

Oracle® Retail Service Backbone (RSB)

Release Notes

Release 15.0.0.1

E71864-01

February 2016

Oracle Retail Service Backbone (RSB) Release 15.0.0.1 is a bundled hot fix release for RSB 15.0. RSB 15.0.0.1 includes selected defect fixes for RSB 15.0 code.

Oracle Customer Support investigates submitted issues assuming that all released updates have been applied. It is the customer's decision when to apply a new release; however, delays in applying updates can complicate the support process.

About Bundled Hot Fix Releases

Oracle Retail bundled hot fix releases are the most frequent releases to update Oracle Retail applications. These releases typically contain only defect fixes; they may also include enhancements that address application performance or other issues. Bundled hot fix releases are of smaller scope than less-frequent patch releases, and they are intended to be easier and faster for the customer to install than major patch updates.

Each bundled hot fix release contains a unique set of defect fixes or enhancements. Note that bundled hot fix releases are not cumulative; that is, defect fixes from a previous bundled hot fix release are not also included in a later bundled hot fix release.

Bundled hot fix releases must be applied in sequential order. Before you can apply a new bundled hot fix release, you must first apply all previous bundled hot fix releases since the last patch release. The Release Notes for each Oracle Retail release identify whether a release is a bundled hot fix release or a patch release.

Periodic patch releases include all defect fixes that have been released through bundled hot fix releases since the last patch release. Patch releases also include new defect fixes and enhancements that have not previously been included in any bundled hot fix release.

Applying the Bundled Hot Fix Release

Before applying the fixes included in the bundled hot fix release, be sure that:

- RSB 15.0 has been installed.

Before applying the new files over your code:

- Note whether any modules have been customized. If so, the customizations must be reapplied to the new version of the module, or the fix may need to be applied to the custom version of the code.
- Copy the original files to a different directory before you copy over them, in case you need to refer to them at a later date.

Running Scripts

Back up data before running any script, because the scripts provided *do not* preserve data. See defect reports for details.

Check with your database administrator to determine whether your database should be analyzed after a script is run. In many cases, analysis of the database is necessary to take advantage of new or modified indexes intended to improve performance of the application.

Noteworthy Defect Fixes

The following noteworthy defects are fixed in this release:

Defect	Description
22543987	As a part of release 15.0, Store Inventory Management (SIM) added container processing to outgoing store shipments. In an attempt to expose all functionality via Web services, this defect addresses the Web service for the Transfer Document processes. It includes several operations and numerous payloads, all of which begin with 'StsTsf'. The new Web service "StoreTransfer" replaces the old Web service "StoreToStoreTransfer" which is not supported by SIM in release 15.0.0.1 or later. Most of the payloads of the previous Web services are being replaced. The following payloads are no longer supported in release 15.0.0.1 or later: StsTsfBolDesc, StsTsfRcvModVo, and StsTsfShipModVo.
22537154	As a part of release 15.0, SIM added container processing to incoming supplier to store shipments. In an attempt to expose all functionality via Web services, this defect addresses the Web service for the Vendor Delivery processes. It includes several operations and numerous payloads, all of which begin with 'VdrDelv'.
22537141	As a part of release 15.0, SIM added container processing to incoming store shipments. In an attempt to attempt to expose all functionality via Web services, this defect addresses the Web service for the Transfer Delivery processes. It includes several operations and numerous payloads, all of which begin with 'TsfDelv'.
22537135	As a part of release 15.0, SIM added container processing to outgoing store shipments. In an attempt to expose all functionality via Web services, this defect addresses the Web service for the Transfer Shipment processes. It includes several operations and numerous payloads, all of which begin with 'TsfShip'.
22516377	The optional attribute replenishment quantity is currently marked as mandatory. This is now an optional field.

Installing a Bundled Hot Fix Release

For more information on installing a bundled hot fix release, see the *Oracle Retail Service Backbone Installation Guide*.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit

Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Value-Added Reseller (VAR) Language

Oracle Retail VAR Applications

The following restrictions and provisions only apply to the programs referred to in this section and licensed to you. You acknowledge that the programs may contain third party software (VAR applications) licensed to Oracle. Depending upon your product and its version number, the VAR applications may include:

- (i) the **MicroStrategy** Components developed and licensed by MicroStrategy Services Corporation (MicroStrategy) of McLean, Virginia to Oracle and imbedded in the MicroStrategy for Oracle Retail Data Warehouse and MicroStrategy for Oracle Retail Planning & Optimization applications.
- (ii) the **Wavelink** component developed and licensed by Wavelink Corporation (Wavelink) of Kirkland, Washington, to Oracle and imbedded in Oracle Retail Mobile Store Inventory Management.
- (iii) the software component known as **Access Via™** licensed by Access Via of Seattle, Washington, and imbedded in Oracle Retail Signs and Oracle Retail Labels and Tags.
- (iv) the software component known as **Adobe Flex™** licensed by Adobe Systems Incorporated of San Jose, California, and imbedded in Oracle Retail Promotion Planning & Optimization application.

You acknowledge and confirm that Oracle grants you use of only the object code of the VAR Applications. Oracle will not deliver source code to the VAR Applications to you. Notwithstanding any other term or condition of the agreement and this ordering document, you shall not cause or permit alteration of any VAR Applications. For purposes of this section, "alteration" refers to all alterations, translations, upgrades, enhancements, customizations or modifications of all or any portion of the VAR Applications including all reconfigurations, reassembly or reverse assembly, re-engineering or reverse engineering and recompilations or reverse compilations of the VAR Applications or any derivatives of the VAR Applications. You acknowledge that it shall be a breach of the agreement to utilize the relationship, and/or confidential information of the VAR Applications for purposes of competitive discovery.

The VAR Applications contain trade secrets of Oracle and Oracle's licensors and Customer shall not attempt, cause, or permit the alteration, decompilation, reverse engineering, disassembly or other reduction of the VAR Applications to a human perceivable form. Oracle reserves the right to replace, with functional equivalent software, any of the VAR Applications in future releases of the applicable program.
