2019 PeopleSoft Customer Advisory Board (CAB) Session Agenda
May 14th, 15th, & 16th, 2019
350 Oracle Parkway, Redwood Shores, California

Time	Session	Speaker or Lead	Remarks
Tuesday, May 14th, 2019 – Meeting Room: Conference Center Lobby			
7:00 AM	Check-In for Badge Pick-up Full Breakfast (served until 9:00 AM)		
Tuesday, May 14th, 2019 – Meeting Room: Auditorium			
8:00 AM – 9:45 AM	**Opening and Overall PeopleSoft Update** Paco Aubrejuan, Senior Vice President for Oracle Development welcomes new and returning CAB members to the 2019 event. He'll cover a few meeting logistics and what members can expect over the next 3 days before sharing an overall update on PeopleSoft. That update will highlight Oracle's strategic investment initiatives ranging from user experience and analytics to new functionality and addressing customization along with deployment of PeopleSoft to Oracle Cloud Infrastructure.	Paco Aubrejuan	
	PeopleTools Update This session will give you an overview of the key PeopleTools initiatives and touch on some highlights of PeopleTools 8.57. We will also give you an advanced preview of key features we are working on for PeopleTools 8.58.	David Bain	
	Applications Roadmap Update Rebekah provides an update on the investments delivered since the last CAB, illustrates how PeopleSoft's investment strategy has advanced the PeopleSoft applications, and highlights some examples of customer adoption of key capabilities. She'll cover the future applications roadmap at a summary level, and how your organizations can influence the roadmap all year long.	Rebekah Jackson	
	Emerging Technologies PeopleSoft has been researching and actively working on ways to integrate	David Bain Deepankar Narayanan	

	Emerging Technology in the applications. We'll take a close look at Chatbots as the first set of deliverables for PeopleSoft. We'll do a deep dive into the Oracle Digital Assistant technology that PeopleSoft is using to drive the Chatbots, and talk about the deliverables, architecture and lifecycle management of the first generation deliveries. Oracle will also briefly discuss its architectural plans for leveraging Oracle Cloud services for AI/ML. The existing PeopleSoft Search Framework used to enable Elastic Search is to be used to provide data for AI/ML services. The intention is to provide customers reference AI/ML implementations and sample templates that they could use and extend as needed		
Tuesday, May 14th, 2019 – ESA/ALM Breakout Session Topics – Room 104

Wednesday, May 15th, 2019 – Conference Center Lobby			
Time	**Session**	**Speaker or Lead**	**Remarks**
7:30 AM	Check-In for Badge Pick-up Full Breakfast (served until 9:00 AM)		
Wednesday, May 15th, 2019 – Meeting Room: Auditorium			
8:00 AM – 10:30 AM	**PeopleSoft on Oracle Cloud** This session highlights the value of running PeopleSoft on Oracle Cloud Infrastructure (OCI) and how Cloud Manager offers unparalleled functionality that increases automation and efficiency. Following the overview, a panel discusses how successful PeopleSoft customers are taking advantage of OCI and why it was the right answer for them. Bring your questions for this interactive panel session!	Mark Hoernemann Panelists TBD	
	Eliminating Customizations: Configuration and Extensibility Tools and Frameworks Success with today's PeopleSoft requires the ability to not just maintain the system, but to deploy new features and capabilities to meet the demands of users and the business. To make this possible, PeopleSoft continues to invest in ways to eliminate and isolate customizations. This session will cover the key tools and frameworks available, planned investments, and common strategies customers are using to take advantage of them.	Rebekah Jackson	
	Analytics Roadmap and New Analytic Opportunities The PeopleSoft team discusses the evolution of analytics within PeopleSoft and its relationship to the user experience. You will be introduced to Kibana a new data visualization solution for PeopleSoft. You will learn what Kibana is, why it is important to PeopleSoft, and see example use cases of Kibana using PeopleSoft data.	Paco Aubrejuan Robbin Velayedam Amira Morcos or Bhupi Sondhi
