1. Setting up RestService for Oracle FLEXCUBE

1.1 Introduction

This chapter explains the steps for setting up the Rest Application for Oracle FLEXCUBE.

1.2 Setting up RestService RESTEJB Application

This section explains the methods of setting up Rest EJB Application.

1.2.1 Prerequisites

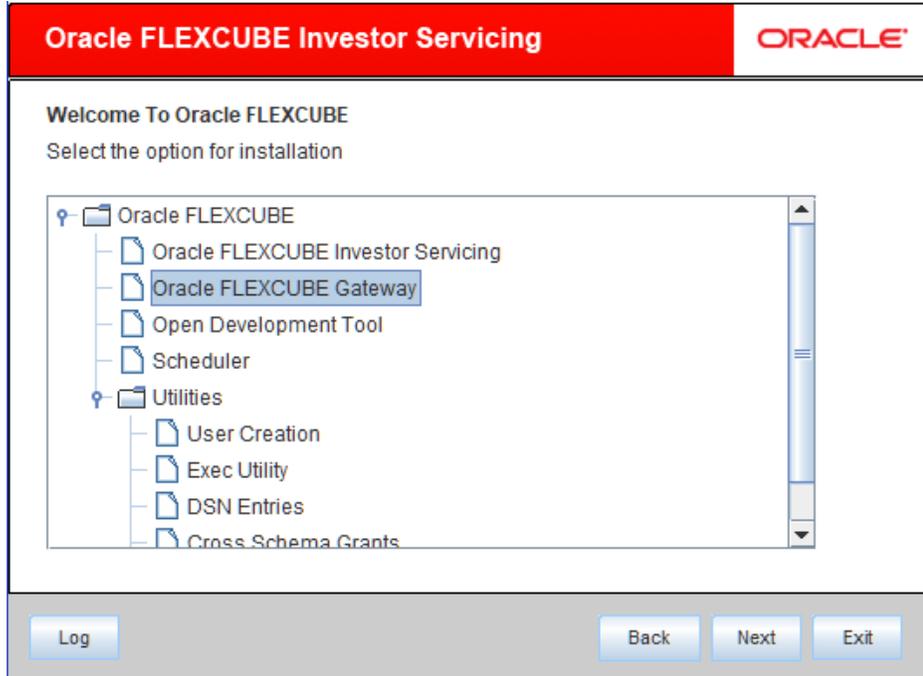

You need to create the following RestEJB property files before building the application:

- GW_RESTEJB_Prop.properties
- gw_restejb_logger.properties

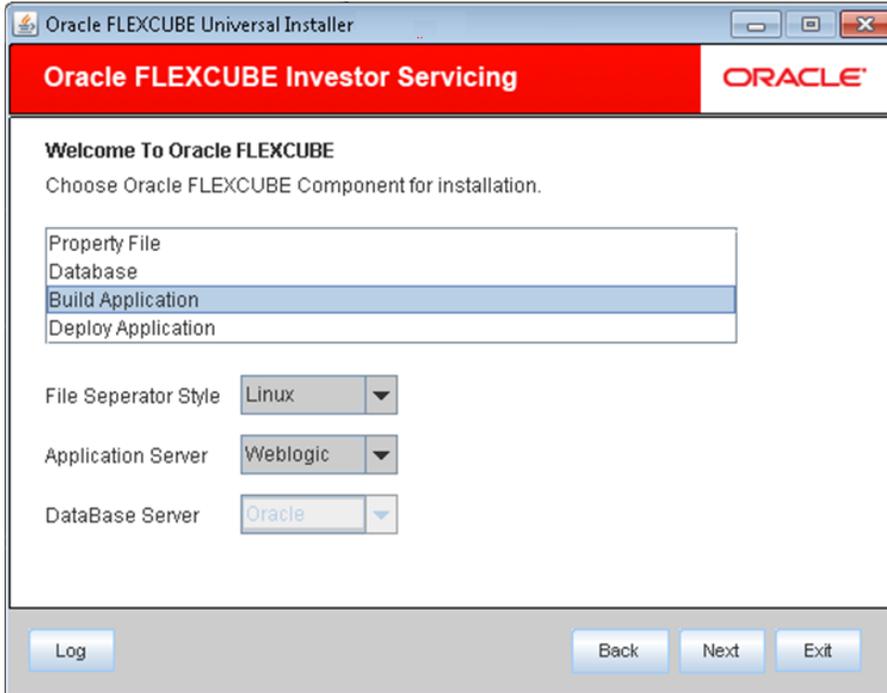

1.2.2 Building EAR File

In order to build EAR file for RestEJB Application, you need to follow the steps given below:

1. Launch Oracle FLEXCUBE Universal Installer. The welcome screen is displayed.
2. Click 'Next' the following screen will be displayed.

Choose the Application 'Gateway'. Click 'Next'. The following screen is displayed:

3. Specify the following details:

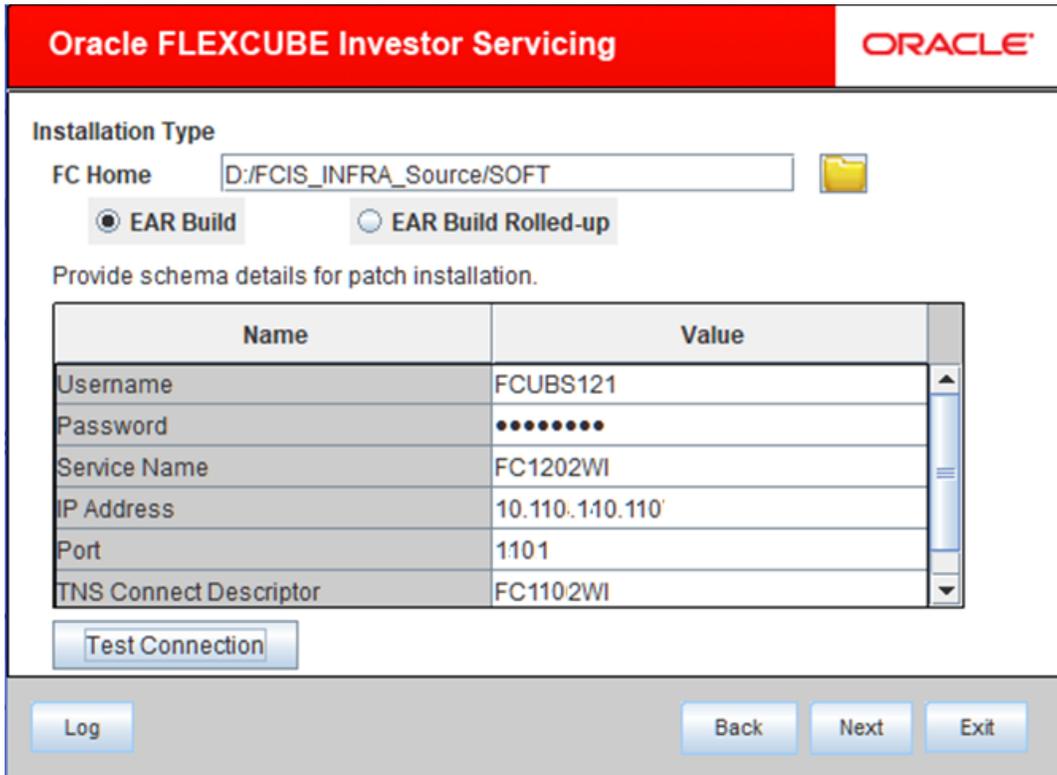

File Seperator Style

Specify the style of file separator (e.g Linux or Windows). Choose the appropriate one from the drop-down list.

Application Server

Specify the application server in which you are creating the property file. Choose the appropriate one from the drop-down list.

4. Choose 'Build Application'. Click 'Next'. The following screen is displayed:
5. This is the FC HOME folder that needs to be set. Also, it should point to SMS schema. Those versions less than or equal to the current environment are allowed.

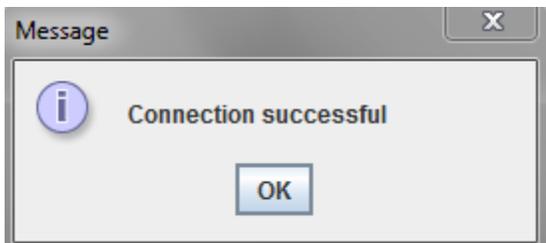

The screenshot shows the Oracle FLEXCUBE Investor Servicing installation wizard. The title bar is red with the Oracle logo. The main window is titled "Installation Type". It features a text box for "FC Home" containing the path "D:/FCIS_INFRA_Source/SOFT" and a folder icon. Below this are two radio buttons: "EAR Build" (selected) and "EAR Build Rolled-up". A section titled "Provide schema details for patch installation." contains a table with the following data:

Name	Value
Username	FCUBS121
Password	●●●●●●●●
Service Name	FC1202WI
IP Address	10.110.110.110
Port	1101
TNS Connect Descriptor	FC1102WI

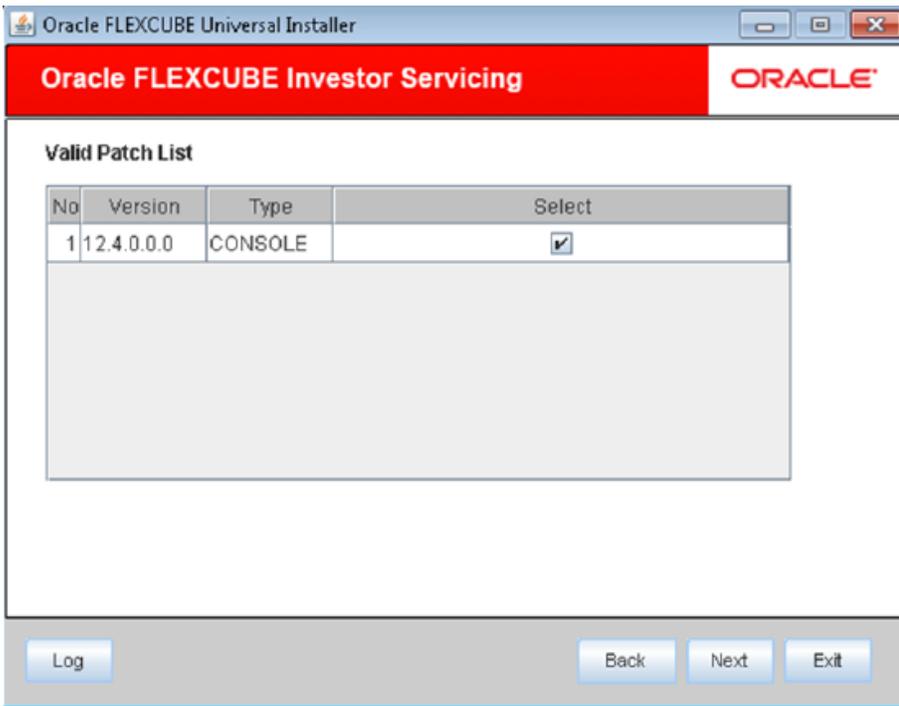

Below the table is a "Test Connection" button. At the bottom of the window are buttons for "Log", "Back", "Next", and "Exit".

Click 'Test Connection'.

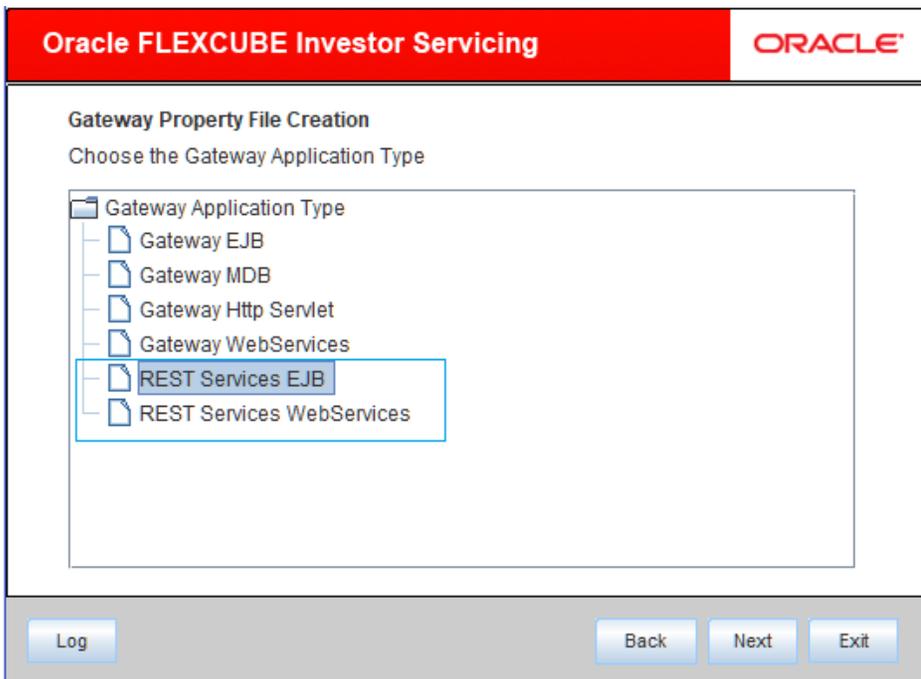

On Successful connection the below message will be displayed.

Click OK. Click 'Next' to navigate to next page

Click Next.

- Choose 'REST Service EJB'. Click 'Next'. Verify all the library are available.

8. Click Next. Provide the property file for RestEJB

The screenshot shows the 'Build Process' screen in the Oracle FLEXCUBE Investor Servicing application. The header includes the text 'Oracle FLEXCUBE Investor Servicing' and the 'ORACLE' logo. The main content area is titled 'Build Process' and contains the instruction 'Specify the Property File path.' Below this, there are three input fields: 'Load Property File' with a folder icon, 'Symmetric key', and a larger text area with the placeholder text 'Provide the property file path to be included.' At the bottom of the screen, there are four buttons: 'Log', 'Back', 'Next', and 'Exit'.

This screenshot shows the same 'Build Process' screen as above, but with a 'Select File' dialog box open over it. The dialog box is titled 'Select File' and shows the 'Look In:' path as 'config'. The file list contains several files, with 'GW_RESTEJB_Prop.properties' selected. The 'File Name:' field at the bottom of the dialog contains 'GW_RESTEJB_Prop.properties' and the 'Files of Type:' dropdown is set to 'All Files'. The 'Select' and 'Cancel' buttons are visible at the bottom right of the dialog box.

The following screen is displayed:

Oracle FLEXCUBE Investor Servicing ORACLE

333 files in INFRA Copied

Copy...

Log Back Next Exit

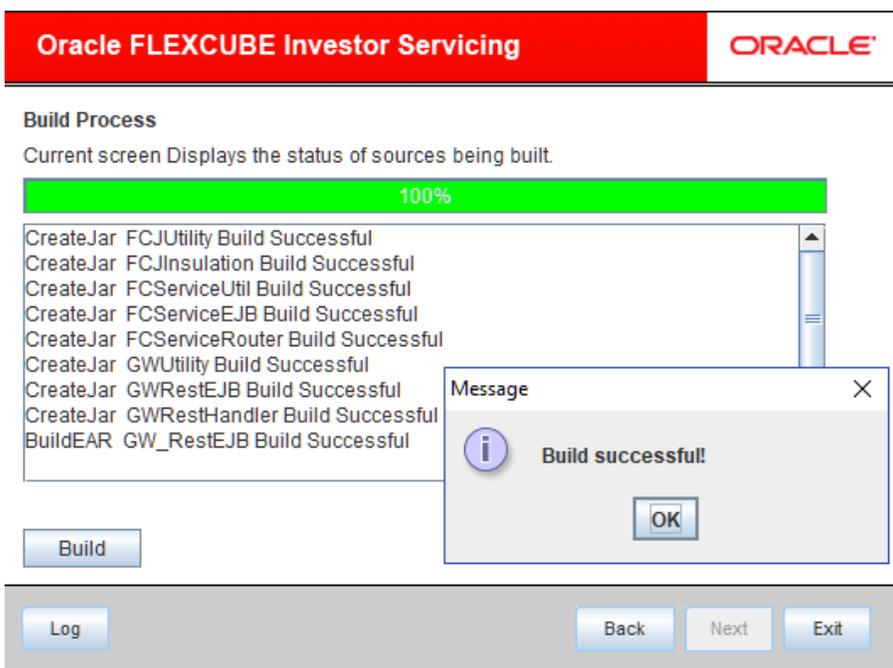

10. Click 'Copy' button. The installer copies the files.

11. Click 'Next'. The following screen is displayed.

12. Click 'Compile' Button.

13. Click "Next". The following screen is displayed.

14. Click 'Build' button to start the build process. The installer builds the source files.

This completes the EAR file generation process. The EAR file will be saved to the destination directory.

2. Setting up Rest Service WebService Application

This section explains the methods of setting up Rest Service Webservice Application.

2.1.1 Prerequisites

You need to create the following Rest Service Webservice property files before building the application:

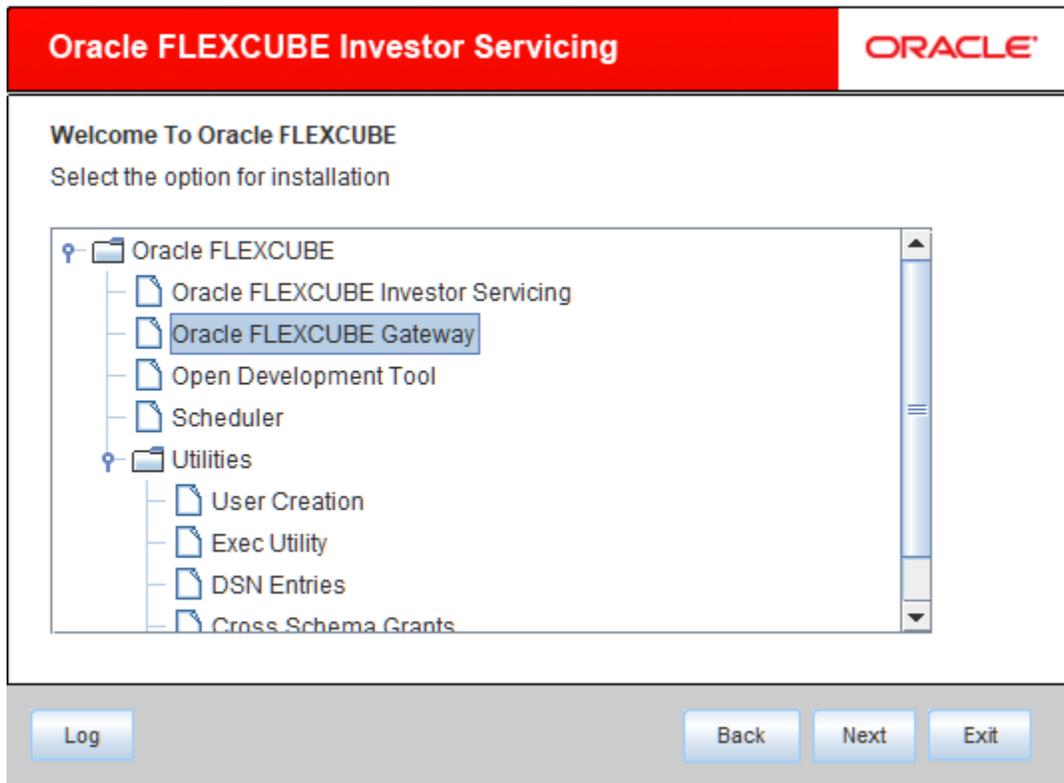

- GW_REST_Prop.properties
- gw_rest_logger.properties

For details, refer to 'RestService_Property_File_Creation'.

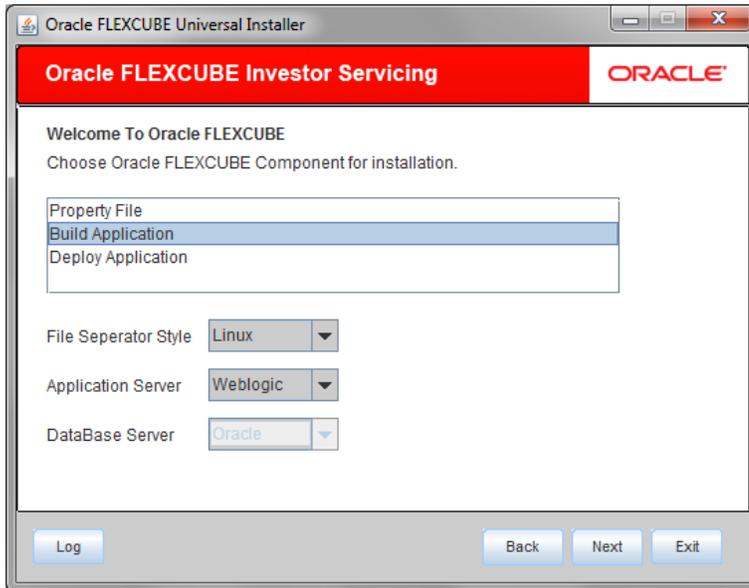

2.1.2 Building EAR File

In order to build EAR file for Rest Service Webservice application, you need to follow the steps given below:

1. Launch Oracle FLEXCUBE Universal Installer. The welcome screen is displayed.

Choose the Application 'Oracle FLEXCUBE Gateway'. Click 'Next'. The following screen is displayed:

2. Specify the following details:

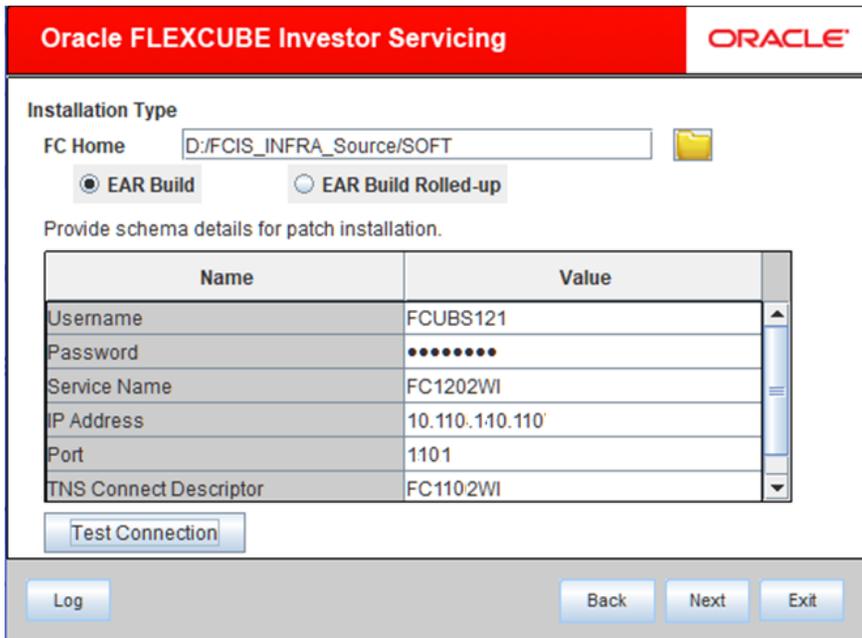

File Separator Style

Specify the type of file separator (e.g: Linux or Windows). Choose the appropriate one from the drop-down list. You also need to specify the version of the selected operating system.

Application Server

Specify the application server in which you are creating the property file. Choose the appropriate one from the drop-down list.

Choose 'Build Application'. Click 'Next'. The following screen is displayed

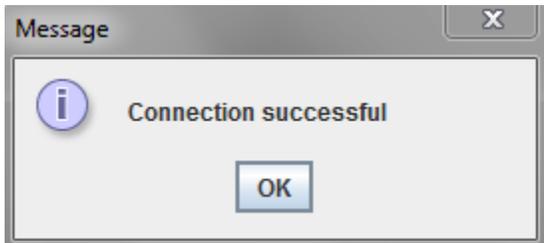

The screenshot shows the Oracle FLEXCUBE Investor Servicing installation wizard. The title bar is red with the Oracle logo. The main window has a white background. At the top, it says "Oracle FLEXCUBE Investor Servicing" and "ORACLE". Below that, the "Installation Type" section has a text box for "FC Home" containing "D:/FCIS_INFRA_Source/SOFT" and a folder icon. There are two radio buttons: "EAR Build" (selected) and "EAR Build Rolled-up". Below this, it says "Provide schema details for patch installation." and a table with columns "Name" and "Value".

Name	Value
Username	FCUBS121
Password	••••••••
Service Name	FC1202WI
IP Address	10.110.110.110
Port	1101
TNS Connect Descriptor	FC1102WI

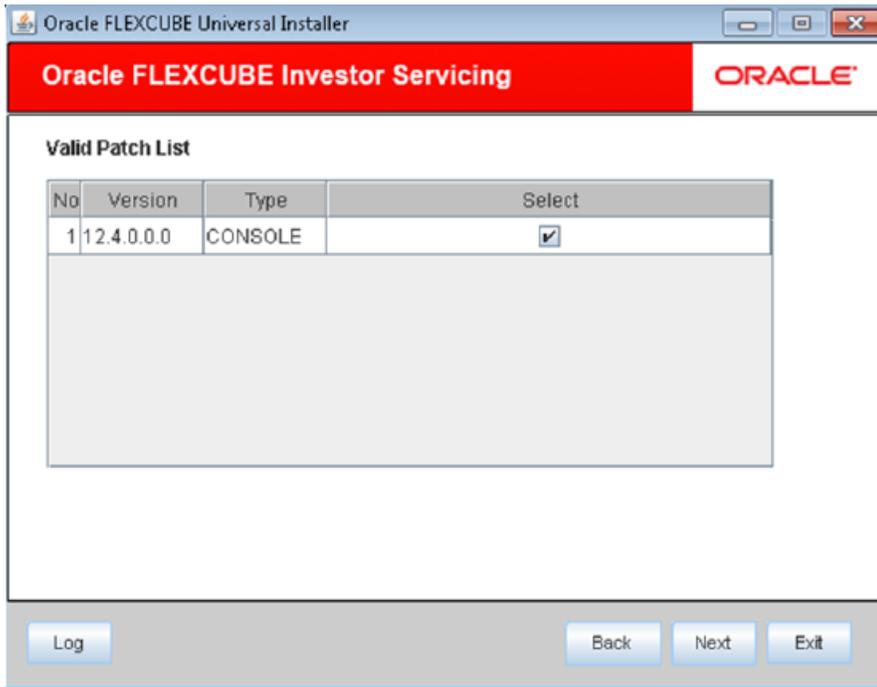

Below the table is a "Test Connection" button. At the bottom of the window are buttons for "Log", "Back", "Next", and "Exit".

Choose FC home and specify the SMS schema details.

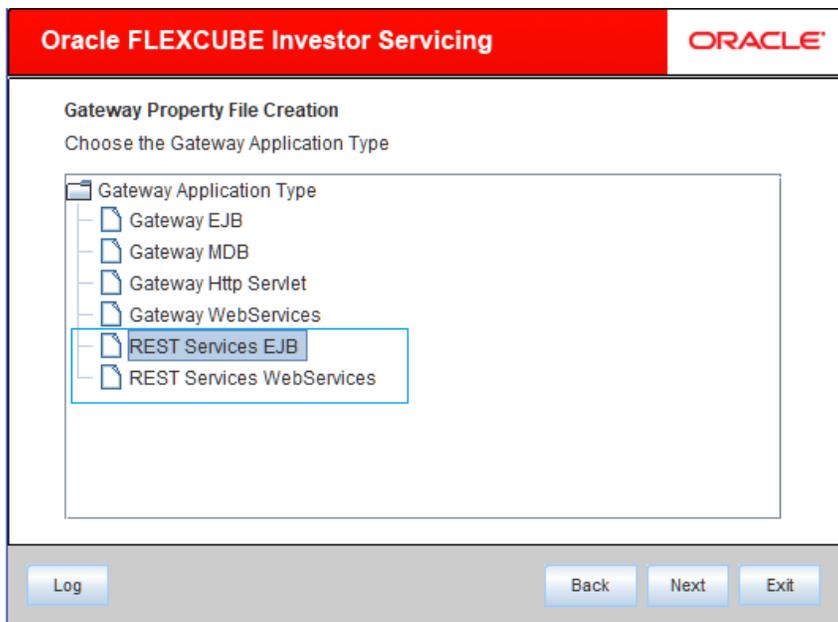

Click 'Test Connection'. On Successful connection the below message will be displayed.

Click OK. Click 'Next' to navigate to next page

Choose patches from list and click 'Next'. The following screen is displayed:

3. Choose 'Rest Service WebService'. Click 'Next'.

Oracle FLEXCUBE Investor Servicing **ORACLE**

Build Process
This screen lists the JARS that are required for compilation

No.	Name	Location	Available

Log Back Next Exit

4. The following screen is displayed: Click 'Next' the following screen will be displayed.

Oracle FLEXCUBE Investor Servicing **ORACLE**

Build Process
Specify the destination directory, application name and context.

Destination Directory 

Application Name

Log Back Next Exit

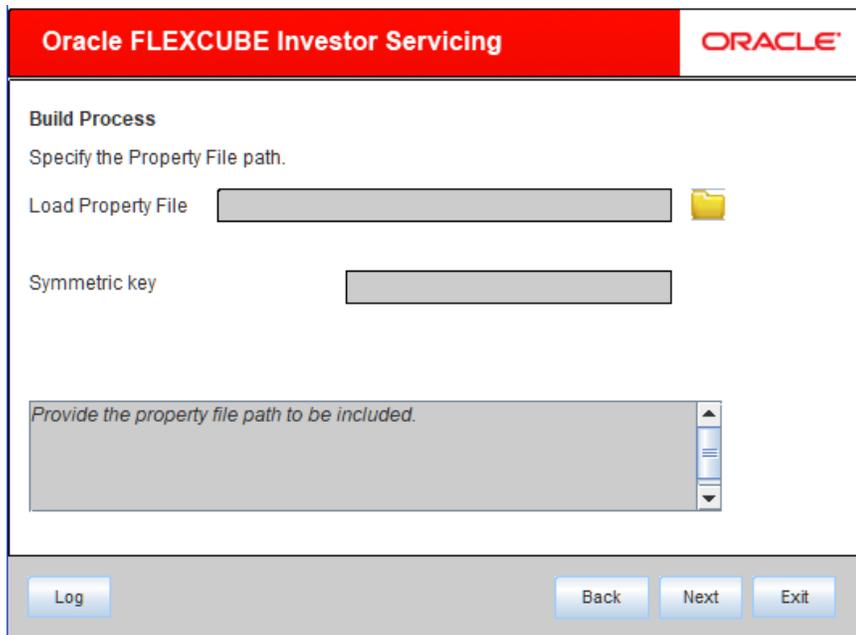

5. Specify the following details:

Destination Directory

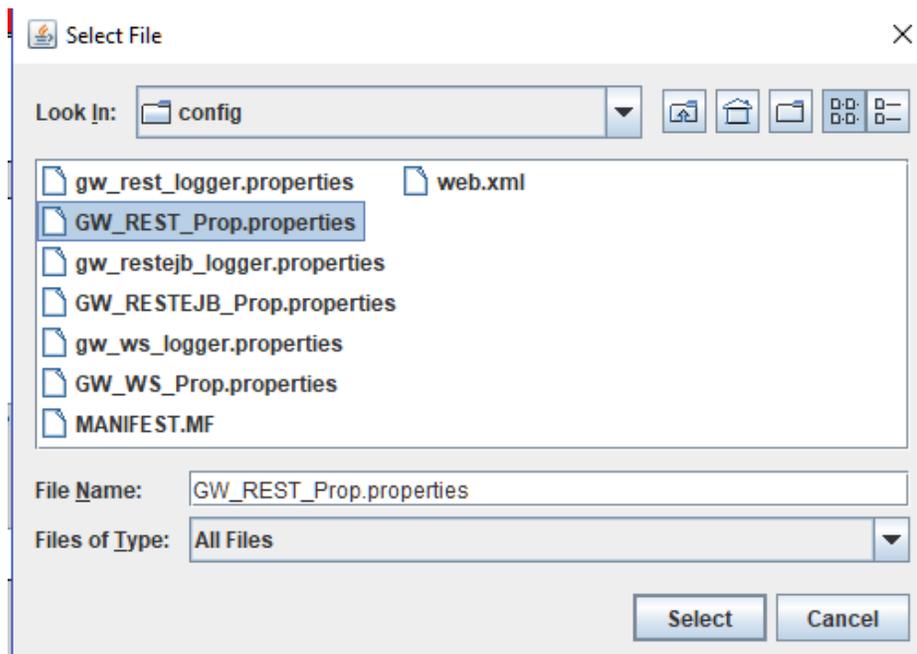

Specify the location of the destination directory. The source files from the software will be copied to this location.

Eg: D:\

Once you have specified the details, click 'Next' to continue.

The dialog box is titled "Oracle FLEXCUBE Investor Servicing" and features the Oracle logo. It is divided into a "Build Process" section and a footer with navigation buttons. The "Build Process" section includes a label "Specify the Property File path." followed by a "Load Property File" label, a text input field, and a folder icon. Below this is a "Symmetric key" label and another text input field. A large text area at the bottom of the section contains the instruction "Provide the property file path to be included." and a vertical scrollbar. The footer contains four buttons: "Log", "Back", "Next", and "Exit".

The "Select File" dialog box shows the "config" directory. The file list includes "gw_rest_logger.properties", "web.xml", "GW_REST_Prop.properties" (which is selected), "gw_restejb_logger.properties", "GW_RESTEJB_Prop.properties", "gw_ws_logger.properties", "GW_WS_Prop.properties", and "MANIFEST.MF". The "File Name" field contains "GW_REST_Prop.properties" and the "Files of Type" dropdown is set to "All Files". "Select" and "Cancel" buttons are at the bottom right.

The following screen is displayed:

The screenshot shows a software window titled "Oracle FLEXCUBE Investor Servicing" with the Oracle logo in the top right corner. The main area is titled "Build Process" and contains the instruction "Specify the Property File path." Below this, there are two input fields: "Load Property File" with the text "ice01jun\restlog\config\GW_REST_Prop.properties" and a folder icon to its right, and "Symmetric key" with the text "oraclefinancials". At the bottom of the main area is a large text box with the placeholder text "Provide the property file path to be included." and a vertical scrollbar on the right. A footer bar contains four buttons: "Log", "Back", "Next", and "Exit".

6. Specify the following details:

Centralized Property File

To modify an existing property file, you need to select the exact property file by clicking on the folder icon.

Note: Do not load the Logger.properties file. The installer will load that file automatically based on the property file.

- Click 'Next'. The following screen is displayed. We can select all the services or we can select an particular service

This completes the EAR file generation process. The EAR file will be saved to the destination directory..

3. Post Building Activity

3.1 Introduction

This section introduces you to the activities to be carried out after setting up the Rest applications.

3.1.1 RestService Configuration

Rest application looks for the required files inside the 'XSD Path' and 'Logger File' provided at the time of Gateway Property creation.

Refer Rest Property file generation document for details.

You need to maintain the following files in XSD Path and Logger Path:

Path	Files
Rest EJB Logger Path	Logger path should contain the gateway property files generated by the Installer. For instance, for RestEJB application, the installer generates the files 'gw_restejb_logger.properties' and 'GW_RESTEJB_Prop.properties'. While creating the property file if you specify the 'Logger Path' as 'D:/GW_EJB/config/gw_restejb_logger.properties', then you need to place both the files 'gw_restejb_logger.properties' and 'GW_RESTEJB_Prop.properties' inside the folder 'D:/GW_EJB/config'.
Rest WebService Logger Path	Logger path should contain the gateway property files generated by the Installer. For instance, for RestEJB application, the installer generates the files 'gw_rest_logger.properties' and 'GW_REST_Prop.properties'. While creating the property file if you specify the 'Logger Path' as 'D:/GW_EJB/config/gw_rest_logger.properties', then you need to place both the files 'gw_restejb_logger.properties' and 'GW_REST_Prop.properties' inside the folder 'D:/GW_EJB/config'.

3.1.2 Deployment Using Oracle WebLogic Application Server

For details on the manual deployment using Oracle WebLogic Application Server, refer to the chapter 'Link for RESTService_Deployment_Weblogic.doc to be provided'

3.1.3 Deployment Using IBM WebSphere Application Server

For details on the manual deployment using IBM WebSphere Application Server, refer to the chapter 'Link for RESTService_Deployment_WebSphere.doc to be provided'.
