

JD Edwards Roadmap

January 2024

Oracle Customers Love JD Edwards!

Premier Support is available through **AT LEAST 2034**

Rolling 10-year window

Reinforcing Oracle's Applications Unlimited commitment
to customers and continuous product innovation

Premier Support provides comprehensive maintenance
and software upgrades

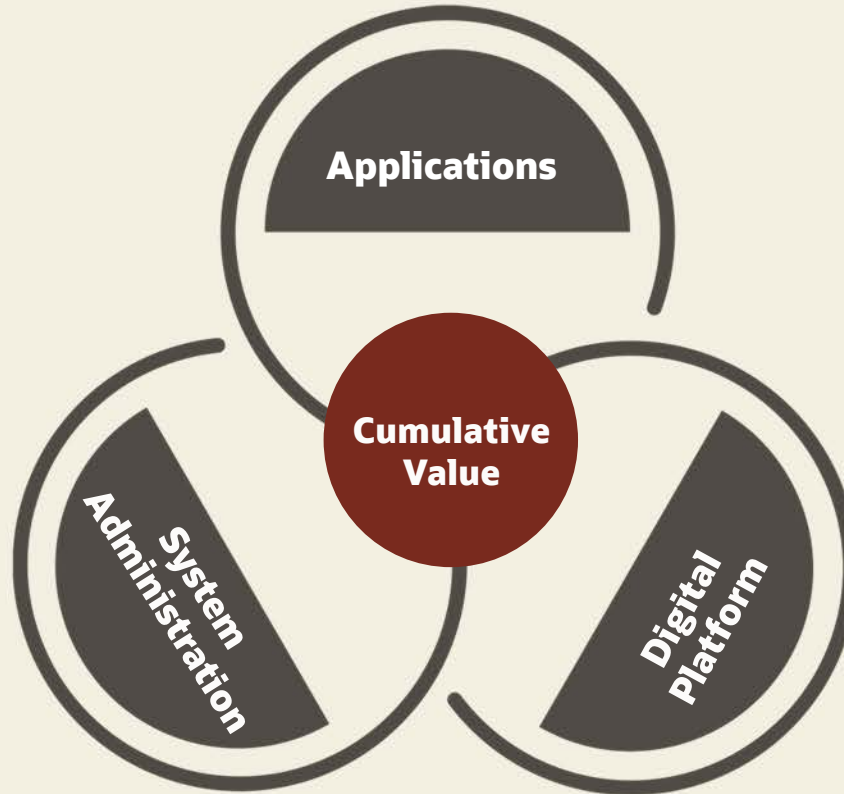

Customer Success Patterns

1. Automate your daily activities with Orchestrator
2. Optimize your business processes by leveraging the cumulative value in applications
3. Transform your operations by leveraging cloud
4. Accelerate your time to value with the JD Edwards ecosystem

JD Edwards Product Strategy

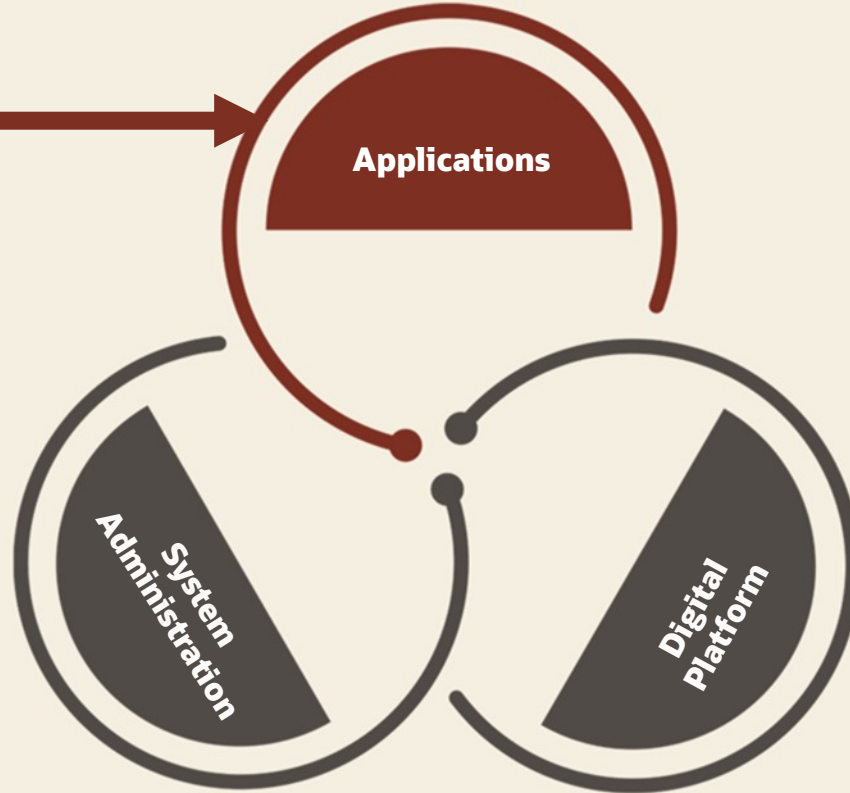

Enabling you to automate, optimize and transform

JD Edwards Product Strategy

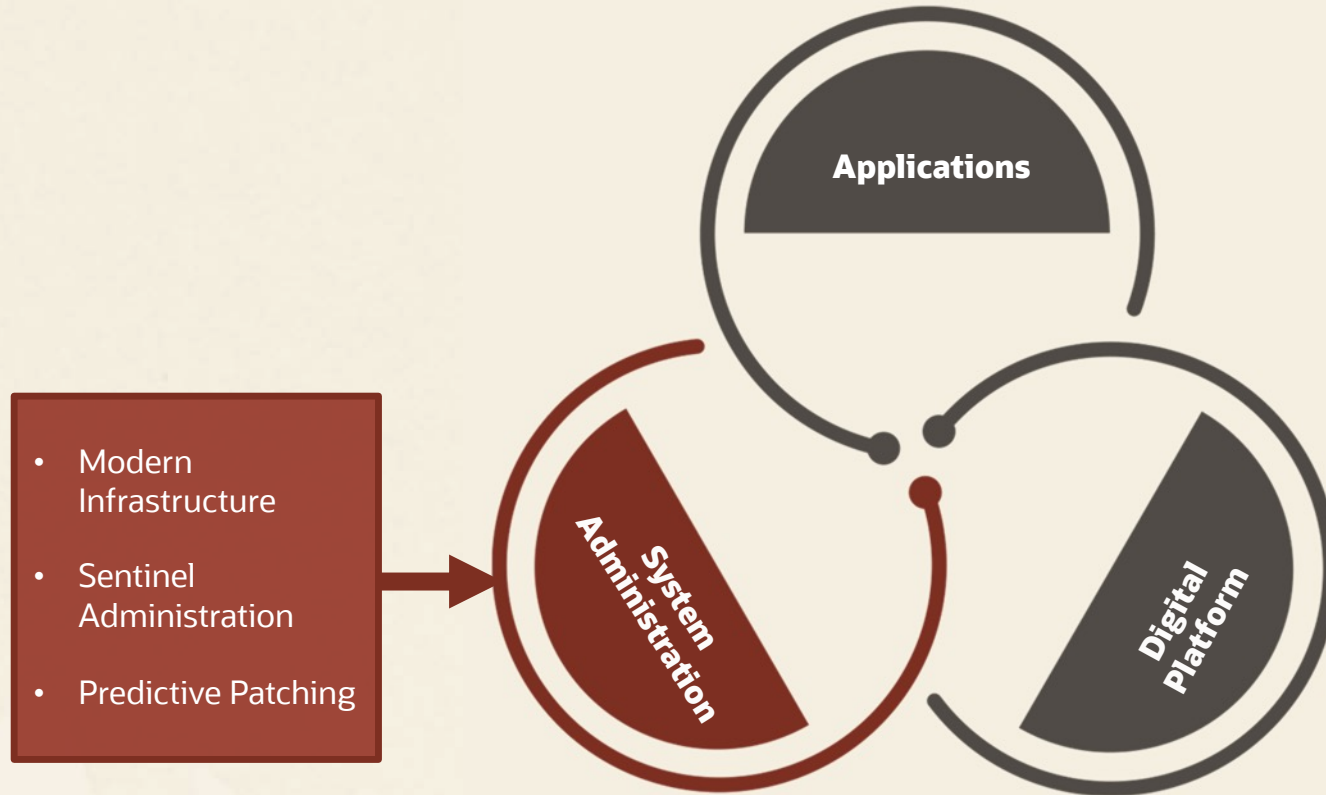

Enabling you to automate, optimize and transform

- Simplify User Experience
- Automate Business Processes
- Enrich Feature Functionality

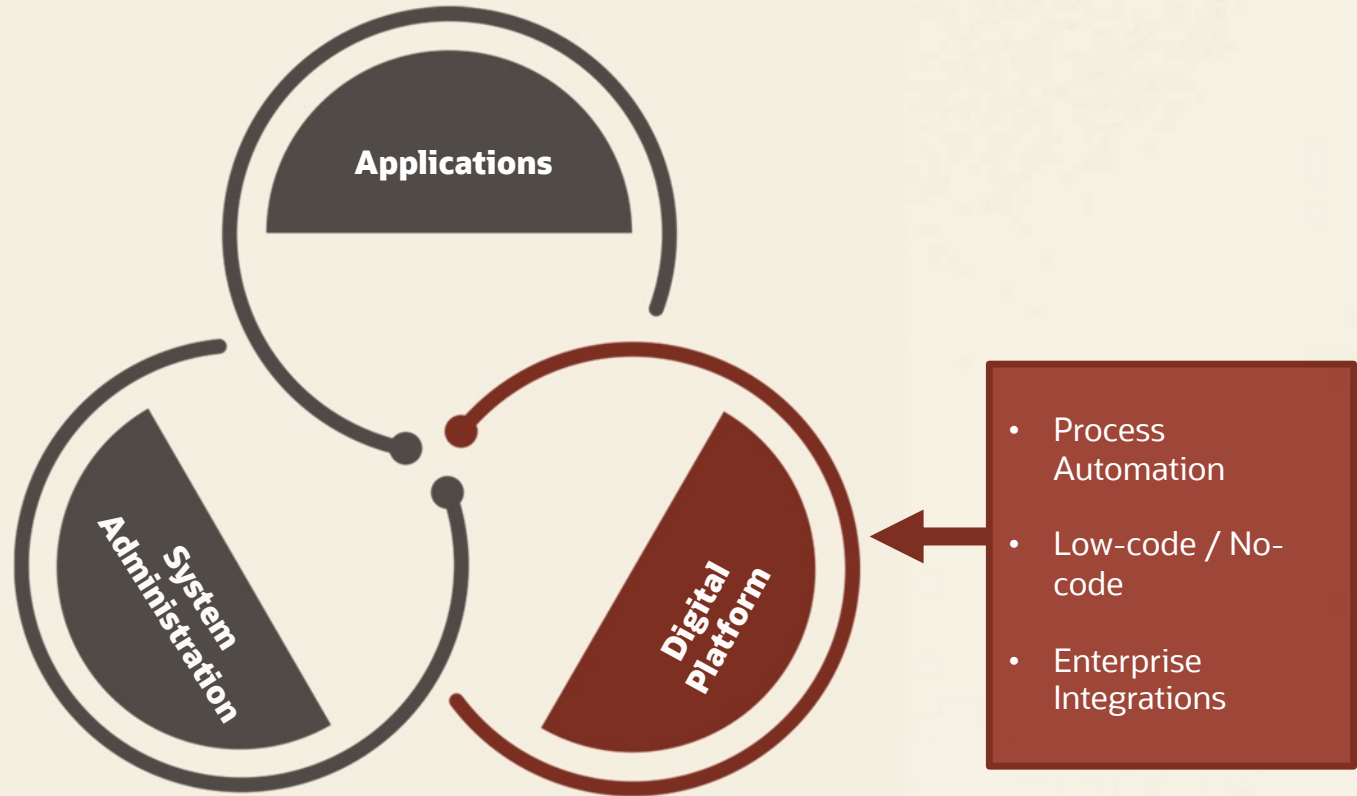

JD Edwards Product Strategy

Enabling you to automate, optimize and transform

JD Edwards Product Strategy

Enabling you to automate, optimize and transform

Optimize, Automate, Transform

Release 22 October/January/April/June

- Bank Account Masking
- Expanded Support for Joint Ventures including Foreign Cash Calls
- Simplified Update of Work Center Rates
- Simplified Update of Lot and Location During Receipt Route
- Volume Level Pricing in Procurement
- Requirements Planning Summary and Supply/Demand Console
- Improved utilization and capacity planning for warehouses
- Visual Maintenance Staff Utilization
- Real Estate Property Location Map
- License Plate Number Commitment Swap Flexibility
- Warehouse Management Support for Inventory Costing by Lot/Location
- Copy a Job to Multiple Jobs
- Current vs Non-Current Lessee Lease Balances

- Workflow Studio
- Attachments to Messages: Media Objects
- Orchestrator Support for Media Objects
- Files as Orchestration Input and Output
- Logic Extensions
- Creating External Forms from Web Client
- Launch Orchestrations from EnterpriseOne Page
- Export EnterpriseOne Search Results to Microsoft Excel
- Rich Formatting of Messages
- Easier digital transactions with QR code enabled EnterpriseOne BI Publisher reports
- Logic Extensions Diagnostics
- Logic Extensions: Business Function Support
- Offline Server Manager Monitoring and Notification
- Health Check API for a Group of Interdependent Servers
- JD Edwards Update Manager for Applications
- Certification of Oracle Autonomous Database – Shared
- Automatic Kernel Reconnection
- AIS REST APIs to Discover Objects and Execute Business Functions

Release 23 October

- Improved Data Quality in Purchase Date Revisions
- Enabling Outbound Interoperability in Purchase Receipts Inquiry
- Provision to Contribute to Social Security Cost for Services
- Option to Print Component Item Substitutes
- Processing Receipts
- Call an Orchestration from a Workflow
- Logic Extensions: Call Directly from a Form Extension
- Logic Extensions: Aggregation Support
- JD Edwards Update Manager: Apply Updates via Web Client
- Web OMW Spec Object Support
- Centralized Configurations for EnterpriseOne (HTML) Servers
- ...

Release 23 January

- On Hand Inventory Repost
- Purchase Order Acknowledgment Approval to Buyer or a Single Recipient
- Option to Exclude Scrap When Determining Work Order Operation Status
- Automatically Calculate Tax and Net Amount for Freight Adjustments
- Ability to Specify G/L Dates for Freight Audit History Application
- Text Attachment API Enhancements
- Define Inputs for a Scheduled Orchestration
- User Modifications to the Orchestrator OpenAPI Document
- Import Excel Data Containing Formulas, Functions, and Cell Formatting
- ...

Release 23 April

- New Workflow to Approve Voucher
- New Workflow to Approve Changes in Bank Account Details
- Ability to Copy Supplier Configuration in Supplier Self Service
- Kanban Status Override
- Option to Prevent Negative Completions
- Enhanced Support for Grower Interoperability Process
- Logging and Monitoring of AIS REST API Requests Nested Logic Extensions
- Rich Formatting of Text Attachments in Orchestrator Studio
- Support for Grid Data Export and Import with Cloud-Based Productivity Tools
- Form Control Extensions
- JDE Update Manager – Update Credit for ESUs
- JDE Update Manager – UBE Log from Software Updates
- ...

Release 23 June

- Automatic Update of Outside Operation Purchase Orders
- Transportation Management Usability
 - New Program to Purge Loads
 - Simplify Access to Media Objects
- DWFC – Dimensional Weight Data Capture
- Segregate partial shipment new lines
- Validate actual shipment date at Ship Confirm
- User-defined Orchestration Monitoring
- Watchlist Badges on EnterpriseOne Page Tiles
- Link Between EnterpriseOne Pages
- Logic Extension Assertions
- Optimized/Secure OCI Deployments with Flexible Load Balancer & WAF
- ...

ORACLE

JD Edwards EnterpriseOne 9.2

Release 24

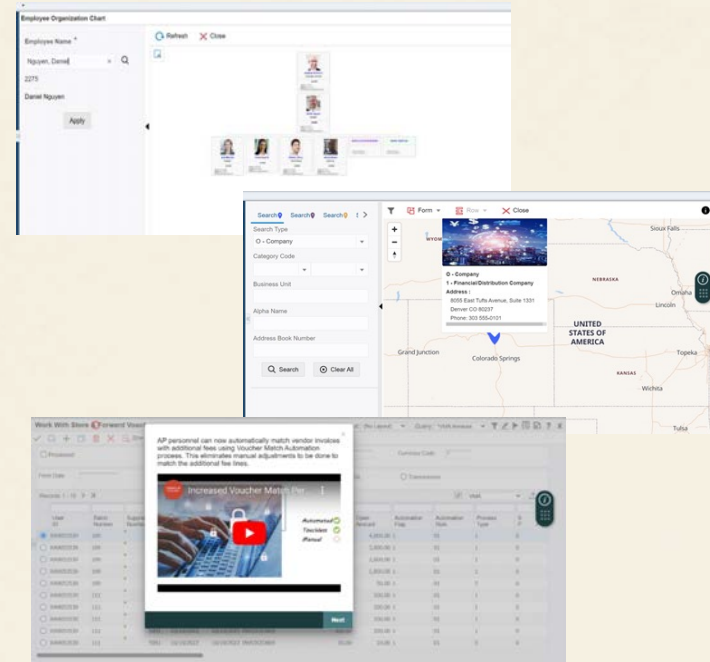

Automate. Optimize. Transform.

Applications

Release 24 Increasing Productivity

- **Simplified User Experience**
Usability Enhancements for Resource Assignments
- **Automate Business Processes**
Blend Lot Trace/Track Auditing
Automated Safety Stock
Enterprise Automation: Shipment to Dispatch
- **Enrich Feature Functionality**
Allow Inventory Location to be Put on Hold
Standalone Check Price in Procurement
Volume Base Buying Recommendations

Volume Base Buying Recommendations in Procurement

- Optimize procurement spend with best unit price
- Automate buying options
- Increase accuracy and efficiency in purchasing

Enhanced Capabilities of Inventory Management

- Allow Inventory Locations to be Put On Hold

- Increase Efficiency

- Improved Flexibility

- Automated Safety Stock Population

- Meet Fluctuating Customer Demand

- Industry Standard Calculations

Simplified Auditing for Blend Management

Trace and Track Product from Vineyard to Table

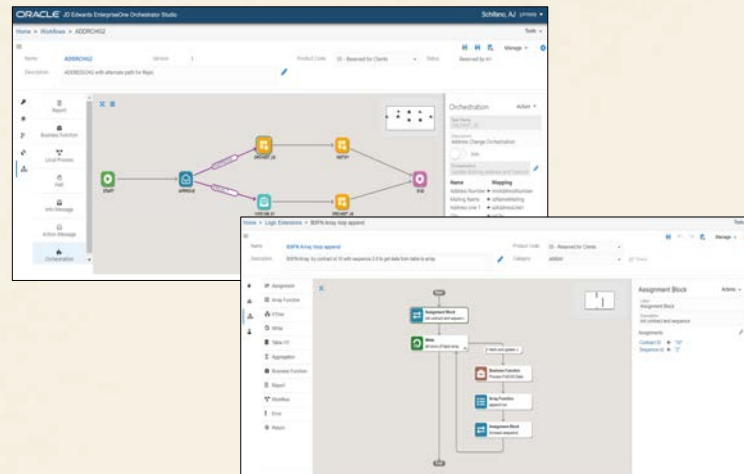

- Improve the accuracy of data captured during an audit
- Demonstrate compliance throughout the audit trail
- Timely access to audit information

Digital Platform

Release 24 Driving Customer's Digital Transformation

- Streamline Process Automation
 - Workflow Monitor
 - Task Tracking
- Remove the need for Customizations
 - Pre-built Workflow Data Structures
 - Output Stream Access for Orchestrations
 - User-defined Delimiter for Orchestrator Output to CSV

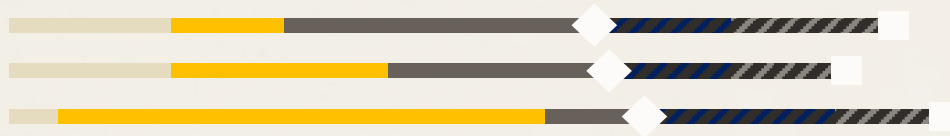

Workflow Monitor

Better visualization of your critical process flows

Planned Workflow Monitor

Workflow Monitor

Workflow	Active	Completed	Suspended 	Terminated
ADDRESSCHG / 1	1	6	0	2
CALLORCH / 2	0	2	0	2
CALLORCH / 3	0	3	0	0
CREDLIMIT / 2	4	0	1	
CREDLIMIT / 9	0	0	0	
WFCALLORCH / 1	0	22	0	

- ✓ Depicts workflow status and metrics
- ✓ Clean, modern look and feel
- ✓ Easy to scan for health and exceptions
- ✓ Continuous assurance; alerts

Task Tracking

A framework for managing and recording the status of critical tasks

- Task Tracking enables you to set due dates for tasks that are assigned to recipients through orchestration and notification messages.
- The recipients can then update the status of those tasks, for example "Approved," "In Process," or "Complete."
- The status updates are written to a table so you can monitor the progress and perform historical analysis.

Alert! Warehouse Incident Reported

Received: 09/19/2023 11:54:08

Warehouse Incident

Recommended Actions

Action	Quick Link	Response
Put warehouse location 1 .A . on Hold	Hold Location	Completed Rejected
Initiate the Incident Response Workflow	Start Workflow	Completed Rejected
Submit an Incident Report	Report an Incident	Completed Rejected

- End users can indicate the status of their tasks
- Orchestrations can update the status of tasks automatically

- Designers can turn on task tracking and define statuses

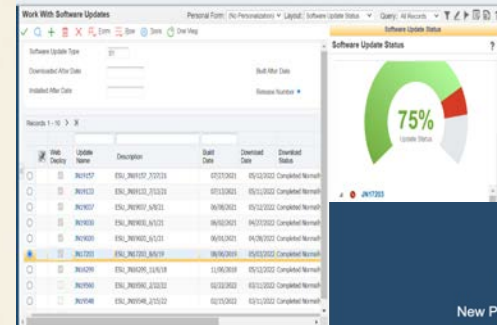

- Task status is recorded for monitoring and analysis

System Administration

Release 24 Lowering the Total Cost of Ownership

- Modern Infrastructure
 - Support for Automatic and Manual Scaling for Autonomous Database
 - Server Manager REST API for TLS Configuration automation
- Sentinel Administration
 - Server Manager - Centralized Configuration for Enterprise & Integration Servers
 - Simplified management of user logging
 - Web OMW – Object Promote to Package
- Predictive Patching
 - JDE Update Manager - Impact Analysis Dashboard
 - JDE Update Manager – Webify UDC & Glossary Compare/Merge Utility

The screenshot shows a 'Sign In' form with the following fields and buttons:

- Sign In
- User ID
- New Password
- Confirm Password
- Reset Password

The screenshot shows the 'User Defined Object Life Cycle Management - Object Management Workbench - Web' interface. It displays a table of records with columns: Advance, Input, Export, Project, Project Description, Status, Status Description, and Type. The table lists several records, including 'PROJECT1' and 'PROJECT2'.

Advance	Input	Export	Project	Project Description	Status	Status Description	Type
			PROJECT1	Project 1	21	Programming	02
			PROJECT2	Project 2	28	QA Test Review	01
			PROJECT3	Project 3	21	Programming	01
			PROJECT4	Project 4	21	Programming	01

JD Edwards Update Manager

- Batch ESU via Web Client (Deploy) of Software Updates
- Impact Analysis Dashboard
- UDC & Glossary Merge Utility

ORACLE

JD Edwards EnterpriseOne 9.2

Release 24

Automate. Optimize. Transform.

Future EnterpriseOne 9.2 Solutions

Highlights of Planned and Research Features

Planned

Planned

Research

Applications

- Enterprise Automation: Requisition to Receipt
- Enterprise Automation: Quote to Order
- Capture and Store Environmental Data for Stationary & Mobile Combustion
- Two-way Voucher Match Automation
- Ability to Generate Alphanumeric Account ID
- Production Lot/Serial Number and Location Automation
- Simplify Bid Process
- Print Held Orders

Digital Platform

- My Workflow Monitor
- Authentication and Authorization for OCI Services
- Rename Inputs to Orchestrations
- Stateful Orchestrations
- Enterprise Process Modeler
- Process Model Generator
- Workflow Monitor Process View
- My Tasks
- Orchestration Variable for Maximum Page Size

System

Administration

- Improved Automated Serialized Object Generation
- Enhanced Query Manager Support for Column Comparison
- JDE Update Manager: UDO Deployment
- UDO Extensibility Guide
- Server Manager APIs
- Optimized Full Package Build Performance
- JDE Update Manager: Web Planner
- UDO Tracking

Applications

- Time Sensitive Pricing
- Self Service Interface
- Embedded Analytics
- Digital Assistant Skills
- LPN Auto-Replenishment
- Expand Delivered Workflows
- Order Mgmt Sales Advisor
- P2P Automation
- Asset Impairment
- Reverse Ship Confirm
- Interactive Visual Components
- Enterprise Automation:
 - Fulfillment Orchestration to Invoice
 - Manufacturing
 - Customer Sentiment – Preventive Maintenance

Applications

- Capture and Store Environmental Data for Purchased Energy - Scope 2
- Enable Validation of Full vs Partial License Plates
- Exclude Scrap when Determining Operation Status
- Include Closed Jobs in Profit Rec
- PO Approval Delegation
- Work Order Over-Issues Management Option
- Multi-year Contract Amortization
- Standard AR Tax Functionality in Cash Call Invoice
- Lot Master History

Digital Platform

- Automation for Batch & Queue Management
- Batch on the Glass
- Industry-standard Workflow (BPMN 2.0)
- Jet Development Framework
- Data Structure Discovery & Selection
- Alternative UX:
 - Digital Assistants
 - Embedded Web Applications
- Enterprise Automation Workbench
- Autocreate Workflow
- Calculated Watchlists
- Conditional Launch of Orchestrations
- Automated Testing Framework

System Administration

- Patch Recommendations
- Autonomous Linux
- Batch Queue Manager
- JDE Update Manager: Application Package Metadata
- Next Gen Cloud Management and Monitoring
- Automatic Recognition of Errors and Anomalies
- Consolidated System Administration
- 2 Step Authentication
- Dev Client Simplification - Centralized Web Tier
- UDO Extensibility: Compare Tool
- Plug-in for OCI Stack Monitoring
- Parser for OCI Log Analytics

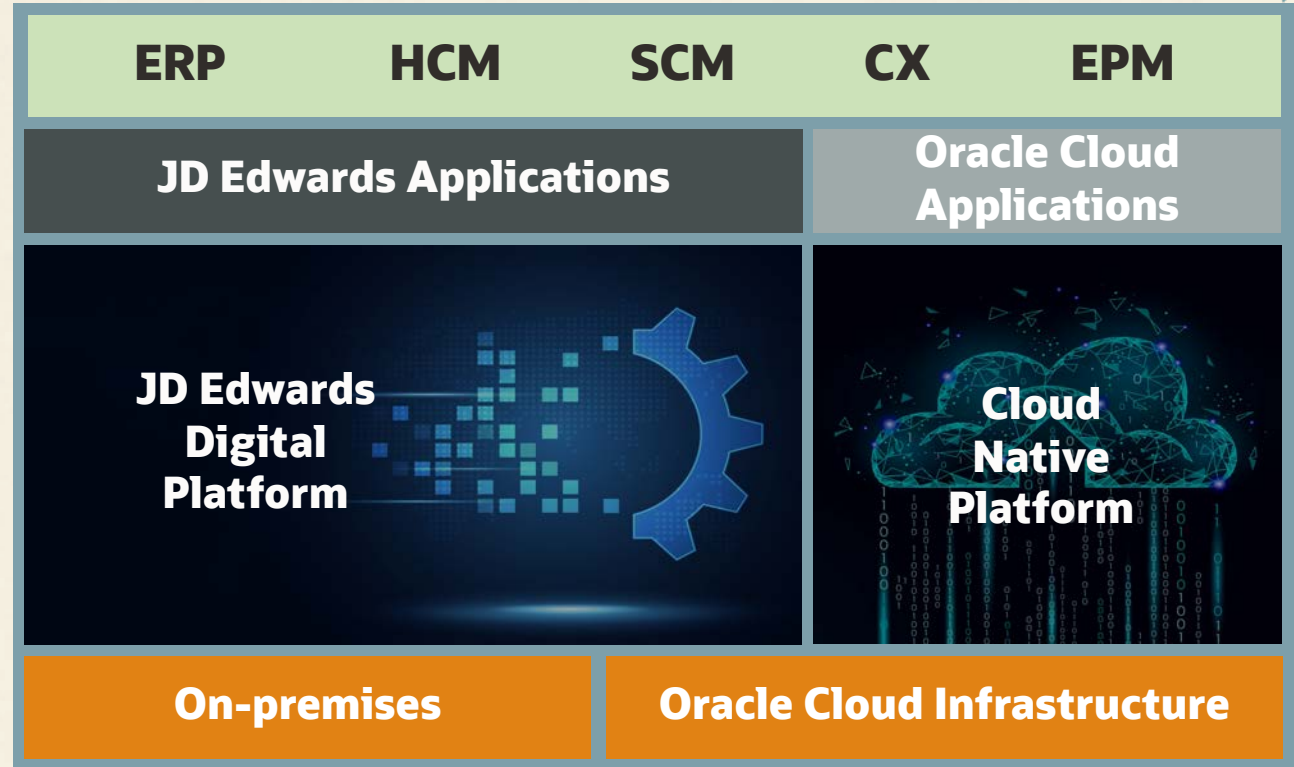

JD Edwards Solution Architecture

Beyond Release 24

Cumulative Value in Applications

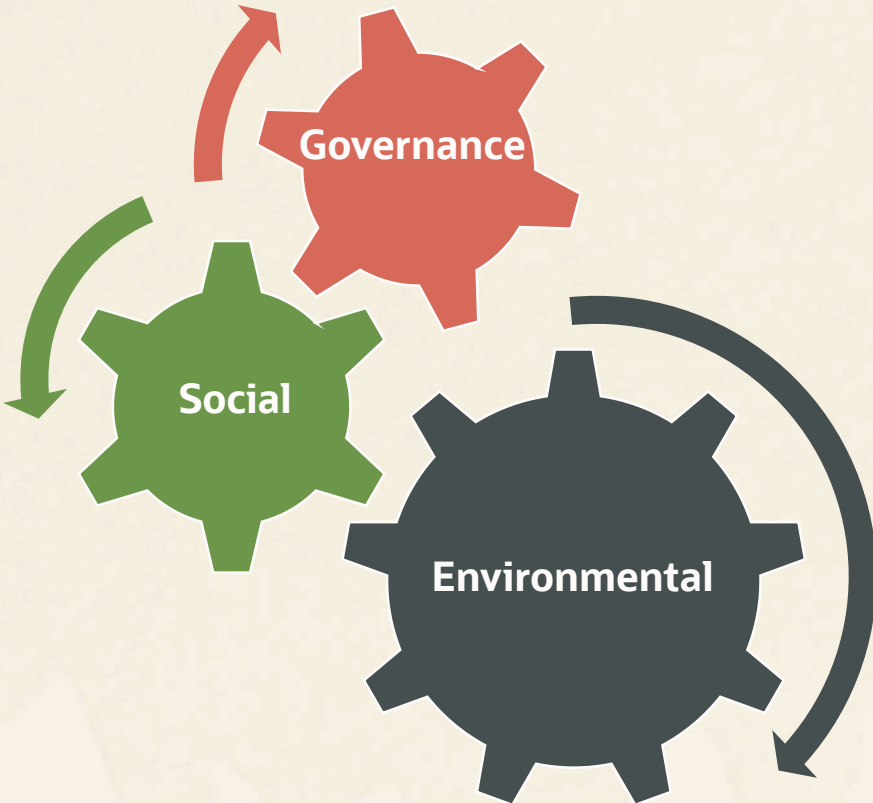

Digital Platform with Enterprise Automation and Intelligence

Cloud as an Ally

ESG - JD Edwards Environmental Framework

Research

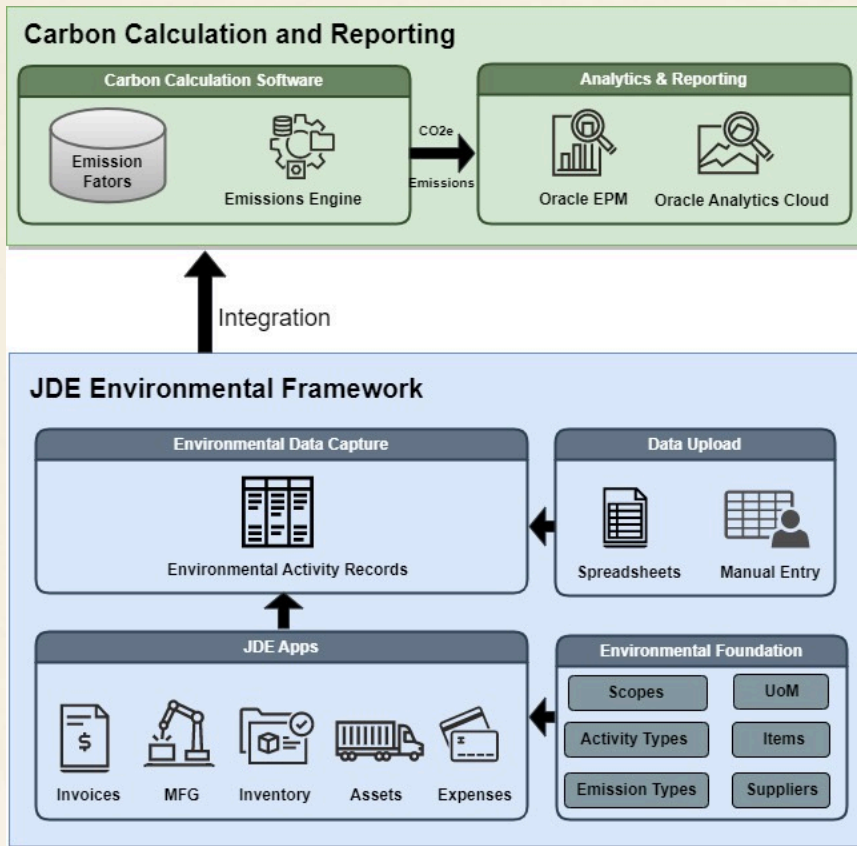

Environmental, Social and Governance (ESG) is a framework used to assess an organization's business practices and performance on various sustainability and ethical issues.

JD Edwards focus is on **Environmental**

Oracle JD Edwards innovation empowers our customers to capture environmental information across business processes that enables customers to improve the environment, transparency of operations, and financial performance.

JD Edwards Environmental Framework Solution

Research

With this solution:

- Set up reference data that are required to be captured for environmental reporting purposes.
- Capture and store environmental data from various day-to-day activities.
- Support manual entry and import of environmental records from other sources.
- Activity records is source of truth of environmental data.
- Export the environmental activity record to perform carbon calculation and reporting.

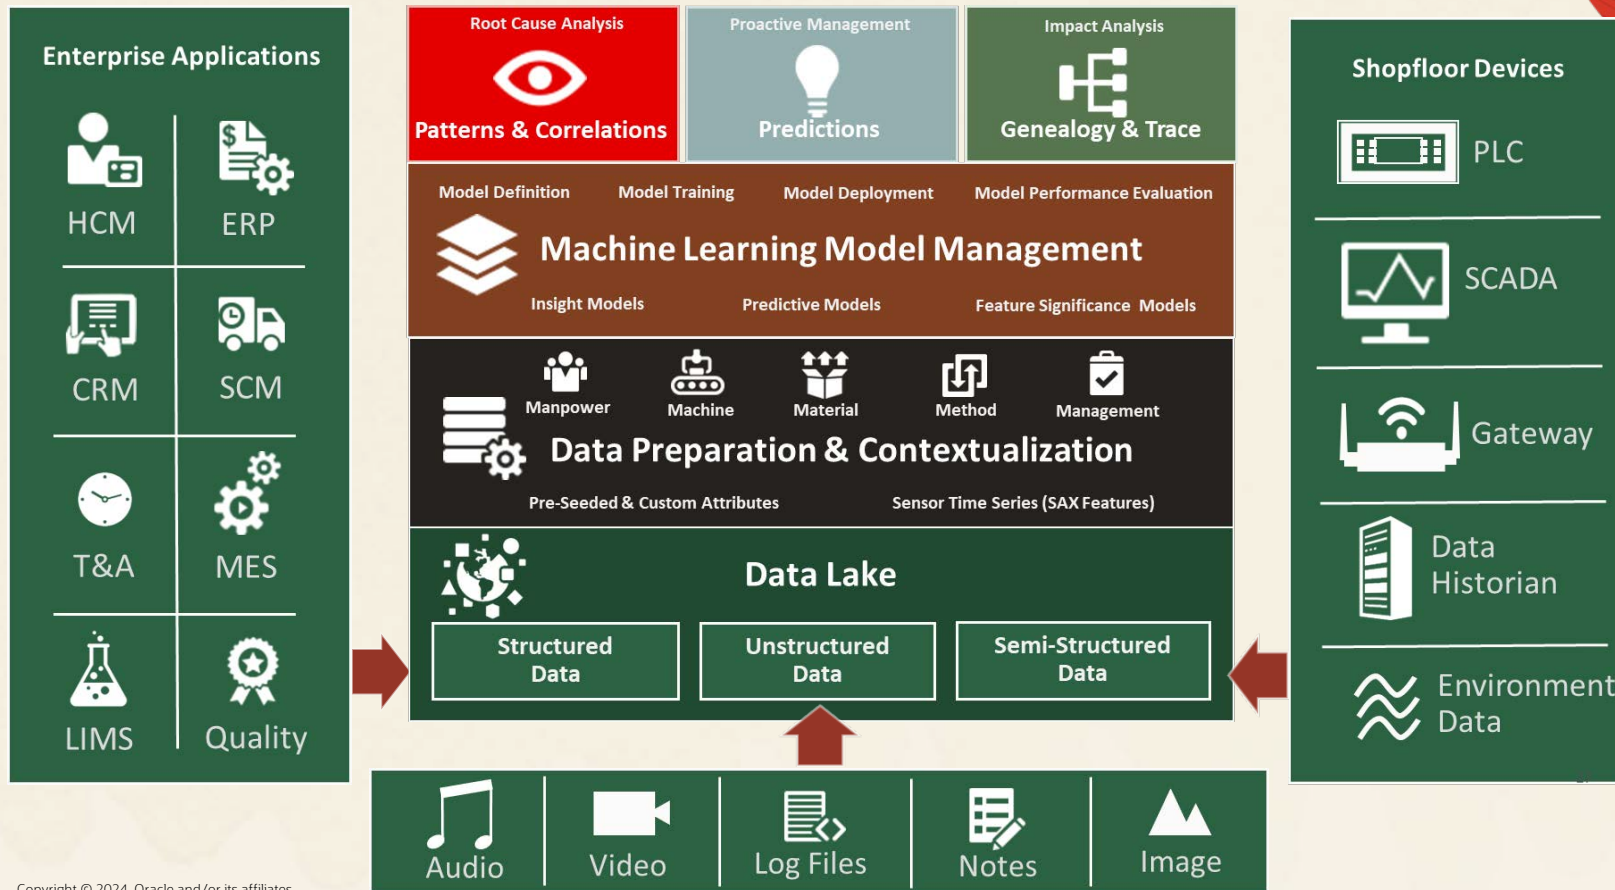

Roadmap

- Scope 1 Stationary Combustion emissions
- Scope 1 Mobile Combustion emissions
- Scope 2 Purchased Energy emissions

OCI AI/ML Apps Accelerator

Research

AI Use Cases

- Predictive Maintenance
- Quality Control
- Supply Chain Optimization
- Warranty Analytics
- Price Optimization
- Demand Forecasting
- Inventory Management
- Intelligent Manufacturing with AI embedded approach
- Anomaly Detection
- Profitability and Revenue Forecasting Management
- Departmental Analytics (HR, Sales, IT)
