## 2 System Configuration

This section describes the Operational Position Setup within the Administration module.

### 2.1. Operational Position Setup

An Operational Position is required in the Advanced Passenger Information System (APIS) for references and reporting, and this is set up in Administration module.

1. Login to **Administration module** and select **Crew Setup, Operational Position** from the drop-down list.
2. Right-click on the left panel and select **Add** to create a new Operational Position or select from the existing list.

Figure 2-1 – Crew Operational Position Code setup

3. Navigate to the Operational Position tab and enter the **Position code**, **description** and **comment**.
4. Under the **Additional Information** section, select the Operational Division from the drop-down list.
5. Under the **APIS Reference** section,
  - a. Define Crew Duty (CARICOM) position
  - b. Define Crew Duty (Other APIS) position

6. Click **OK** to save.

## 2.2. APIS XML Setup

A related APIS xml file is required to be uploaded into SPMS database and below are the affected tables.

**Table 2-1 - APIS File list**

Description	XML file	Table
Agency List	Agency_List.xml	SCA
CARICOM Port	CARICOMPORTS.xlsx	CCP
Crew Type List	Crew Type List	CWT
Foreign Port List	Foreign_Port_List.xml	FPL
International Ship Security Certificate Recognized Security Organization (RSO)	RSO.xml	RSO
Port Code	PortCode.csv	PCO
UK Port List	Port_UK_List.xml	UKP

1. Place all the XML files in \\Public Documents\Oracle Hospitality Cruise folder for the respective data to be updated into the database.
2. The system prompts an error message when opening the CARICOM setup if a mismatch is found in the position or crew type maintained in Administration module and the Crew Type.XML file. Please ensure all the required Operational Position is in the XML file before generating the report. Click **OK** to continue.

3. Review and correct all the invalid data found in the log file.

## 2.3. Ship Information Setup

The Ship Information must be entered before one is allowed to generate the report and this is setup in the Caricom application.

Figure 2-3 – Standard Parameter Configuration – Ship Information Setup

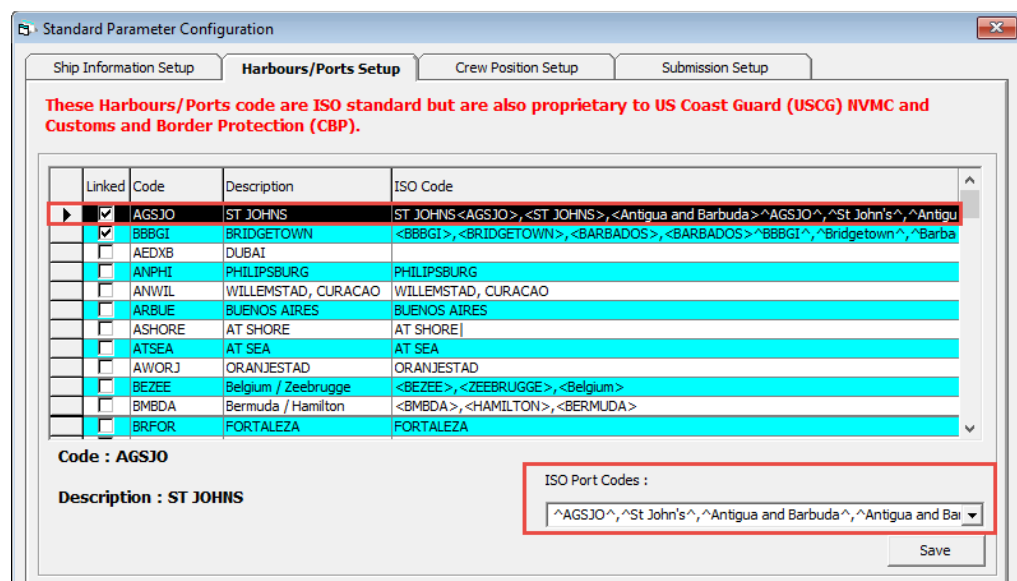

1. Run the **CARICOM.exe**.
2. Select **CARICOM Setup** from the **CARICOM Transfer**.

## 2.4. Port Setup

The Port Setup is differentiated by the symbols used and stored in the XML files. For example, the ISO Port Code for St Johns has “^” and “<”. This means the ISO Port is shown in the **Standard Parameter Configuration, Harbours/Ports Setup, ISO Port Codes** and eNOAD Port. See below table and figures for symbol use in the port setup.

**Table 2-2 - Port Symbol Stored in APIS file**

Description	Symbol
CARICOM Port	^
eNOAD Port	<
Panama Canal ADR Port	-
eBorder UK Port	#

**Figure 2-4 – CARICOM – Port list**

## 2.5. Submission Setup

The Submission Setup is a field where you define the Webservice Submission and it supports manual report generation and online submission. Please obtain the URL from your handling agent/representative.

- Web Services Submission Token String
- Web Services Submission URL Address

- Web Services Submission SOAP Header
- Web Service Submission SOAP Action

## 2.6. Transfer Folder Setup

A transfer folder is required when generating the report file. Manually create the folder and then enter the path in **Parameter, File Output Folder** if wish to save the file to a default location. If none is defined in the Parameter, the system defaults the folder to "C:\Users\Public\Documents\Oracle Hospitality Cruise\[Folder]."

If the Transfer folder does not exist, the System prompts an error message 'Invalid path [path]'.

## 2.7. Document Type Setup

The Document Types accepted in SPMS must be mapped with a correct CARICOM code.

1. Login to **Administration module**.
2. Select **Administration, System Codes** and the **Document Types** from the menu option.
3. Select the Document Types from the left panel and in the **APIS <ID\_TYPE> Mapping:** field, enter the hardcoded document type. See [Document Type Mapping Field](#) for more information.
4. Click **OK** to save.
