Property File Path

If the property file is internal to the application EAR, it gets displayed here on selection of EAR path. If the property file is external, specify the location. You can use the directory button to browser and select the directory.

Application Name

Application name gets displayed on selection of EAR path.

Application Context

Application context gets displayed on selection of EAR path.

Manage Resources

Check this box if resources are to be created along with deployment.

14. Click 'Next' and the following screen is displayed:

15. Specify the following details

Application Name

Not applicable for application full deployment.

Status

Not applicable for application full deployment.

Cell Name

Specify the appropriate Cell Name.

Node Name

Specify the the appropriate Node Name.

Target Type

Specify the the appropriate target type.

Server Name

Specify the the appropriate server name, if the selected target type is 'Server'.

Cluster Name

Specify the appropriate cluster name, if the selected target type is 'Cluster'.

The values fed in the above screen are not validated at the screen level as a result of a limitation and hence, please provide accurate information.

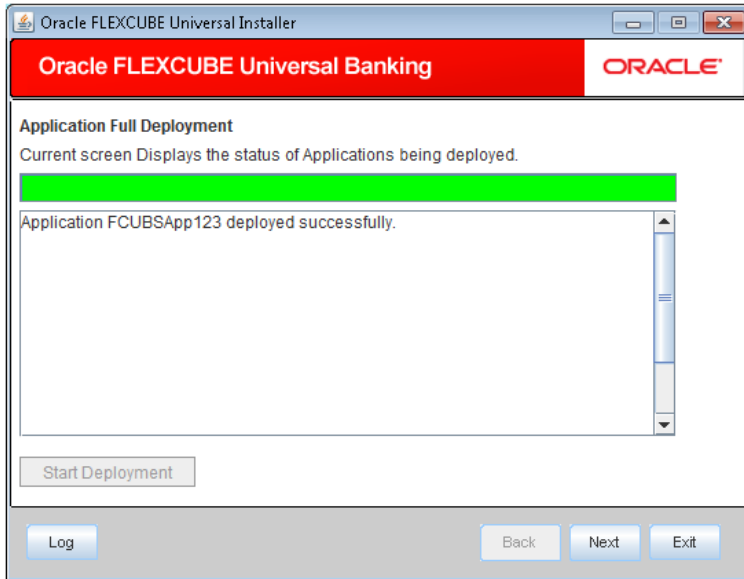

16. Click 'Next' and the following screen is displayed:

17. Click on 'Start Deployment' to begin the process of application deployment. On successful deployment, the following screen is displayed:

18. Click 'OK' and the following screen is displayed:

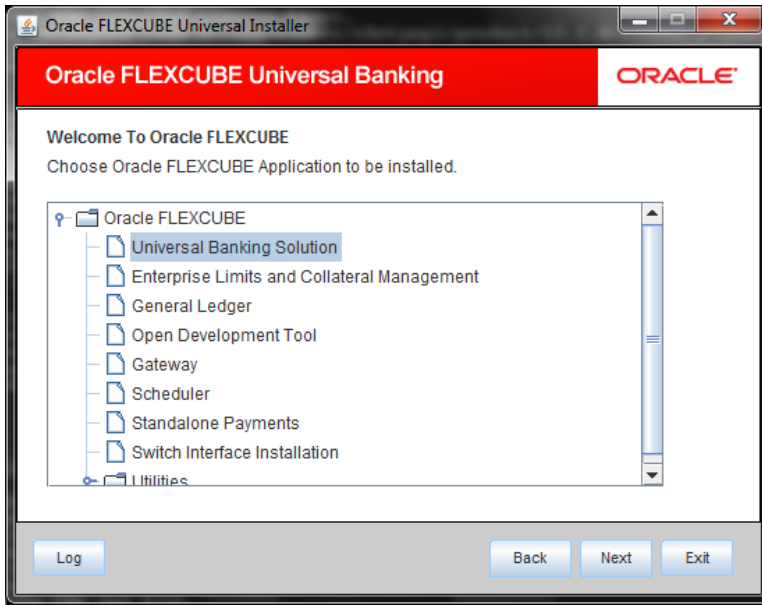

19. If the deployment is not successful, the 'Undeploy' button gets enabled.
