2. Tawarooq Origination

The process of Tawarooq finance origination gets initiated when a prospective customer approaches the bank, with a finance account opening request or when the bank approaches a prospective customer, taking lead from its database. In case of a bank–initiated request, the process moves forward only if the prospective customer is interested. The entire process is carried out in multiple stages and on successful completion of each stage, it moves automatically to the next stage.

When the customer approaches the bank for its products and offers, before initiating the finance origination process, the bank can create a mock-proposal which would have the personal details of the customer, the finance offers the customer is interested in as well as the schedules associated with the finance offer. This can be stored as reference in the system to be retrieved when the actual finance process flow is initiated.

This chapter contains the following sections:

- Section 2.1, "Stages in Tawarooq"
- Section 2.2, "Finance Prospect Maintenance"
- Section 2.3, "Credit Rating Rules"
- Section 2.4, "Credit Ratio"
- Section 2.5, "Override Maintenance"

2.1 Stages in Tawarooq

Tawarooq process flow uses Oracle BPEL framework with multiple human tasks for workflow stages. The capture and enrichment of information in multiple steps can be dynamically
assigned to different user roles, so that multiple users can take part in the transaction. Oracle Business rules are used for dynamic creation of multiple approval stages.

The following details need to be maintained for originating a Tawarooq:

- Finance Application Capture
- Application Verification
- Application Management Verification (Configurable)
- Internal Blacklist Check
- External Blacklist Check
- Underwriting (Credit Evaluation)
- Finance Approval
- Document Verification
- Finance details upload
- Sale Confirmation
- User Acceptance
- Disbursement
- Manual Liquidation

The Tawarooq origination process flow is composed of following stages:

The following are different types of the asset categories in Tawarooq:

- Vehicle
- Home
- Others

### 2.2 Finance Prospect Maintenance

This section contains the following topics:

- Section 2.2.1, "Maintaining Finance Prospect Details"
- Section 2.2.2, "Customer Tab"
- Section 2.2.3, "Details Tab"
- Section 2.2.4, "Requested Tab"
- Section 2.2.5, "Viewing Finance Prospect Summary"

#### 2.2.1 Maintaining Finance Prospect Details

You can maintain the details of a prospective borrower or a finance applicant, when the borrower initially approaches the bank enquiring about the various finance products that are being offered.

The following details are captured as part of this maintenance:

- Prospective customer’s personal and location details
- Prospective customer’s employment details

Specify the preferred profit rate of the prospective customer.

2.2.5 Viewing Finance Prospect Summary

You can view a summary of the prospective finance customers or the borrowers in ‘Finance Prospect Details’ screen. You can also query for a particular record based on desired search criteria.

You can invoke this screen by typing ‘ORSLEADM’ in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

You can specify any of the following details to search for a record:
- Authorization Status
- Record Status
- Lead Id
- Date of Enquiry

Click ‘Search’ button to search for a record based on the search criteria specified. You can double click a desired record to view the detailed screen.
2.3  Credit Rating Rules

This section contains the following topics:

- Section 2.3.1, "Maintaining Credit Rating Rules"
- Section 2.3.2, "Main Tab"
- Section 2.3.3, "Risk Factor Tab"
- Section 2.3.4, "Specifying Credit Grades"
- Section 2.3.5, "Specifying Auto Decision Details"
- Section 2.3.6, "Viewing Credit Rule Summary"

2.3.1  Maintaining Credit Rating Rules

You can maintain a set of questions along with a possible set of answers with associated scores, to assess the credit rating of a prospective finance customer. You can also calculate the risk factor associated with the finance and arrive at a credit grade based on the scores obtained.

You can maintain these details in ‘Rule Details’ screen. You can invoke this screen by typing ‘ORDRULMT’ in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

You can specify the following details in this screen:

**Rule Id**
Specify a unique identification for the credit rating rule.
Description
Specify a suitable description for the credit rating rule.

Type
Select the type of the finance from the following options available:
- Retail
- Corporate

2.3.2 Main Tab
You can maintain the following details in this tab:

**Question Details**

**Question Id**
The question Id is automatically generated by the system.

**Category**
Select the category to which the question belongs from the option list provided.

**Question**
Specify the question to be asked to the prospective customer to derive the credit rating score.

**Answer Details**

**Sequence Number**
The sequence number is automatically generated by the system.

**Possible Answer**
Specify a set of possible answers to be associated with a question.

**Score**
Specify the score associated with an answer.
2.3.3 **Risk Factor Tab**

You can specify the risk details associated with the finance and also indicate the formula for calculating the credit score in this tab.

---

**Risk Id**

Specify a unique identifier for the credit risk being maintained.

**Description**

Specify a suitable description for the credit risk.

### 2.3.3.1 Specifying Formula Details

You can specify the formula to calculate the credit score by clicking the ‘Formula’ button corresponding to a credit risk entry in Risk Factor tab. The ‘Formula’ screen is displayed where you can specify the condition for calculating the credit score associated with a risk condition.
You can specify the following details here:

**Sequence Number**
The sequence number is automatically generated by the system.

**Condition**
The condition specified using the Elements, Functions, Operators etc. gets displayed here.

**Result**
Specify the result to be associated with the condition specified.

**Elements**
Specify the data elements to be used to define the formula for credit score calculation or select the element from the option list provided.

**Functions**
Select the mathematical function to be used to define the formula from the drop-down list provided.

**Braces**
Select the opening or the closing brace from the drop-down list provided, to define the credit score calculation formula.

**Operators**
Select the mathematical operator to be used to define the credit score calculation formula. You can select ‘+’, ‘-’, ‘*’, or ‘/’.

**Logical Operators**
Select the logical operator to be used to define the credit score calculation formula. You can select ‘<’, ‘>’, ‘=’, ‘<>, ‘>=’, ‘<=’, ‘AND’ or ‘OR’.

### 2.3.4 Specifying Credit Grades

You can maintain different credit grades based on the credit scores obtained. Click ‘Rating’ button in Rule Details screens to invoke the ‘Rating’ screen, where you can maintain these details.

You can specify the following details here:

**Sequence Number**
The sequence number is automatically generated by the system.
Score
Specify the score associated with a credit risk.

Grade
Specify the credit grade based on the score obtained.

2.3.5 Specifying Auto Decision Details

While creating finance, you need to decide whether the applicant is eligible to receive finance from the bank. Auto Decision feature in Oracle FLEXCUBE decides whether to approve or reject an application. It also gives the stipulations or reasons for the decision.

To use this feature, you need to maintain the Auto Decision details in ‘Auto Decision’ screen.

Specify the following details:

Serial Number
The system displays the serial number.

Score
Specify the maximum credit score of the finance applicant for the system to make the corresponding auto decision. The score is maintained based on the Risk Factor maintained in Rule details screen.

Auto Decision
Specify the auto decision to be made for each credit score. You can maintain the maximum credit scores for each of the following decisions:

- Auto Approved
- Recommend Approval
- Recommend Reject
- Auto Rejected

While creating finance, based on the applicant’s credit score and auto decision mapping maintained in here, the system decides whether to approve, reject, recommend approval or recommend rejection of the application.
2.3.6 Viewing Credit Rule Summary

You can view a summary of the credit rules in ‘Rule Maintenance’ screen. You can also query for a particular record based on desired search criteria.

You can invoke this screen by typing ‘ORSRULMT’ in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

You can specify any of the following details to search for a record:

- Authorization Status
- Record Status
- Rule Id

Click ‘Search’ button to search for a record based on the search criteria specified. You can double click a desired record to view the detailed screen.

2.4 Credit Ratio

This section contains the following topics:

- Section 2.4.1, "Maintaining Credit Ratios"
- Section 2.4.2, "Specifying Formula Details"
- Section 2.4.3, "Viewing Credit Ratio Summary"

2.4.1 Maintaining Credit Ratios

You can maintain the rules to calculate the credit ratios in ‘Credit Ratio Maintenance’ screen.
You can invoke this screen by typing ‘ORDRATMT’ in the field at the top right corner of the Application toolbar and clicking the adjoining arrow button.

You can specify the following details in this screen:

**Group Id**
Specify a unique identification code for the ratio group.

**Description**
Specify a suitable description for the ratio group.

**Type**
Select the type of the finance from the following options available:

- Retail
- Corporate

**Ratio Id**
Specify a unique identification for the credit ratio being maintained.

**Description**
Specify a suitable description for the credit ratio.

### 2.4.2 Specifying Formula Details

You can specify the formula to calculate the credit ratio by clicking the ‘Formula’ button corresponding to a ratio Id.
The 'Formula' screen is displayed where you can specify the condition for calculating the credit ratio associated with a ratio Id.

You can specify the following details here:

**Ratio Type**
Select the type of the ratio being maintained, from the drop down list provided. The following options are available:
- Stated Before
- Stated After
- Actual Before
- Actual After

**Condition**
The condition specified using the Elements, Functions, Operators etc. gets displayed here.

**Elements**
Specify the data elements to be used to define the formula for credit ratio calculation or select the element from the option list provided.

**Functions**
Select the mathematical function to be used to define the formula from the drop-down list provided.

**Braces**
Select the opening or the closing brace from the drop-down list provided, to define the credit ratio calculation formula.

**Operators**
Select the mathematical operator to be used to define the credit ratio calculation formula. You can select ‘+’, ‘-’, ‘*’, or ‘/’.

**2.4.3 Viewing Credit Ratio Summary**
You can view a summary of the credit ratios in 'Credit Ratio Maintenance' screen. You can also query for a particular record based on desired search criteria.
You can invoke this screen by typing ‘ORSRATMT’ in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

You can specify any of the following details to search for a record:

- Authorization Status
- Record Status
- Group Id

Click ‘Search’ button to search for a record based on the search criteria specified. You can double click a desired record to view the detailed screen.

2.5 Override Maintenance

This section contains the following topics:

- Section 2.5.1, "Maintaining Override Details"
- Section 2.5.2, "Viewing Override Summary"
2.5.1 **Maintaining Override Details**

You can maintain the formulae to verify if overrides need to be generated dynamically, in 'Override Maintenance' screen. You can invoke this screen by typing ‘ORDOVDMT’ in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

You can specify the following details in this screen:

**Process Code**
Specify the process code of the process for which you wish to maintain override conditions or select the process code from the option list provided.

**Application Category**
Specify the category to which the finance application belongs or select the application category from the option list provided.

**Type**
Select the type of the finance from the following options available:
- Retail
- Corporate
- Ijarah
- Irtisna
- Mudarabah
- Murabaha
- Musharaka
Stage
Select the stage of the finance origination process from the option list provided. The various stages can be Application Entry, Application Verification, Underwriting, Finance Approval etc.

Description
Specify a suitable description for the finance origination stage.

Overrides
Here, you can capture the details of the conditions to be checked for generating override messages.

Sequence Number
The sequence number is automatically generated by the system.

Condition
The condition specified using the Elements, Functions, Operators etc. gets displayed here.

Error Code
Specify the error code to be used to generate the override message or select the error code from the option list provided.

Error Parameter
Specify the error parameter to be substituted in the override messages.

Elements
Specify the data elements to be used to define the conditions for generating override messages or select the element from the option list provided.

Functions
Select the mathematical function to be used to define the condition from the drop-down list provided.

Braces
Select the opening or the closing brace from the drop-down list provided, to define the conditions for generating override messages.

Operators
Select the mathematical operator to be used to define the conditions for generating override messages. You can select ‘+’, ‘-’, ‘*’, or ‘/’.

Logical Operators
Select the logical operator to be used to define the conditions for generating override messages. You can select ‘<’, ‘>’, ‘=’, ‘<=’, ‘>=’, ‘AND’ or ‘OR’.

2.5.2 Viewing Override Summary

You can view a summary of the overrides in ‘Override Maintenance’ screen. You can also query for a particular record based on desired search criteria.

You can invoke this screen by typing ‘ORSOVDMT’ in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.
You can specify any of the following details to search for a record:

- Authorization Status
- Record Status
- Process Code
- Application Category

Click ‘Search’ button to search for a record based on the search criteria specified. You can double click a desired record to view the detailed screen.

### 2.6 Document Checklist and Advices

This section contains the following topics:

- Section 2.6.1, "Maintaining Document Checklist and Advices"
- Section 2.6.2, "Process Flow (BPEL) Report"
- Section 2.6.3, "Viewing Document Checklist Summary"

#### 2.6.1 Maintaining Document Checklist and Advices

You can maintain the list of documents that are required during the finance origination process, in 'Documents and Advice Maintenance' screen. Document checklists are maintained for an application category and for the various stages in the origination process. You can also maintain the details of the Advices that need to be generated on completion of a stage in the process.
You can invoke ‘Documents and Advice Maintenance’ screen by typing ‘ORDDOCMT’ in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

You can specify the following details in this screen:

**Process Code**
Specify the process code of the process for which you wish to maintain override conditions or select the process code from the option list provided.

**Application Category**
Specify the category to which the finance application belongs or select the application category from the option list provided.

**Stage**
Select the stage of the finance origination process from the option list provided. The various stages can be Application Entry, Application Verification, Underwriting, Finance Approval etc.

**Stage Title**
Specify a suitable description for the finance origination stage.

**Document Details**

**Document Category**
Specify the category to which the document belongs or select the document category from the option list provided.
Document Type
Specify the type of the document or select the document type from the option list provided.

Mandatory
Select the option to indicate whether the document is mandatory or not. You can select any of the following options from the drop-down list provided:
- Mandatory
- Overridden
- Others

BI Advices

Report Name
Specify the name of the advice report to be generated on completion of the process stage.

Template
Specify the template to be used to generate the advice report.

Format
Select the format in which the advice report needs to be generated from the drop-down list provided. The following options are available:
- PDF
- RTF

Locale
Select the locale information to be used for generating the advices from the drop-down list. The following options are available:
- en-US

2.6.2 Process Flow (BPEL) Report

Based on the details maintained on ‘Documents and Advices Maintenance’ screen, you can generate a report from any stage of the process flow. To generate this report from a particular stage, you need to click the ‘Document’ tab at that stage. Under the frame ‘Advices’, you have the option to generate this report.

You can generate the report only if you maintain ‘ORRPICAL_en_US.rtf’ as the template.

You can generate this report in ‘PDF’ or ‘RTF’ formats.

Contents of the Report
This report contains the following details of the finance account:

<table>
<thead>

2.6.3 **Viewing Document Checklist Summary**

You can view a summary of the document checklists and advices in ‘Document Details’ screen. You can also query for a particular record based on desired search criteria.

You can invoke this screen by typing ‘ORSDOCMT’ in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

You can specify any of the following details to search for a record:

- Authorization Status
- Record Status
- Process Code
- Application Category

Click ‘Search’ button to search for a record based on the search criteria specified. You can double click a desired record to view the detailed screen.

2.7 **Application Category**

This section contains the following topics:

- **Section 2.7.1, "Maintaining Application Category Details"**
- **Section 2.7.2, "Main Tab"**
- **Section 2.7.3, "Agency Tab"**
- **Section 2.7.4, "Viewing Application Category Summary"**

2.7.1 **Maintaining Application Category Details**

You can maintain various application categories linked to multiple finance products that cater to the requirements of different customers, in ‘Application Category Maintenance’ screen. The entire process of finance origination depends mainly on the category to which the application belongs.
You can invoke ‘Application Category Maintenance’ screen by typing ‘ORDCATMT’ in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

You can specify the following details in this screen:

**Application Category**
Specify a unique identification for the finance application category.

**Category Description**
Specify a suitable description for the finance application category.

**Rule Id**
Specify the credit rule to be associated with the application category or select the Rule Id from the option list provided.

**Ratio Id**
Specify the credit ratio to be associated with the application category or select the Ratio Id from the option list provided.

**Pricing Group**
Specify the pricing group to be linked to the Tawarooq application category. The option list displays all valid pricing groups applicable. Choose the appropriate one.

### 2.7.2 Main Tab

You can capture the following details in the ‘Main’ tab.
**Product Details**

You can specify the following details related to the finance product here:

**Product Code**
Specify the identification code of the finance product to be linked to the application category being maintained. You can also select the product code from the option list provided.

**Product Description**
The description associated with the selected finance product gets displayed here.

**Default**
Check this box to indicate if the finance product selected should be maintained as the default product for the application category.

**Other Details**

You can capture the additional details related to the finance product here:

**Offer Id**
Specify a unique identification for the finance offer being made to the customer.

**No of Installments**
Specify the number of instalments associated with the finance.

**Units**
Select the units based on which the finance disbursement should be carried out. The following options are available in the option list:

**Rate**
Specify the profit rate to be associated with the finance.

**Rate Code**
Specify the rate code used to derive the profit rate or select the rate code from the option list provided.

**Spread**
Specify the spread that is applicable for the finance being offered.

**Effective Rate**
The effective profit rate gets displayed here, based on the profit and the spread specified.

**Default**
Check this box to indicate if the finance offer specified should be maintained as the default offer for the application category.
2.7.3 **Agency Tab**

In ‘Agency’ tab, you can capture the details of the credit rating agencies and credit bureaus that provide credit rating details for customer securities.

You can specify the following details in this screen:

**Credit Agency**

You can capture the details related to the credit rating agencies here.

**Agency Code**

Specify the identification code of the rating agency that provides credit rating details for customer securities.

**Agency Name**

Specify the name of the rating agency that provides credit rating details for customer securities.

**Bureau Details**

You can capture the details related to the credit bureau here.

**Bureau Code**

Specify the identification code of the credit bureau that provides credit ratings for customer securities.
Bureau
Specify the name of the credit bureau that provides credit rating details for customer securities.

2.7.4 Viewing Application Category Summary

You can view a summary of the application categories in ‘Category Details’ screen. You can also query for a particular record based on desired search criteria.

You can invoke this screen by typing ‘ORSCATMT’ in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

You can specify any of the following details to search for a record:

- Authorization Status
- Record Status
- Application Category

Click ‘Search’ button to search for a record based on the search criteria specified. You can double click a desired record to view the detailed screen.

2.8 Maintaining Pricing Details

Oracle FLEXCUBE allows you to maintain pricing groups and apply a suitable pricing rule to an application category during tawarooq finance origination. The pricing rule automatically selects the best matched finance offer for the finance application from the available offers for the application category.
You need to maintain pricing groups and define the price IDs and formulae for the group using ‘Pricing Maintenance’ screen. To invoke the screen, type ‘ORDPRCMT’ in the field at the top right corner of the application toolbar and click the adjoining arrow button.

Specify the following details:

**Pricing Group**
Specify a unique name to identify the price group.

**Description**
Specify a brief description of the price group.

**Price Type**
Specify the price type associated with the price group. You can choose one of the following price types:

- Retail
- Corporate
- Ijarah
- Istisna
- Mudarabah
- Murabaha
- Musharaka
- Tawarooq

**Pricing Details**
Specify the following details.

**Price ID**
Specify a unique price ID.

This price ID can be applied to a finance at underwriting stage.
Price Description
Specify a brief description of the price ID.

Default
Check this box to set this as the default price ID for the price group that you maintain.

Formula
Click ‘Formula’ button to define the pricing rule for each price ID. You can define the formula using origination system elements in Oracle FLEXCUBE.

You can specify the following details here:

Sequence Number
The sequence number is automatically generated by the system.

Condition
The condition specified using the Elements, Functions, Operators etc. gets displayed here.

Result
Specify the result to be associated with the condition specified.

Elements
Specify the data elements to be used to define the formula for pricing details or select the element from the option list provided.

Functions
Select the mathematical function to be used to define the formula from the drop-down list provided.

Braces
Select the opening or the closing brace from the drop-down list provided, to define the pricing details formula.

Operators
Select the mathematical operator to be used to define the pricing details formula. You can select ‘+’, ‘-’, ‘*’, or ‘/’. 
Logical Operators
Select the logical operator to be used to define the pricing details formula. You can select ‘<’, ‘>’, ‘=’, ‘<>’, ‘>=’, ‘<=’, ‘AND’ or ‘OR’.

Based on the formula and the finance application category, the system automatically applies a price ID to the application. You can apply a different price ID that matches the application only at the Underwriting Stage.

If you change a price ID selected by the system and reapply a different price ID, the system changes the score of the pricing rule. The score determines the price ID to be automatically applied.

Offer
Click ‘Offer’ button to define the offers for pricing ID.

Based on the score and the finance application category, the system automatically applies a price ID to the application. You can apply a different price ID that matches the application only at the Underwriting Stage.

Sequence Number
The system displays the sequence number.

Score From
Specify the minimum score range for the offer.

Score Up To
Specify the maximum score range for the offer.

Rate
Specify the loan rate for the loan.

No of Installments
Specify the Number of Loan Installments/Schedules.

Frequency
Specify the Loan Schedule Frequency.

Units
Specify the Loan Schedule Frequency Unit/Basis.
2.9 **Stages in Tawarooq Finance Origination**

The different stages in Tawarooq process flow are designed using Oracle BPEL framework. The process of finance origination consists of several manual as well as system tasks, carried out in a sequential manner. Many users can be involved in the completion of a transaction and at each stage of the process, a user or a group of users, assigned with a task, acquire and work on the relevant transaction.

This section contains the following topics:

- Section 2.9.1, "Stages"

### 2.10 Finance Application Details Entry Stage

In this stage, the bank receives an application for a finance along with the relevant documents and financial statements from a prospective customer. If the applicant does not have an
account but intends to open one, the bank also obtains the account opening form and related documents as part of this activity.

The details related to the applicant, contact information, employment information, requested finance details, collateral details etc. are captured during this stage. Documents obtained from the applicant are uploaded and advices maintained for the stage are generated by the process after completion of the stage.

Users belonging to user role ‘CEROLE’ are authorized to perform these tasks.

This section contains the following topics:

- Section 2.10.1, "Making Application Entry"
- Section 2.10.2, "Main Tab"
- Section 2.10.3, "Capturing Customer MIS"
- Section 2.10.4, "Capturing Customer Account MIS"
- Section 2.10.5, "Details Tab"
- Section 2.10.6, "Financials Tab"
- Section 2.10.7, "Requested Tab"

- Section 2.10.9, "Collaterals Tab"
- Section 2.10.10, "Comments Tab"
- Section 2.10.11, "Capturing Document Details"

### 2.10.1 Making Application Entry

You can key-in the finance application details required in ‘Tawarooq Application Entry’ screen.
You can also invoke this screen by typing ‘ORDTAWAE’ in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

The Application Number is automatically generated by the system. You can capture the following details in the main screen:

**Application Category**
Specify the finance application category to be used or select the application category from the option list provided.

**Product Code**
Specify the Tawarooq product to be used for initiating the finance or select the product code from the option list provided.

**Branch Code**
The system displays the branch code here.

**Lead ID**
Specify the lead Id of the finance applicant or select the lead Id from the option list provided.

**Enquiry ID**
Specify an enquiry Id, if you wish to retrieve information on the finance offer selected by the customer. You can also select the ID from the adjoining option list. The list contains all the Enquiry IDs created for the customer as part of the finance simulation process.

**Application Branch**
Specify the application branch.
**Application Number**  
System displays the application number of the customer.

**User Reference Number**  
Specify the user reference number for the finance application.

**Priority**  
Select the type of priority from the drop-down list provided. The following options are available:

- Low
- Medium
- High

**Status**  
The status of the application gets displayed here.

Click ‘Default’ button to default the details related corresponding to the prospective finance customer.

2.10.2 **Main Tab**

The details corresponding to the lead Id selected gets displayed in the ‘Main’ tab, once you click the ‘Default’ button. You can modify these details if needed.

**Channel**  
Specify the channel Id for the finance. The adjoining option list displays all valid channels maintained in the system. You can select the appropriate one.

**Intermediary Group**  
Specify the intermediary group. The adjoining option list displays all valid intermediary group maintained in the system. You can select the appropriate one.

**KYC Required**  
Check this box to indicate the KYC check is required for the customer.

If you check this box, the system will evaluate a business rule. Based on that rule, the system initiates both Internal KYC and External KYC or both during application entry and verification stage.

If you do not check this box, the system then skips the Internal KYC and External KYC stages after completing the application entry and verification stages.

**Auto Decision Required**  
Check this box to enable auto decision on finance application. If you check this box, based on the applicant credit score – auto decision mapping maintained in ‘Auto Decision’ screen, the system decides whether to approve, reject, recommend approval or recommend rejection of the application. If you do not check this box, the system will not make an auto decision with regard to approval of the application.

You can set the status of this check box only during Application Entry stage.

**External Credit Check Required**  
Check this box to enable external credit bureau service for credit evaluation of the finance applicant.
If you check this box, the system will automatically initiate external credit check. If you do not check this box, the system will not initiate external credit bureau check.

The credit check initiation happens before underwriting stage.

**Applicant Details**

**Type**
Select the type of the customer from the drop-down list provided. The following options are available:
- Primary
- Co-Applicant

**Existing**
Check this box to indicate if the customer applying for the finance is an existing customer of the bank.

Line Details

Line Code
Specify the Line Code to which the liability ID is to be associated with. Allocating credit limits for the Line-Liability combination can be done. The customer(s) who fall under this Liability Code will in turn avail credit facilities under this Credit line.

By linking a Credit Line to a Liability code the customer also gets linked to the Credit Line. This is true because a Liability code has been assigned to every credit seeking customer and the credit facilities granted to the customer are defined and tracked against this code.

Line Serial
Each time a customer - line code combination is specified, Oracle FLEXCUBE ELCM system assigns a unique serial number to the combination. This serial number is unique to the line-liability code combination. Thus, for every new record entered for a Line-Liability combination, a new serial number is generated. The Line - Liability - Serial number forms a unique combination.

Line Branch
Select the line branch code from the adjoining option list.

Main Line Code
Specify the main line code. The adjoining option list displays all valid main line codes maintained in the system. You can choose the appropriate one.

Users belonging to user role ‘CMROLE’ are authorized to perform these tasks.

The approver can send the application back to the previous stage if the information provided is not adequate or choose to cancel it if the information captured is not satisfactory.

If the application details are verified successfully, the approver can proceed with the processing of the application by selecting ‘PROCEED’ as the Outcome. The approver can select ‘RETURN’ to return the process to previous stage for data correction or ‘CANCEL’ to terminate the process.
On successful completion, a message stating that the task is successfully completed gets displayed.

To acquire the next stage, you need to go to the ‘Task’ menu and select ‘Assigned’ under ‘Standard’ option. All tasks that have been successfully completed are listed in the right side of the screen. Select the checkbox against your ‘Workflow Ref No’ and click ‘Acquire’ button at the top of the screen to acquire the next stage of the task.

The system displays the information message as "...xxx Acquire Successful" on successful acquisition of the task.

Click ‘Ok’ to proceed to the next stage. To select the acquired task for the next stage, select ‘Acquired’ under ‘Standard’ option in the ‘Task’ menu. All the tasks that have been successfully acquired are displayed in the right side of the screen. Search for your workflow reference number and click the ‘Workflow Ref No’ to open ‘Tawarooq Document Verification’ screen.

If you have checked the option ‘Auto Decision Required’ during Application Entry stage, the based on the applicant credit score – auto decision mapping maintained in ‘Auto Decision’ screen, the system decides whether to approve the finance or not. The system makes one of the following decisions in that case:

- Auto Approved
- Recommend Approval
- Recommend Reject
- Auto Rejected

If the auto decision made by the system is ‘Auto Approval’, you can skip the finance approval stage.

If the auto decision made by the system is ‘Recommend Approval’ or ‘Recommend Reject’, you need to manually verify and confirm the decision at this stage.

If the auto decision made by the system is ‘Auto-Reject’ then the application moves back to the application entry stage.

If any price group is associated with the application category, then the system will apply auto pricing after proceeding the Application Entry stage by considering the default ‘Price ID’ linked to the pricing group. Further, based on the selected finance offer, the finance is applied and schedules are defaulted. However, at underwriting stage, the underwriter may proceed or re-apply the finance by selecting a different finance offer.

Any advices maintained for this stage are generated after the completion of the stage.

### 2.17 Message Generation

In this stage generation of offer letter and sending the contractual agreements takes place.

### 2.18 Document Verification Stage

In the Document Verification stage, the documents captured in the previous stages are verified. It is ensured that all documents in the checklist maintained are obtained from the customer. In this stage, the application and applicant information captured as part of the previous stages undergoes a final verification.

Users belonging to user role ‘CMROLE’ are authorized to perform these tasks.
You can key-in the Finance application details required in ‘Tawarooq Document Verification’ screen.

The verifier can choose to send the application back to the previous stage if the information provided is not adequate or choose to cancel it if the information captured is not satisfactory.

If the applicant, application and document details are verified successfully, the verifier can proceed with the processing of the application by selecting ‘PROCEED’ as the Outcome. The verifier can select ‘RETURN’ to return the process to underwriting stage for data correction or ‘CANCEL’ to terminate the process.

On successful completion, a message stating that the task is successfully completed gets displayed. The customer, customer account, collateral etc. are created in the system on completion of the Document verification stage.

### 2.19 Finance Application Details Upload

In this final stage, the finance and collateral are created. Customer is also created if the applicant is a new customer. Customer account is also created if information is captured for the same.

The system creates a Customer / Finance / Collateral / Facility / Account in Oracle FLEXCUBE with details captured from previous stages. A user in manager level role handles this stage. The creation of customer, collateral and finance can be verified in ORDTWMCU screen.
If everything is found acceptable, select the action ‘PROCEED’ in the textbox adjoining the ‘Audit’ button in this screen and save the record by clicking the ‘Save’ icon in the tool bar. The following screen will be displayed.

### 2.20 Sale Confirmation Stage

In this stage the sale confirmation of the underlying assets generate the Tawaroq origination through ‘Tawaroq Sale Confirmation’ screen.

You can maintain the following details:

- **Branch Code**
  The system displays the branch code.

- **Account Number**
  The system displays the account number.

- **Sale Date**
  In this field the current application date will get defaulted.

- **Remarks**
  You can specify the remarks for the sale confirmation. This field is applicable only for the accounts under the product whose ‘Sale Confirmation Required’ option is checked in the ‘Preference’ screen.

If everything is found acceptable, select the action ‘PROCEED’ in the textbox adjoining the ‘Audit’ button in this screen and save the record by clicking the ‘Save’ icon in the tool bar. The following screen will be displayed.

### 2.21 User Acceptance Stage

In this stage based on the outcome of the previous stage, the sale confirmation of Tawaroq origination in the next stage.
Manual disbursement is done for the accounts created with a manual disbursement product. For accounts created with auto disbursement products, disbursement occurs on save of document verification stage.

The system creates a task ‘Manual Liquidation’ in the ‘Reject’ task list.

### 2.22 Disbursement of *Tawaroq* Stage

In this stage based on the outcome of the previous stage, the disbursement of *Tawaroq* for the underlying asset or moving the asset to inventory is decided.

If sale is confirmed, the system will trigger the disbursement of *Tawaroq* based on the value date.

If the sale is rejected, the system will display the asset detail capture detail.
2.23 **Manual Liquidation Stage**

Manual Liquidation is possible only if disbursement is done.

If everything is found acceptable, select the action ‘PROCEED’ in the textbox adjoining the ‘Audit’ button in this screen and the process is completed. Otherwise the process displays the following screen.

If everything is found acceptable, select the action ‘PROCEED’ in the textbox adjoining the ‘Audit’ button in this screen and save the record by clicking the ‘Save’ icon in the tool bar. The following screen will be displayed.

2.24 **Stages in Tawarooq Finance Origination using Oracle BPMN Framework**

Tawarooq process flow uses Oracle BPMN framework also with multiple human tasks for workflow stages. The capture and enrichment of information in multiple steps can be dynamically assigned to different user roles, so that multiple users can take part in the transaction. Oracle Business rules are used for dynamic creation of multiple approval stages.
