1. Deploying Oracle FLEXCUBE on WebSphere

1.1 Introduction

This document explains the steps to deploy the Oracle FLEXCUBE UBS application on IBM WebSphere application server.

1.2 Deploying Application

1.2.1 FCUBS Application Deployment

To deploy Oracle FLEXCUBE UBS application on WebSphere application server, follow the steps given below:

1. Open the Administrative Console of WebSphere server:

   Open an internet browser and type the WebSphere Admin Console URL http://{Host}:{Port}/console.

   Eg: https://10.10.10.10:1010/console

   In the above example, 10.10.10.10 is the machine IP address on which WebSphere is running.

   The following screen is displayed:

   ![WebSphere Integrated Solutions Console]

2. Enter the user name and password and click ‘Log In’ to log in to the application server.

3. Navigate to the WebSphere Home Page.
The following screen is displayed.

4. Expand Applications from left-side menu and Click 'New Application'.
The following screen is displayed.

5. Click 'New Enterprise Application.'
6. Browse the application EAR file and click next button

The following screen is displayed.
7. Click ‘Next’. The following screen is displayed.

8. Enter the Application Name. This should be the application name mentioned as part of EAR building.
9. Click ‘Next’.
10. Check all the options. Click ‘Next’. The following screen is displayed.

11. Specify the details as shown in the figure.
12. Click ‘Next’. Following screen is displayed.

![WebSphere Integrated Solution](image)

13. Click ‘Next’.

The following screen is displayed.
Click next.
14. Click ‘Finish’.

The following screen is displayed.
15. Click ‘Save’.
16. Select the application and click ‘Start’.
The application starts as shown below:

![WebSphere IDE](image)

This completes the deployment of EAR (FCJNeoWeb.ear) on IBM WebSphere 8.5.5.0 Application Server from the Administration Console.

1.2.2 **FCUBS Scheduler Application Deployment**

To deploy Oracle FLEXCUBE UBS application on WebSphere application server, follow the steps given below:

17. Open the Administrative Console of WebSphere server:

   Open an internet browser and type the WebSphere Admin Console URL http://(Host):(Port)/console.

   Eg: https://10.10.10.10:1010/console

   In the above example, 10.10.10.10 is the machine IP address on which WebSphere is running.
The following screen is displayed:

18. Enter the user name and password and click ‘Log In’ to log in to the application server.
19. Navigate to the WebSphere Home Page.
The following screen is displayed.

20. Expand Applications from left-side menu and Click ‘New Application’.
The following screen is displayed.

21. Click ‘New Enterprise Application.'
22. Browse the application EAR file and click next button

The following screen is displayed.

![WebSphere Integrated Solution](image)

23. Click ‘Next’. The following screen is displayed.
24. Enter the Application Name. This should be the application name mentioned as part of EAR building.

25. Check all the options. Click ‘Next’. The following screen is displayed.
26. Specify the details as shown in the figure.

27. Click 'Next'. The following screen is displayed.
28. Click ‘Next’. The following screen is displayed.

29. Click ‘Finish’. The following screen is displayed.
Click ‘Save’. The following screen is displayed.

30. Select the application and click ‘Start’.
The application starts as shown below:

1.2.3 FCUBS GWEJB Application Deployment

To deploy Oracle FLEXCUBE UBS application on WebSphere application server, follow the steps given below:

1. Open the Administrative Console of WebSphere server:

   Open an internet browser and type the WebSphere Admin Console URL http://(Host):(Port)/console.

   Eg: https://10.10.10.10:1010/console

   In the above example, 10.10.10.10 is the machine IP address on which WebSphere is running.
2. Enter the user name and password and click ‘Log In’ to log in to the application server.

3. Navigate to the WebSphere Home Page.
4. Expand Applications from left-side menu and Click 'New Application'.
The following screen is displayed.

5. Click ‘New Enterprise Application.’
6. Browse the application EAR file and click next button

7. Click Next and the following screen is displayed.
8. Click next and the following screen is displayed.

![Image of screen 1]

9. Click next and the following screen is displayed.

![Image of screen 2]

10. Click next and the following screen is displayed.

![Image of screen 3]
11. Click next and the following screen is displayed.

12. Click on finish and the following screen is displayed.
13. Click on save and the following screen is displayed.

31. Select the deployed application and click on start
32. Click on the application and the following screen is displayed.

33. Click on EJB JNDI names and the following screen is displayed.
Provide the JNDI Name for GWEJB.jar as “GWEJB#com.ofss.fcubs.gw.ejb.GWEJBRremote”

34. Click on OK, and the following screen is displayed.

35. Click on save and the deployment is finished.
1.2.4 **FCUBS GWMDB Application Deployment**

To deploy Oracle FLEXCUBE UBS application on WebSphere application server, follow the steps given below:

1. Open the Administrative Console of WebSphere server:
   
   Open an internet browser and type the WebSphere Admin Console URL
   http://{Host}:{Port}/console.
   
   Eg: https://10.10.10.10:1010/console

   In the above example, 10.10.10.10 is the machine IP address on which WebSphere is running.

   The following screen is displayed:

   ![WebSphere Integrated Solutions Console](image)

   2. Enter the user name and password and click ‘Log In’ to log in to the application server.

   3. Navigate to the WebSphere Home Page.
The following screen is displayed.

4. Expand Applications from left-side menu and Click 'New Application'.
The following screen is displayed.

5. Click ‘New Enterprise Application.”
6. Click on Browse and select the MDB EAR and the following screen is displayed.

![Image of the screen showing the Browse option for selecting the MDB EAR]

7. Click on next and the following screen is displayed.

![Image of the screen showing the next option]

8. Click on next and the following screen is displayed.

![Image of the screen showing the next option again]
9. Click on next and the following screen is displayed.

10. Click on next and the following screen is displayed.
11. Input the listener name click next. Following screen is displayed.

12. Enter the details as shown and click next.
14. Click on continue and following screen is displayed.

15. Give necessary details as shown and click next.
16. Click on continue and below screen is displayed.

17. Click on next and following screen is displayed.
18. Click on Finish and following screen is displayed.

36. Click on save and following screen is displayed.
37. Select the deployed EAR and click on start.

MDB EAR deployment is successfully finished.
1.2.5 **FCUBS HTTP Application Deployment**

To deploy Oracle FLEXCUBE UBS application on WebSphere application server, follow the steps given below:

1. Open the Administrative Console of WebSphere server:
   - Open an internet browser and type the WebSphere Admin Console URL
     http://(Host):{Port}/console.
   - Eg: https://10.10.10.10:1010/console
   - In the above example, 10.10.10.10 is the machine IP address on which WebSphere is running.

   The following screen is displayed:

   ![WebSphere Integrated Solutions Console](image)

   2. Enter the user name and password and click ‘Log In’ to log in to the application server.

   3. Navigate to the WebSphere Home Page.
The following screen is displayed.

4. Expand Applications from left-side menu and Click ‘New Application’.
The following screen is displayed.

5. Click 'New Enterprise Application.'
6. Browse the application EAR file and click next button

7. Click next and the following screen is displayed.
8. Click next and the following screen is displayed.

9. Click next and the following screen is displayed.
10. Click next and the following screen is displayed.

11. Click next and the following screen is displayed.
12. Click next and the following screen is displayed.

13. Click on finish and the following screen is displayed.
14. Click on save and the following screen is displayed.

![Deployment Screen]

15. Select the installed application and click on start.

![Application Selection Screen]

GWHTTP application has been deployed successfully.
1.2.6 **FCUBS GWWebServices Application Deployment**

To deploy Oracle FLEXCUBE UBS application on WebSphere application server, follow the steps given below:

1. Open the Administrative Console of WebSphere server:
   
   Open an internet browser and type the WebSphere Admin Console URL `http://(Host):(Port)/console`
   
   Eg: `https://10.10.10.10:1010/console`
   
   In the above example, 10.10.10.10 is the machine IP address on which WebSphere is running.

   The following screen is displayed:

   ![WebSphere Administrative Console](image)

   2. Enter the user name and password and click ‘Log In’ to log in to the application server.

   3. Navigate to the WebSphere Home Page.
4. Expand Applications from left-side menu and Click ‘New Application’.
The following screen is displayed.

5. Click ‘New Enterprise Application.’
6. Browse the application EAR file and click next button.

7. Click on next and the following screen is displayed.
9. Click on next and the following screen is displayed.

10. Click on next and the following screen is displayed.
11. Click on next and the following screen is displayed.

12. Click on next and the following screen is displayed.
13. Click on finish and the following screen displayed.

14. Click on save and the following screen is displayed.
15. Select the installed application and click on start.

GWWebServices application has been deployed successfully.
