

Oracle® Public Cloud Machine

What's New for Oracle Public Cloud Machine

Release 17.1.2

E78461-03

April 2017

What's New for Oracle Public Cloud Machine

New features are released on Oracle Public Cloud Machine on a regular intervals. To take advantage of these, the Oracle Public Cloud Machine must be patched with the latest version. If you require a new feature sooner than your regular patching schedule, please discuss with your Oracle Cloud Administration team. Below is an overview of new Cloud services, features and enhancements added recently to improve your Oracle Public Cloud Machine experience.

Topics

- [April 2017](#)
- [November 2016](#)

April 2017

Cloud Service on Oracle Public Cloud Machine	Description
Oracle Database Cloud Service	<p>Oracle Database 12c Release 2 (12.2) is now available for database deployments hosting a single-instance database and Oracle RAC database.</p> <p>The January 2017 Patch Set Update (PSU) is now available to patch existing Database Cloud Service database deployments.</p> <p>For more information on these new features and other enhancements, see What's New for Database Cloud Service.</p>
Oracle Java Cloud Service	<p>As part of this release, January 2017 Patch Set Update (PSU) is now available to patch existing Java Cloud Service database deployments. For more information on PSU and other added enhancements, see What's New for Java Cloud Service.</p>

Cloud Service on Oracle Public Cloud Machine	Description
Oracle Compute Cloud Service	After your Oracle Public Cloud Machine is patched to the new release, you must upgrade Oracle Compute Cloud Service instances that you have created. For more information on how to upgrade Oracle Compute instances, see Upgrading your Oracle Compute Cloud Service Instances in <i>Using Oracle Compute Cloud Service</i> .

November 2016

Cloud Service on Oracle Public Cloud Machine	Description
Oracle SOA Cloud Service	<p>Oracle Cloud Public Machine release 16.3.1 now supports Oracle SOA Cloud Service.</p> <p>Oracle SOA Cloud Service provides a PaaS computing platform for running Oracle SOA Suite, Oracle Managed File Transfer Cloud Service, Oracle Service Bus and Integration Analytics on the cloud machine. For more information on SOA Cloud Service, see the following links:</p> <ul style="list-style-type: none"> • Oracle SOA Cloud Service • Oracle Managed File Transfer Cloud Service
Oracle Database Cloud Service	One of the major enhancements added as part of this release is support for Oracle Real Application Clusters (RAC) database. You can now create a RAC database when you create a Database Cloud Service database deployment. For more information on RAC support and other enhancements, see What's New for Database Cloud Service.
Oracle Java Cloud Service	As part of this release, various new features and enhancements are added to Java Cloud Service. For more information, see What's New for Java Cloud Service.
Oracle Compute Cloud Service	After your Oracle Public Cloud Machine is upgraded to the new release, you must upgrade Oracle Compute Cloud Service instances that you have created. For more information on how to upgrade Oracle Compute instances, see Upgrading your Oracle Compute Cloud Service Instances in <i>Using Oracle Compute Cloud Service</i> .
