edit employee information on a transaction
 - Add paid out details to a transaction
9. Click **OK** to save your changes and close the window.

Maintain a Transaction

Navigate: From the main menu, select Action > Sales Audit > Additional Operations > Transaction Maintenance. The Transaction Find window is displayed.

Search for and retrieve a transaction in Edit mode. The Transaction Detail window opens.

1. On the Transaction Detail window, click on the Items tab.
2. Select an item on the table

Add item details

1. Click **Item Detail**. The Item Detail window opens.

The screenshot shows the 'Item Detail' window with the following fields and sections:

- Item Search:** Item (text field with search icon).
- Item Attributes:** Item Type, UOM, and several empty text fields.
- Standard UOM Section:** Standard UOM, Quantity, Unit Retail (text fields).
- Checkboxes:**
 - Swiped or scanned at POS?
 - Taxable at this location?
 - This item part of a drop shipment?
- Buttons:** OK.

Item Detail Window

2. Select or clear the Swiped or Scanned at POS? check box.
3. Select or clear the Taxable at this Location? check box.
4. Click **OK** to save your changes and close the window.

Add reference information for an item

1. Click **Item Ref.** The Item Reference window opens.

Item Reference Window

2. Enter references in the Reference fields as necessary.
3. Click **OK** to save your changes and close the window.

Add a return reason to an item

1. Click **Return Reason.** The Return Reason window opens.

Return Reason Window

2. In the Return Reason Code field, select the return reason code.
3. Click **OK** to save your changes and close the window.

Add customer order information to an item

1. Click **Cust Ord Attr.** The Customer Order Attributes window opens.

Customer Order Attributes Window

Note: This button is available only if the item is Direct Ship or the sale was from the warehouse to the consumer.

2. Update the fields as necessary.
3. Click **OK** to save your changes and close the window.

Add Customer Information to a Transaction

Navigate: From the main menu, select Action > Sales Audit > Additional Operations > Transaction Maintenance. The Transaction Find window is displayed.

Search for and retrieve a transaction in Edit mode. The Transaction Detail window opens.

8. In the Description field, enter a description of the customer.
9. Click **OK** to save your changes and close the window.

Add Paid Out Details to a Transaction

Navigate: From the main menu, select Action > Sales Audit > Additional Operations > Transaction Maintenance. The Transaction Find window is displayed.

Search for and retrieve a transaction in Edit mode. The Transaction Detail window opens.

The screenshot shows the 'Transaction Detail' window with the following fields and sections:

- Transaction Information:** ReSA, Tran. No. (33000001), Chain, POS Tran. No. (0), Status (Present), Business Day, Tran. Type, Balance, Store, Sub-Tran. Type, Value (0.00), Tran. Date/Time, Reason Code, Currency, Transaction Uploaded from POS?, Transaction Reference Info Exists.
- Transaction Level Customer Order Attribs:** Banner Id, Customer Order No, Customer Order Date.
- Navigation Tabs:** Items, Tender, Tax, Customer, Exported, Employees, Paid Out Details.
- Table:** A table with columns: Item Type, Item, Description, Unit Retail, Selling UOM, Qty., UOM Qty., Item Status, Total Discount, Total Retail, Catch Wt., Drop Ship, Price Over ride?, Disc., Ref.
- Buttons:** Aggd, Item Detail, Voucher Detail, Return Reason, Price Override, Disc. Detail, Item Ref., Cust-Ord Attr, Delete, OK, Comments, Previous, OK+Next, Errors, Reference, Audit Trail, Refresh Errors, Refresh, Cancel.

Transaction Detail Window

1. On the Transaction Detail window, click on the Paid Out Details tab.
2. In the Vendor field, enter a vendor number, or click the LOV  button and select the vendor.
3. In the Vendor Invoice Number field, enter a vendor invoice number.
4. In the Proof of Delivery Number field, enter a proof of delivery number.
5. In the Payment Reference Number field, enter a payment reference number.
6. Click **OK** to save your changes and close the window.

Add Tax Information to a Transaction

Navigate: From the main menu, select Action > Sales Audit > Additional Operations > Transaction Maintenance. The Transaction Find window opens.

Search for and retrieve a transaction in Edit mode. The Transaction Detail window opens.

Transaction Detail Window

1. On the Transaction Detail window, click on the Tax tab.
2. Click **Add**.
3. In the Tax Type field, select the type of tax.
4. In the Amount field, enter the amount paid or returned for the type of tax.
5. To add a reference to the tax information:
 - a. Click **Reference**. The Tax Reference window opens.

Tax Reference Window

- b. Enter the appropriate information.
6. Click **OK** to save your changes and close the windows.

Add Tender Information to a Transaction

Navigate: From the main menu, select Action > Sales Audit > Additional Operations > Transaction Maintenance. The Transaction Find window opens.

Search for and retrieve a transaction in Edit mode. The Transaction Detail window opens.

Transaction Detail Window

1. On the Transaction Detail window, click on the Tender tab.
2. Click **Add**.
3. From the Tender Type Group field, select the tender type group.
4. From the Tender Type field, select the tender type, or click the LOV  button and select the tender type.
5. In the ID Number field, enter the ID number of the tender, if applicable.
6. If you selected a type of card payment in the Tender Type Group field:
 - a. Click **Card Details**. The Credit Card Details window opens.

Tender Reference Window

- b. Enter data in the Reference fields as needed.
 - c. Click **OK** to save your changes and close the window.
9. Click **OK** to save your changes and close the window.

Maintain Item Discounts for a Transaction

Navigate: From the main menu, select Action > Sales Audit > Additional Operations > Transaction Maintenance. The Transaction Find window opens.

Search and retrieve a transaction in Edit mode. The Transaction Detail window opens.

Transaction Detail Window

1. On the Transaction Detail window, click on the Items tab.
2. Click **Disc Detail**. The Discount Detail window opens.

Discount Detail Window

3. In the RMS Promo Type field, select the type of promotion or discount you are creating.
 - If you are creating a promotion, in the Promotion field, enter the promotion, or click the LOV button and select the promotion.
 - If you are creating a discount, from the Discount Type field, select the type of discount that you want to apply to the item.
4. In the Promotion Component field, edit the component of the promotion as necessary, or click the LOV button and select the promotion component.
5. In the Coupon Number field, enter the ID of the promotion or discount.
6. In the Qty field, enter the quantity for the discount.
7. In the Unit Disc Amount field, enter the amount of the discount.

3. Click **OK** to save your changes and close the window.

Delete an item from a transaction

1. Click **Delete**. You are prompted to delete the record.
2. Click **Yes**.
3. Click **OK** to save your changes and close the window.

Add a Non-Merchandise Code

Navigate: From the main menu, select Control > Setup > Non-Merchandise Codes > Edit. The Non-Merchandise Codes Maintenance window open.

Non-Merchandise Codes Maintenance Window

4. Click **Add**.
5. On the next available line, enter a unique ID in the Non-Merchandise Code field.
6. In the Description field, enter a description for the non-merchandise code.
7. When applicable, select the Service Indicator check box.
8. Click **OK** to save your changes and close the window.

ACH Maintenance

Automated Clearing House Maintenance Overview

The automated clearing house (ACH) maintenance modules allows you to declare and manage how much money has been deposited in local bank accounts. ACH maintenance allows HQ users to manage how money moves from local bank accounts to centralized bank accounts.

Business process

In the ACH maintenance module you can:

- Enter the estimated deposit for store/day
- Find the rolling average of the last 4 weeks
- Change the current day's total and the previous day's adjustments.

Reports

There are no reports pertaining to automated clearing house.

System administration

There are no system administration functions pertaining to automated clearing house.

Bank ACH Maintenance Window [sbnkach]

The Bank ACH Maintenance window allows you to view Account Clearinghouse (ACH) transactions for all bank accounts. You can add manual adjustment values to override the ACH amounts. Once the amounts go through the ACH for a particular bank account, you can no longer modify the transactions.

Create a Bank/Store Relationship

Navigate: From the main menu, select Control > Partner. The Partner Find window is displayed.

Search for and retrieve a bank partner in Edit mode. The Partner Maintenance window opens.

From the Options menu, select Stores. The Bank/Store Relationship window opens.
