## 1. Introduction

### 1.1 Background

This document provides an overview of setting up the UCM server for capturing of all documents received from/given to customer in a central content management repository. Oracle documentation are to be referred for HA and other configuration patterns.

#### 1.2 Organization of the Document

The first chapter of this document gives an introduction with brief background and organization of the document.

Subsequent chapters of this document will give the implementation details.

#### 1.3 Acronyms and Abbreviations

UCM	Universal Content Management
IPM	Imaging and Process Management
RCU	Repository Creation Utility

## 2. Prerequisites

Oracle Weblogic 11gR1 (10.3.5)

Download Oracle Weblogic from Oracle Website. This is available for reference at

http://www.oracle.com/technetwork/middleware/ias/downloads/wls-main-097127.html

- 1. Download based on your needs (Windows/Linux/Generic).
- 2. The installation process might slightly vary depending on the platform / mode if installation (package/net).
- 3. Run the wls1035\_oepe111172\_win32.exe

### 2.1 Create Repository in order to Configure the Application

Oracle Repository Creation Utility (RCU) is used to create schemas that are required for UCM server Installation.

- 1. Install Database.
- 2. Download Repository Creation Utility

http://www.oracle.com/technetwork/middleware/soasuite/downloads/index.html

3. Navigate to the directory into which RCU is installed. For Example

<rcu\_home>\BIN Where rcu\_home is the directory in which RCU is installed.

4. Click on rcu.bat file to create the repository.

13. Completion Summary.

## 3. UCM Server Setup

1. Download Oracle Webcenter Content 11gR1(Version: 11.1.1.5.0), formerly known as (Oracle Enterprise Content Management) from

https://sac.us.oracle.com/download/index.html

- 2. At the right top corner there is a search box, where searching for string <11.1.1.5>
- 3. Search for <Enterprise Content> in the result page and found a zip which is downloadable.
- 4. Download Enterprise Content Management

Oracle Enterprise Content Management 11g (11.1.1.5.0) (zip file 1 of 2)

Oracle Enterprise Content Management 11g (11.1.1.5.0) (zip file 2 of 2)

which provides a FTP download and select FTP server to download.

5. Extract all the files and Install them on the server machine.

## 4. Configuring the ECM application server:

### 4.1 Introduction

New domain can be configured or an existing domain can be extended with Oracle ECM suite components.

#### 4.2 New Domain Configuration

1. Run Configure Application

2. Create a new domain / extend an existing domain to include ECM suite components.

Fusion Middleware Configuration Wizard	
Select Domain Source	ORACLE
Generate a domain configured automatically to support the following produces of the following	cts:
