1. Preface

1.1 Introduction

This Manual is designed to help you to quickly get familiar with the Security Management System (SMS) module of Oracle FLEXCUBE.

It provides an overview of the module and takes you through the various stages in setting-up and using the security features that Oracle FLEXCUBE offers.

This user manual is a supplement to the Core SMS user manual and contains only specific functionalities and information related to Oracle FCUBS Core SMS. Hence, this document should be read in conjunction with the Core SMS user manual from the perspective of completeness in flow and understanding.

Besides this User Manual, you can find answers to specific features and procedures in the Online Help, which can be invoked, by choosing Help Contents from the Help Menu of the software. You can further obtain information specific to a particular field by placing the cursor on the relevant field and striking <F1> on the keyboard.

1.2 Audience

This Manual is intended for the following User/User Roles:

<table>
<thead>
<tr>
<th>Role</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oracle FLEXCUBE Implementers</td>
<td>To set up the initial startup parameters in the individual client workstations.</td>
</tr>
<tr>
<td></td>
<td>To set up security management parameters for the Bank.</td>
</tr>
<tr>
<td>SMS Administrator for the Bank</td>
<td>To set the SMS bank parameters.</td>
</tr>
<tr>
<td></td>
<td>To identify the Branch level SMS Administrators.</td>
</tr>
<tr>
<td>SMS Administrator for the Branch</td>
<td>To create User and Role profiles for the branches of your bank.</td>
</tr>
<tr>
<td></td>
<td>Will also grant access to the various functions to the Users.</td>
</tr>
<tr>
<td>A Oracle FLEXCUBE user</td>
<td>Any user of Oracle FLEXCUBE whose activities are traced by the SMS module.</td>
</tr>
</tbody>
</table>

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

1.4 Organization

This manual is organized into the following chapters:

<table>
<thead>
<tr>
<th>Chapter</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chapter 1</td>
<td>About this Manual gives information on the intended audience. It also lists the various chapters covered in this User Manual.</td>
</tr>
</tbody>
</table>
### 1.7 Related Documents

- The Procedures User Manual
2. Security Management

2.1 Introduction

This chapter contains the following sections:

- Section 2.2, "User Limit Maintenance"
- Section 2.3, "Role Branch Limits Maintenance"
- Section 2.4, "Limits Role Maintenance"
- Section 2.5, "Alerts for Users"
- Section 2.6, "Multi-Factor Authentication"

2.2 User Limit Maintenance

This section contains the following topics:

- Section 2.2.1, "Invoking User Limit Maintenance Screen"
- Section 2.2.2, "Limits Button"
- Section 2.2.3, "Tills Button"
- Section 2.2.4, "Group Code Restriction"
- Section 2.2.5, "General Ledgers Button"

2.2.1 Invoking User Limit Maintenance Screen

You can maintain the user limit and till details in the ‘User Limit Maintenance’ screen. You can invoke this screen by typing ‘SMDLMTIL’ in the field at the top right corner of the Application toolbar and clicking on the adjoining arrow button.

User Identification

Specify the user identification code. Alternatively, you can select the user identification code from the option list. The list displays all valid values.

Name

The system displays the name of the user.
2.2.2 **Limits Button**

Click ‘Limits’ button to invoke the Limits screen.

![Limits Screen Screenshot]

**Limits**
Select the limits from the following options:
- User Limits - Select this option to maintain user limits.
- Limits Role - Select this option to maintain the limits role.
- No Limits - Select this option to place no restrictions on the user.

**Limit Currency**
Indicate the currency in which the limits (transactions amounts) will be expressed. If a user captures a transaction in a different currency, Oracle FLEXCUBE will convert the transaction amount to the Limits Currency and then perform the validations.

**Authorization Limit**
Specify the maximum amount that a user (to which the limits role is associated) is allowed to process while authorizing a transaction.

If the transaction amount that the user is attempting to authorize exceeds the authorization limit maintained for the Role, the system displays an override message. Selection of the ‘OK’ button in the message window will allow the user to continue with the authorization despite exceeding the limits. If the user selects the ‘Cancel’ button, he will not be able to continue with authorizing the transaction.

**Maximum Transaction Amount**
Specify the maximum amount that the user can enter in a single transaction.

**Role of Limits**

**Branch**
For a user, you can assign Limit Roles specific to each branch of your bank. Depending on the branch in which the user operates, the relevant Limits Role will be made applicable. You can select the branch from the option-list available.

**Limits Role**
All the Limits Roles maintained at your bank will be displayed in the option-list. You can select the Roles you wish to link to the user profile. On selection of the Role, the following details get defaulted:
Note
The role limits (input and authorization) would apply to a user with which the limits role has been associated, for operations in any of the modules listed above (that is, payment transactions, single entry journal transactions, multi-offset transactions).

2.2.3 Tills Button

You can restrict the user from using certain tills maintained at your bank. Such restrictions can be specified in the 'Tills' screen. Click 'Tills' button to invoke the 'Tills' screen.

You can either allow or disallow the user from using certain tills.

- Select the option ‘Allowed’ if you want to allow the user to manage certain tills
- Select the option 'Disallowed' to disallow the user to manage certain tills

After choosing either the ‘Allowed’ or ‘Disallowed’ option, click add icon to add a record under the ‘Tills’ list. Into each added field select the required Till Id by clicking the adjoining option list.
2.2.4 **Group Code Restriction**

You can restrict the group code for the selected Oracle FLEXCUBE user ID using 'Group Code Restriction' screen. To invoke this screen, click 'Group Code Restriction' button in 'User Maintenance' screen.

**Group Code**
Specify whether the group code is allowed or disallowed for the Oracle FLEXCUBE user ID. You can select one of the following:
- Allowed
- Disallowed

**Group Code**
Specify group code which is allowed or disallowed for the Oracle FLEXCUBE user. You can select any or all of the following:
- Retail
- Corporate

**Group Description**
System describes the group code selected by the user.

User will be able to query or modify the account details only for those customers whose group code is allowed to him. If a user tries to query or modify the account of the customer whose group code is restricted for him, system will display the error message “User is restricted to query or modify the account”.

2.2.5 **General Ledgers Button**

You can restrict the user from posting entries to certain General Ledgers (GLs) maintained in Oracle FLEXCUBE. Further, you can restrict the user from posting entries to specific node
GLs and Leaf GLs. Leaf GLs maintained in the section ‘Exception Leaf GLs’ will be excluded from this restriction. Click ‘General Ledgers’ button to specify the GL restrictions.

You can either allow or disallow the user from using certain GLs. Select the node GLs that you want to restrict. If you want to allow/disallow posting to some leaf GLs from the selected node GL, specify them in the Exception Leaf GLs list.

For instance, if we have a node GL 100000000 and it has four leaf GLs 100000087, 100000088, 100000089 and 100000090 and the posting is allowed only to one of the leaf GL 100000089, then you have to select GL restriction as Disallowed and give the node GL under Node GLs and the leaf node GL 100000089 under Exceptional Leaf GLs.

Similarly, if you want to allow posting to all leaf GLs under a node GL and disallow posting to some leaf GLs, then select GL Restriction as Allowed and specify the node GL under section node GLs and the leaf GLs to be disallowed under the section Exception Leaf GLs.

### 2.3 Role Branch Limits Maintenance

This section contains the following topics:

- Section 2.3.1, "Invoking Role Branch Limits Maintenance Screen"
2.3.1 Invoking Role Branch Limits Maintenance Screen

You can maintain role branch limits in the Role Branch Limits Maintenance screen. To invoke this screen type ‘SMDRBLMT’ in the field at the top right corner of the Application toolbar and click the adjoining arrow button.

You can link a Limits Role to the User Profile. The Limits maintained for the role will be applicable to the user profile to which it is linked.

Role ID
Specify the role identification number. Alternatively you can select the role ID from the option list. The list displays all valid values.

Role Description
The system displays the role description.

Authorizer Role
Check this box to enable authorizer role.

Limit Currency
Specify the limit currency. Alternatively, you can select the currency from the option list. The limit displays all valid values.

User Limit
Specify the user specific limit.

2.4 Limits Role Maintenance

This section contains the following topics:

- Section 2.4.1, "Invoking Limits Role Maintenance"

2.4.1 Invoking Limits Role Maintenance

Oracle FLEXCUBE allows you to place restrictions on the amount specified by a user when processing a transaction. You can also restrict users with authorization rights from authorizing transactions with amounts beyond a specific limit.

To achieve this, you can define Input Limits and Transaction Authorization Limits for a user at the time of maintaining a User Profile in Oracle FLEXCUBE. The input limits and authorization limits will be made applicable to the following types of transactions.
Oracle FLEXCUBE allows you to maintain different Role Limits, which can then be linked to a user profile. The limits defined for the attached role will be applicable to the user profile to which it is linked. The Role Limits are maintained in the ‘Limits Role Maintenance’ screen. You can invoke this screen by typing ‘SMDRLMNE’ in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

Role Identification
The Id that you specify here will uniquely identify the Role Limit throughout the system. A Role Limit is distinct from the User Role, in that the Role Limit is designated for the specific purpose of enabling you to set transaction amount processing limits that you wish to impose on a user.

Description
You can specify a brief description for the Role Limit being defined.

Limits Currency
Here you will indicate the currency in which the limits (transactions amounts) will be expressed. If a user captures a transaction in a different currency, Oracle FLEXCUBE will convert the transaction amount to the Limits Currency and then perform the validations.

Note
For currency conversions, the system will use the mid-rate of the STANDARD exchange rate type maintained in your system.

Input Limit
Specify the maximum amount that a user (to which the limits role is associated) is allowed to process while entering a transaction.
If the transaction amount exceeds the input limit maintained for the Role, the system displays an override message. Selection of the ‘OK’ button in the message window will allow the user to continue despite exceeding the limits. If the user selects the ‘Cancel’ button, he will not be able to continue with transaction processing.

**Authorization Limit**
Specify the maximum amount that a user (to which the limits role is associated) is allowed to process while authorizing a transaction.

If the transaction amount that the user is attempting to authorize exceeds the authorization limit maintained for the Role, the system displays an override message. Selection of the ‘OK’ button in the message window will allow the user to continue with the authorization despite exceeding the limits. If the user selects the ‘Cancel’ button, he will not be able to continue with authorizing the transaction.

---

**Note**
The role limits (input and authorization) would apply to a user with which the limits role has been associated, for operations in any of the modules listed above (that is, payment transactions, single entry journal transactions, multi-offset transactions).
The role limits maintained in the screen ‘SMDRLMNT’ are not applicable for web branch.

2.5 **Alerts for Users**

This section contains the following topics:
- Section 2.5.1, "Defining Alerts for Users"

2.5.1 **Defining Alerts for Users**

Oracle FLEXCUBE allows you to define and send text messages to a destination user. These text messages will be displayed as an alert on the dashboard when the destination user logs in to the application. The user can then pick up the unprocessed messages and process it.

You can define the message for a destination user in the ‘User Alerts’ screen. You can invoke this screen by typing ‘SMDUSALR’ in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.
The following details are captured here:

**User Id**
Specify the id of the destination user to whom the message has to be sent.

**Sequence No**
Specify the sequence number of the message that you are defining.

**Alert Type**
Specify the alert type as I (Information).

**Message**
Specify the message that has to be sent to the destination user.

**Status**
Specify the status of the message as any of the following:
- P - Processed
- U - Unprocessed

After defining the message click ‘Exit’ button to exit from the screen.

*For more details on how the destination user can view the alert messages refer section titled ‘Unprocessed Alerts’ in the chapter ‘Getting Started with Oracle FLEXCUBE’ in ‘Procedures’ User Manual.*

### 2.6 Multi-Factor Authentication

This section contains the following topic:
- Section 2.6.1, "Logging into Oracle FLEXCUBE by Multi-Factor Authentication"
- Section 2.6.2, "Maintaining Multi-Factor Authentication Limits"
- Section 2.6.3, "Viewing Multi-Factor Authentication - Limit Maintenance Summary"

#### 2.6.1 Logging into Oracle FLEXCUBE by Multi-Factor Authentication

Multi-Factor Authentication (MFA) is an authentication mode, which provides further level of authentication apart from the regular user ID and password authentication.

After successful login validation to FLEXCUBE, the system validates whether the user is enabled for MFA as maintained at the ‘User Maintenance’ (SMDUSRDF) screen. If you are MFA enabled, you are eligible for transactions greater than MFA limit and the system displays the MFA login screen and defaults the user ID.
You can specify the following details:

**Multi-Factor Id**
The system displays the Multi-Factor authentication ID linked to the user ID.

**Multi-Factor PIN**
Specify the Multi-Factor PIN for MFA.

The system generates the MFA PIN just before the authentication, which expires in a short time. The generated MFA PIN is communicated to the user in multiple ways, such as text messages sent to the user’s mobile phone or electronic devices.

The system prompts the user to input the MFA token as a second password and validates the user’s authenticity. This process reduces the risk posed by using only user ID or password mechanism. If the MFA pin is validated successfully, the user’s session is marked as ‘Multi-Factor Authenticated’. Else, it is marked as ‘Multi-Factor Not Authenticated’.

### 2.6.2 Maintaining Multi-Factor Authentication Limits

You can capture Multi-Factor Authentication (MFA) limits branch-wise and module-wise in the ‘Multi-Factor Authentication - Limit Maintenance’ screen. MFA limit indicates the limit above which MFA is required. The process of MFA can be determined by the parameters set at the individual user level. MFA limits can be used to authorize transactions above certain limit.

You can invoke this screen by typing ‘SMDMFALM’ in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.
You can specify the following details here:

**Branch Code**
Specify the branch code for MFA limit. Alternatively, you can select the branch code from the option list. The list displays all the branches in the country maintained in the system and a value ***, which indicates all branches.

**Branch Name**
The system displays the name of the branch code.

**Module Identification**
Specify the module code for MFA limit. Alternatively, you can select the module code from the option list. The list displays all the modules maintained in the system and a value ***, which indicates all modules.

**Module Name**
The system displays name of the module for the selected module code.

**Limit Currency**
Specify the currency code in which the limit amount can be specified. Alternatively, you can select the currency code from the option list. The list displays all the currencies maintained in the system.

**Input Limit**
Specify the limit amount for input.

**Authorization Limit**
Specify the authorization limit amount for authorizer.
2.6.3 Viewing Multi-Factor Authentication - Limit Maintenance Summary

You can view multi-factor authentication limit maintenance in the ‘Multi-Factor Authentication - Limit Maintenance Summary’ screen. You can invoke this screen by typing ‘SMSTMFALM’ in the field at the top right corner of the Application toolbar and clicking on the adjoining arrow button.

In the above screen, you can base your queries on any or all of the following parameters and fetch records:

- Authorization Status
- Branch Code
- Record Status
- Module Identification

Click ‘Search’ button. The system identifies all records satisfying the specified criteria and displays the following details for each one of them:

- Authorization Status
- Branch Code
- Record Status
- Module Identification
3. Associated Functions

This chapter contains the following sections:

- Section 3.1, "Current Users"
- Section 3.2, "Error Messages"
- Section 3.3, "Branch Status"

3.1 Current Users

This section contains the following topics:

- Section 3.1.1, "View Current Users"

3.1.1 View Current Users

The user of a branch can view a list of all the users logged in from the current branch or from any other the branches through the ‘Current Users’ screen.

The following details are captured here:

Branch
You are allowed to view users logged in from the current branch as well as any other branch. Select the any of the following options and click ‘Users’ button to view the current users of that branch:

- Current Branch
- All Branches

The following user details are displayed here:

- Branch – The branch from which the user has logged in
- Terminal – The terminal/system from which the user has logged in
- User Identification – The name of the user
- Start Time – The time when the user logged in
3.2 **Error Messages**

This section contains the following topics:

- Section 3.2.1, "Maintaining Error Messages"

### 3.2.1 Maintaining Error Messages

Error codes provide step by step support for maintenances and contract Input for a User. The Error codes are uploaded into the system at Software installation. However the ‘Description’ and ‘Type’ of the error can be modified from the Oracle FLEXCUBE Menu. Each Error Code can be of the following types:

- Override (O)
- Ignore / Warning (I)
- Error (E)

You can maintain error messages using the ‘Error Messages Maintenance’ screen. You invoke this screen by typing ‘CSDERMSG’ in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow.

The following details are captured here:

**Error Code**
Specify a code for the error message here.

**Language**
Specify the language code of the error message.

**Description**
Specify the description for the language code.

**Message**
Specify the error message that has to be displayed.
3.3 Branch Status

This section contains the following topics:

- Section 3.3.1, "Viewing Branch Status"

3.3.1 Viewing Branch Status

You can view the host connectivity status of various branches through the 'Branch Status' screen. You can invoke this screen by typing 'SMSBRNST' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screen is displayed as below:

You can query for records based on the following criteria:

- Branch Code
- Branch Name
- Branch Status

Click ‘Search’ button. Based on your preferences, the system identifies all records satisfying the criteria and displays the following details for every record:

- Branch Code
- Branch Name
- Branch Status
4. Reports

The chapter contains the following sections:

- Section 4.1, "Security Management System Violations Log Report"
- Section 4.2, "User Profile Report"
- Section 4.3, "Changes Report"
- Section 4.4, "Inactive Users Aging Analysis Report"
- Section 4.5, "SMS User Inactive Log Report"
- Section 4.6, "Online Performance Statistics Report"
- Section 4.7, "Role Profile Created Report"
- Section 4.8, "User Profile Report"
- Section 4.9, "User Entitlement Report"

4.1 Security Management System Violations Log Report

This section contains the following topics:

- Section 4.1.1, "Generating Security Management System Violations Log Report"
- Section 4.1.2, "Contents of the Security Management System Violations Log Report"

4.1.1 Generating Security Management System Violations Log Report

Any attempt at violating the security of the system will be reported in the Security Violations report. You can generate this report for a particular period.

To invoke the screen to generate this report, type ‘SMRPVLLG’ in the field at top right corner of the Application tool bar and click the adjoining arrow button.

The screen is as shown below:

![Security Management Violation Log Report Screen]

Indicate the following details:
**Date Range**

Indicate the date range.

**From Date**

Indicate the date from which you want to generate the violations report, using the adjoining calendar.

**To Date**

Indicate the date until which you want to generate the violations report, using the adjoining calendar.

**Time Range**

Specify the time range that should be considered for the violations report.

**Sort By**

Indicate the mode of sorting data in the report by choosing one of the following options:

- Date and Time
- User Identification

**Purge**

Check this box to indicate that the report can be purged.

Click ‘OK’ button to generate the report.

### 4.1.2 Contents of the Security Management System Violations Log Report

The contents of this report are discussed under the following heads:

**Header**

The Header carries the title of the report, information on the branch code, the ID of the user who generated the report, the date and time at which it was generated, the branch date, the modules covered in the report.

**Body of the report**

The following details are displayed in the report

<table>
<thead>
<tr>
<th>Field Name</th>
<th>Field Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>User-ID</td>
<td>The user who was involved in the security management system violation.</td>
</tr>
<tr>
<td>Start Time</td>
<td>The time at which the security management system was violated.</td>
</tr>
<tr>
<td>Message</td>
<td>The error message if any displayed by the system during validation</td>
</tr>
<tr>
<td>Function Descrip-</td>
<td>The description of the function that was executed by the user, which resulted in the violation.</td>
</tr>
<tr>
<td>tion</td>
<td></td>
</tr>
<tr>
<td>Terminal ID</td>
<td>The terminal-ID of the terminal onto which the user was logged.</td>
</tr>
</tbody>
</table>
4.2 User Profile Report

This section contains the following topics:
- Section 4.2.1, "Generating User Profile Report"
- Section 4.2.2, "Contents of the User Profile Report"

4.2.1 Generating User Profile Report

The details of all the user profiles that have been defined are available in the form of a report. The User Profile Report gives details of user profiles maintained for all or specific users. It includes:
- The functions attached to the role.
- The roles to which the user is attached.
- Amount limits for each user.
- Branches in which the user can operate.
- Currencies the user can use.
- Customers the user can deal with.
- Restrictive passwords defined for the user.

To invoke the screen to generate this report, type ‘SMDCUUSR’ in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

The screen is as shown below:
4.2.2 Contents of the User Profile Report

<table>
<thead>
<tr>
<th>Field Name</th>
<th>Field Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Branch Code and Name</td>
<td>The code allotted to the branch and the full name of the branch.</td>
</tr>
<tr>
<td>Date and Time</td>
<td>At which the report was generated.</td>
</tr>
<tr>
<td>Printed by</td>
<td>The user who has generated the report.</td>
</tr>
<tr>
<td>Spool File</td>
<td>If the report has been printed onto a spool file, the name of the spool file is given here.</td>
</tr>
<tr>
<td>Sort on</td>
<td>The criteria on which the details have been sorted.</td>
</tr>
<tr>
<td>Date Range</td>
<td>The period for which the report is generated.</td>
</tr>
<tr>
<td>User-ID</td>
<td>The ID of the user whose details are being reported.</td>
</tr>
<tr>
<td>Name</td>
<td>The name of the user whose details are being reported.</td>
</tr>
<tr>
<td>Time Level</td>
<td>The time level of the user.</td>
</tr>
<tr>
<td>Language Code</td>
<td>The language assigned to the user.</td>
</tr>
<tr>
<td>Profile Expires On</td>
<td>The date on which the user profile is due to expire.</td>
</tr>
<tr>
<td>Status</td>
<td>The status of the user - enabled, on hold or disabled.</td>
</tr>
<tr>
<td>Function-ID</td>
<td>The function allowed for the user.</td>
</tr>
<tr>
<td>Function Description</td>
<td>The description of the function.</td>
</tr>
<tr>
<td>Link with Role Definition</td>
<td>If the user has been linked to a role, the role-ID is given here.</td>
</tr>
<tr>
<td>Maximum Transaction Amount</td>
<td>The maximum amount that the user can enter in a single transaction.</td>
</tr>
<tr>
<td>Maximum Authorization Amount</td>
<td>The maximum amount that a transaction can have if it has to be authorized by this user.</td>
</tr>
<tr>
<td>Branch Code</td>
<td>The branch in which the user profile is defined.</td>
</tr>
<tr>
<td>Branch Name</td>
<td>The name of the branch in which the user has signed on.</td>
</tr>
<tr>
<td>Currency Code</td>
<td>The S.W.I.F.T code of the currency in which the user can operate.</td>
</tr>
<tr>
<td>Currency Name</td>
<td>The name of the currency in which the user can operate.</td>
</tr>
<tr>
<td>Customer Code</td>
<td>The customer whose accounts can be handled by the user.</td>
</tr>
<tr>
<td>Customer Name</td>
<td>The name of the customer whose accounts can be handled by this user.</td>
</tr>
<tr>
<td>Restrictive Passwords - User</td>
<td>The passwords defined as restrictive passwords for the user.</td>
</tr>
</tbody>
</table>

4.3 Changes Report
This section contains the following reports:

- Section 4.3.1, "Generating Change Report"
- Section 4.3.2, "Contents of the Changes Report"

### 4.3.1 Generating Change Report

This report gives details of maintenance done on the following screen:

- Static Parameters screen
- Static User Profile Details screen
- Dynamic User Profile Details screen
- Static Role Profile Details
- Static User Profile Details

You can generate this report for a particular period using the ‘Report’ screen. To invoke this screen type ‘SMRPCHLG’ in the field at top right corner of the Application tool bar and click the adjoining arrow button.

### 4.3.2 Contents of the Changes Report

The contents of this report are discussed under the following heads:

**Header**

The Header carries the title of the report, information on the branch code, the ID of the user who generated the report, the date and time at which it was generated, the branch date, the modules covered in the report.

**Body of the report**

The following details are displayed in the report:

<table>
<thead>
<tr>
<th>Field Name</th>
<th>The field that has been maintained</th>
</tr>
</thead>
<tbody>
<tr>
<td>Input by</td>
<td>The Id of the person who input the details of the transaction</td>
</tr>
<tr>
<td>Old Value</td>
<td>The value in the field before it was modified</td>
</tr>
<tr>
<td>New Value</td>
<td>The value in the field after it was modified</td>
</tr>
</tbody>
</table>
4.4 Inactive Users Aging Analysis Report

This section contains the following topics:

- Section 4.4.1, "Generating Inactive Users Aging Analysis Report"
- Section 4.4.2, "Contents of the Inactive Users Aging Analysis Report"

4.4.1 Generating Inactive Users Aging Analysis Report

This report gives details of users who have not used the system over a certain period. You should enter the period when you invoke the report. The details are sorted in ascending order of the date from which the user has not used the system.

Click ‘OK’ button if you want to generate this report. To come out of this screen without generating the report click ‘Exit’ button.

4.4.2 Contents of the Inactive Users Aging Analysis Report

<table>
<thead>
<tr>
<th>Field Name</th>
<th>Field Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>User-ID</td>
<td>The ID of the user who has not been using the system</td>
</tr>
<tr>
<td>Inactive Since</td>
<td>The date from which the user has not accessed the system</td>
</tr>
<tr>
<td>Status</td>
<td>The status of the user - enabled, disabled, hold, inactive</td>
</tr>
<tr>
<td>Inactivity Period</td>
<td>The number of days for which the user has not used the system</td>
</tr>
</tbody>
</table>

4.5 SMS User Inactive Log Report

This section contains the following topics:

- Section 4.5.1, "Generating SMS User Inactive Log Report"
- Section 4.5.2, "Contents of the Inactive Users Log Report"

4.5.1 Generating SMS User Inactive Log Report

This report gives details of users who have not used the system over a certain period. You should enter the period when you invoke the report. The details are sorted in ascending order of the date from which the user has not used the system. In the Application Browser, this report is available under the SM module.
To invoke the screen ‘Security Maintenance Inactive Users Report’ type ‘SMRPINST’ in the field at top right corner of the Application tool bar and click the adjoining arrow button.

### 4.5.2 Contents of the Inactive Users Log Report

The contents of this report are discussed under the following heads:

**Header**

The Header carries the title of the report, information on the branch code, the ID of the user who generated the report, the date and time at which it was generated, the branch date, the modules covered in the report.

**Body of the report**

The following details are displayed in the report.

<table>
<thead>
<tr>
<th>Field Name</th>
<th>Field Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>User-ID</td>
<td>The ID of the user who has not been using the system</td>
</tr>
<tr>
<td>Home Branch</td>
<td>The home branch of the bank.</td>
</tr>
<tr>
<td>Last Signed On</td>
<td>The date from which the user has not accessed the system</td>
</tr>
<tr>
<td>Inactive For (In days)</td>
<td>The number of days for which the user has not used the system</td>
</tr>
</tbody>
</table>

### 4.6 Online Performance Statistics Report

The section contains the following topics:

- Section 4.6.1, "Generating Online Performance Statistics Report"
- Section 4.6.2, "Contents of the Online Performance Statistics Report"

#### 4.6.1 Generating Online Performance Statistics Report

This report lists the maximum, minimum and average execution time for different actions across transactions in Oracle FLEXCUBE. You can generate this report using the ‘Online
Screen Performance Statistics Report' screen. To invoke this screen, type ‘SMRONSTA’ in the field at top right corner of the Application tool bar and click the adjoining arrow button.

Specify the following details:

**Function**
Specify the function ID for which performance statistics need to be collected. The adjoining option list displays all transaction related function IDs available in the system. You can select the appropriate one. You can also leave this field blank if you have mentioned the action. This will imply that the report needs to be generated for the given action across all function IDs.

**Action**
Specify the action that needs to be performed on the function ID. The adjoining option list displays all operations for the functions IDs available in the system. You can select the appropriate one. You can also leave this field blank if you have mentioned the action. This will imply that the report needs to be generated for the given function ID across all actions.

---

**Note**
Both the function and the action cannot be null at a time.

### 4.6.2 Contents of the Online Performance Statistics Report

The parameters specified while generating the report are printed at the beginning of the report. The contents of this report are discussed under the following heads:

**Header**
The Header carries the title of the report, information on the branch code, the ID of the user who generated the report, the date and time at which it was generated, the branch date, the modules covered in the report.

**Body of the report**
The following details are displayed in the report.

<table>
<thead>
<tr>
<th>Term</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Function Id</td>
<td>This indicates function action of the screen.</td>
</tr>
</tbody>
</table>
4.7 Role Profile Created Report

This section contains the following topics:

- Section 4.7.1, "Generating Role Profile Created Report"
- Section 4.7.2, "Contents of the Report"

### 4.7.1 Generating Role Profile Created Report

The Role Profile Created report provides details of the role profile created. You can invoke the screen by typing the code in the field at the top right corner of the Application tool bar and click on the adjoining arrow button.

You can specify the following parameters:

<table>
<thead>
<tr>
<th>Parameter</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Function Id</td>
<td>This indicates function ID of the screen.</td>
</tr>
<tr>
<td>Action</td>
<td>This indicates the action performed on the Function ID.</td>
</tr>
<tr>
<td>Source</td>
<td>This indicates the source of the report.</td>
</tr>
<tr>
<td>Max Response</td>
<td>This indicates the maximum execution time for the action on the Function ID.</td>
</tr>
<tr>
<td>Min Response</td>
<td>This indicates the minimum execution time for the action on the Function ID.</td>
</tr>
<tr>
<td>Average</td>
<td>This indicates the average execution time of the report to be generated.</td>
</tr>
<tr>
<td>Count</td>
<td>This indicates the execution count for the report to be generated.</td>
</tr>
<tr>
<td>Log Time</td>
<td>Time of execution.</td>
</tr>
</tbody>
</table>

You can generate the report based on the following role criteria. The following options are available for section:
• All Roles
• Selected

Role ID
Specify a valid Role ID for which you want to generate the report from the adjoining option list, if you have selected ‘Selected’.

4.7.2 Contents of the Report

The parameters specified while generating the report are printed at the beginning of the report. Other content displayed in the report is as follows:

Header
The following details are displayed in the header section:

<table>
<thead>
<tr>
<th>Field Name</th>
<th>Field Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Branch</td>
<td>Indicates Branch Code and Branch Name</td>
</tr>
<tr>
<td>Branch Date</td>
<td>Indicates Current Date of the Branch</td>
</tr>
<tr>
<td>User ID</td>
<td>Indicates User ID</td>
</tr>
<tr>
<td>Date &amp; Time</td>
<td>Indicates the Date and Time when the report was generated</td>
</tr>
<tr>
<td>Module</td>
<td>Indicates module for which report is generated.</td>
</tr>
</tbody>
</table>

Body of the Report
The following details are displayed as body of the generated report:

<table>
<thead>
<tr>
<th>Field Name</th>
<th>Field Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Role ID</td>
<td>Indicates role ID</td>
</tr>
<tr>
<td>Role Description</td>
<td>Indicates role description</td>
</tr>
<tr>
<td>Functions Allowed</td>
<td>Indicates function allowed for the role</td>
</tr>
<tr>
<td>Branches Allowed</td>
<td>Indicates branch code and name of the branches allowed</td>
</tr>
<tr>
<td>Account Class Allowed</td>
<td>Indicates the account class and description of the account classes allowed</td>
</tr>
<tr>
<td>Users Attached</td>
<td>Indicates the User ID, Name and the branch of the Users attached</td>
</tr>
</tbody>
</table>

4.8 User Profile Report

This section contains the following topics:

• Section 4.8.1, "Generating User Profile Report"
• Section 4.8.2, "Contents of the Report"
4.8.1 Generating User Profile Report

The User Profile report provides details of the user profile. You can invoke the screen by typing the code ‘SMRPUSPR’ in the field at the top right corner of the Application tool bar and click on the adjoining arrow button.

You can specify the following parameters:

**Report For**

You can generate the report based on the following user criteria. The following options are available for section:

- All Users
- Selected

**User ID**

Specify a valid User ID for which you want to generate the report from the adjoining option list, if you have selected “Selected”.

4.8.2 Contents of the Report

The parameters specified while generating the report are printed at the beginning of the report. Other content displayed in the report is as follows:

**Header**

The following details are displayed in the header section:

<table>
<thead>
<tr>
<th>Field Name</th>
<th>Field Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Branch</td>
<td>Indicates Branch Code and Branch Name</td>
</tr>
<tr>
<td>Branch Date</td>
<td>Indicates Current Date of the Branch</td>
</tr>
<tr>
<td>User ID</td>
<td>Indicates User ID</td>
</tr>
<tr>
<td>Date &amp; Time</td>
<td>Indicates the Date and Time when the report was generated</td>
</tr>
<tr>
<td>Module</td>
<td>Indicates module for which report is generated.</td>
</tr>
</tbody>
</table>
### Body of the Report

The following details are displayed as body of the generated report:

<table>
<thead>
<tr>
<th>Field Name</th>
<th>Field Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Branch</td>
<td>Indicates branch code</td>
</tr>
<tr>
<td>User ID</td>
<td>Indicates User ID</td>
</tr>
<tr>
<td>User name</td>
<td>Indicates User name</td>
</tr>
<tr>
<td>Category</td>
<td>Indicates Category</td>
</tr>
<tr>
<td>Language</td>
<td>Indicates Language</td>
</tr>
<tr>
<td>Time Level</td>
<td>Indicates Time Level</td>
</tr>
<tr>
<td>Status</td>
<td>Indicates Status</td>
</tr>
<tr>
<td>Status Changed On</td>
<td>Indicates Status Changed On</td>
</tr>
<tr>
<td>Last Signed On</td>
<td>Indicates Last Signed On</td>
</tr>
<tr>
<td>Password Changed</td>
<td>Indicates Password Changed</td>
</tr>
<tr>
<td>Cumulative Invalid Logins</td>
<td>Indicates Cumulative Invalid Logins</td>
</tr>
<tr>
<td>Start Date</td>
<td>Indicates Start Date</td>
</tr>
<tr>
<td>End Date</td>
<td>Indicates End Date</td>
</tr>
<tr>
<td>Successive Invalid Logins</td>
<td>Indicates Successive Invalid Login</td>
</tr>
<tr>
<td>Max Input Limit</td>
<td>Indicates Maximum Input Limit</td>
</tr>
<tr>
<td>Max Authorization Limit</td>
<td>Indicates Maximum Authorization Limit</td>
</tr>
<tr>
<td>Max Online Authorization Limit</td>
<td>Indicates Maximum Online Authorization Limit</td>
</tr>
<tr>
<td>Roles Attached</td>
<td>Indicates ID and description of the roles attached for the User</td>
</tr>
<tr>
<td>Functions Allowed</td>
<td>Indicates ID and description of the functions allowed for the User</td>
</tr>
<tr>
<td>Functions Disallowed</td>
<td>Indicates ID and description of the functions disallowed for the User</td>
</tr>
<tr>
<td>Branches Allowed</td>
<td>Indicates branch code and name of the branches allowed</td>
</tr>
<tr>
<td>Account Class Allowed</td>
<td>Indicates the account class and description of the account classes allowed</td>
</tr>
<tr>
<td>Branches Allowed</td>
<td>Indicates ID and Name of the tills allowed</td>
</tr>
<tr>
<td>Tills Allowed</td>
<td>Indicates the code and description of the tills allowed</td>
</tr>
<tr>
<td>Products Allowed</td>
<td>Indicates the code and description of the product allowed</td>
</tr>
</tbody>
</table>
4.9 **User Entitlement Report**

This section contains the following topics:
- Section 4.9.1, "Generating User Entitlement Report"
- Section 4.9.2, "Contents of the Report"

### 4.9.1 Generating User Entitlement Report

The User Entitlement report provides user entitlement details. You can invoke the screen by typing the code ‘SMRUSREN’ in the field at the top right corner of the Application tool bar and click on the adjoining arrow button.

You can specify the following parameters:

**User Entitlement**

You can specify the following parameters

**User Status**

You can generate the report based on the following user status criteria. The following options are available for section:
- Enabled
- Disabled

**Branch Options**

You can generate the report based on the following branch criteria. The following options are available for section:
- All
- Single

**Branch Code**

Specify a valid branch code for which you want to generate the report from the adjoining option list, if you have selected ‘Single’.
User Options

You can generate the report based on the following user criteria. The following options are available for section:

- All
- Single

User ID

Specify a valid user ID for which you want to generate the report from the adjoining option list, if you have selected ‘Single’.

4.9.2 Contents of the Report

The parameters specified while generating the report are printed at the beginning of the report. Other content displayed in the report is as follows:

Header

The following details are displayed in the header section:

<table>
<thead>
<tr>
<th>Field Name</th>
<th>Field Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Branch</td>
<td>Indicates Branch Code and Branch Name</td>
</tr>
<tr>
<td>Branch Date</td>
<td>Indicates Current Date of the Branch</td>
</tr>
<tr>
<td>User ID</td>
<td>Indicates User ID</td>
</tr>
<tr>
<td>Date &amp; Time</td>
<td>Indicates the Date and Time when the report was generated</td>
</tr>
<tr>
<td>Module</td>
<td>Indicates module for which report is generated.</td>
</tr>
</tbody>
</table>

Body of the Report

The following details are displayed as body of the generated report:

<table>
<thead>
<tr>
<th>Field Name</th>
<th>Field Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Home Branch</td>
<td>Indicates Home Branch</td>
</tr>
<tr>
<td>Branch Name</td>
<td>Indicates Branch Name</td>
</tr>
<tr>
