1. Internal Handoff Grants Utility

1.1 Introduction

Fund Handoff and Dividend Handoff require grant to populate Fund Information and Dividend Information from AMC to Distributor Schema. To enable Internal Handoff feature, below steps to be followed to provide grants from Distributor LOB to AMC LOB Schema.

This chapter explains the steps to execute internal handoff grants using Oracle FLEXCUBE Investor Servicing Installer.

1.2 Setting up Cross Schema Entries

In order to execute cross schema scripts, follow the steps given below.

Start Oracle FLEXCUBE Investor Servicing Installer.

### Prerequisites

Please specify the JDK and Oracle Home path.

- **JDK Path**: `c:/Software/Java/jdk1.8.0_91`
- **Oracle Home**: `c:/Software/Oracle12c/product/12.1.0/dbhome_1`
- **Application Server Home**: `c:/Software/Weblogic12211/wls/server`
- **Application Server Location**: Local

Specify the following details:

**JDK Path**

Specify the location of the JDK. You can use the directory button to browse to the JDK location.

**Oracle Home**

Specify the location of the Oracle Home installation. You can use the directory button to browse to the location.
Application Server Home

Specify the location of the application server.

**Note:** In case any of the selected directories is incorrect, the Installer will display an appropriate error message. In that case, you need to correct the directory path and proceed.

Click ‘Next’. The following screen is displayed.
Select ‘Internal Handoff Grants’ and click ‘Next’. The following screen is displayed.

Specify the following schema details. This is the Schema on which scripts of other schema are to be executed.

**Target Schema**
Specify target schema name for grants to be executed.

**User Name**
Specify the user name to access the schema.

**Password**
Enter the schema password.

**Service Name**
Provide service name of Database.

**TNS Connect Descriptor**
Specify a valid connect string that contains the details for database connectivity.

**IP Address**
Specify the IP address of the system where the database schema is installed.

**Port**
Specify the port number.

Once you have entered the details, you can test the database schema connection using ‘Test Connection’ button.
Note:
- If the connection is established, the installer displays a message ‘Connection Successful’.
- If there is an error in establishing the connection, the system displays the message ‘Invalid DB Credentials’.
- If the TNS entry is not proper, the installer displays the message ‘TNS entries are not proper’.

After testing the connection successfully, click ‘Next’. The following screen is displayed.

Click Execute to execute the Internal Handoff Grants.
