1. Deployment XML Operations Utility

1.1 Introduction

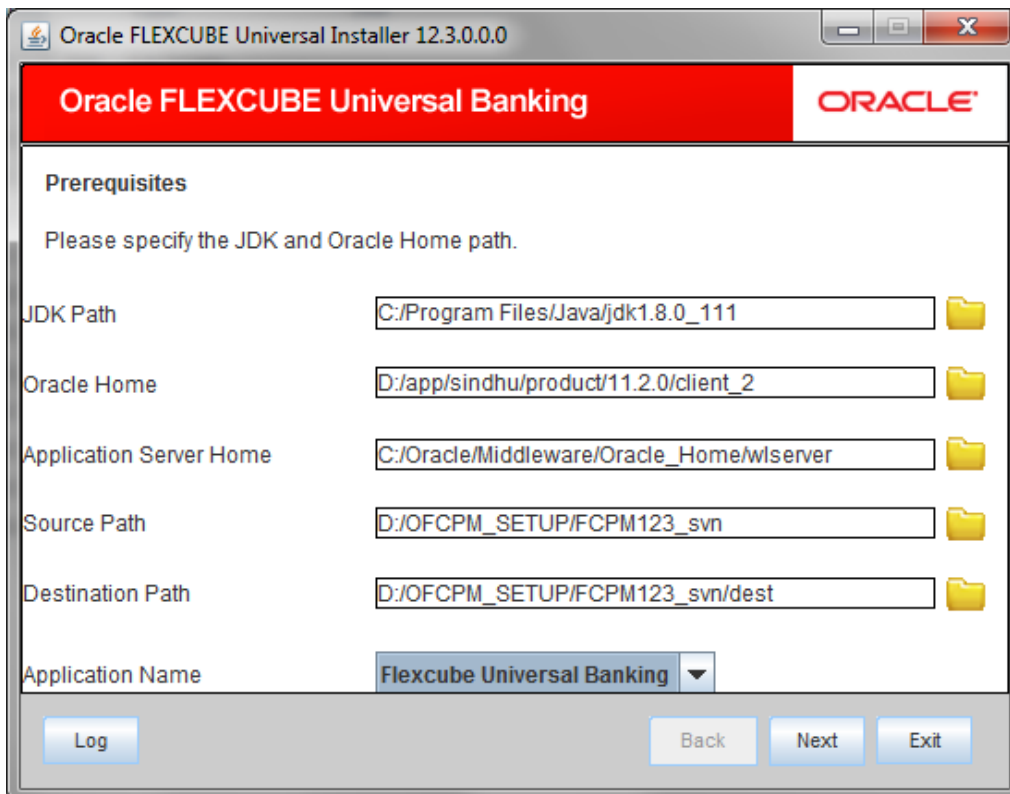

This document explains the steps to modify the deployment plan xml WebLogic using Oracle FLEXCUBE Universal Banking Installer.

Deployment plans helps to change an application's WebLogic Server configuration related environment without modifying existing deployment descriptors.

1.2 Updating deployment Plan XML

In order to modify the deployment plan xml, follow the steps given below.

1. Start Oracle FLEXCUBE Universal Banking Installer.

2. Specify the following details:

JDK Path

Specify the location of the JDK. You can use the directory button to browse to the JDK location.

Oracle Home

Specify the location of the Oracle Home installation. You can use the directory button to browse to the location.

Application Server Home

Specify the location of the application server.

In case any of the selected directories is incorrect, the Installer will display an appropriate error message. In that case, you need to correct the directory path and proceed.

Source Path

Provide the source path maintained

Destination Path

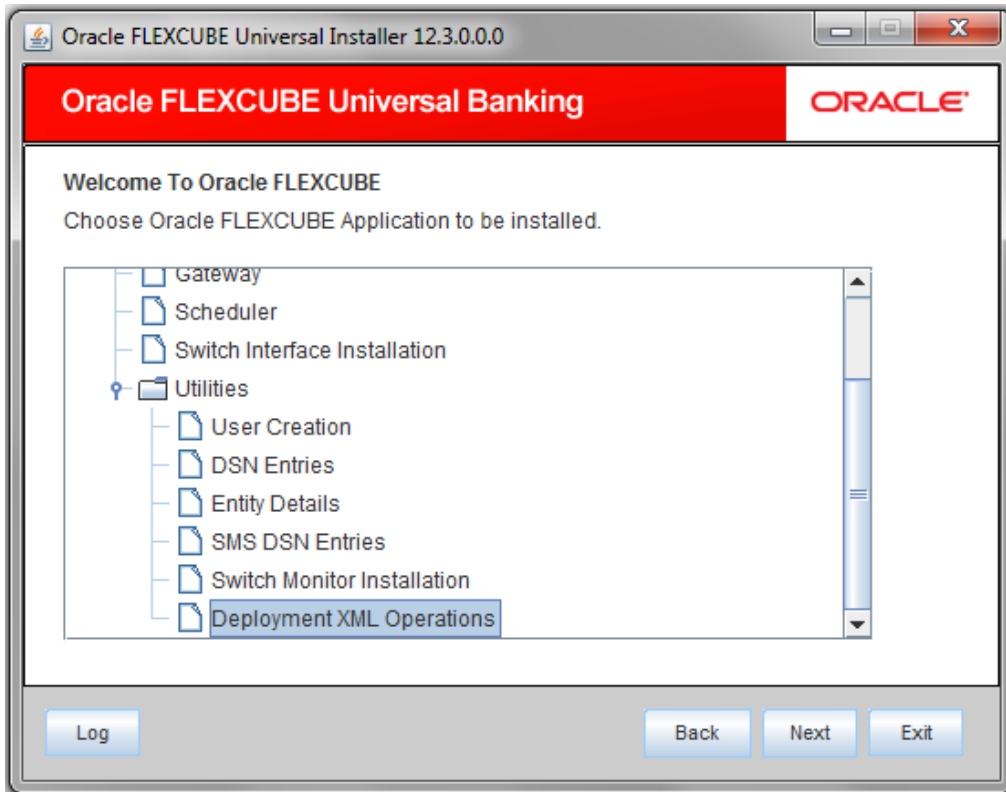

Provide the destination path maintained

Application Name

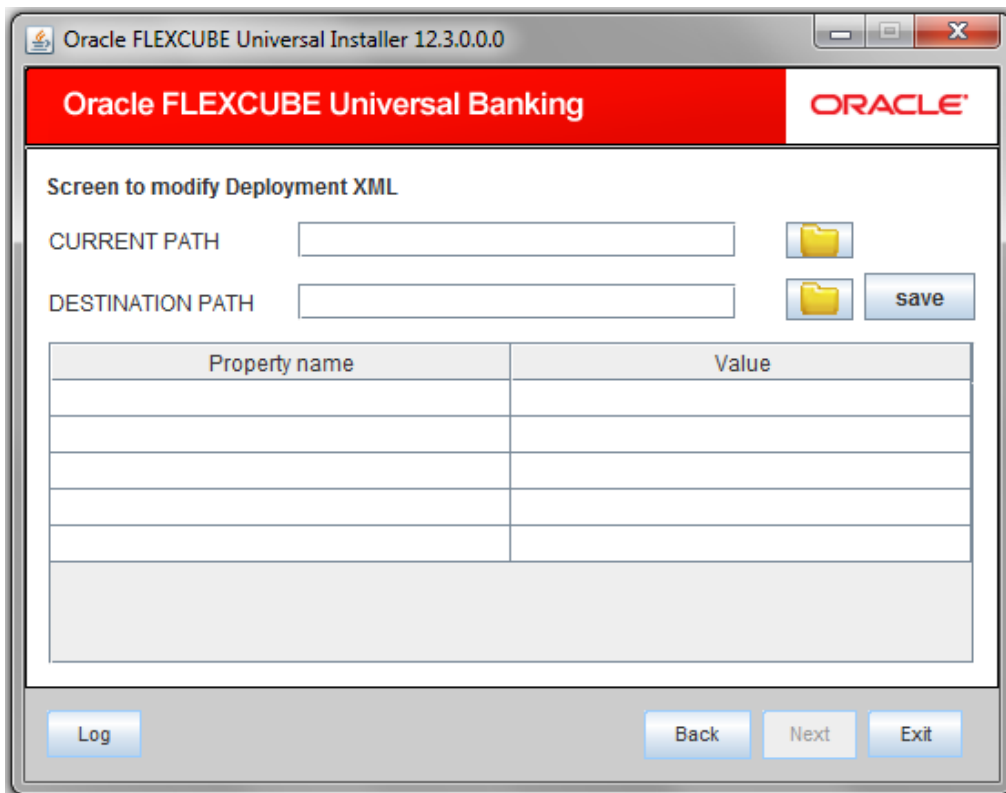

Select the application name from the drop down.

3. Click 'Next'. The following screen is displayed

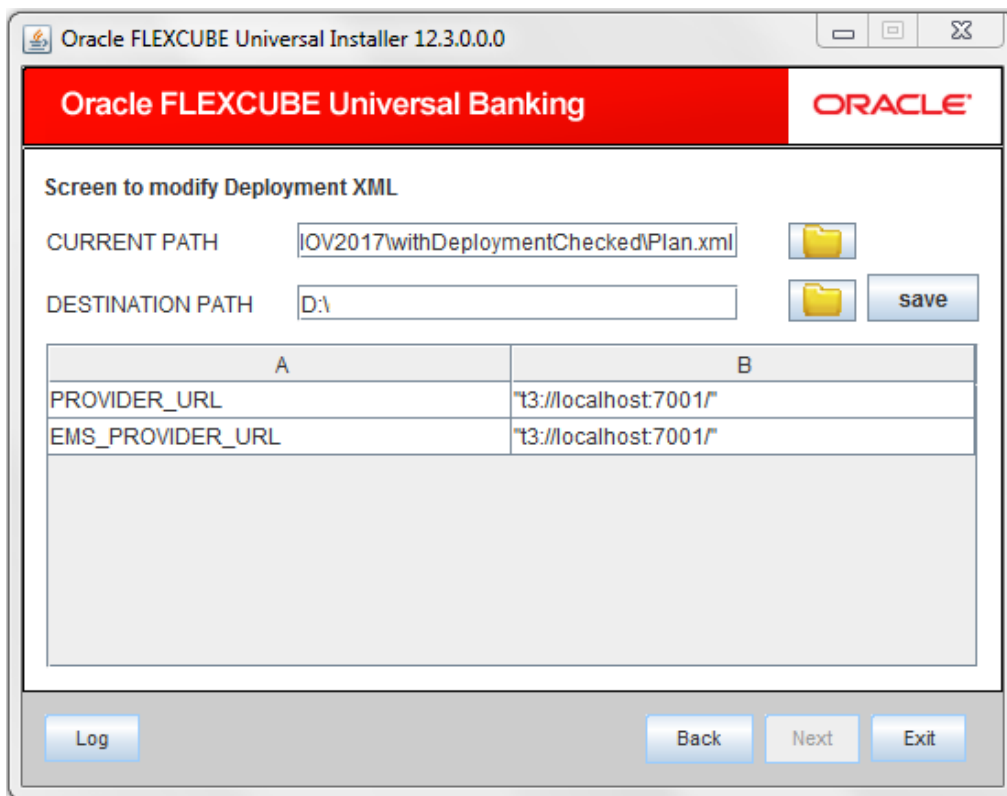

Select "Deployment XML operations" in Utilities and Click "Next".

Browse Path where existing plan.xml is saved in CURRENT PATH field.

The table lists property name with value as shown in the below Screen.

Browse path where updated xml has to be saved in DESTINATION PATH field.

Modify the required value and click Save.

On save, the updated Plan.xml will be available in the destination folder.

Updated Plan.xml can now be used to deploy along with the ear file in the Weblogic Console.
