Log		3ack Next Exit

- 5. Select 'Database' as Oracle FLEXCUBE component for installation.
- 6. Specify the following details.

## **Operating System**

Specify the operating system in which you are installing Oracle FLEXCUBE.

#### **Database Server**

Specify the database server on which you are installing Oracle FLEXCUBE.

7. Click 'Next'. The following screen is displayed.

Gracle FLEXCUBE Univ	ersal Installer

Database Installation Specify source and de	stination path.	
	🗹 Consolidated 🗌 Multiple Sources	
Source Directory	D:\INSTALLATIONDIRECTORY	
Destination Directory	D:\DESTTEMPDIR	📔
Log	Back	Next Exit

8. Specify the following source and destination directory details.

#### Source Directory

Specify the source directory location. The source directory should have the 'rad\_ddl.sql' and other corresponding packages. You can use the directory icon to browse to the source directory location.

#### **Destination Directory**

Specify the destination directory. You can use the directory icon to browse to the source directory location.

#### Consolidated

Check this box to indicate a consolidated installation.

If you need to compile a single patch into the database, then you can leave this box unchecked and specify the source directory of the patch in the 'Source Directory' field.

#### **Multiple Sources**

In case of Cluster/Patch releases, you can get the files from multiple source directories. If you check this box, the installer will not allow you to specify the source directory in this screen.

9. Click 'Next' button, if' Multiple Sources' is selected, the following screen will be dispalyed.

13. Click 'Next'. The following screen is displayed.

Database Installation Provide schema details.		
Name	Value	•
Username	installer	
Password	•••••	
Service Name	testdb	
IP Address	10.10.10	
Port	1521	
TNS Connect Descriptor	testdb.world	
Test Connection		

14. Specify the following schema details:

### User Name

Specify the user name to access the schema.

## Password

Specify the schema password for the above user name.

### Service Name

Specify service name of database.

### **TNS Connect Descriptor**

Specify a valid connect string that contains the details for database connectivity.

#### IP Address

Specify the IP address of the system where the database schema is installed.

## Port

Specify the port number.

15. Once you have specified the details, click 'Test Connection' button to test the database schema connection.

Message		×
i	Connection successful	
	ОК	

The above message is displayed if the connection is established sucessfully.

16. Click 'Next'. The following screen is displayed.

- 18. Click on ODT DDL log to see the log.
- 19. Click 'Next'. The following screen is displayed.

Source FLEXCUBE Universal Installer	
Oracle FLEXCUBE Universal Banking	ORACLE
Database Installation	
Current screen Displays the status of the ODT App objects being c	
0%	
Load ODT Objects Log Log Back	Next Exit

- 20. In the 'Include' column, check this box to indicate the object you need to load.
- Click 'Load ODT Objects' button to compile APP objects. The installer loads the functions, procedures, views, triggers and packages as per your selection and compiles them.
- 22. Click 'ODT Objects Log' to view the log. The log file 'LoadODTObj.log' will be available in the destination directory under the folder 'DBLogs'.
- 23. Click 'Next'. The following screen is displayed.

Current screen Displays the	number of invalids in the DE	3.	1
Object Type	Invalid Count	Total Count	
FUNCTION	17	160	
PROCEDURE	27	176	
VIEW	78	2717	
TRIGGER	124	396	
PACKAGE	1579	9858	
PACKAGE BODY	7232	9511	
	1232	3511	

- 24. Click 'Invalids List' button to view the count of invalid objects in the database. You can view the file 'InvalidList.txt' created by the installer in the destination directory under the folder 'DBLogs'.
- 25. Click 'Recompile' to re-compile any invalid objects If present. This reduces the invalid object count.

The Installer allows 'Recompile' multiple times in order to reduce the invalid objects count.

The following screen is displayed on successful re-compilation of ODT Objects.

Object Type	Invalid Count	Total Count	
CTION 0		0	
CEDURE 0		4	
v o		0	
GGER 0		0	
KAGE 0		56	

The database is set up for the ODT installation.
