1. ALM21-Agriculture Plan Code Maintenance

Agricultural Plan Master stores values for various Agriculture module specific attributes. Functional behavior of an Agri Loan Product depends on the Agri plan attached to the product. This plan is attached to an agriculture product and is responsible for behavior of various functionalities supported for agricultural loans.

To add plan code

1. Select the **Add** mode.
2. Type the plan code and plan serial number and press the **<Tab>** key.
3. Enter the relevant information and click the **Ok** button.
4. The system displays the message "Record Added...Authorisation Pending...Click Ok to Continue".

To modify plan code

1. Select the **Modify** mode.
2. Type the plan code and press the **<Tab>** key or select it from the pick list.
3. Modify the relevant information and click the **Ok** button.
4. The system displays the message "Record Modified...Authorisation Pending...Click Ok to Continue".

To delete plan code

1. Select the **Delete** mode.
2. Type the plan code and press the **<Tab>** key or select it from the pick list.
3. Click the **Ok** button.
4. The system displays the message "Record Deleted...Authorisation Pending...Click Ok to Continue".

To cancel plan code

1. Select the **Cancel** mode.
2. Type the plan code and press the **<Tab>** key or select it from the pick list.
3. Click the **Ok** button.
4. The system displays the message "Record Cancelled...Click Ok to Continue".

To amend plan code

1. Select the **Amend** mode.

2. Type the Plan Code and press the **<Tab>** key or select it from the pick list.
3. Amend the relevant information and click the **Ok** button.
4. The system displays the message "Record Amended...Authorisation Pending...Click Ok to Continue".

To authorize plan code

1. Select the **Authorize** mode.
2. Type the plan code and press the **<Tab>** key or select it from the pick list.
3. Click the **Ok** button.
4. The system displays the message "Record Authorized...Click Ok to Continue".

To view plan code

1. Select the **Inquiry** mode.
2. Type the plan code and press the **<Tab>** key or select it from the pick list.
3. The system displays the document plan code details.

2. LNM11 - Product Master Maintenances

Loan product master encapsulates all the attributes of the product introduced by the bank. Once the product is defined, you can open new accounts under the same product. The account pertaining to a product automatically inherits the specified product attributes though changes can be made at the account level to offer special privileges to the customer.

Using this option you can set up different types of products at the bank level by defining various product parameters such as interest processing, Penalty Interest, Repayment Schedule, Disbursement parameters, etc. All the products are uniquely identified in the system by means of a product code.

Definition Prerequisites

- BAM44 - Reminder Plan Maintenance
- ACM02 - Asset Classification Preferences
- ACM05 - Asset Classification Plan Maintenance
- BA035 - Document Plan Code Maintenance
- LNM22 - Loan Plan Deduction Maintenance
- ALM21-Agriculture Plan Code Maintenance

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add loan product details

1. Type the fast path **LNM11** and click **Go** or navigate through the menus to **Global Definitions > Loan > Product Master Maintenances**.
2. The system displays the **Product Master Maintenances** screen.

Add On Loan	<p>[Optional, Check Box]</p> <p>Select the Add On Loan check box to define a syariah type of loan.</p> <p>Note: This field is not applicable for Agricultural Loan</p>
Backdated Account Open Allowed	<p>[Optional, Numeric, Three]</p> <p>Type the threshold number of days upto which the loan accounts can be opened with back date under this product.</p> <p>Note: This field is not applicable for Agricultural Loan</p>

Field Name	Description
Propagate Rate for PMI	<p>[Optional, Check Box]</p> <p>Select the Propagate Rate for PMI checkbox to apply regular rate to the PMI¹ stage.</p> <p>Note: This field is not applicable for Agricultural Loan</p>
Allow Maturity Extn if Arrears	<p>[Optional, Check Box]</p> <p>Select the Maturity Extn if Arrears checkbox to extend the loan account maturity date beyond the existing FCR maturity date.</p> <p>Note: This field is not applicable for Agricultural Loan</p>
Compounding rate method	<p>[Mandatory, Drop Down]</p> <p>Select the rate from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Account Rate • Index Rate <p>Note: This field is not applicable for Agricultural Loan</p>
Penalty Rate Basis	<p>[Mandatory, Drop-Down]</p> <p>Select the penalty rate from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Rate Plan-This signifies the Loans Product Rates Plan (FP: LN060) to be used for penalty for loan. The base rate used for penalty interest computation will be the index code applicable as per the Loans Product Rates Plan (FP: LN060) (linked through option Schedule Types (FP: LNM98). The variance defined in the Account Variance Maintenance (FP: LN079) for penalty type of rate will be applied over this index rate to derive the net penalty rate. Net Penalty rate = index rate (for penalty) +/- penalty variance. • Net Account Rate - The net effective rate of the loan (regular rate) will be used as the base for penalty rate. The variance defined in the Account Variance Maintenance (FP: LN079) for penalty type of rate will be applied over the net effective rate of the loan to derive the net penalty rate. Change in any factor that constitute the regular rate of interest, will trigger a recalculation of penalty interest rate if the penalty rate is derived using net account rate. Once the option is chosen and record is authorized, the option cannot be modified during the life of the loan account. So Net Penalty rate = Net effective account rate (regular rate) +/- penalty variance.

¹(Post Maturity Interest)

Field Name	Description
Disallow PMI Interest	<p>[Optional, Check Box]</p> <p>Select Disallow PMI Interest check box to suppress the calculation of PMI interest for all the loan accounts opened under the product.</p> <div style="border: 1px solid black; padding: 5px;"> <p>Note: The PMI index will not be charged even if a valid rate is maintained in Rate chart for loan accounts during the PMI stage. This option cannot be modified once the record is authorized.</p> </div>
Provision Plan Code	<p>[Mandatory,Picklist]</p> <p>Select the provision plan code from the picklist.This defined the an expense set aside as an allowance for bad loans.</p>

Minimum Interest Variance	<p>[Optional, Numeric, Two, Five]</p> <p>Type the minimum interest variance allowed on the interest rate for the product.</p> <p>The account level interest variance should be within the value defined at the product level.</p> <p>For example, if the minimum variance is set as - 2%, system will display an error message when the interest variance at the account level is set as – 3%.</p> <p>Once added, this field cannot be modified or amended.</p>
Maximum Interest Variance	<p>[Optional, Numeric, Two, Five]</p> <p>Type the maximum interest variance allowed on the interest rate for the product.</p> <p>The account level interest variance should be within the value defined at the product level.</p> <p>For example, if the maximum variance is set as 3%, system will display an error message when the interest variance at the account level is set as 4%.</p> <p>Once added, this field cannot be modified or amended.</p>
Minimum Installment	<p>[Mandatory, Numeric, 11, Two]</p> <p>Type the minimum installment amount that can be accepted as an installment for an account opened under the product.</p>
Maximum Installment	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the maximum amount that can be accepted as an installment for an account opened under the product.</p>

²(Interest Only Installment)

Field Name	Description
Minimum Grace Period (in Days)	<p>[Optional, Numeric, Three]</p> <p>Type the minimum grace period in months.</p> <p>This field is enabled if the loan product type is Islamic. The grace period at the account level should be greater than the minimum grace period defined here.</p>
Maximum Grace Period (in Days)	<p>[Optional, Numeric, Three]</p> <p>Type the maximum grace period in months.</p> <p>The grace period at the account level should be less than the maximum grace period defined here.</p>
Floor Rate	<p>[Mandatory, Numeric, Three, Ten]</p> <p>Type the floor rate.</p> <p>It is the minimum interest rate that is applicable to a product. The value entered in this field should not be less than or equal to 100</p>
Ceiling Rate	<p>[Mandatory, Numeric, Three, Ten]</p> <p>Type the ceiling rate.</p> <p>It is the variance from benchmark rate in percentage term that can be added to benchmark rate to charge maximum possible rate to the loan account. The value entered in this field should not be less than or equal to 100</p>
Offer Validity Period	<p>[Mandatory, Numeric, Three, Drop-Down]</p> <p>Type the offer validity period in days/months/years.</p> <p>Offer validity period is the stage where the bank makes an offer to the customer and the customer accepts the terms and conditions of the loan, before the loan offer expires. Offer validity period starts after the offer letter is printed. This period should be less than the product expiry date.</p>
Acceptance Validity Period	<p>[Mandatory, Numeric, Three, Drop-Down]</p> <p>Type the acceptance validity period in days/months/years.</p> <p>Acceptance validity period starts from the date the customer has accepted the offer. The first disbursement on the account has to happen before the expiry of Acceptance Validity period calculated from the Offer acceptance date.</p> <p>The Customer Acceptance (Fast Path: 5597) option records this particular event for an application.</p>
Minimum Split Loan Amount	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the minimum loan amount beyond which the original loan account cannot be split.</p> <p>It is the minimum amount that should be left in the loan account after split.</p>

Defaults

Field Name	Description
Document Plan Code	<p>[Optional, Pick List]</p> <p>Select the document plan code from the pick list.</p> <p>A document plan code is defined in the Document Plan Code Maintenance (Fast Path: BA035) option.</p>
Statement Frequency	<p>[Mandatory, Drop-Down]</p> <p>Select the statement frequency from the drop-down list.</p> <p>Statement frequency is the frequency at which the account statement is sent to the customer.</p> <p>The options are:</p> <ul style="list-style-type: none"> • None • Monthly • BiMonthly • Quarterly • Halfyearly • Yearly <p>Combined statements for multiple accounts are defined in the Combined Statement Plan (Fast Path: C1162) option.</p>
Pass Contingents	<p>[Optional, Check Box]</p> <p>Select the Pass Contingents check box to pass the contingent entries. It allows the user to select the frequency of the contingent entries.</p>
Contingent Entry Frequency	<p>[Conditional, Drop-Down]</p> <p>Select the contingent entry frequency from the drop-down list.</p> <p>It is the frequency of executing the contingent entries.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Daily • Monthly <p>This field is enabled only if the Pass Contingents check box is selected.</p>
Security	

Field Name	Description
Type Of Security Required	<p>[Optional, Drop-Down]</p> <p>Select the type of security from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Security - A security has to be linked to the account • Guarantor - A customer has to be linked to the account with 'GUA' relationship • None - Allows unsecured loans • Co-Borrower - The co-borrower can be linked to the loan account as a type of security
Collateral Review Frequency	<p>[Optional, Drop-Down]</p> <p>Select the collateral review frequency from the drop-down list.</p> <p>It is the frequency at which the collateral offered against the loan should be reviewed. A report will be generated comparing the collaterals provided against a credit on the account.</p> <p>The options are:</p> <ul style="list-style-type: none"> • None • Monthly • Bi-Monthly • Quarterly • Half-Yearly • Yearly
Exception Reporting	
Small Loan Amount	<p>[Mandatory, Numeric, 11, Two]</p> <p>Type the small loan amount.</p> <p>If the loan is disbursed for a value below the amount specified, it is automatically reflected in the exception report for the day.</p>
Large Loan Amount	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the large loan amount.</p> <p>If the loan is disbursed for a value above the amount specified, it is automatically reflected in the exception report for the day.</p>
Small Term in Months	<p>[Optional, Numeric, Three]</p> <p>Type the small period in months.</p> <p>If the loan is disbursed for a period below the term specified, it is automatically reflected in the exception report for the day.</p>

Field Name	Description
Large Term in Months	<p>[Optional, Numeric, Three]</p> <p>Type the large period in months.</p> <p>If the loan is disbursed for a period above the term specified, it is automatically reflected in the exception report for the day.</p>
Small Rate	<p>[Optional, Numeric, Six, Five]</p> <p>Type the small rate of interest.</p> <p>If the loan is disbursed for a value below the rate specified, it is automatically reflected in the exception report for the day.</p>
Large Rate	<p>[Optional, Numeric, Six, Five]</p> <p>Type the large rate of interest.</p> <p>If the loan is disbursed for a value above the rate specified, it is automatically reflected in the exception report for the day.</p>
Sanctioned Amount Revision	
Allow Upwards	<p>[Optional, Check Box]</p> <p>Select the Allow Upwards check box if the sanctioned limit of the account can be increased.</p>
Allow Downwards	<p>[Optional, Check Box]</p> <p>Select the Allow Downwards check box if the sanctioned limit of the account can be decreased.</p>
Agriculture Plan Master	
Plan Code	<p>[Mandatory,Picklist]</p> <p>Select the plan code which is to be attached for the loan account</p>

Field Description

Field Name	Description
------------	-------------

Limits	
--------	--

Field Name	Description
Allowed Disbursement Modes	<p>[Optional, Check Box]</p> <p>Select the appropriate check boxes to indicate the allowed disbursement modes.</p> <p>The bank can restrict the disbursal modes for certain products. For example, in the case of home loans the bank may disburse only banker's cheque in the name of the builder.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Current / Savings • Cash • Cheque • GL • ATM • POS • Outward Remittance • External Account <p>It is mandatory to select any one of the check box.</p> <p>Note:ATM,POS,Outward remittance and External account modes are not applicable for Agricultural Loans</p>
Maximum No Of Disbursements	<p>[Conditional, Numeric, Five]</p> <p>Type the maximum number of times the bank can disburse the loan.</p> <p>Only one disbursement can take place during a day.</p>
Threshold on Sanctioned Amount	<p>[Optional, Numeric, Three]</p> <p>Type the threshold on sanctioned amount.</p> <p>The threshold percentage is the percentage over sanctioned amount that can be disbursed without any additional checks or authorisation.</p>
Rescission Period in Days	<p>[Mandatory, Numeric, Three]</p> <p>Type the rescission period after the disbursal of the loan.</p> <p>The rescission period starts after the first disbursal.</p> <p>If the customer wants to cancel the loan within the rescission period, then all the deduction and the interest accrued/charged on the account will be reversed by the system. Any deductions to be levied on the account are handled operationally.</p>
Defaults	

Field Name	Description
Disbursement Deduction Plan Code	<p>[Optional, Pick List]</p> <p>Select the disbursement deduction plan code from the pick list.</p> <p>A deduction plan is a list of deductions/billing/debits to be performed at the time of loan disbursement (first disbursements only).</p> <p>A deduction plan consists of more than one type of deduction and is set up in the Loan Plan Deduction Maintenance (Fast Path: LNM22) option.</p> <p>No deduction of installment type is allowed for IPi³ type loans.</p>
Schedule Drawn On	<p>[Conditional, Drop Down]</p> <p>Select the appropriate schedule drawn on option from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Actual Outstanding Amount • Sanction Amount <p>This field is enabled if Loan Type is selected as Term or Agriculture in Definition tab.</p>
Amortization	
Method of Amortization	<p>[Mandatory, Drop-Down]</p> <p>Select the method of amortization to be adopted from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Straight-Line: If this option is selected for the loans account: $\text{Monthly amortisable amount} = \text{charge collected} * \text{no of days in that month} / \text{term of the loan in Days.}$ i.e., actual total days from disbursement date to maturity date. If this option is selected for OD: $\text{Monthly amortisable amount} = \text{charge collected} * \text{no of days in that month} / \text{term of the OD in days, i.e., actual total days from limit sanction date to limit expiry date.}$ • IRR : This option is applicable only for term loan accounts. FLEXCUBE will create 2 schedules internally for 2 different IRR's. First IRR is calculated for the entire loan amount and the second IRR is calculated for the loan amount - service charge. The difference in the interest component of Schedule 1 and Schedule 2 will be the amortized service charge component for the month.

³(Interest and Principal Installment)

Field Name	Description
Amortization-Accounting Entries Frequency	<p>[Display]</p> <p>This field displays the amortization frequency based on the method of amortization selected in the corresponding field.</p> <p>If the Straight-Line option is selected in the Method of Amortization field, this field will be defaulted to Calendar and if IRR-Based option is selected Anniversary will be displayed.</p>
Move To Regular Stage After Disbursement	<p>[Conditional, Check box]</p> <p>Select the check box to allow the account to move to regular type from IOI stage.</p> <p>This field is enabled if Loan Type is selected as Term in Definition tab.</p> <p>Example:</p> <ul style="list-style-type: none"> • An account with IOI stage and Partial Disbursement done. • Subsequently the account is fully disbursed. • If this check box is selected the account will move to the regular stage (EPI/IPI) automatically.

Field Description

Field Name	Description
Assets	
Principal Balance	<p>[Mandatory, Numeric, Nine]</p> <p>Type the principal balance GL code.</p> <p>The outstanding balances of the normal loan accounts belonging to the selected product will be recorded in this general ledger code.</p> <p>This is an asset type GL.</p>

Field Name	Description
Suspended Principal	<p>[Mandatory, Numeric, Nine]</p> <p>Type the suspended principal balance GL code.</p> <p>The outstanding balances of the suspended loan accounts belonging to the selected product will be recorded in this general ledger code.</p> <p>This is an asset type GL.</p>
Fees Receivable	<p>[Mandatory, Numeric, Nine]</p> <p>Type the fees receivable GL code.</p> <p>The outstanding fees amount to be recovered from normal loan accounts belonging to the selected product will be recorded in this general ledger code.</p> <p>This is an asset type GL.</p>
Suspended Fees Receivable	<p>[Mandatory, Numeric, Nine]</p> <p>Type the suspended fees GL code.</p> <p>The outstanding fees amount to be recovered from the suspended loan account belonging to the selected product will be recorded in this general ledger code.</p> <p>This is an asset type GL.</p>
Outgoing Receivable	<p>[Mandatory, Numeric, Nine]</p> <p>Type the outgoing receivable GL code.</p> <p>The outgoings raised on the normal accounts belonging to the selected product such as insurance premium, etc, are recorded in the general ledger code.</p> <p>This is an asset type GL.</p>
Suspended Outgoing Receivable	<p>[Mandatory, Numeric, Nine]</p> <p>Type the suspended outgoing receivable GL code.</p> <p>The outgoings raised on the suspended accounts belonging to the selected product such as insurance premium, etc, are recorded in the general ledger code.</p> <p>This is an asset type GL.</p>
Legal Fees Receivable	<p>[Mandatory, Numeric, Nine]</p> <p>Type the legal fees receivable GL code.</p> <p>If the customer has requested the bank to pay the legal fees on his/her behalf, the bank pays it and recovers the outstanding amount from the customer. This legal fee to be recovered for normal accounts is recorded in the general ledger code.</p> <p>This is an asset type GL.</p>

Field Name	Description
Suspended Legal Fees Receivable	<p>[Mandatory, Numeric, Nine]</p> <p>Type the suspended legal fees GL code.</p> <p>The legal fees payable by the customer on a suspended loan account belonging to the selected product will be recorded in the general ledger code.</p> <p>This is an asset type GL.</p>
Contingent Asset	<p>[Mandatory, Numeric, Nine]</p> <p>Type the sanctioned amount of account.</p>
Allowance for Loss-Uncollected Interest GL	<p>[Conditional, Numeric, Nine]</p> <p>Type the contra asset GL maintained for uncollected interest.</p> <p>This field is enabled for term loans only.</p>
Rollover Interest	<p>[Conditional, Numeric, Nine]</p> <p>Type the GL that is used to hold the moratorium interest until paid.</p>
Suspended Diverting Interest Receivable	<p>[Mandatory, Numeric, Nine]</p> <p>Type the suspended diverting interest receivable GL code which will be debited for receivable amount when the diverting interest arrears are raised on the loan account whose accrual status is suspended. If claw back is applicable for diverting interest, and if there are unpaid diverting interest arrears on loan at the time of movement of loan from normal to suspended, then the unpaid arrears will move from diverting interest receivable GL to suspended diverting interest receivable GL. This is an asset type GL.</p>
Diverting Interest Receivable	<p>[Mandatory, Numeric, Nine]</p> <p>Type the diverting interest receivable GL code.</p> <p>If the loan amount disbursed is used by the customer for any purpose other than the purpose for which loan is disbursed, then the account is charged with diverting interest and is accounted for in diverting interest receivable GL and will be considered as a separate arrear type. This ad-hoc interest amount is calculated externally but applied in FCR through debit interest adjustment. Diverting interest is a separate arrear and is accounted and recognized separately. This is an asset type GL.</p>
Liabilities	
Legal Fees Payable	<p>[Mandatory, Numeric, Nine]</p> <p>Type the legal fees GL code.</p> <p>The legal fees payable to the lawyer's company for expenses incurred on the accounts belonging to the selected product will be recorded in the general ledger code. This is a liability type GL.</p>

Field Name	Description
Outgoing Payable	<p>[Mandatory, Numeric, Nine]</p> <p>Type the outgoings payable GL code.</p> <p>The outgoings raised on the account are recorded in this general ledger code.</p> <p>This is a liability type GL.</p>
Bad Debt Reserve	<p>[Mandatory, Numeric, Nine]</p> <p>Type the bad debt reserve GL code.</p> <p>Whenever a provisioning is attempted on a loan account as per the CRR definition the system debits the expense/Writeoff GL and parks the amount in the bad debt reserve. In case of repayment or a full write off of the loan account the relative amount is reversed from this GL</p> <p>This is a liability type of GL.</p>
Split Loan Interim GL	<p>[Mandatory, Numeric, Nine]</p> <p>Type the GL code where the disbursed amount for the split loan will be parked.</p> <p>This amount is debited from the interim GL for partial payoff of the original loan account on the same day.</p>
Unapplied Advance (RPA)	<p>[Mandatory, Numeric, Nine]</p> <p>Type the unapplied advance GL code.</p> <p>Excess payments made on the account by the customer are recorded in this GL. These payments shall be automatically appropriated in the future when arrears are raised on the account.</p> <p>This is a liability type GL.</p>
Contingent Liability	<p>[Mandatory, Numeric, Nine]</p> <p>Type the contingent liability GL code.</p> <p>The contingent liability is the amount to be paid.</p>
Settlement Payout	<p>[Mandatory, Numeric, Nine]</p> <p>Type the GL code for settlement payment.</p> <p>Any contribution amount received for a loan account is credited to this GL. During disbursement, Oracle FLEXCUBE debits the Principal Balance (Asset type) and credits this GL.</p> <p>Note: You can modify this field if accounts are not yet maintained under the defined loan product.</p>
Income	

Field Name	Description
Misc Income	<p>[Mandatory, Numeric, Nine]</p> <p>Type the appropriate miscellaneous income GL code.</p> <p>The additional income generated on the account is recorded in the general ledger code.</p> <p>The entry is initiated from the common billing maintenance.</p> <p>This is an income type GL.</p>
Small Balance Forfeiture	<p>[Mandatory, Numeric, Nine]</p> <p>Type the small balance forfeiture GL code.</p> <p>When the customer account is closed, his credit balance below a certain limit is forfeited. This forfeited balance in the account is recorded in the general ledger code.</p> <p>The small balance forfeiture limit for the product is defined in the Closure tab.</p> <p>This is an income type GL.</p>
Suspended Diverting Interest Income	<p>[Mandatory, Numeric, Nine]</p> <p>Type the suspended diverting interest income GL code which will be booked as liability when the diverting interest arrears remain unpaid and the loan account accrual status is Suspended. This is a liability type GL.</p>
Diverting Interest Income	<p>[Mandatory, Numeric, Nine]</p> <p>Type the diverting interest income GL code which will be booked as income when diverting interest arrears are raised on the normal loan account. This is an income type GL.</p>
Expense	
Small Balance Waiver	<p>[Mandatory, Numeric, Nine]</p> <p>Type the small balance waiver GL code.</p> <p>When the customer account is closed, his debit balance below a certain limit is written off. If the small balance of the customer has been waived off, then it is recorded in this general ledger code.</p> <p>The small balance waiver limit for the product is defined in the Closure tab.</p> <p>This is an expense type GL.</p>
Writeoff Expense	<p>[Mandatory, Numeric, Nine]</p> <p>Type the write off expense GL code.</p> <p>When the suspended account is written off, it is recorded in this general ledger code.</p> <p>This is an expense type GL.</p>

Field Name	Description
Provision for Loss- Uncollected Interest GL	<p>[Conditional, Numeric, Nine]</p> <p>Type the expense GL maintained for provisioning uncollected interest.</p> <p>This field is enabled only for term loan account.</p>
Add-on Accounting	
Margin Accounting	<p>[Conditional, Check Box]</p> <p>Select the Margin Accounting check box to pass accounting entries for margin receivable as per Syariah – Murabahah practice on loan disbursement. The user has to select this check box to create a Syariah – Murabahah product.</p> <p>This check box is enabled if the Add On Loan check box is selected in the Definition tab.</p>
Inventory GL Definition	<p>[Conditional, Check Box]</p> <p>Select the Inventory GL Definition check box to pass accounting entries for inventory bought and sold on loan disbursement. The user has to select this check box to create a Syariah – Murabahah product.</p> <p>This check box is enabled if the Add On Loan check box is selected in the Definition tab.</p>
Total Margin Receivable	<p>[Conditional, Numeric, Nine]</p> <p>Type the GL, that will reflect the total interest receivable over the remaining tenure of the loan for normal loan.</p> <p>This is an asset type GL.</p> <p>This field is enabled if the Margin Accounting check box is selected.</p>
Inventory Asset GL	<p>[Conditional, Numeric, Nine]</p> <p>Type the GL, that will reflect the accounting entry to show that the bank has purchased asset from third party and sold it to customer.</p> <p>This is an asset type GL.</p> <p>This field is enabled if the Inventory GL Definition check box is selected.</p>
Deferred Margin Income	<p>[Conditional, Numeric, Nine]</p> <p>Type the GL, that will be credited with total interest receivable amount at the time of disbursement and will be debited with the amount of interest received as and when installment amount is paid for normal loan.</p> <p>This field is enabled if the Margin Accounting check box is selected.</p>

Field Name	Description
Inventory Liability GL	<p>[Conditional, Numeric, Nine]</p> <p>Type the GL, that will reflect the accounting entry to show that the bank has purchased asset from third party and sold it to customer.</p> <p>This is a liability type GL.</p> <p>This field is enabled if the Inventory GL Definition check box is selected.</p>

1.2. AL057-Agri Loan Direct Account Opening

This option facilitates the user to directly open a loan account without having to go through the **APS**⁸ work flow. Unlike APS, the necessary document records and collateral details are maintained after the account is opened.

You can open Loan Accounts using the **Loan Direct Account Opening** option.

When a new Loan Account is being opened, the Transaction Processing application will perform a check depending upon the search criteria selected by the user. The search criteria could be either of Customer Short Name, Customer IC or Customer ID. Using the data input by the user the system will perform a check on the centralised customer information database to find out whether the customer is new or an existing customer.

Access

- Fast Path: AL057
- Transaction Processing > Account Transactions > Agri Loan Account Transactions > Other Transactions > Agri Loan Direct Account Opening

Definition Prerequisites

- Branch Type Maintenance [BAM17]: Branch Type Maintenance must be defined before opening a new Loan account.
- Schedule Type (Fast Path: LNM98)
- Product Master Maintenance (Fast Path: LNM11)
- Product Collateral Linkage (Fast Path: BAM63)
- CYDCPAIR - Currency Pair Definition
- 8053 - Customer Addition
- ACM05 - Asset Classification Plan Maintenance

Other Prerequisites

- Branch Product Cross Reference (Fast Path: BA435)

Field Description

Field Name	Description
Customer Information	
Search Criteria	<p>[Mandatory, Drop-Down]</p> <p>Select the search criteria from the drop-down menu to search for the customer.</p> <p>The search criteria are as follows:</p> <ul style="list-style-type: none"> Customer short name Customer IC Identification criteria (IC) arrived at by the bank during customer addition. Customer ID- Unique identification given by the bank.

Field Name	Description
Search String	<p>[Mandatory, Alphanumeric]</p> <p>Enter the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field.</p> <p>If the search criterion is specified as customers' short name or IC then any of the letter(s) of the letter of the short name or ID can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Choose the appropriate customer from the existing customer list.</p> <p>For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.</p>
ID	<p>[Display]</p> <p>The ID of the customer.</p> <p>A customer ID is an identification number, generated by the system after customer addition is completed successfully and can be used to search the customer. The system displays the customer ID, when the customer is validated.</p>
IC	<p>[Display]</p> <p>Type the appropriate customer IC.</p> <p>A customer IC with customer type is a unique method of identifying a customer across the bank (across all branches). Based on the IC, the system can identify the customer as an existing customer, even when the customer opens a new account in another branch.</p> <p>The IC should be in conjunction with the customer. This can determine if the customer is an existing customer.</p> <p>For example, a social security number, passport number can be used as Customer IC for Individual Customers.</p>
Loan Application No.	<p>[Conditional, Numeric]</p> <p>The application number is generated for each loan application that is made. This is used to retrieve data related to that loan application to amend, cancel or authorize the loan application.</p>
Short Name	<p>[Display]</p> <p>This column displays the short name of the primary customer after validation.</p>

Field Name	Description
Branch Code	<p>[Mandatory, Drop-Down]</p> <p>The branch code.</p> <p>The account opening procedure can be either centralized or decentralized. In a centralized setup, one centralized processing center will open accounts for all branches of a region. You have to select the code of the centralized processing branch if the bank follows the centralized setup for account opening.</p> <p>In Decentralised setup, the branch code will default to the name of the branch which triggered this transaction.</p>
Customer Relation	<p>[Mandatory, Drop-Down]</p> <p>Select the appropriate relation from the drop-down list.</p> <p>A customer is linked to an account, by a relations tag. This drop-down list contains different relations. For example, Sole Owner, Joint And First, Joint and Other and other relations.</p> <p>For successful account opening transaction, a customer with primary relationship viz. Sole Owner, Joint And First, or Joint Or First must be linked. If primary relationship linked is Joint And First or Joint Or First, another customer with secondary relationship viz. Joint and other or Joint or other must be linked to the account.</p> <p>A maximum of three customers can be linked to an account in the account-opening screen. You can attach additional customers to the accounts using the</p> <p>Account Customer Relationship Maintenance option (CI142).</p> <p>These relationships are maintained in FLEXCUBE only for information purposes.</p>
Product Code	<p>[Mandatory, Picklist]</p> <p>A manually generated unique identifier for the Loan product.</p> <p>The product code that is being assigned should be within the range for Loans module as specified in the FLEXCUBE table ba_prod_acct_info (Internal table). The product code and the Branch Product Cross Reference must be downloaded to the branch.</p> <p>The picklist list has a list of authorized loan products available for the selected branch.</p> <p>The user has to select the product for which the account has to be opened.</p>
Currency	<p>[Display]</p> <p>The currency code in which the product is defined.</p> <p>The list of valid currencies are maintained in Currency Code Maintenance option.</p> <p>All the entries are posted in the account in the account currency. The exchange rate values must be defined and downloaded.</p>

Field Name	Description
Loan Purpose	<p>[Mandatory, Alphanumeric]</p> <p>Enter the purpose for which the loan is required.</p>
Loan Term	<p>[Mandatory, Numeric]</p> <p>Enter the tenure of the loan in months.</p> <p>The value is validated against the minimum and maximum term of the loan product defined at the product level.</p>
Asset Value/Project Cost	<p>[Mandatory, Numeric]</p> <p>Enter the value of the asset for which the loan application is submitted.</p>
Contribution/Margin	<p>[Conditional, Numeric]</p> <p>Enter the contribution value for purchasing the asset. In case there is no margin or contribution this field can be left blank.</p> <p>The contribution value should be less than the asset value.</p>
Loan Amount	<p>[Display]</p> <p>The loan amount.</p> <p>The loan amount is calculated as the difference in value between the asset and contribution.</p> <p><i>Loan Amount = Asset Value – Contribution</i></p> <p>The loan amount value is validated against minimum and maximum amount defined in the Loans Product Master (LNM11).</p>
Repayment Mode	<p>[Drop-Down]</p> <p>The repayment mode of the loan.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Cash • Cheque • Account Transfer • GL

Field Name	Description
Schedule Code	<p>[Mandatory, Pick List]</p> <p>The repayment schedule code.</p> <p>Only the schedules, which are attached to the product, are displayed in the pick list.</p> <p>The name of the schedule is displayed adjacent to the schedule code.</p> <p>At the time of disbursement the default selected schedule will be attached to the loan account. However, if there is more than one schedule attached to the product the user can still change the default schedule from the picklist during actual disbursement (AL521).</p>
Net Product Rate	<p>[Display]</p> <p>Displays the net product rate.</p> <p>Net Product rate is the interest rate associated with the loan.It depends on the schedule code selected .</p>
Interest Variance	<p>[Optional, Numeric]</p> <p>Enter the interest variance to be offered to the customer.</p> <p>The variance is validated based on the min. and max. interest variance defined in the Loans Product Master (LNM11).</p>
Date of Sanction	<p>[Optional, dd/mm/yyyy]</p> <p>Provide the date on which the loan application was sanctioned</p>
Sanctioning Authority	<p>[Optional, Drop-Down]</p> <p>Provide the sanctioning authority .</p> <p>This refers to the officer or group of officers who sanction the loan</p>
Sanction Reference	<p>[Optional, AlphaNumeric]</p> <p>Enter the reference given by the sanctioning authority</p>
Date of Loan Papers	<p>[Optional, dd/mm/yyyy]</p> <p>Enter the date on which the loan papers are drawn up by the officer</p>
Fixed/Floating Switch Due Date	<p>[Optional, dd/mm/yyyy]</p> <p>Enter the date on which the rate switch is to be done.</p>
AC Plan Code	<p>[Mandatory, Numeric]</p> <p>Enter the Asset Classification Plan Code for the account to be generated</p>

Field Name	Description
Crop Loans	<p>[Display]</p> <p>The loans for cultivation of crop.</p> <p>The check box is selected if the loan account is opened in agri master product.</p>
Crop Type	<p>[Conditional, Pick List]</p> <p>The crop type for which the loan account is opened.</p> <p>This field is enabled only if the Crop Loans check box is selected.</p>
Season	<p>[Mandatory, Drop-Down]</p> <p>The season of the crop.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Kharif • Rabi
Review Period	<p>[Drop-Down]</p> <p>The review period of the loan amount.</p> <p>The review period is in months.</p> <p>The options are:</p> <ul style="list-style-type: none"> • 6 • 12 • 18 • 24
Review Date	<p>[Display, dd/mm/yyyy]</p> <p>The review date of the loan amount.</p> <p>This field is system generated, as the review period is selected the review date is displayed.</p> <p>The system generates the report and also displays a warning message if the user attempts any transaction on the account after this date is over.</p>
Account Number Generated	<p>[Display]</p> <p>After all the above details are correctly entered the system-generated loan account number is displayed on the screen.</p>
Property Location	<p>[Optional,Pick list]</p> <p>Enter the location of the property for which the loan application is made.</p>

Field Name	Description
Agri Loan/Advance Purpose	<p>[Optional, Drop-Down]</p> <p>Enter the purpose of the agricultural loan.</p> <p>The options are :</p> <ul style="list-style-type: none"> • Produce Loan • Agriculture - Indirect - Others • Agriculture - Direct • Agriculture - Indirect - Dealers / Sellers in Agri inputs
Place of Institute	<p>[Optional, Drop-Down]</p> <p>Provide the location where the institute is situated.</p>
Population	<p>[Optional, Input]</p> <p>Provide the population value.</p>
GCC Loan Purpose	<p>[Optional, Drop-Down]</p> <p>Select the purpose of GCC Loan from the drop down.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Others • Agriculture • MSME
Concession Rate	<p>[Optional,Numeric]</p> <p>Enter the concession rate allowed for the loan.</p>
Date of Concession Rate	<p>[Date]</p> <p>Enter the date from which the concession is allowed.</p>
Concession Rate Permitted By	<p>[Optional, Drop-Down]</p> <p>Select the authority who provided the concession from the drop down.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Manager • Director • Supervisor

Field Name	Description
Status of Processing Charges	<p>[Optional, Drop-Down]</p> <p>Select the status of the processing charges from the drop down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Yes • No • Waived • Not Applicable
Date of Processing Charges	<p>[Optional, Date]</p> <p>Enter the date from which the processing charges will be levied.</p>

To open loan account directly

1. Select the search criteria from the drop-down list.
2. Type the search string and press the **<Tab>** key and select the customer from the pick list.
3. Enter the relevant information and click the **Ok** button.
4. The system displays the message "Authorisation Required. Do You Want to continue?".
5. Click the **OK** button.
6. The system displays the **Authorization Reason** screen.
7. Enter the relevant information and click the **Ok** button.
8. The system displays the account number generated message.

1.3. BA437 - Account Memo Maintenance

You can maintain memos for accounts using this option. For any CASA, Loan or TD account a memo can be attached, which will be displayed to the teller when any transaction is done against the account in the branch.

A memo can be a reminder about important actions that have taken place on the account.

In case the primary customer of the account has a memo linked (customer level memo), then both the customer memo and account memo will be displayed in a concatenated fashion.

Sometimes multiple memos are required for the same customer. The memos are of two types: high level and low level. There is a maximum limit of 5 memos for each customer out of which four memos are active memos and one is an internal memo.

If a low level memo is encountered during transaction, authorization is not required for it. A high level memo requires authorization. The transaction will proceed only if the authorizer overrides any high level memo. This is applicable for both account level as well as customer level memo. However system will not validate the existence of memo in case of batch upload.

Definition Prerequisites

- Availability of CASA/LOAN/TD account for the customer
- BAM40 - Reason Codes

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Authorize, Inquiry. For more information on the procedures of every mode, refer to Standard Maintenance Procedures.

To add a memo to an account

1. Type the fast path **BA437** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Others > Account Memo Maintenance**.
2. The system displays the **Account Memo Maintenance** screen.

Field Name	Description
Amount Paid Today	[Display] The amount disbursed today into the loan account is displayed here.
Funds in RPA	[Display] RPA ¹⁰ stands for "Repayment Pending Appropriation". In loans module any amount paid towards disbursement of the loan is first debited to RPA. The house keeping shell in the EOD later appropriates the amount in RPA to offset any arrears due in the loan account. In case no arrears are due the amount will continue to reside in RPA till such time arrears become due in the loan account. The RPA always points to a Liability GL.
Balance Details	
Total Amount Disbursed from Host	[Display] The gross amount (before disbursement deduction, if any) that is disbursed on the current date is displayed.
Disbursement Deductions	[Display] The amount to be deducted from the amount that is disbursed on the current date. The deduction is defaulted from the selection done during the host disbursement under Account schedule. If the deduction was waived during the host disbursement this field will have zero value.
Margin Amount	[Display] The margin amount.
Available Balance for Branch Disbursement	[Display] The available balance for branch disbursement amount.

To disburse the loan

1. Type the account number and press the <Tab> key.
2. Select the disbursement mode from the drop-down list.
3. Click the **Ok** button.
4. The system displays the message "Do You Want to continue?"
5. Click the **OK** button.
6. The system displays the **Loan Disbursement** screen depending on the selected disbursement mode.
7. Enter the relevant information and click the **Ok** button.

¹⁰(Repayment Pending Appropriation (advance payment))

8. The system displays the transaction sequence number. The transaction number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction.

Note: Depending on the set up, there will be validation that the customer of the Debit account and the customer of the Credit should have the same Customer ID.
For more information on Authorization transactions, refer to the ***FLEXCUBE Introduction User Manual***.

1.5. 1661-Agri Loans Disbursement by Cash

Agricultural loans can be disbursed to the customer through this option, only after the **Account Schedule** is setup (Fast Path: AL521). The loan can be disbursed by cash, transfer to CASA, transfer to GL or banker's cheque, demand draft by using this option.

Note: Refer to **Account Schedule** setup above (Fast Path: AL521) for more details on setting up of the loan account schedule.

Field Name	Description
Margin Amount	[Input] Enter the margin amount in cash.
User Reference No	[Alphanumeric, 40] The user reference number assigned to the customer. This field is enabled or disabled depending on the profit booking being enabled or disabled for the particular transaction.
Instrument No	[Mandatory, Numeric] The instrument number.
Narrative	[Display] The default narration, based on the transaction. The user can change the narration, if required.

To disburse the loan

1. Type the account number and press the <Tab> key.
2. Select the disbursement mode from the drop-down list.
3. Click the **Ok** button.
4. The system displays the message "Do You Want to continue?"
5. Click the **OK** button.
6. The system displays the **Loan Disbursement** screen depending on the selected disbursement mode.
7. Enter the relevant information and click the **Ok** button.
8. The system displays the transaction sequence number. The transaction number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction.

Note: Depending on the set up, there will be validation that the customer of the Debit account and the customer of the Credit should have the same Customer ID.
For more information on Authorization transactions, refer to the ***FLEXCUBE Introduction User Manual***.

1.7. 1663-Agri Loans Disbursement by GL

Agricultural loans can be disbursed to the customer through this option, only after the **Account Schedule** is setup (Fast Path: AL521).

Note: Refer to **Account Schedule** setup above (Fast Path: AL521) for more details on setting up of the loan account schedule.

Field Description

Field Name	Description
Account No	<p>[Mandatory, Numeric, 16]</p> <p>Enter the loan account number for which the installment payment is to be made.</p> <p>The short name of the account holder is populated adjacent to the account number.</p>
Account Ccy	<p>[Display]</p> <p>The field displays the currency assigned to the product, under which the account is opened.</p> <p>All the entries posted in the account are in the account currency.</p> <p>For example, if the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.</p> <p>This field is non-editable.</p>

Field Name	Description
Disbursement Mode	<p>[Mandatory, Drop-Down]</p> <p>The multiple disbursement modes are possible for Loan Disbursement.</p> <p>Following are the disbursement mode.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Cash • Savings Transfer • GL Transfer • Pay Order
Outstandings	
Principal Balance	<p>[Display]</p> <p>The actual principal balance as on the date of installment payment is displayed considering all dues were paid on time.</p>
DND	<p>[Display]</p> <p>The amount that is debited to the agri loan account.</p>
Installment Arrears	<p>[Display]</p> <p>The total installment arrears that are outstanding in the loan account is displayed.</p> <p><i>Total Installment = Principal + Interest</i></p>
Interest Arrears	<p>[Display]</p> <p>The total interest arrears that are outstanding in the loan account is displayed.</p>
Other Arrears	<p>[Display]</p> <p>Any other type of arrears due not forming part of the Principal or interest arrear component are displayed here. These dues could be Outgoing Arrears, Legal Fees, Insurance Premium arrears, Service Charge arrears etc. These arrears could be raised using Common Billing screen (Fast Path: BAM50).</p>
Penalty Arrears	<p>[Display]</p> <p>The penalty interest is levied on the customer for the non-payment of the dues. It is basically the interest on arrears commonly known as IOA¹⁵ (Interest on Arrears). The unpaid penalty interest arrears due but not paid is displayed.</p>
UnApplied Credits	

¹⁵(Interest On Arrears)

Field Name	Description
Amount Paid Today	[Display] The amount disbursed today into the loan account is displayed here.
Funds in RPA	[Display] RPA ¹⁶ stands for "Repayment Pending Appropriation". In loans module any amount paid towards disbursement of the loan is first debited to RPA. The house keeping shell in the EOD later appropriates the amount in RPA to offset any arrears due in the loan account. In case no arrears are due the amount will continue to reside in RPA till such time arrears become due in the loan account. The RPA always points to a Liability GL.
Balance Details	
Total Amount Disbursed from Host	[Display] The gross amount (before disbursement deduction, if any) that is disbursed on the current date is displayed.
Disbursement Deductions	[Display] The amount to be deducted from the amount that is disbursed on the current date. The deduction is defaulted from the selection done during the host disbursement under Account schedule. If the deduction was waived during the host disbursement this field will have zero value.
Margin Amount	[Display] The margin amount.
Available Balance for Branch Disbursement	[Display] The available balance for branch disbursement amount.

Agri Loan Disbursement by PO

Field Description

Field Name	Description
Bank Code	<p>[Mandatory, Drop-Down]</p> <p>This field displays the bank / issuer on which the BC is drawn. The list of banks on which DDs can be issued are maintained in the Issuer Maintenance [BAM09] screen and downloaded to the branch. Normally banks issue DDs drawn.</p> <p>This field is non-editable.</p>
Txn Ccy	<p>[Mandatory, Pick List]</p> <p>The currency of the cheque.</p> <p>This field, by default, displays the account currency as the transaction currency.</p> <p>This is the currency in which the transaction will take place.</p> <p>Select the appropriate currency, from the drop-down list.</p> <p>While posting the transaction entries to the account, the transaction currency is converted into the account currency and for posting the GL entries it is converted into the local currency of the bank.</p>

Field Name	Description
Acct Ccy Rate	<p>[Display]</p> <p>The rate at which the account currency is converted to the local currency of the bank.</p> <p>The teller's right to change the account currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable.</p> <p>If the account currency and the local currency are the same, the field takes a default value as 1, which cannot be modified.</p>
Tcy Rate	<p>[Display]</p> <p>This field displays the rate at which the transaction currency is converted to the local currency of the bank. The exchange rate values are defined and downloaded from FCC.</p> <p>The teller's right to change the transaction currency rate is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable.</p>
Disbursement Amt	<p>[Display]</p> <p>The loan amount that has to be disbursed is displayed.</p> <p>This amount will be in the currency of the loan account.</p>
Margin Amount	<p>[Display]</p> <p>The margin amount.</p>
Cheque Amount (Tcy)	<p>[Display]</p> <p>This field displays the net disbursement amount for which the PO will be issued in account currency after deduction of charges.</p> <p>This amount is in the account ccy.</p>
Cheque Date	<p>[Display]</p> <p>The date of the Cheque, which takes a default value of the posting date.</p> <p>This field, by default, displays the posting date as the date on which the PO is issued.</p> <p>This field is non-editable.</p>

Field Name	Description
Serial No.	<p>[Display]</p> <p>For a remittance instrument such as a PO, at the time of issue, the system generates a serial number comprising the branch code, instrument type and a running serial number.</p> <p>The serial number for each instrument type is maintained separately and on reversal of an instrument issue, the instrument serial number will not be reused for the next instrument issue.</p> <p>When an instrument comes for clearing, it may be referred by the MICR number, and Routing number which needs to be maintained for each instrument, if it is expected to come through an inward clearing batch. If an instrument is liquidated by the teller, the instrument serial number is sufficient, as this is the number by which FLEXCUBE tracks the instrument uniquely.</p> <p>This field is non-editable.</p>
Micr No	<p>[Mandatory]</p> <p>Type the MICR number of the DD. This is a number pre-printed on the instrument.</p> <p>For every remittance instrument it is necessary to maintain a MICR number that is printed on the instrument if the instrument is expected to come for clearing through inward clearing. A cross reference is maintained using option Maintaining Instrument MICR Number (Fast Path: STM57) with the system generated serial number so that the instrument can be tracked by the system whether it is liquidated or enquired upon by MICR number or the serial number.</p>
Routing No	<p>[Mandatory, Numeric, Nine]</p> <p>This field displays the routing number against which the cheque has been drawn.</p> <p>The routing number is the combination of the bank code and the branch code.</p> <p>The combination can be obtained from the Routing Branch Maintenance [STM54] screen.</p> <p><i>Routing Number</i>¹⁹ = Sector Code / Bank Code + Branch Code</p> <p>For a cheque deposited, this routing number is used by the system to determine the float days and thus the value date of the instrument.</p> <p>For an inward clearing cheque this routing number should belong to the bank. The order, in which the codes in the routing number are to be entered, is determined by the set up at the Settlement Bank Parameters [STM59] screen.</p>

¹⁹(It is the number printed on the cheque, also called MICR number (Magnetic Ink Character Recognition). This number facilitates faster clearance of the instrument. It can be configured to have the following information: Bank code, Sector, Branch Code.)

Field Name	Description
Beneficiary Name	[Mandatory, Alphanumeric, 40] Type the name of the beneficiary for the PO.
Passport/IC No	[Alphanumeric, 14] Type the passport or IC number of the beneficiary. This is an identification collected from the beneficiary of the PO at the time of liquidation. This field is mandatory.
Beneficiary Addr	[Alphanumeric, 40] Type the contact address of the beneficiary. This is normally needed for record purposes and provided as additional information. This field is mandatory.
User Reference No	[Alphanumeric, 40] The user reference number assigned to the customer. This field is enabled or disabled depending on the profit booking being enabled or disabled for the particular transaction.
Instrument No	[Mandatory, Numeric] The instrument number.
Narrative	[Display] The default narration, based on the transaction. The user can change the narration, if required.

To disburse the loan

1. Type the account number and press the <Tab> key.
2. Select the disbursement mode from the drop-down list.
3. Click the **Ok** button.
4. The system displays the message "Do You Want to continue?"
5. Click the **OK** button.
6. The system displays the **Loan Disbursement** screen depending on the selected disbursement mode.
7. Enter the relevant information and click the **Ok** button.
8. The system displays the transaction sequence number. The transaction number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction.

Note: Depending on the set up, there will be validation that the customer of the Debit account and the customer of the Credit should have the same Customer ID.
For more information on Authorization transactions, refer to the ***FLEXCUBE Introduction User Manual***.

1.9. AL045-Agri Loan Disbursement Reversal

The loan, which is disbursed, can be reversed using the **Loan Disbursement Reversal** option. A loan disbursement transaction may have to be reversed due to administrative reasons or any error in the disbursement set-up for the loan account. The loan disbursement reversal transaction will reverse the disbursement as well as any charges deducted at the time of disbursement.

If the teller has already disbursed the loan amount at the branch, the same teller should reverse the loan disbursement transaction on the same day using option 6006-**Search Electronic Journal**. Subsequently, this reversal at the host should be done. Without the branch reversal of the disbursement the host disbursal reversal cannot be performed. At the head office, you can also reverse the loan disbursement transaction using this option.

Field Description

Field Name	Description
Account Number	[Mandatory, Numeric, 16] Enter the valid loan account number.
Payout Mode	[Display] The mode in which the loan was disbursed will be displayed. For example in cash, cheque, and transfer to savings.
Disbursed Amount	[Display] The total disbursed amount in account currency disbursed will be displayed. This is the gross amount exclusive of deductions.
Total Deductions	[Display] The total amount deducted from the disbursed loan amount will be displayed.
Net Disbursed	[Display] The net amount disbursed in account currency. <i>Net Disbursed = Gross Amount disbursed – Total deductions.</i>

Field Name	Description
Total Billed	[Display] The total amount of deduction in the account currency.

Column Name	Description
SrIno	[Display] The serial number.
Type	[Display] The type of deduction. Some of the deduction types are service charge, premium, installment etc.
Amount in LCY	[Display] The deduction amount in local currency.
Deduction Currency	[Display] The deduction currency.
Rate	[Display] The exchange rate for converting the deduction amount from local currency to account currency.
Amount in ACY	[Display] The amount deducted in account currency.
Currency	[Display] The currency mode in which the service charge was deducted.
Mode	[Display] The mode in which the service charge was deducted i.e. Bill, Deduct, Debit.

To reverse a loan disbursement

1. Type the account number and press the <Tab> key.
2. Click the **Ok** button.
3. The system displays the message "Authorization required. Do You Want to continue?"
4. Click the **OK** button.
5. The system displays the **Authorization Reason** screen.
6. Enter the relevant information and click the **Ok** button.
7. The system displays the message "Disbursement Reversal Done"

Note: The reversal transaction will reverse all the entries passed during the original disbursement and the reversal transaction shows all the relevant information for confirmation.

1.10. ALM38-Agri Loan Approved Amount Maintenance

The loan amount, which is sanctioned for a particular account can be modified using the **Loan Approved Amount Maintenance** option.

This option has to be used when the borrower decides not to use the full amount sanctioned. **FLEXCUBERetail** does not allow the user to increase the amount over the sanctioned loan. It is possible to revise the loan amount below the sanctioned amount. The lower limit for the revision is the utilized amount. In case the loan is partially disbursed the lower limit for the revision i.e. the New Approved Amount will be the utilized amount.

To amend the approved loan amount details

1. Select the **Amend** mode.
2. Type the appropriate account number or select the relevant account number from the picklist and press the **<Tab>** key.
3. The system populates the related fields.
4. Click the **Ok** button.
5. The system displays the message "Record Amended...Authorisation Required...Click Ok to Continue".

To authorize the approved loan amount details

1. Select the **Authorize** mode.
2. Type the appropriate account number or select it from the pick list.
3. Click the **Ok** button.
4. The system displays the message "Record Authorized...Click Ok to Continue".

1.11. ALM39-Agri Loan Account Application Details Maintenance

The user can extend the validity period for accepting the loan offer, using the **Loan Account Application Details Maintenance** option. Disbursements cannot be done if the acceptance validity period has expired. This maintenance is applicable when the loan account is opened using **APS**²¹ module and has not been disbursed. The offer validity period is defined in **Loan Product Master** (LNM11). Offer validity period is the stage where bank makes an offer to the customer and he should be giving his acceptance to the terms and conditions of the loan before the loan offer expires. Offer validity period starts after the Offer letter is printed.

Currency Code	<p>[Display]</p> <p>This field displays the currency assigned to the product, under which the account is opened.</p>

Field Name	Description
Expiry Date	<p>[Display]</p> <p>The expiry date of the loan acceptance period. This date is defaulted based on the date specified during the loan account opening in APS.</p> <p>The customer has to accept the loan, on or before this date.</p> <p>This date can be modified to extend the validity period.</p>

To modify Loan Account Application details

1. Navigate to the **Loan Account Application Details Maintenance** option using the (Fast Path: ALM39).
2. The system displays the **Loan Account Application Details Maintenance** screen.
3. Select the **Modify** mode.
4. Type the appropriate account number.
5. Click on the screen. This populates the related fields.
6. Modify the information and click the **Ok** button.
7. The system displays the message "Record Modified...Authorisation Required...Click Ok to Continue".

To Cancel Loan Account Application details

1. Navigate to the **Loan Account Application Details Maintenance** option using the (Fast Path: ALM39).
2. The system displays the **Loan Account Application Details Maintenance** screen.
3. Select the **Cancel** mode.
4. Type the appropriate account number or select it from the pick list.
5. Click on the screen. This populates the related fields.
6. Click the **Ok** button.
7. The system displays the message "Record Modified...Authorisation Required...Click Ok to Continue".

To Amend Loan Account Application details

1. Navigate to the **Loan Account Application Details Maintenance** option using the (Fast Path: ALM39).
2. The system displays the **Loan Account Application Details Maintenance** screen.
3. Select the **Amend** mode.
4. Type the appropriate account number or select it from the pick list.
5. Click on the screen. This populates the related fields.
6. Click the **Ok** button.

7. The system displays the message "Record Modified...Authorisation Required...Click Ok to Continue".

To authorize Loan Account Application details

1. Navigate to the **Loan Account Application Details Maintenance** option using the (Fast Path: ALM39).
2. The system displays the **Loan Account Application Details Maintenance** screen.
3. Select the **Authorize** mode.
4. Type the appropriate account number or select it from the pick list.
5. Click the **Ok** button.
6. The system displays the message "Record Modified...Authorisation Required...Click Ok to Continue".

To authorize Loan Account Application details

1. Navigate to the **Loan Account Application Details Maintenance** option using the (Fast Path: ALM39).
2. The system displays the **Loan Account Application Details Maintenance** screen.
3. Select the **Inquire** mode.
4. Type the appropriate account number.
5. Click on the screen. This populates the related details.

5. Loan Repayments

1.12. 1670-Agri Loan Installment Payment Inquiry

The Installment payment Inquiry option allows a user to enter details of regular repayments on an account by a customer. The installment payment option is used for amounts equal to or less than the arrears due on the account. Excess payment is allowed for Revolving Loans, where accounts have arrears already due. The initial inquiry screen will display all the outstanding arrears (interest/principal etc.) along with the unbilled penalty arrears till date (calculated online) due to late payment of arrears on the account.

The payment can be by multiple modes viz., Cash, Local Cheque, Transfer from CASA or GL transfer. After the payment is made the system updates the amount paid today for the account. The set-off of paid amount against arrears happens in end of day based on the appropriation sequence for arrear type and date of arrear as set at the product level.

Total Arrears	<p>[Display]</p> <p>The total amount of arrears that the customer has to pay is displayed. Irrespective of the amount entered in the Txn Amount field, the system will display the total arrears due as on the date of payment.</p> <p>This field is non-editable.</p>
User Reference No	<p>[Alphanumeric, 40]</p> <p>The user reference number assigned to the customer.</p> <p>This field is enabled or disabled depending on the profit booking being enabled or disabled for the particular transaction.</p>
Narrative	<p>[Display]</p> <p>This field displays the default narration, based on the transaction. The user can change the narration, if required.</p>

To inquire on loan installment payment

1. Type the account number and press the <Tab> key.
2. Select the appropriate option from the **Installment Mode** drop-down list.
3. Click the **Ok** button.
4. Depending up on the option selected from **Installment Mode** drop-down list, the system displays the relevant transaction screen.
5. Enter the relevant information and click the **Ok** button
6. The system displays the transaction sequence number message box. The transaction number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction.

1.15. 1673-Agri Loan Installment - Payment by GL

The Installment payment Inquiry option allows a user to enter details of regular repayments on an account by a customer. The installment payment option is used for amounts equal to or less than the arrears due on the account. Excess payment is allowed for Revolving Loans ,where accounts have arrears already due. The initial inquiry screen will display all the outstanding arrears (interest/principal etc.) along with the unbilled penalty arrears till date (calculated online) due to late payment of arrears on the account.

The payment can be by multiple modes viz., Cash, Local Cheque, Transfer from CASA or GL transfer. After the payment is made the system updates the amount paid today for the account. The set-off of paid amount against arrears happens in end of day based on the appropriation sequence for arrear type and date of arrear as set at the product level.

Account No	<p>[Mandatory, Numeric, 16]</p> <p>Enter the loan account number for which the installment payment is to be made.</p> <p>The short name of the account holder is populated adjacent to the account number.</p>
Account Ccy	<p>[Display]</p> <p>The field displays the currency assigned to the product, under which the account is opened.</p> <p>All the entries posted in the account are in the account currency.</p> <p>For example, if the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.</p> <p>This field is non-editable.</p>

Field Name	Description
Installment Mode	<p>[Mandatory, Drop-Down]</p> <p>Multiple repayment modes are possible for Loan Installment Payment. However, the modes are validated against the parameters defined at the Loans Product Master Level option (Fast Path: LNM11). Following are the installment mode.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Cash • Local Cheque • Savings Transfer • GL Transfer
Outstanding	
Principal Balance	<p>[Display]</p> <p>The actual principal balance as on the date of installment payment is displayed considering all dues were paid on time.</p>
DND	<p>[Display]</p> <p>The DND (Debit but not Due amount) amount that is debited to the agri loan account.</p>
Installment Arrears	<p>[Display]</p> <p>The total installment arrears that are outstanding in the loan account is displayed.</p> <p><i>Total Installment = Principal + Interest</i></p>
Interest Arrears	<p>[Display]</p> <p>The total interest arrears that are outstanding in the loan account is displayed.</p>
Other Arrears	<p>[Display]</p> <p>Any other type of arrears due not forming part of the Principal or interest arrear component are displayed here. These dues could be Outgoing Arrears, Legal Fees, Insurance Premium arrears, Service Charge arrears etc. These arrears could be raised using Common Billing screen (Fast Path: BAM50).</p>
UnBilled Penalty Interest	<p>[Display]</p> <p>Unbilled Penalty Interest is the interest accrued on the loan account from the last penalty charging date till the current date. The Unbilled penalty interest till date due to late payment of arrears on the account is calculated online.</p>
Upto	<p>[Display]</p> <p>The system-generated date up to which the unbilled penalty interest calculated is displayed.</p>

Field Name	Description
Penalty Arrears	<p>[Display]</p> <p>The penalty interest is levied on the customer for the non-payment of the dues. It is basically the interest on arrears commonly known as IOA²⁸ (Interest on Arrears). The unpaid penalty interest arrears due but not paid is displayed.</p>
UnApplied Credits	
Amount Paid Today	<p>[Display]</p> <p>The amount paid today into the loan account by way of installment payment, advance payment, partial payoff or standing instruction from CASA account is displayed here.</p>
Funds in RPA	<p>[Display]</p> <p>RPA²⁹ stands for "Repayment Pending Appropriation". In loans module any amount paid towards repayment of the loan is first credited to RPA. The house keeping shell in the EOD later appropriates the amount in RPA to offset any arrears due in the loan account. In case no arrears are due the amount will continue to reside in RPA till such time arrears become due in the loan account. The RPA always points to a Liability GL.</p>
Installment Payment	
Total Due Including DND	<p>[Display]</p> <p>The total amount payable by the customer is displayed.</p> <p><i>Total Due = DND + Installment Arrears + Other Arrears + Penalty Arrears + UnBilled Penalty Interest</i></p>

Agri Loan Installment - Payment By GL

Loan Installment payment can be done by using an intermediate GL. This selected GL is debited and the loan account credited. The GL has to be a normal GL on which direct posting is allowed.

The loan account gets credited and the appropriation for the credit happens in EOD.

Field Description

Field Name	Description
Clearing Type	<p>[Mandatory, Drop-Down]</p> <p>The clearing type.</p> <p>The bank can set up multiple clearing types, where cheques that are required to be cleared at different times of the day are deposited so that they can be treated differently. All processes for a cheque from outward clearing, running of value date, and marking late clearing, etc. takes place on the basis of the clearing type.</p>
Cheque No	<p>[Mandatory, Numeric, 12]</p> <p>The cheque number, which is present on the MICR line of the instrument.</p> <p>When the cheque is deposited into any payee's account, the cheque number is used to ensure that the duplicate entries are not made in the system (that the same cheque is not deposited multiple times in the system.). On deposit of every cheque, cheque number, routing number and drawer account number (all the three are present on the MICR line) are used to check for the presence of duplicate instrument. If duplicate instruments are found, cheque deposit will be rejected unless the earlier cheques are all marked as Returned.</p>

Field Name	Description
Cheque Literal	<p>[Mandatory, Drop-Down]</p> <p>The cheque literal.</p> <p>Options are:</p> <ul style="list-style-type: none"> • Drawing Voucher Deposit • Guaranteed Cheque Deposit • House Cheque Deposit • Local Cheque Deposit • MO/PO Deposit • Outstation Cheque Deposit <p>This field is not used in any processing.</p>
Cheque Date	<p>[Mandatory, dd/mm/yyyy]</p> <p>The cheque date from the calendar, which is present on the instrument.</p> <p>This date has to be less than or equal to current posting date. This date is used in checking validity of the instrument. Instruments become stale if the cheque date is prior to the current posting date by the stale period (defined in the Settlement Bank Parameters option).</p>
Routing No	<p>[Mandatory, Numeric, 9]</p> <p>The routing number against which the cheque has been drawn.</p> <p>The routing number is a combination of the bank code, the branch code and the sector code from where the instrument was drawn.</p> <p>The combination can be obtained from the Routing Branch Maintenance option.</p> <p>Routing Number³² = Sector Code / Bank Code + Branch Code</p> <p>For a deposited cheque, this routing number is used by the system to determine the float days and thus the value date of the instrument.</p> <p>For an inward clearing cheque, this routing number should belong to the bank. The order, in which the codes in the routing number are to be entered, is determined by the set up using the Settlement Bank Parameters option.</p>
Bank	<p>[Display]</p> <p>The bank name to which the cheque belongs, corresponding to the bank code extracted from the routing number.</p>

³²(It is the number printed on the cheque, also called MICR number (Magnetic Ink Character Recognition). This number facilitates faster clearance of the instrument. It can be configured to have the following information: Bank code, Sector, Branch Code.)

Field Name	Description
Branch	<p>[Display]</p> <p>The branch name from where the cheque is drawn, corresponding to the branch code and bank code extracted from the routing number.</p>
Drawer Accnt No.	<p>[Mandatory, Numeric, 16]</p> <p>The drawer account number is the account number of the person who has issued the cheque. The drawer account, generally printed on the cheque leaf is the account from where the funds will come into the beneficiary account. If the cheque is drawn on a different bank, the drawer account number will not be validated by the system. If the cheque is drawn on your own bank, the system will validate the drawer account number for its correctness.</p>
Value Date	<p>[Display]</p> <p>The value date of the cheque.</p> <p>When a cheque is deposited on an account, the system uses the routing number to check the float days from the Endpoint Float Maintenance option and the working days from the Calendar for End Point option to generate the value date of the cheque.</p> <p>The value date is the date on which the cheque is expected to be cleared. On the value date, the system updates the customer's available balance and credits the account with the cheque amount and reduces the un-cleared funds on the account.</p> <p>For more information on maintaining value date, refer to the Clearing Definitions chapter in the <i>Definitions User's Guide</i>.</p>
Sector	<p>[Display]</p> <p>The clearing sector name to which the cheque branch belongs, corresponding to the sector code extracted from the routing number. Sector Codes are defined using Sector Master option.</p>
Late Clearing	<p>[Display]</p> <p>The values Y or N for late clearing.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Y - If the late clearing is marked • N - If the late clearing is not marked <p>This field displays Y when a customer deposits a cheque after the clearing cut-off time is over, for current posting date for the selected clearing type.</p> <p>The instruments that are deposited in late clearing will be considered as 'Late for clearing'. Such instruments will be treated as deposit for the next working date for all value date calculation.</p>
Chg Commission	<p>[Display]</p> <p>This field is currently not used in any processing.</p>

To inquire on loan installment payment

1. Type the account number and press the **<Tab>** key.
2. Select the appropriate option from the **Installment Mode** drop-down list.
3. Click the **Ok** button.
4. Depending up on the option selected from **Installment Mode** drop-down list, the system displays the relevant transaction screen.
5. Enter the relevant information and click the **Ok** button
6. The system displays the **Instrument Details** screen.
7. Enter the relevant information and click the **Ok** button.
8. The system displays the transaction sequence number message box. The transaction number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction.

1.17. 1680-Agri Loan Partial Payoff Inquiry

Partial payoff indicates that part of the principal amount due, over and above the arrears due is paid off. Since Partial Payoff results in reduction in the outstanding principal the loan account will get rescheduled on the lower principal base. When performing the partial payoff the teller can chose the reschedule option - as "Recalculate installment" or "Recalculate term". A new schedule will be generated in the EOD accordingly.

In case of partial payoff, it is possible to charge interest accrued till current date i.e. upto the date the Partial Payoff transaction is performed.

The Payoff benefit specifies when the effect of the payment should be reflected on the interest base.

The available options are:

- **Immediate** – The Interest base is updated from the date of payment
- **Next Rest period** - The rest period is specified at the schedule setup (LNM98) and the interest base will be updated as per rest period specified in the schedule attached to the loan account
- **Next due date** - The interest base will be updated when the next installment falls due
- **None** - The interest base is not affected by the payment. This may be used in simple interest kind of loans

Partial Payoff of loan can be made by cash, local cheque, transfer from CASA or GL transfer by using this option.

Funds in RPA	<p>[Display]</p> <p>RPA³⁴ stands for “Repayment Pending Appropriation”. In loans module any amount paid towards repayment of the loan is first credited to RPA. The house keeping shell in the EOD later appropriates the amount in RPA to offset any arrears due in the loan account. In case no arrears are due the amount will continue to reside in RPA till such time arrears become due in the loan account. The RPA always points to a Liability GL.</p>
Partial Payoff	
Total Due Including DND	<p>[Display]</p> <p>The total amount payable by the customer is displayed.</p> <p>If 'Apply interest till date' is unchecked</p> $Total\ Due = DND + Total\ arrears + Unbilled\ penalty\ interest$ <p>If 'Apply interest till date' is checked</p> $Total\ Due = DND + Total\ arrears + Unbilled\ penalty\ interest + unbilled\ interest$

Examples of calculating the penalty for a Partial Payoff transaction:

As mentioned above following are the options or methods of calculating the Penalty Interest for a Partial Payoff transaction:

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest.

Assume a Loan account with the following status :

Outstanding Principal Balance	INR 120000.00
Outstanding Principal Arrear	INR 20000.00
Outstanding Interest Arrear	INR 2700.00
Other Arrear	INR 120.00 (also includes Interest arrear till date)
PPF Penalty Rate	5%
Total Arrears	INR 22820.00

³⁴(Repayment Pending Appropriation (advance payment))

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest.

Partial Payoff amount paid	INR 46000.00
-----------------------------------	--------------

The arrears will first be appropriated against the payment of INR 46000.00 i.e. $46000 - 22820 = \text{INR } 23180.00$ - Assuming Partial Payoff Penalty @ 5% (Amount Based method) will be calculated as $23180 * 5/105 = \text{INR } 1103.81$

The residual amount of the Partial Payoff less the Penalty amount (A-B) will be appropriated against the principal outstanding – i.e. $23180 - 1103.81 = \text{INR } 22076.19$

On Amount + Term - Penalty is charged as x% p.a. for the remaining period. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest

Assume a Loan account with the following status

Outstanding Principal Balance	INR 120000.00
Outstanding Principal Arrear	INR 20000.00
Outstanding Interest Arrear	INR 2700.00
Other Arrear	INR 120.00 (also includes Interest arrear till date)
PPF Penalty Rate	5%
Total Arrears	INR 22820.00
Partial Payoff	INR 46000.00

The appropriation will be done as under

The arrears will first be appropriated against the payment of INR 46000.00 i.e. $46000 - 22820 = \text{INR } 23180.00$ - Assuming Partial Payoff Penalty @ 5% (Amount + Term Based method assuming the total term of the loan was 60 months and the balance amount is 42 months, the rate discounting factor is $42/60 = 0.7$ and the rate is $5 * 0.7$ i.e. 3.5%) Thus the calculation will be $23180 * 3.5/103.5 = \text{INR } 783.86$

The residual amount of the Partial Payoff less the Penalty amount (A-B) will be appropriated against the principal outstanding – i.e. $23180 - 783.86 = \text{INR } 22396.14$

To inquire on loan partial payoff

1. Type the account number and press the <Tab> key.
2. Select the penalty method and type the penalty rate.
3. Select the appropriate option from the **Partial Payoff Mode** drop-down list.
4. Click the **Ok** button.
5. Depending up on the option selected from **Partial Payoff Mode** drop-down list, the system displays the relevant transaction screen.

6. Enter the relevant information and click the **Ok** button.
7. The system displays the message "Authorisation Required. Click Ok to continue".
8. Click the **OK** button.
9. The system displays the **Authorization Reason** screen.
10. Enter the relevant information and click the **Grant** button.
11. The system displays the transaction sequence number message box. The transaction number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction.

Note: For information on Denomination Detail, Instrument Detail, Cheque Detail and Authorization transactions, refer to the **FLEXCUBE Introduction User Manual**.

1.18. 1681-Agri Loan Partial Payoff by Cash

Partial payoff indicates that part of the principal amount due, over and above the arrears due is paid off. Since Partial Payoff results in reduction in the outstanding principal the loan account will get rescheduled on the lower principal base. When performing the partial payoff the teller can chose the reschedule option - as "Recalculate installment" or "Recalculate term". A new schedule will be generated in the EOD accordingly.

In case of partial payoff, it is possible to charge interest accrued till current date i.e. upto the date the Partial Payoff transaction is performed.

The Payoff benefit specifies when the effect of the payment should be reflected on the interest base.

The available options are:

- **Immediate** – The Interest base is updated from the date of payment
- **Next Rest period** - The rest period is specified at the schedule setup (LNM98) and the interest base will be updated as per rest period specified in the schedule attached to the loan account
- **Next due date** - The interest base will be updated when the next installment falls due
- **None** - The interest base is not affected by the payment. This may be used in simple interest kind of loans

Partial Payoff of loan can be made by cash, local cheque, transfer from CASA or GL transfer by using this option.

Access

- Fast Path: 1681
- Transaction Processing > Account Transaction > Agri Loan Account Transactions > Inquiries > Agri loans Partial Payoff Inquiry

Definition Prerequisites

- CYDCPAIR - Currency Pair Definition

Other Prerequisites

- The exchange rate values must be defined and downloaded
- Amount to be repaid should be greater than the due arrears

Loan Partial Payoff By Cash

Partial Payoff payment can be made by Cash mode. Partial payment indicates that part of the principal amount due, over and above the arrears due is paid off. This is followed by rescheduling of the loan as part of EOD process. The cash payment for an account will update the teller balance in that currency. The payment may be in a currency different from the account currency.

Field Name	Description
Narrative	[Optional, Alphanumeric, 40] Type the narration. This field displays the default narration, based on the transaction.

Examples of calculating the penalty for a Partial Payoff transaction:

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest.

Assume a Loan account with the following status :

Outstanding Principal Balance	INR 120000.00
Outstanding Principal Arrear	INR 20000.00
Outstanding Interest Arrear	INR 2700.00
Other Arrear	INR 120.00 (also includes Interest arrear till date)
PPF Penalty Rate	5%
Total Arrears	INR 22820.00
Partial Payoff amount paid	INR 46000.00

The arrears will first be appropriated against the payment of INR 46000.00 i.e. $46000 - 22820 = \text{INR } 23180.00$ - Assuming Partial Payoff Penalty @ 5% (Amount Based method) will be calculated as $23180 * 5/105 = \text{INR } 1103.81$

The residual amount of the Partial Payoff less the Penalty amount (A-B) will be appropriated against the principal outstanding – i.e. $23180 - 1103.81 = \text{INR } 22076.19$

On Amount + Term - Penalty is charged as x% p.a. for the remaining period. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest

Assume a Loan account with the following status

Outstanding Principal Balance	INR 120000.00
Outstanding Principal Arrear	INR 20000.00
Outstanding Interest Arrear	INR 2700.00
Other Arrear	INR 120.00 (also includes Interest arrear till date)

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest.

PPF Penalty Rate	5%
Total Arrears	INR 22820.00
Partial Payoff	INR 46000.00

The appropriation will be done as under

The arrears will first be appropriated against the payment of INR 46000.00 i.e. $46000 - 22820 = \text{INR } 23180.00$ - Assuming Partial Payoff Penalty @ 5% (Amount + Term Based method assuming the total term of the loan was 60 months and the balance amount is 42 months, the rate discounting factor is $42/60 = 0.7$ and the rate is 5×0.7 i.e. 3.5%) Thus the calculation will be $23180 \times 3.5/103.5 = \text{INR } 783.86$

The residual amount of the Partial Payoff less the Penalty amount (A-B) will be appropriated against the principal outstanding – i.e. $23180 - 783.86 = \text{INR } 22396.14$

To inquire on loan partial payoff

1. Type the account number and press the **<Tab>** key.
2. Select the penalty method and type the penalty rate.
3. Select the appropriate option from the **Partial Payoff Mode** drop-down list.
4. Click the **Ok** button.
5. Depending up on the option selected from **Partial Payoff Mode** drop-down list, the system displays the relevant transaction screen.
6. Enter the relevant information and click the **Ok** button.
7. The system displays the transaction sequence number message box. The transaction number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction.

Note: For information on Denomination Detail, Instrument Detail, Cheque Detail and Authorization transactions, refer to the **FLEXCUBE Introduction User Manual**.

1.19. 1683-Agri Loan Partial Payoff by GL

Partial payoff indicates that part of the principal amount due, over and above the arrears due is paid off. Since Partial Payoff results in reduction in the outstanding principal the loan account will get rescheduled on the lower principal base. When performing the partial payoff the teller can chose the reschedule option - as "Recalculate installment" or "Recalculate term". A new schedule will be generated in the EOD accordingly.

In case of partial payoff, it is possible to charge interest accrued till current date i.e. upto the date the Partial Payoff transaction is performed.

The Payoff benefit specifies when the effect of the payment should be reflected on the interest base.

The available options are:

- **Immediate** – The Interest base is updated from the date of payment
- **Next Rest period** - The rest period is specified at the schedule setup (LNM98) and the interest base will be updated as per rest period specified in the schedule attached to the loan account
- **Next due date** - The interest base will be updated when the next installment falls due
- **None** - The interest base is not affected by the payment. This may be used in simple interest kind of loans

Partial Payoff of loan can be made by cash, local cheque, transfer from CASA or GL transfer by using this option.

Examples of calculating the penalty for a Partial Payoff transaction:

As mentioned above following are the options or methods of calculating the Penalty Interest for a Partial Payoff transaction:

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest.

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest.

Assume a Loan account with the following status :

Outstanding Principal Balance	INR 120000.00
Outstanding Principal Arrear	INR 20000.00
Outstanding Interest Arrear	INR 2700.00
Other Arrear	INR 120.00 (also includes Interest arrear till date)
PPF Penalty Rate	5%
Total Arrears	INR 22820.00
Partial Payoff amount paid	INR 46000.00

The arrears will first be appropriated against the payment of INR 46000.00 i.e. $46000 - 22820 = \text{INR } 23180.00$ - Assuming Partial Payoff Penalty @ 5% (Amount Based method) will be calculated as $23180 * 5/105 = \text{INR } 1103.81$

The residual amount of the Partial Payoff less the Penalty amount (A-B) will be appropriated against the principal outstanding – i.e. $23180 - 1103.81 = \text{INR } 22076.19$

On Amount + Term - Penalty is charged as x% p.a. for the remaining period. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest

Assume a Loan account with the following status

Outstanding Principal Balance	INR 120000.00
Outstanding Principal Arrear	INR 20000.00
Outstanding Interest Arrear	INR 2700.00
Other Arrear	INR 120.00 (also includes Interest arrear till date)
PPF Penalty Rate	5%
Total Arrears	INR 22820.00
Partial Payoff	INR 46000.00

The appropriation will be done as under

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest.

The arrears will first be appropriated against the payment of INR 46000.00 i.e. $46000 - 22820 = \text{INR } 23180.00$ - Assuming Partial Payoff Penalty @ 5% (Amount + Term Based method assuming the total term of the loan was 60 months and the balance amount is 42 months, the rate discounting factor is $42/60 = 0.7$ and the rate is 5×0.7 i.e. 3.5%) Thus the calculation will be $23180 \times 3.5 / 103.5 = \text{INR } 783.86$

The residual amount of the Partial Payoff less the Penalty amount (A-B) will be appropriated against the principal outstanding – i.e. $23180 - 783.86 = \text{INR } 22396.14$

To inquire on loan partial payoff

1. Type the account number and press the <Tab> key.
2. Select the penalty method and type the penalty rate.
3. Select the appropriate option from the **Partial Payoff Mode** drop-down list.
4. Click the **Ok** button.
5. Depending up on the option selected from **Partial Payoff Mode** drop-down list, the system displays the relevant transaction screen.
6. Enter the relevant information and click the **Ok** button.
7. The system displays the transaction sequence number message box. The transaction number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction.

Note: For information on Denomination Detail, Instrument Detail, Cheque Detail and Authorization transactions, refer to the **FLEXCUBE Introduction User Manual**.

1.20. 1682-Agri Loan Partial Payoff by Savings Transfer

Partial payoff indicates that part of the principal amount due, over and above the arrears due is paid off. Since Partial Payoff results in reduction in the outstanding principal the loan account will get rescheduled on the lower principal base. When performing the partial payoff the teller can chose the reschedule option - as "Recalculate installment" or "Recalculate term". A new schedule will be generated in the EOD accordingly.

In case of partial payoff, it is possible to charge interest accrued till current date i.e. upto the date the Partial Payoff transaction is performed.

The Payoff benefit specifies when the effect of the payment should be reflected on the interest base.

The available options are:

- **Immediate** – The Interest base is updated from the date of payment
- **Next Rest period** - The rest period is specified at the schedule setup (LNM98) and the interest base will be updated as per rest period specified in the schedule attached to the loan account
- **Next due date** - The interest base will be updated when the next installment falls due
- **None** - The interest base is not affected by the payment. This may be used in simple interest kind of loans

Partial Payoff of loan can be made by cash, local cheque, transfer from CASA or GL transfer by using this option.

Access

- Fast Path: 1682
- Transaction Processing > Account Transaction > Agri Loan Account Transactions > Inquiries > Agri loans Partial Payoff Inquiry

Definition Prerequisites

- BAM14 - Rewards and Service Charges definition
- CYDCPAIR - Currency Pair Definition

Agri Loan Partial Payoff By Savings Transfer

Partial Payoff by transfer from a CASA account can be performed. The system validates that the CASA account entered is a valid account. If the account is a liability account, system will not allow the account to go into debit balance. The CASA account gets debited to the extent of the Partial Payoff payment and the same can be seen in the CASA statement inquiry. The loan account gets credited and the appropriation for the credit happens in EOD.

Examples of calculating the penalty for a Partial Payoff transaction:

As mentioned above following are the options or methods of calculating the Penalty Interest for a Partial Payoff transaction:

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest.

Assume a Loan account with the following status :

Outstanding Principal Balance INR 120000.00

Outstanding Principal Arrear INR 20000.00

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest.

Outstanding Interest Arrear	INR 2700.00
Other Arrear	INR 120.00 (also includes Interest arrear till date)
PPF Penalty Rate	5%
Total Arrears	INR 22820.00
Partial Payoff amount paid	INR 46000.00

The arrears will first be appropriated against the payment of INR 46000.00 i.e. $46000 - 22820 = \text{INR } 23180.00$ - Assuming Partial Payoff Penalty @ 5% (Amount Based method) will be calculated as $23180 * 5/105 = \text{INR } 1103.81$

The residual amount of the Partial Payoff less the Penalty amount (A-B) will be appropriated against the principal outstanding – i.e. $23180 - 1103.81 = \text{INR } 22076.19$

On Amount + Term - Penalty is charged as x% p.a. for the remaining period. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest

Assume a Loan account with the following status

Outstanding Principal Balance	INR 120000.00
Outstanding Principal Arrear	INR 20000.00
Outstanding Interest Arrear	INR 2700.00
Other Arrear	INR 120.00 (also includes Interest arrear till date)
PPF Penalty Rate	5%
Total Arrears	INR 22820.00
Partial Payoff	INR 46000.00

The appropriation will be done as under

The arrears will first be appropriated against the payment of INR 46000.00 i.e. $46000 - 22820 = \text{INR } 23180.00$ - Assuming Partial Payoff Penalty @ 5% (Amount + Term Based method assuming the total term of the loan was 60 months and the balance amount is 42 months, the rate discounting factor is $42/60 = 0.7$ and the rate is $5 * 0.7$ i.e. 3.5%) Thus the calculation will be $23180 * 3.5/103.5 = \text{INR } 783.86$

The residual amount of the Partial Payoff less the Penalty amount (A-B) will be appropriated against the principal outstanding – i.e. $23180 - 783.86 = \text{INR } 22396.14$

To inquire on loan partial payoff

1. Type the account number and press the <Tab> key.

2. Select the penalty method and type the penalty rate.
3. Select the appropriate option from the **Partial Payoff Mode** drop-down list.
4. Click the **Ok** button.
5. Depending up on the option selected from **Partial Payoff Mode** drop-down list, the system displays the relevant transaction screen.
6. Enter the relevant information and click the **Ok** button.
7. The system displays the transaction sequence number message box. The transaction number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction.

Note: For information on Denomination Detail, Instrument Detail, Cheque Detail and Authorization transactions, refer to the **FLEXCUBE Introduction User Manual**.

1.21. 1684-Agri Loan Partial Payoff by Local Cheque

Partial payoff indicates that part of the principal amount due, over and above the arrears due is paid off. Since Partial Payoff results in reduction in the outstanding principal the loan account will get rescheduled on the lower principal base. When performing the partial payoff the teller can chose the reschedule option - as "Recalculate installment" or "Recalculate term". A new schedule will be generated in the EOD accordingly.

In case of partial payoff, it is possible to charge interest accrued till current date i.e. upto the date the Partial Payoff transaction is performed.

The Payoff benefit specifies when the effect of the payment should be reflected on the interest base.

The available options are:

- **Immediate** – The Interest base is updated from the date of payment
- **Next Rest period** - The rest period is specified at the schedule setup (LNM98) and the interest base will be updated as per rest period specified in the schedule attached to the loan account
- **Next due date** - The interest base will be updated when the next installment falls due
- **None** - The interest base is not affected by the payment. This may be used in simple interest kind of loans

Partial Payoff of loan can be made by cash, local cheque, transfer from CASA or GL transfer by using this option.

Access

- Fast Path: 1684
- Transaction Processing > Account Transaction > Agri Loan Account Transactions > Inquiries > Agri loans Partial Payoff Inquiry

Definition Prerequisites

- CYDCPAIR - Currency Pair Definition

Other Prerequisites

- The exchange rate values must be defined and downloaded
- Amount to be repaid should be greater than the due arrears

Agri Loan Partial Payoff By Local Cheque

Partial Payoff payment can be made by Local Cheque mode. Partial payment indicates that part of the principal amount due, over and above the arrears due is paid off. This is followed by rescheduling of the loan as part of EOD process. When Partial Payoff payment for a loan is made by cheque, system accepts the cheque details such as the instrument number, routing number, the clearing type and amount. The uncleared amount of the loan is updated and the cheque is sent for clearing. The cheque date has to be less than or equal to current date. If the cheque date is less than current date the system will validate that the cheque has not crossed its stale period.

On the cheque being cleared, the uncleared amount is reduced accordingly and the loan account is credited.

Field Name	Description
Penalty Method	<p>[Mandatory, Drop-Down]</p> <p>Select the penalty method from the drop-down list.</p> <p>A bank may choose to charge a partial payoff penalty. This penalty is set up as an interest rule and attached to the stage at which the penalty is to be charged. This is usually applied in the regular stage of the loan.</p> <p>This is the method to be used to charge penalty for early repayment of the loan.</p> <p>The teller can select from anyone of the following options:</p> <ul style="list-style-type: none"> • On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest • On Amount + Term – Penalty is charged as x% p.a. for the remaining period. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest • Waive – Penalty is waived • Manual – If penalty method is selected as manual, then the penalty amount field is enabled where the user needs to enter the amount of penalty to be charged. The penalty rate field will be blank. The penalty amount can be entered as 'Zero' or a value greater than that. <p>The accounting entries will be passed to the GLs specified in the Product Interest Attributes (Fast Path: LNM42) applicable for partial pay off penalty type of interest. If penalty amount is entered as 'Zero', accounting entries will not be passed. Penalty amount will be paid from the transaction amount. Penalty will not be computed using the rate specified in Interest rate plan for penalty rate type.</p> <p>For more information refer to Example 01 provided at the end of the topic.</p>
Penalty Rate	<p>[Display]</p> <p>This field displays the penalty rate.</p> <p>The PPF penalty rate gets defaulted from the Schedule Type Definition (Fast Path: LNM98) option attached to the product under which the loan account exists.</p> <p>If the Penalty Method selected is either 'Waive' or 'Manual' this field not displays any value.</p>

Field Name	Description
Txn Amount	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the appropriate transaction amount. This is the cheque amount that is being paid as Partial Payoff. The amount entered here should be greater than the total arrears due including the penalty interest. If the amount entered is less than or equal to the arrear amount the system will display message "Transaction Amount should be greater than amount to pay". However, this amount should not be greater than the total outstanding loan amount. If the amount is greater than the outstanding loan amount the system will display message "Transaction amount is sufficient to settle the loan – Do EFS⁴⁴ Transaction".</p> <p>The amount is entered in the transaction currency for depositing the cheque. The cheque deposit amount is converted into the account currency, using the transaction currency rate and account currency rate.</p>
Partial Payoff Amt	<p>[Display]</p> <p>This field displays the partial amount (of the loan) that will be paid off.</p> <p>Initially the system will display the total arrears due in this field. After the teller enters the partial payoff amount in the Txn Amount field above the amount in this field will display the value as mentioned in the Txn Amount field.</p>
Penalty Amount	<p>[Display]</p> <p>This field displays the penalty amount charged by the bank for early partial repayment of the loan.</p> <p>The value in this field will be calculated by the system based on the penalty method selected and the default rate applicable for the loan account.</p> <p>If the penalty method selected Waive then no amount will be displayed in this field.</p> <p>If the penalty Method selected either of On Amount or On Amount + Term, this field displays the penalty amount charged by the bank for early partial repayment of the loan.</p> <p>The value in this field will be calculated by the system based on the penalty method selected and the default rate applicable for the loan account.</p> <p>If the penalty method selected is Waive then no amount will be displayed in this field.</p> <p>If the penalty method is selected as Manual, this field is available to enter the amount which can be 'Zero' or a value greater than that.</p>
Narrative	<p>[Optional, Alphanumeric, 40]</p> <p>Type the narration.</p> <p>The field displays the default narration, based on the transaction.</p>

Field Description

Field Name	Description
Clearing Type	<p>[Mandatory, Drop-Down]</p> <p>The clearing type.</p> <p>The bank can set up multiple clearing types, where cheques that are required to be cleared at different times of the day are deposited so that they can be treated differently. All processes for a cheque from outward clearing, running of value date, and marking late clearing, etc. takes place on the basis of the clearing type.</p>
Cheque No	<p>[Mandatory, Numeric, 12]</p> <p>The cheque number, which is present on the MICR line of the instrument.</p> <p>When the cheque is deposited into any payee's account, the cheque number is used to ensure that the duplicate entries are not made in the system (that the same cheque is not deposited multiple times in the system.). On deposit of every cheque, cheque number, routing number and drawer account number (all the three are present on the MICR line) are used to check for the presence of duplicate instrument. If duplicate instruments are found, cheque deposit will be rejected unless the earlier cheques are all marked as Returned.</p>

Field Name	Description
Cheque Literal	<p>[Mandatory, Drop-Down]</p> <p>The cheque literal.</p> <p>Options are:</p> <ul style="list-style-type: none"> • Drawing Voucher Deposit • Guaranteed Cheque Deposit • House Cheque Deposit • Local Cheque Deposit • MO/PO Deposit • Outstation Cheque Deposit <p>This field is not used in any processing.</p>
Cheque Date	<p>[Mandatory, dd/mm/yyyy]</p> <p>The cheque date from the calendar, which is present on the instrument.</p> <p>This date has to be less than or equal to current posting date. This date is used in checking validity of the instrument. Instruments become stale if the cheque date is prior to the current posting date by the stale period (defined in the Settlement Bank Parameters option).</p>
Routing No	<p>[Mandatory, Numeric, 9]</p> <p>The routing number against which the cheque has been drawn.</p> <p>The routing number is a combination of the bank code, the branch code and the sector code from where the instrument was drawn.</p> <p>The combination can be obtained from the Routing Branch Maintenance option.</p> <p>Routing Number⁴⁵ = Sector Code / Bank Code + Branch Code</p> <p>For a deposited cheque, this routing number is used by the system to determine the float days and thus the value date of the instrument.</p> <p>For an inward clearing cheque, this routing number should belong to the bank. The order, in which the codes in the routing number are to be entered, is determined by the set up using the Settlement Bank Parameters option.</p>
Bank	<p>[Display]</p> <p>The bank name to which the cheque belongs, corresponding to the bank code extracted from the routing number.</p>

⁴⁵(It is the number printed on the cheque, also called MICR number (Magnetic Ink Character Recognition). This number facilitates faster clearance of the instrument. It can be configured to have the following information: Bank code, Sector, Branch Code.)

Field Name	Description
Branch	<p>[Display]</p> <p>The branch name from where the cheque is drawn, corresponding to the branch code and bank code extracted from the routing number.</p>
Drawer Accnt No.	<p>[Mandatory, Numeric, 16]</p> <p>The drawer account number is the account number of the person who has issued the cheque. The drawer account, generally printed on the cheque leaf is the account from where the funds will come into the beneficiary account. If the cheque is drawn on a different bank, the drawer account number will not be validated by the system. If the cheque is drawn on your own bank, the system will validate the drawer account number for its correctness.</p>
Value Date	<p>[Display]</p> <p>The value date of the cheque.</p> <p>When a cheque is deposited on an account, the system uses the routing number to check the float days from the Endpoint Float Maintenance option and the working days from the Calendar for End Point option to generate the value date of the cheque.</p> <p>The value date is the date on which the cheque is expected to be cleared. On the value date, the system updates the customer's available balance and credits the account with the cheque amount and reduces the un-cleared funds on the account.</p> <p>For more information on maintaining value date, refer to the Clearing Definitions chapter in the <i>Definitions User's Guide</i>.</p>
Sector	<p>[Display]</p> <p>The clearing sector name to which the cheque branch belongs, corresponding to the sector code extracted from the routing number. Sector Codes are defined using Sector Master option.</p>
Late Clearing	<p>[Display]</p> <p>The values Y or N for late clearing.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Y - If the late clearing is marked • N - If the late clearing is not marked <p>This field displays Y when a customer deposits a cheque after the clearing cut-off time is over, for current posting date for the selected clearing type.</p> <p>The instruments that are deposited in late clearing will be considered as 'Late for clearing'. Such instruments will be treated as deposit for the next working date for all value date calculation.</p>
Chg Commission	<p>[Display]</p> <p>This field is currently not used in any processing.</p>

Examples of calculating the penalty for a Partial Payoff transaction:

As mentioned above following are the options or methods of calculating the Penalty Interest for a Partial Payoff transaction:

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest.

Assume a Loan account with the following status :

Outstanding Principal Balance	INR 120000.00
Outstanding Principal Arrear	INR 20000.00
Outstanding Interest Arrear	INR 2700.00
Other Arrear	INR 120.00 (also includes Interest arrear till date)
PPF Penalty Rate	5%
Total Arrears	INR 22820.00
Partial Payoff amount paid	INR 46000.00

The arrears will first be appropriated against the payment of INR 46000.00 i.e. $46000 - 22820 = \text{INR } 23180.00$ - Assuming Partial Payoff Penalty @ 5% (Amount Based method) will be calculated as $23180 * 5/105 = \text{INR } 1103.81$

The residual amount of the Partial Payoff less the Penalty amount (A-B) will be appropriated against the principal outstanding – i.e. $23180 - 1103.81 = \text{INR } 22076.19$

On Amount + Term - Penalty is charged as x% p.a. for the remaining period. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest

Assume a Loan account with the following status

Outstanding Principal Balance	INR 120000.00
Outstanding Principal Arrear	INR 20000.00
Outstanding Interest Arrear	INR 2700.00
Other Arrear	INR 120.00 (also includes Interest arrear till date)
PPF Penalty Rate	5%
Total Arrears	INR 22820.00
Partial Payoff	INR 46000.00

The appropriation will be done as under

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest.

The arrears will first be appropriated against the payment of INR 46000.00 i.e. $46000 - 22820 = \text{INR } 23180.00$ - Assuming Partial Payoff Penalty @ 5% (Amount + Term Based method assuming the total term of the loan was 60 months and the balance amount is 42 months, the rate discounting factor is $42/60 = 0.7$ and the rate is 5×0.7 i.e. 3.5%) Thus the calculation will be $23180 \times 3.5/103.5 = \text{INR } 783.86$

The residual amount of the Partial Payoff less the Penalty amount (A-B) will be appropriated against the principal outstanding – i.e. $23180 - 783.86 = \text{INR } 22396.14$

To inquire on loan partial payoff

1. Type the account number and press the <Tab> key.
2. Select the penalty method and type the penalty rate.
3. Select the appropriate option from the **Partial Payoff Mode** drop-down list.
4. Click the **Ok** button.
5. Depending up on the option selected from **Partial Payoff Mode** drop-down list, the system displays the relevant transaction screen.
6. Enter the relevant information and click the **Ok** button.
7. The system displays the transaction sequence number message box. The transaction number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction.

Note: For information on Denomination Detail, Instrument Detail, Cheque Detail and Authorization transactions, refer to the **FLEXCUBE Introduction User Manual**.

1.22. LN046 - Post Dated Cheques Maintenance

Using this option, customers can repay their loan installments through post dated cheques. All cheques are designated in the same currency, and therefore, a series of cheques can be accepted and maintained. Postdated cheques are presented to the clearing house on the respective cheque dates and subsequently treated like normal cheques.

This is used in case of EMI (Equated Monthly Installment) type of loans where the loan installment amounts (Principal+Interest) are the same. This maintenance can only be done for Term loans and for those term loan accounts where disbursement has been done.

Definition Prerequisites

- STM59 - Settlement Bank Parameters
- BAM20 - Bank Codes Maintenance
- STM54 - Routing Branch Maintenance
- STM64 - Clearing Type Maintenance
- LN057 - Loan Direct Account Opening

Modes Available

Add, Delete, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add postdated cheque for installment payment

1. Type the fast path **LN046** and click **Go** or navigate through the menus to Transaction Processing > Account Transactions > Loan Account Transactions > Clearing > Post Dated Cheques Maintenance.
2. The system displays the **Post Dated Cheques Maintenance** screen.

6. Loan Closure

1.25. 1730- Agri Loans Refund Inquiry

Using this option you can refund the excess balance of a loan account that shows credit balance after the outstanding is cleared by the customer, Further, the loan account having the credit balance should be over and above the small balance forfeiture amount set in the product level.

In such case the loan account will not be closed, till the refund is made. Once the refund is made, system will pass the necessary GL entries and mark the loan account as closed. The bank can refund the credit balance in the loan account by Cash mode or by transferring the amount to the customer's CASA account.

Loans Refund Inquiry

The screenshot shows the 'DEMO BANK' interface for a 'Loans Refund Inquiry'. The top navigation bar includes 'Local Currency DEM', 'Welcome T3ATAP', 'Date posting on 01/12/2015', and 'Previous Login Details'. The main header displays 'DEMO' and the date 'Tuesday, April 14, 2015 4:43:26 PM'. The left sidebar contains a 'Fast Path' section with '1730' and a 'SEARCH' section with a 'Customer Id' field and 'Find', 'Clear', and 'Advance' buttons. Below this is an 'ALL TRANSACTION' section with a tree view showing 'Transaction Processing', 'Global Definitions', and 'Commercial Banking & Entity Defini...'. At the bottom of the sidebar are 'MY TRANSACTION' and 'MY TODO LIST' sections. The main content area is titled 'Agri Loans Refund Inquiry' and contains several data entry fields: 'Account No' (000000036560), 'Account Ccy' (USD), 'Refund Mode' (Cash), 'Outstandings' (Principal Balance: 0.00, Amount Disbursed Today: 0.00, Total Arrears: 0.00), 'UnApplied Credits' (Amount Paid Today: 0.00, Funds in RPA: 31,300.00), and 'Refund' (Total Payable: 31,300.00). A 'Message from webpage' dialog box is centered on the screen, asking 'contd: Do you want to continue?' with 'OK' and 'Cancel' buttons. The bottom of the screen features a navigation bar with buttons for 'Card', 'Change Pin', 'Cheque', 'Card Rate', 'Denomination', 'Instrument', 'Inventory', 'Pin Validation', 'Service Charge', 'Signature', and 'Transfer Cheque', along with 'Login', 'Logout', 'Close', and 'Clear' buttons.

5. Click the **Ok** button.
6. The system displays the message "Do You want to continue?" Click the **Ok** button.
7. Depending on the option selected the system displays the relevant transaction screen.

9. Click the **Ok** button.

10. The system displays the relevant transaction screen depending on the option selected.
11. Enter the relevant information and click the **Ok** button.
12. The system displays the transaction number. The transaction number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction.

Note: Depending on the set up, there will be validation that the customer of the Debit account and the customer of the Credit should have the same Customer ID.

1.26. 1690-Agri Loans Full Payoff Inquiry

The balance loan outstanding amount can be refunded by the customer in full by Cash, transfer from CASA or GL Transfer by using this option. Full payoff indicates that the loan account is being settled and closed before the term of the loan ends. The bank may charge some penalty for such early settlements.

At the time of **EFS**⁴⁸, system calculates the interest and arrears (**IOA**⁴⁹ interest) due till date. The EFS closure date is always taken as the Value date. Banks may require the customer to provide sufficient notice prior to full payoff of the Loan account. The payoff notice period is set in the **Product Master Maintenance** option. In case an EFS notice has been given then the end of notice period is taken as the EFS date. Else in case EFS is done without notice no account is taken of the notice period.

Once final settlement is made, the system marks the account as closed today. The system then passes the GL entries and closes the account in EOD. No further transactions or processing will occur on this account.

Revolving Type of Agri Loans (Those loans which are maintained as Revolving Type 'Immediate' or Yearly' in ALM21) can be closed online during Full Payoff Inquiry post authorization, if there are no Credit Balance present in Agriculture Loan account and Total Due to be paid by customer is zero.

Prepayment Charges	<p>[Display]</p> <p>The prepayment charges based on the penalty method selected is displayed. This field will be blank if Waive option is selected in the Penalty Method.</p> <p>If the On Amount option is selected from the Penalty Method drop-down list, the system calculates the prepayment penalty on the amount being paid towards the principal after all current arrears are paid at the specified penalty rate.</p> <p>If the On Amount &Term option is selected from the Penalty Method drop-down list, the system calculates the prepayment penalty on the amount being paid towards the principal after all current arrears are paid from date of full payoff to the maturity date of the loan.</p> <p>If the Waive option is selected from the Penalty Method drop-down list, the value in this field will be zero.</p>
Upto Maturity Date	<p>[Display]</p> <p>The maturity date of the loan will be displayed. The penalty will be calculated from the date of the EFS upto the Maturity Date displayed in this field.</p>
Total Due	<p>[Display]</p> <p>The total amount payable by the customer.</p> <p><i>Total Due= Total arrears (Installment Arrears + Penalty Arrears) + UnBilled</i></p> <p><i>Penalty Interest + Unbilled Interest+Unbilled SC+ Unbilled Penalty Fee +DND+</i></p> <p><i>Prepayment charges+ Principal Balance</i></p>

To payoff full loan account

1. Type the account number and press the <Tab> key.
2. Select the settlement mode from the drop-down list.
3. Click the **Ok** button.

⁵⁰(Repayment Pending Appropriation (advance payment))

4. The system displays the relevant transaction screen depending on the settlement mode selected.
5. Enter the relevant information and click the **Ok** button.

Note: For information on Denomination Detail, Instrument Detail, Cheque Detail and Authorization transactions, refer to the ***FLEXCUBE Introduction User Manual***.

** Examples of calculating the penalty for a Early or Final Settlement (EFS) Transaction:*

As mentioned above following are the options or methods of calculating the Penalty Interest for a EFS transaction:

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid towards appropriation of the balance principal amount.

Assume a Loan account with the following status:

Outstanding Principal Balance	INR 120000.00
Outstanding Principal Arrear	INR 20000.00
Outstanding Interest Arrear	INR 2700.00
Other Arrear	INR 120.00 (also includes Interest arrear till date)
EFS Penalty Rate	5%

Thus, the total arrears is INR 22820.00

Assuming all the above arrears i.e. INR 22820 is paid the balance principal amount after repayment of Principal arrears will be

120000 less 20000 = INR 100000

Penalty will be calculated on the net amount of principal which is to be closed prematurely – i.e. INR 100000

Assuming EFS Penalty @ 5% (Amount Based method) will be calculated as
 $100000 \times 5 / 100 = \text{INR } 5000$

On Amount + Term - Penalty is charged as x% p.a. for the remaining period. The penalty will be calculated on the excess amount repaid towards appropriation of the balance principal amount.

Assume a Loan account with the following status:

Outstanding Principal Balance	INR 120000.00
Outstanding Principal Arrear	INR 20000.00
Outstanding Interest Arrear	INR 2700.00

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid towards appropriation of the balance principal amount.

Other Arrear : INR 120.00 (also includes Interest arrear till date)

EFS Penalty Rate 5%

Thus, the total arrears is INR 22820.00

Assuming all the above arrears i.e. INR 22820 is paid the balance principal amount after repayment of Principal arrears will be

120000 less 20000 = INR 100000

Penalty will be calculated on the net amount of principal which is to be closed prematurely – i.e. INR 100000

Assuming EFS @ 5% (Amount + Term Based method assuming the total term of the loan was 60 months and the balance term is 42 months, the rate discounting factor is $42/60 = 0.7$)

Thus the calculation will be $100000 * 5\% * 0.7 = \text{INR } 3500$

1.27. 1691-Agri Loans EFS by Cash

The balance loan outstanding amount can be refunded by the customer in full by Cash, transfer from CASA or GL Transfer by using this option. Full payoff indicates that the loan account is being settled and closed before the term of the loan ends. The bank may charge some penalty for such early settlements.

At the time of **EFS**⁵¹, system calculates the interest and arrears (**IOA**⁵² interest) due till date. The EFS closure date is always taken as the Value date. Banks may require the customer to provide sufficient notice prior to full payoff of the Loan account. The payoff notice period is set in the **Product Master Maintenance** option. In case an EFS notice has been given then the end of notice period is taken as the EFS date. Else in case EFS is done without notice no account is taken of the notice period.

Once final settlement is made, the system marks the account as closed today. The system then passes the GL entries and closes the account in EOD. No further transactions or processing will occur on this account.

To payoff full loan account

1. Type the account number and press the <Tab> key.
2. Select the settlement mode from the drop-down list.
3. Click the **Ok** button.
4. The system displays the relevant transaction screen depending on the settlement mode selected.
5. Enter the relevant information and click the **Ok** button.

Note: For information on Denomination Detail, Instrument Detail, Cheque Detail and Authorization transactions, refer to the **FLEXCUBE Introduction User Manual**.

** Examples of calculating the penalty for a Early or Final Settlement (EFS) Transaction:*

As mentioned above following are the options or methods of calculating the Penalty Interest for a EFS transaction:

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid towards appropriation of the balance principal amount.

Assume a Loan account with the following status:

Outstanding Principal Balance	INR 120000.00
Outstanding Principal Arrear	INR 20000.00
Outstanding Interest Arrear	INR 2700.00
Other Arrear	INR 120.00 (also includes Interest arrear till date)
EFS Penalty Rate	5%

Thus, the total arrears is INR 22820.00

Assuming all the above arrears i.e. INR 22820 is paid the balance principal amount after repayment of Principal arrears will be

120000 less 20000 = INR 100000

Penalty will be calculated on the net amount of principal which is to be closed prematurely – i.e. INR 100000

Assuming EFS Penalty @ 5% (Amount Based method) will be calculated as
 $100000 \times 5/100 = \text{INR } 5000$

On Amount + Term - Penalty is charged as x% p.a. for the remaining period. The penalty will be calculated on the excess amount repaid towards appropriation of the balance principal amount.

Assume a Loan account with the following status:

Outstanding Principal Balance	INR 120000.00
Outstanding Principal Arrear	INR 20000.00
Outstanding Interest Arrear	INR 2700.00

Other Arrear : INR 120.00 (also includes Interest arrear till date)

EFS Penalty Rate 5%

Thus, the total arrears is INR 22820.00

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid towards appropriation of the balance principal amount.

Assuming all the above arrears i.e. INR 22820 is paid the balance principal amount after repayment of Principal arrears will be

120000 less 20000 = INR 100000

Penalty will be calculated on the net amount of principal which is to be closed prematurely – i.e. INR 100000

Assuming EFS @ 5% (Amount + Term Based method assuming the total term of the loan was 60 months and the balance term is 42 months, the rate discounting factor is $42/60 = 0.7$

Thus the calculation will be $100000 * 5\% * 0.7 = \text{INR } 3500$

1.28. 1692-Agri Loans EFS by Savings Transfer

The balance loan outstanding amount can be refunded by the customer in full by Cash, transfer from CASA or GL Transfer by using this option. Full payoff indicates that the loan account is being settled and closed before the term of the loan ends. The bank may charge some penalty for such early settlements.

At the time of **EFS**⁵⁴, system calculates the interest and arrears (**IOA**⁵⁵ interest) due till date. The EFS closure date is always taken as the Value date. Banks may require the customer to provide sufficient notice prior to full payoff of the Loan account. The payoff notice period is set in the **Product Master Maintenance** option. In case an EFS notice has been given then the end of notice period is taken as the EFS date. Else in case EFS is done without notice no account is taken of the notice period.

Once final settlement is made, the system marks the account as closed today. The system then passes the GL entries and closes the account in EOD. No further transactions or processing will occur on this account.

Agri Loan EFS By Savings Transfer

EFS by transfer from a CASA account can be performed. The system validates that the CASA account entered is a valid account, without a block or debit block status. If the account is a liability account, system will not allow the account to go into negative balance. The CASA account gets debited to the extent of the EFS amount and the same can be seen in the CASA statement inquiry.

EFS Amount	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the amount that will be paid as full settlement of the loan.</p> <p>This amount will be in the same currency as that of the loan account. It is inclusive of the future interest amount.</p>
Sav Acct Amt	<p>[Display]</p> <p>This field displays the amount that will be debited from the provider CASA account, for the final settlement of the loan.</p>
User Reference No	<p>[Optional, Alphanumeric, 40]</p> <p>Type the user reference number.</p> <p>The user reference number is assigned to identify the transaction.</p> <p>This field is enabled or disabled depending on the profit booking being enabled or disabled for the particular transaction.</p>

Field Name	Description
Narrative	[Optional, Alphanumeric, 40] Type the narration. The field displays the default narration, based on the transaction.

To payoff full loan account

1. Type the account number and press the <Tab> key.
2. Select the settlement mode from the drop-down list.
3. Click the **Ok** button.
4. The system displays the relevant transaction screen depending on the settlement mode selected.
5. Enter the relevant information and click the **Ok** button.

Note: For information on Denomination Detail, Instrument Detail, Cheque Detail and Authorization transactions, refer to the **FLEXCUBE Introduction User Manual**.

** Examples of calculating the penalty for a Early or Final Settlement (EFS) Transaction:*

As mentioned above following are the options or methods of calculating the Penalty Interest for a EFS transaction:

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid towards appropriation of the balance principal amount.

Assume a Loan account with the following status:

Outstanding Principal Balance	INR 120000.00
Outstanding Principal Arrear	INR 20000.00
Outstanding Interest Arrear	INR 2700.00
Other Arrear	INR 120.00 (also includes Interest arrear till date)
EFS Penalty Rate	5%

Thus, the total arrears is INR 22820.00

Assuming all the above arrears i.e. INR 22820 is paid the balance principal amount after repayment of Principal arrears will be

120000 less 20000 = INR 100000

Penalty will be calculated on the net amount of principal which is to be closed prematurely – i.e. INR 100000

Assuming EFS Penalty @ 5% (Amount Based method) will be calculated as
 $100000 * 5 / 100 = \text{INR } 5000$

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid towards appropriation of the balance principal amount.

On Amount + Term - Penalty is charged as x% p.a. for the remaining period. The penalty will be calculated on the excess amount repaid towards appropriation of the balance principal amount.

Assume a Loan account with the following status:

Outstanding Principal Balance INR 120000.00

Outstanding Principal Arrear INR 20000.00

Outstanding Interest Arrear INR 2700.00

Other Arrear : INR 120.00 (also includes Interest arrear till date)

EFS Penalty Rate 5%

Thus, the total arrears is INR 22820.00

Assuming all the above arrears i.e. INR 22820 is paid the balance principal amount after repayment of Principal arrears will be

120000 less 20000 = INR 100000

Penalty will be calculated on the net amount of principal which is to be closed prematurely – i.e. INR 100000

Assuming EFS @ 5% (Amount + Term Based method assuming the total term of the loan was 60 months and the balance term is 42 months, the rate discounting factor is $42/60 = 0.7$

Thus the calculation will be $100000 * 5\% * 0.7 = \text{INR } 3500$

1.29. 1693-Agri Loans EFS by GL

The balance loan outstanding amount can be refunded by the customer in full by Cash, transfer from CASA or GL Transfer by using this option. Full payoff indicates that the loan account is being settled and closed before the term of the loan ends. The bank may charge some penalty for such early settlements.

At the time of **EFS**⁵⁷, system calculates the interest and arrears (**IOA**⁵⁸ interest) due till date. The EFS closure date is always taken as the Value date. Banks may require the customer to provide sufficient notice prior to full payoff of the Loan account. The payoff notice period is set in the **Product Master Maintenance** option. In case an EFS notice has been given then the end of notice period is taken as the EFS date. Else in case EFS is done without notice no account is taken of the notice period.

Once final settlement is made, the system marks the account as closed today. The system then passes the GL entries and closes the account in EOD. No further transactions or processing will occur on this account.

Field Description

Field Name	Description
Account No	<p>[Mandatory, Numeric, 16]</p> <p>Type the appropriate account number for which the early/final settlement of the loan is to be made. The name of the loans account holder is populated adjacent to the account number.</p> <p>This is a numeric field and can hold up to 16 digits.</p> <p>This field is mandatory.</p>
Account Ccy	<p>[Display]</p> <p>This field displays the currency assigned to the product at the product level, under which the account is opened.</p> <p>All the entries posted in the account are in the account currency. The exchange rate values must be defined and downloaded.</p> <p>For example, if the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.</p> <p>This field is non-editable.</p>

Field Name	Description
Penalty Method	<p>[Mandatory, Drop-Down]</p> <p>A bank may choose to charge a EFS penalty. This penalty is set up as an interest rule and attached to the stage at which the penalty is to be charged. This is the method to be used to charge penalty for Early/Final Settlement of the loan.</p> <p>The teller can select from anyone of the following options. The options are:</p> <ul style="list-style-type: none"> • On Amount – The penalty is will be charged as x% of the outstanding principal amount. • On Amount + term – The penalty is will be charged as x% of the outstanding principal amount for the remaining period. • Waive – The penalty is waived. <p><i>* Examples of calculating the penalty is mentioned at the end of Full Payoff option</i></p>
Penalty Rate	<p>[Mandatory, Numeric]</p> <p>The penalty rate for the early/final settlement is displayed. The EFS penalty rate gets defaulted from the Schedule Type Definition option (Fast Path: LNM98) attached to the product under which the loan account exists. This rate cannot be modified.</p> <p>This field is disabled if the penalty method is selected as Waive.</p>
Settlement Mode	<p>[Mandatory, Drop-Down]</p> <p>Multiple repayment modes are possible for Loan EFS. However, the modes are validated against the parameters defined at the Loans Product Master Level option (Fast Path: LNM11). Following are the EFS modes of payment.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Cash • Savings Transfer • GL Transfer
Value Date	<p>[Display]</p> <p>Displays the process date and is disabled. By default, the current date is displayed.</p>
Outstanding	
Principal Balance	<p>[Display]</p> <p>The actual principal balance on the date of early or final payoff considering if all dues were paid on time is displayed.</p> <p>This field is non-editable.</p>

Field Name	Description
Total Arrears	<p>[Display]</p> <p>The field displays the total arrears due on the date of EFS excluding Unbilled Interest+ Penalty interest.</p> <p><i>Total Arrears = principal arrears + interest arrears + fee arrears + legal fee arrears + premium arrears + outgoing arrears + penalty arrears</i></p>
UnBilled SC	<p>[Display]</p> <p>Displays the unbilled SC if any.</p>
UnBilled Interest	<p>[Display]</p> <p>Unbilled Interest is the interest accrued on the loan account from the last interest charging date till the current date i.e. the date of partial repayment of loan.</p> <p>This field is non-editable.</p>
Upto	<p>[Display]</p> <p>The system generated date up to which unbilled interest is calculated is displayed.</p> <p>This field is non-editable.</p>
UnBilled Penalty Interest	<p>[Display]</p> <p>Unbilled Penalty Interest is the interest accrued on the loan account from the last penalty charging date till the current date. The Unbilled penalty interest till date, due to late payment of arrears on the account is calculated online.</p> <p>This field is non-editable.</p>
Upto	<p>[Display]</p> <p>The system-generated date up to which the Unbilled penalty interest is calculated is displayed.</p> <p>This field is non-editable.</p>
UnBilled Penalty Fee	<p>[Display]</p> <p>In case any unbilled penalty charges/Fees in the schedule is attached to the loan account the same is calculated and displayed.</p>
Upto	<p>[Display]</p> <p>The system-generated date up to which the penalty charges are calculated.</p> <p>By default, the system displays the process date.</p>
UnApplied Credits	

Field Name	Description
Amount Paid Today	<p>[Display]</p> <p>The amount paid, on the current date, into the loan account by way of installment payment, advance payment, partial payoff or standing instruction from CASA account is displayed here.</p>
Funds in RPA	<p>[Display]</p> <p>RPA⁵⁹ stands for “Repayment Pending Appropriation”. In loans module any amount paid towards repayment of the loan is first credited to RPA. The house keeping shell in the EOD later appropriates the amount in RPA to offset any arrears due in the loan account. In case no arrears are due the amount will continue to reside in RPA till such time arrears become due in the loan account. The RPA always points to a Liability GL.</p>
Settlement	
Prepayment Charges	<p>[Display]</p> <p>The prepayment charges based on the penalty method selected is displayed. This field will be blank if Waive option is selected in the Penalty Method.</p> <p>If the On Amount option is selected from the Penalty Method drop-down list, the system calculates the prepayment penalty on the amount being paid towards the principal after all current arrears are paid at the specified penalty rate.</p> <p>If the On Amount &Term option is selected from the Penalty Method drop-down list, the system calculates the prepayment penalty on the amount being paid towards the principal after all current arrears are paid from date of full payoff to the maturity date of the loan.</p> <p>If the Waive option is selected from the Penalty Method drop-down list, the value in this field will be zero.</p>
Upto Maturity Date	<p>[Display]</p> <p>The maturity date of the loan will be displayed. The penalty will be calculated from the date of the EFS upto the Maturity Date displayed in this field.</p>
Total Due	<p>[Display]</p> <p>The total amount payable by the customer.</p> <p><i>Total Due= Total arrears (Installment Arrears + Penalty Arrears) + UnBilled Penalty Interest + Unbilled Interest+Unbilled SC+ Unbilled Penalty Fee +DND+ Prepayment charges+ Principal Balance</i></p>

Future Interest Charged #	<p>[Conditional, Numeric, 13, Two]</p> <p>Type the quantum of the future interest amount, to be booked at the time of EFS to interest income GL.</p> <p>The future interest amount is calculated as follows:</p> <p><i>Future Interest = Total of all future interest installments that will be due after the value date – uncollected interest.</i></p> <p>The value in this field can be reduced to zero but it cannot be more than the current value in the field.</p> <p>This field is enabled only if the Add On Loan check box is selected in the Loan Product Master (Fast Path: LNM11) option (Syariah Loans).</p> <p>For Non-Syariah term loans this field will display zero value and will not be available for modifications even after the user chooses to continue with EFS.</p>

Field Name	Description
Interest Waived	[Display] This field displays the future interest amount reduced by the user in the adjacent field.
EFS Amount	[Mandatory, Numeric, 13, Two] Type the amount that will be paid as full settlement of the loan. This amount will be in the same currency as that of the loan account. It is inclusive of the future interest amount.
GL Acct Amount	[Display] This field displays the amount that will be debited from the provider CASA account, for the final settlement of the loan.
Narrative	[Optional, Alphanumeric, 40] Type the narration. The field displays the default narration, based on the transaction.

To payoff full loan account

1. Type the account number and press the <Tab> key.
2. Select the settlement mode from the drop-down list.
3. Click the **Ok** button.
4. The system displays the relevant transaction screen depending on the settlement mode selected.
5. Enter the relevant information and click the **Ok** button..

Note: For information on Denomination Detail, Instrument Detail, Cheque Detail and Authorization transactions, refer to the ***FLEXCUBE Introduction User Manual***.

** Examples of calculating the penalty for a Early or Final Settlement (EFS) Transaction:*

As mentioned above following are the options or methods of calculating the Penalty Interest for a EFS transaction:

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid towards appropriation of the balance principal amount.

Assume a Loan account with the following status:

Outstanding Principal Balance	INR 120000.00
Outstanding Principal Arrear	INR 20000.00
Outstanding Interest Arrear	INR 2700.00

On Amount – Penalty is charged as x% of amount. The penalty will be calculated on the excess amount repaid towards appropriation of the balance principal amount.

Other Arrear INR 120.00 (also includes Interest arrear till date)

EFS Penalty Rate 5%

Thus, the total arrears is INR 22820.00

Assuming all the above arrears i.e. INR 22820 is paid the balance principal amount after repayment of Principal arrears will be

120000 less 20000 = INR 100000

Penalty will be calculated on the net amount of principal which is to be closed prematurely – i.e. INR 100000

Assuming EFS Penalty @ 5% (Amount Based method) will be calculated as
 $100000 \times 5 / 100 = \text{INR } 5000$

On Amount + Term - Penalty is charged as x% p.a. for the remaining period. The penalty will be calculated on the excess amount repaid towards appropriation of the balance principal amount.

Assume a Loan account with the following status:

Outstanding Principal Balance INR 120000.00

Outstanding Principal Arrear INR 20000.00

Outstanding Interest Arrear INR 2700.00

Other Arrear : INR 120.00 (also includes Interest arrear till date)

EFS Penalty Rate 5%

Thus, the total arrears is INR 22820.00

Assuming all the above arrears i.e. INR 22820 is paid the balance principal amount after repayment of Principal arrears will be

120000 less 20000 = INR 100000

Penalty will be calculated on the net amount of principal which is to be closed prematurely – i.e. INR 100000

Assuming EFS @ 5% (Amount + Term Based method assuming the total term of the loan was 60 months and the balance term is 42 months, the rate discounting factor is $42/60 = 0.7$)

Thus the calculation will be $100000 \times 5\% \times 0.7 = \text{INR } 3500$

7. Other Transactions

1.30. LNM42 - Product Interest Attributes

Using this option you can link the defined interest rules with various products.

In Interest rules the various type of interests, viz., Regular, Penalty, Partial Payoff Penalty, **EFS**⁶⁰ Penalty and Post Maturity Interest are defined. Only interest rules attached to a product from Product Interest Attributes are available for linking at the Schedule Type Maintenance.

All interest related GLs are defined under the Product Interest Attributes Maintenance. Further the accounting basis, i.e., whether the interest calculation should be on Accrual or Cash basis can be specified through this maintenance for Penalty interest type.

Definition Prerequisites

- LNM41 - Interest Rules
- LNM11 - Product Master Maintenances
- GLDCHACT - (Chart of accounts)

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add product interest attributes details

1. Type the fast path **LNM42** and click **Go** or navigate through the menus to **Global Definitions > Loan > Product Interest Attributes**.
2. The system displays the **Product Interest Attributes** screen.

Field Description

Field Name	Description
Product Code	<p>[Mandatory, Pick List]</p> <p>Select the product, for which the Interest Attribute is to be defined, from the pick list. The pick list lists only the authorized loans products.</p> <p>Product Code is a manually generated unique identifier for the Loan product.</p>
Currency	<p>[Display]</p> <p>This field displays the currency code in which the product is defined.</p> <p>The list of valid currencies is maintained in CYDCDEFN (currency definition).</p> <p>All the entries are posted in the account in the account currency. The exchange rate values must be defined and downloaded.</p>

Field Name	Description
Interest Rule	<p>[Mandatory, Pick List]</p> <p>Select the interest rule from the pick list.</p> <p>It is mandatory to define and download the Interest Rules (Fast Path: LNM41) before defining the Product Interest Attributes.</p> <p>The system displays the name of the interest rule adjacent to the interest rule code.</p>
Interest Type	<p>[Display]</p> <p>This field displays the interest type associated with the Interest Rule selected in the Interest Rule field.</p> <p>As mentioned above Interest rules facilitates defining the various types of interests, viz., Regular, Penalty, Partial Payoff Penalty, EFS Penalty and Post Maturity Interest.</p>
Interest Treatment	
Interest Treatment	<p>[Mandatory, Drop-Down]</p> <p>Select the interest treatment from the drop-down list.</p>
Accounting	
<p>It is mandatory to select either the Cash Basis or Accrual Basis option. The system enables or disables the fields for modification based on the system configuration and interest types maintained for the interest rules. For Example: For PPF, EFS interest types the accounting can be configured as Cash basis. For regular, post maturity interest types the accounting can be configured as accrual basis.</p>	
Cash Basis	<p>[Optional , Radio Button]</p> <p>Click Cash Basis, if accounting should be done on the cash basis. In Cash Basis the interest is calculated online at the time of the transaction, i.e., the accounting entries are passed only on the day the transaction is performed.</p>
Accrual Basis	<p>[Optional, Radio Button]</p> <p>Click Accrual Basis, if accounting should be done on accrual basis. "Accrual" of Interest on loan accounts is the process by which income is "earned" or recognized at a pre-defined frequency. This means the accrual frequency is the frequency with which accounting entries to recognize interest accrual are passed. Thus, accrual of interest on Loans is periodic, the frequency being decided at product level and can be set as Daily, Monthly or higher.</p>
GL Codes	
Interest Income	<p>[Mandatory, Numeric, Nine]</p> <p>Type the appropriate GL code with Income type for recording Income Earned from Loan accounts under this product.</p> <p>This GL account is credited and the Interest Accrued GL account is debited at the time of Loan Interest accrual on an account.</p> <p>This is an Income type GL.</p>

Field Name	Description
Suspended Interest	<p>[Mandatory, Numeric, Nine]</p> <p>Type the appropriate GL code with Liability type for recording Income Earned from suspended accounts.</p> <p>This GL account is credited and the Suspended interest Accrued GL account is debited at the time of Interest accrual on a Suspended account.</p> <p>This GL is a Liability type of GL.</p>
Interest Accrued	<p>[Mandatory, Numeric, Nine]</p> <p>Type the appropriate GL code with Asset type for recording Interest Accrued on Loan accounts.</p> <p>This GL account is debited and the Interest Income GL account is credited at the time of Interest accrual on a Loan account with Normal Accrual status.</p> <p>This GL is an Asset type of GL.</p>
Suspended Interest Accrued	<p>[Mandatory, Numeric, Nine]</p> <p>Type the appropriate GL code with Asset type for recording Interest Accrued on Suspended Loan accounts.</p> <p>This GL account is debited and the Suspended interest (Liability) GL account is credited at the time of Interest accrual on a Suspended Loan account.</p> <p>This GL is a Asset type of GL.</p>
Interest Receivable	<p>[Mandatory, Numeric, Nine]</p> <p>Type the appropriate GL code with type asset for recording interest receivable amount on Loan accounts.</p> <p>Entries to this GL happen only after the accruals have happened on the loan account. During charging of interest on Loan accounts the Interest Receivable GL account is debited and the Interest Accrued GL account is credited (reversed). Once this GL is debited it implies that the arrear is generated and the interest amount becomes due from the customer.</p> <p>This is an asset type GL.</p>
Suspended Interest Receivable	<p>[Mandatory, Numeric, Nine]</p> <p>Type the appropriate GL code with asset type for recording Interest Receivable amount on suspended accounts.</p> <p>During charging on an already suspended account, this GL account is debited and the Suspended Interest Accrued GL is credited.</p> <p>When an account turns non-performing and if the clawback facility is enabled, all the pending interest arrears are transferred to this GL. In this case this GL is debited and the Interest Receivable GL is credited.</p> <p>This is an asset type of GL.</p>

Field Name	Description
Unearned Interest	This GL is currently not in use.
Suspended Recovery	<p>[Mandatory, Numeric, Nine]</p> <p>Type the appropriate GL code with Income type for recording suspended interest recovered from suspended accounts.</p> <p>When credits are made to suspended accounts for recovery of interest, the Suspended Interest (Income GL) is debited to the extent of recovery and this GL is credited.</p> <p>This is ideally an income type of GL where the bank can monitor the interest amount that has been recovered from the account after it got suspended.</p>
Interest Waiver	<p>[Display]</p> <p>This field displays the interest waiver.</p> <p>The waived interest account is debited this GL account.</p>
Interest Expense	<p>[Display]</p> <p>This field displays the interest expense only if credit interest rule is selected and product type is revolving.</p>
Interest Income Adjustment	<p>[Mandatory, Numeric, Nine]</p> <p>Type the appropriate GL code with income type for recording interest income adjustment from loan accounts under this product.</p> <p>This is an income type GL.</p>
Suspended Interest Income Adjustment	<p>[Mandatory, Numeric, Nine]</p> <p>Type the appropriate GL code with liability type for recording suspended interest income adjustment from suspended accounts.</p> <p>This is an liability type of GL.</p>
Margin/Profit	<p>[Conditional, Numeric, Nine]</p> <p>Type the income GL code.</p> <p>This GL will reflect the actual Interest income. The GL will be credited only when interest is paid by the customer. The interest income GL will be debited to the extent of credit received in the interest receivable GL for both normal loan accounts.</p> <p>This field is enabled if the Regular option is selected in the Interest Type field.</p>

3. Click the **Add** button.
4. Select the product code and interest rule from the pick list.
5. Enter the interest treatment, accounting basis and GL code details.

1.31. LNM43 - Installment Rules

Using this option you can define different installment rules. Installment rule helps define

- The basis on which the computation of the loan repayment amount is to be drawn. The computation formula are inbuilt in the system
- The Year base, i.e., either of Calendar or Anniversary year base
- Rounding rules
- The predefined installment rules can be applied to the **Schedule Type** (Fast Path: LNM98) option.

Definition Prerequisites

Not Applicable

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add installment rule

1. Type the fast path **LNM43** and click **Go** or navigate through the menus to **Global Definitions > Loan > Installment Rules**.
2. The system displays the **Installment Rules** screen.

Field Description

Field Name	Description
Computation	

ORACLE®

Field Name	Description
Computation Formula	<p>[Mandatory, Drop-Down]</p> <p>Select the computation formula from the drop-down list.</p> <p>As mentioned above the Installment Computation Formulae are inbuilt in the FLEXCUBE system. The basis on which the installment will be calculated will be dependent on the selection of the computation formula.</p> <p>The options are:</p> <ul style="list-style-type: none"> • ARM - It is a unique method of calculating installment payments based on weighted average calculation. The interest rule is defined on the basis of tiered term. For Example: The interest for the first 3 months (month no. 1 to 3) = 10% . The interest for the next 3 months (month no. 4 to 6) = 11%. The interest for the next 4 months (month no. 7 to 10) = 11.5%. The interest for the next 2 months (month no. 11 and 12) = 12% • IO in Arrears. • IPI- In IPI type of installment the Principal component of the installment remains constant throughout the term of the loan. The interest calculation is driven on the basis of the interest rule defined, i.e., either of Actual balance or Schedule balance. Thus the amount of installment (Principal+Interest) will be different on every due date. • Moratorium- Moratorium is similar to IOI type of Installment. However, in case of Moratorium the system does not charge the interest amount till the end of the Moratorium period. In other words no amount becomes payable during the currency of the Moratorium Period. Interest is computed and compounded periodically, but the same is capitalised at end of Moratorium period. • Post Maturity- On completion of the given term of a loan if the loan amount remains outstanding the loan account is meant to have entered in the Post Maturity stage. Post Maturity stage is mandatory in the schedule definition and the system validates the existence of the PMI stage at the time of schedule setup. A separate interest rule of Post Maturity type is defined and the Post Maturity Installment Rule together with the Post Maturity Interest Rule is defined at the time of Schedule Setup option (Fast Path: LNM98). In Post Maturity stage the entire loan outstanding together with Interest and other charge arrears becomes due. Interest is calculated on the entire outstanding loan amount including interest and other arrears. • Revolving Loan Installment- This schedule is applicable only for the Revolving kind of loans. At the time of the set up, the computation formula should be selected as the Revolving schedule to set up a Revolving Loan schedule. • IO

Field Name	Description
Charge Broken Period Interest on First repayment	<p>[Conditional, Check Box]</p> <p>Select the Charge Broken Period Interest on First repayment checkbox to charge interest for the broken period with the first repayment.</p> <p>This field is enabled on selecting the EPI option from the Computation Formula drop-down list. The selection of this option should be in conjunction with the selection of the Base Behavior in the interest base under Interest Rule, i.e., either of Expected (Schedule balance) or Actual (Actual balance).</p> <p>Ideally where the interest base selected is Expected then this check box may not be selected as interest will be calculated on the Scheduled balance.</p> <p>On the other hand if the interest base selected is Actual then this check box may be selected as the interest will be calculated on the Actual balance.</p>
Dates	
Year Base	<p>[Mandatory, Drop-Down]</p> <p>Select the year base, for the installment calculation, from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Calendar - A calendar loan will always have installment/interest payments on month ends. For e.g. a loan is disbursed on 10-Mar-2006 – for IOI stage the repayment can be made to fall due on 31-Mar-2006 and for regular stage (IPI/EPI/FPI) the repayment will fall due on 30-April-2006 • Anniversary - An Anniversary loan on the other hand will take the anniversary of the last disbursement date or any other date specified as the date of charging. For e.g. a loan is disbursed on 10-Mar-2006-for IOI stage the repayment can be made to fall due on 31-Mar-2006 and for regular stage (IPI/EPI/FPI) the repayment can be made to fall due on any date equal to or greater than 10-April-2006 but not later than 10-May-2006. <p>If Computation Formula is selected as User Defined Schedule then, the value selected in this field – Calendar OR Anniversary it will be applicable on interest arrears only and not on Principal Arrears.</p>

Rounding Rules

Field Name	Description
Rounding Method	<p>[Mandatory, Drop-Down]</p> <p>Select the rounding method from the drop-down list.</p> <p>The installment amount that is calculated after computation of principal and interest due can be rounded as per banks requirement.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Raise • Cutoff • Round • No Rounding <p>*Examples of rounding methods have been given below.</p>
Nearest Amount To Round To	<p>[Mandatory, Drop-Down]</p> <p>Select the nearest amount to round up from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • 1 • 10 • 100 • 1000

6. Click the **Ok** button.

7. The system displays the message "Record Added...Authorisation Pending...". Click the **OK** button.

8. The installment rules are added successfully once the record is authorised.

* Examples of rounding:

Installment Amount	Rounding method	Nearest amount to round to	Rounded Amount
10095.8463	Raise	1	10095.85
		10	10095.9
		100	10096
		1000	10100
10095.8463	Cutoff	1	10095.84
		10	10095.8
		100	10095
		1000	10090

Installment Amount	Rounding method	Nearest amount to round to	Rounded Amount
10095.8463	Round	1	10095.85
		10	10095.8
		100	10096
		1000	10100

1.32. LNM41 - Interest Rules

Interest computation forms a major role in the loan account. Interest rule identifies the method in which interest has to be calculated.

- The interest base (the amount on which the interest has to be calculated)
- The period (the number of days for which the interest has to be applied)
- The rate (the rate at which the interest has to be computed)

Using this option the rules are defined, based on the above components (principal, period, and rate) that are retrieved from an account for calculating interest.

Separate interest rules are required to be set up for

- Regular interest
- IOA or Penalty interest
- Post Maturity interest
- EFS penalty
- PPF penalty

For each of the above interest types, the interest rate structure, accrual basis, base for computation and rounding parameters can be set up.

Definition Prerequisites

Not Applicable

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add interest rule

1. Type the fast path **LNM41** and click **Go** or navigate through the menus to **Global Definitions > Loan > Interest Rules**.
2. The system displays the **Interest Rules** screen.

Interest Rules

				<input type="checkbox"/>

At the bottom, there is a toolbar with buttons: Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry, UDF, OK, Close, and Clear.

Field Description

Field Name	Description
Rule ID	[Mandatory, Numeric, Five] Type the Interest Rule ID. Interest rule ID is a unique number, which represents the interest rule.
Rule Name	[Mandatory, Alphanumeric, 40] Type the name for the interest rule.

Field Name	Description
Interest Type	<p>[Mandatory, Drop-Down]</p> <p>Select the interest type from the drop-down list.</p> <p>As mentioned above a schedule setup in loans requires separate interest types to be defined each having different computation parameters and characteristics.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Regular-This interest type is ideally defined for the regular stage of the loan. Regular stage from the interest rules point of view would also include the IOI and the Moratorium stage, if applicable. Interest base for regular interest is set up differently for actual balance loans and schedule balance loans <p>For Actual Balance type loans the interest base is updated based on the arrears outstanding on the account. Irrespective of the schedule of repayments generated at the time of disbursement if there are arrears pending on the account then these get added to the interest base and the interest is thus charged on outstanding interest as well. This can be set up as part of the interest rules definition by indicating which arrears should be considered as part of interest base</p> <p>On the other hand in case of scheduled balance loans irrespective of arrears on the account the interest is calculated as per the schedule only.</p> <ul style="list-style-type: none"> • Penalty- Separate rules can be set up for processing of Penalty (IOA) interest. The penalty interest base on which the penalty will be calculated is specified in the interest rules. The user can select the arrear types which will be the base for calculating the penalty. These arrears may include Interest arrears, Charge arrears, Penalty arrears and Principal arrears • Partial Payoff Penalty- Partial payoff results in reduction of part of the principal amount over and above the arrears due. A bank may thus choose to charge a partial payoff penalty. This penalty is set up as an interest rule and attached to the stage at which the penalty is to be charged. This is usually the regular stage of the loan • EFS Penalty- Early or Final settlement indicates that the loan account is being settled and closed before the term of the loan ends. The bank may charge some penalty for such early settlements. The penalty is added to the outstanding arrears and total principal due to arrive at EFS amount • Post Maturity- On completion of the given

3. Click the **Add** button.
4. Enter the rule ID and name.
5. Select the interest type from the drop-down list.

Field Description

Field Name	Description
------------	-------------

Computation	
-------------	--

Field Name	Description
Accrual Basis	<p>[Mandatory, Drop-Down]</p> <p>Select the interest accrual basis from the drop-down list.</p> <p>This field denotes the interest accrual basis to be applied to the interest rule being defined. It defines the way in which number of days is calculated between two dates for interest computation.</p> <p>FLEXCUBE Retail supports eight accrual basis.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Euro 30/360 – 30 days in a month will be taken as numerator for all months except February. Actual number of days in February will be considered for calculation. 360 days in a year will be taken as denominator. • US 30/360 - 30 days in a month will be taken as numerator and 360 days in a year will be taken as denominator. • Actual/Actual - Actual days in a month will be taken as numerator and actual days in a year will be taken as denominator. • Actual/360 - Actual days in a month will be taken as numerator and 360 days in a year will be taken as denominator. • Euro 30/Actual - 30 days in a month will be taken as numerator for all months except February. Actual number of days in February will be considered for calculation. Actual days in a year will be taken as denominator. • US 30/Actual - 30 days in a month will be taken as numerator for all months. Actual days in a year will be taken as denominator. • Actual/365 - Actual days in a month will be taken as numerator and 365 days in a year will be taken as denominator. • IND30/360 - 30 days in a month will be taken as numerator and 360 days in a year will be taken as denominator. (Feb is 30 if the dates are calendar).In case, the bank wants 30 days in all calculations the following can be done: For disbursement on Anniversary or Non month end cases - use US30/360. For disbursement on Calendar Month end cases - use IND30/360. <p>Once added, this field cannot be modified or amended.</p>

Interest Base

Interest computation is driven on two methods, viz., on Actual balance or on Expected balance. It is therefore imperative to enable the system to recognize the amount on which the interest is to be calculated. For this purpose the interest base is to be defined

Field Name	Description
Base Behavior	<p>[Conditional, Drop-Down]</p> <p>Select the base behavior from the drop-down list.</p> <p>As mentioned above, there are two methods for calculating the interest, viz., Expected or Schedule. The difference between Actual and Expected balance loan occurs only in case of arrears. Therefore at the time of schedule generation there is no effect of this aspect. The schedule generated by system would be same in both cases and would follow the expected balance. In Expected method the system will consider the schedule balance as the base whereas in Actual balance the system will recognize the actual loan outstanding balance which would include the arrears component as well.</p> <p>This field is enabled only if the Regular option is selected from the Interest Type field.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Expected-The interest calculation will not look at the actual balance and will compute interest on the scheduled expected balance only. In other words irrespective of the repayment status the interest will be calculated on the original schedule balance only. • Actual-The interest will be computed on the actual balance. • Normal – This option is the selected to define interest rule for penalty. • Slabs – If this option is selected, it allows the user to apply the penalty as per the penalty slab.
Penalty Slab Plan	<p>[Conditional, Pick List]</p> <p>Select the penalty slab plan from the pick list.</p> <p>This pick list is used to capture the penalty slabs maintained in the Penalty Slab Maintenance (Fast Path: LNM48) option.</p> <p>This field is enabled if the Penalty option is selected in the Interest Type field and Slabs option is selected in the Base Behavior field.</p>
Principal	

Principal

[Mandatory, Drop-Down]

Select the appropriate principal option, to include the principal for the interest base, from the drop-down list. Selection of this field is to be done in conjunction with the selection of the Principal Arrear options, viz., None, Include or Exclude.

The options are:

- **None**-This option is applicable only for Penalty interest type. This is because the penal interest is calculated on the arrears which can include Interest, Charge and Principal arrears. The system automatically assumes this option on selection of Penalty interest type
- **Outstanding Balance**- This is the most commonly used option for regular interest calculation of loans. This field is enabled only for Regular, EFS (Early or Final Settlement) interest and Post Maturity interest types

In case of **EFS**⁶¹ Penalty (Early or **Final Settlement**⁶²) this field value indicates the "outstanding" principal amount being paid off after set off against all arrears. The system automatically selects Outstanding balance as the base for interest type 'EFS Penalty'.

In **PMI**⁶³ stage the entire outstanding balance becomes the arrear and thus the outstanding balance will be taken as the interest base.

In case the base behavior selected is Expected the system will automatically select the Outstanding Balance as the Principal base and will exclude the Principal arrears. This will ensure that the interest calculation will happen on the schedule balance only.

On the other hand if the base behavior selected is Actual and the Principal base is Outstanding balance, the commonly used combination will be to include the Interest and charge arrears but to select Principal Arrears as 'None'. This is because the Outstanding balance already includes the Principal arrears. System will not allow to opt for the 'Include' option in the Principal Arrear field with this combination.

Selection of 'Exclude' Principal arrears in combination with base behavior as Actual and Outstanding balance as base is not advisable as interest will be calculated on scheduled principal amount which is in contradiction with the selected combination.

- **Sanctioned Amount**-The sanctioned amount is taken as the base for computation of the interest. This option is available only for Regular Interest type.
- **Disbursed Amount**- The actual amount disbursed by the bank which may be less than or equal to the sanctioned amount is taken as the base for computation of the interest.
- **Principal Paid-off**-This option is applicable only when the Interest type selected is Partial Payoff Penalty. The Partial Payoff Penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest. Thus all the fields in the arrears grid will get disabled as the excess amount repaid becomes the base for calculation of the Partial Payoff Penalty.
- Net Credit Balance

Field Name	Description
Include Advances	<p>[Conditional, Check Box]</p> <p>Select the Include Advances check box to render the Advance payment amount to reduce the outstanding principal amount to arrive at the actual interest base.</p> <p>Advance payment is the installment amount paid over and above the pending arrears.</p> <p>This field is enabled only on selection of Interest Type as Regular.</p>
Arrears	<p>Rule definition requires to specify the inclusion or exclusion of various types of arrears. Accordingly the interest base gets updated for computation of various types of interest</p>
Interest Arrears	<p>[Optional, Check Box]</p> <p>Select the Interest Arrears check box to include interest arrears for the interest base calculation.</p> <p>All interest arrears can be used as part of base calculation for interest/penalty base. This check box is enabled only when the Interest types, viz., Regular, Penalty and Post Maturity are selected.</p> <p>If the Base Behavior selected is Expected then this check box will be disabled. This is because arrears do not form part of interest base in case of an Expected schedule balance type of loan.</p> <p>For Regular interest type with the Base Behavior selected as Actual and Principal base selected is any of the available options, if this check box is selected then the interest arrears will be considered as part of the interest base.</p> <p>For Penalty interest and Post Maturity Interest type also the interest arrears check box can be selected.</p>
Charge Arrears	<p>[Optional, Check Box]</p> <p>Select the Charge Arrears check box to include charge arrears for the interest base calculation.</p> <p>Charge arrears include arrears like service charges, outgoings, legal fees and insurance premium charged on the loan account. If in arrears, these amounts can be used as part of interest base or penalty base computation.</p> <p>The other conditions are similar to ones explained above in the Interest arrears.</p>

⁶¹(Early and Final Settlement)

⁶²(It is the liquidation of the loan account on or after maturity date by paying the final installment due.)

⁶³(Post Maturity Interest)

Field Name	Description
Penalty Arrears	<p>[Optional, Check Box]</p> <p>Select the Penalty Arrears check box to include penalty arrears for the interest base calculation.</p> <p>Interest on Arrears or IOA⁶⁴/Penalty arrears can be used as part of Regular interest, Penalty interest or Post Maturity interest types. It should be noted that selection of the Penalty Arrears would result in penalty interest compounding. In case of using this parameter for interest base, care needs to be taken to set appropriate frequency for Penalty interest compounding at schedule definition. If Penalty interest compounding for interest is set as None in schedule definition, ticking this field will have no effect. The Penalty arrears check box selection would be ideally used for Post Maturity Interest type where the bank wants to charge interest on Penalty interest arrears.</p>
Principal Arrears	<p>[Mandatory, Drop-Down]</p> <p>Select the principal arrears from the drop-down list.</p> <p>Interest computation on principal arrears is determined by selection of the options under this field.</p> <p>This selection has to be done in conjunction with the selected Principal base as explained above, i.e., None, Outstanding Balance, Sanctioned Amount or Disbursed Amount. If any principal is in arrears it would already be part of outstanding. So user needs to take this into account while setting this parameter.</p> <p>This field is not applicable for Partial Payoff Penalty and EFS Penalty interest types.</p> <p>The options are:</p> <ul style="list-style-type: none"> • None- Since interest base is already calculated on outstanding principal amount, this option is usually used for interest base computation for Actual balance loans. This avoids double counting in Actual balance Loans • Include- This indicates that the principal arrears should be added over and above to the outstanding principal. This option is usually used only for Interest Type Penalty computation where Principal base itself is set to None • Exclude- If interest is to be calculated on scheduled principal amount, in schedule balance type of Loans this option is usually used. This will exclude outstanding arrears and only consider the scheduled principal balance

Rounding Rules

⁶⁴(Interest On Arrears)

Field Name	Description
Rounding Method	<p>[Mandatory, Drop-Down]</p> <p>Select the rounding method from the drop-down list.</p> <p>Interest arrears or any type of penalty arrears amount computed by the system can be set up to rounded by various methods as per the Banks requirement. The number of places to which the rounding is to be done can also be specified as 1, 10, 100 and 1000.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Raise • Cutoff • Round <p>For more information, refer to Example 01 provided at the end of the option.</p>
Nearest Amount To Round	<p>[Mandatory, Drop-Down]</p> <p>Select the nearest amount to round up from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • 1 • 10 • 100 • 1000
Control Parameters	
Minimum Interest Amount	<p>[Conditional, Numeric, 13, Two]</p> <p>Type the minimum interest amount that is to be paid.</p> <p>This field is enabled if Penalty is selected in the Interest Type field.</p>

7. Click the **OK** button.
8. The system displays the message "Record Added...Authorisation Pending...Click Ok to Continue". Click the **OK** button.
9. The interest rules are added successfully once the record is authorised.

Example01: Examples of rounding:

The available methods in Interest rules set up are as follows:

- **Raise** – The interest amount is raised to the next higher decimal place
- **Cutoff** – The interest amount is truncated at the specified decimal place
- **Round** – The interest amount is rounded up if the decimal place is .5 or greater and rounded down if less than 0.5

Interest Amount	Rounding method	Nearest amount to round to	Rounded Amount
10095.8463	Raise	1	10095.85
		10	10095.9
		100	10096
		1000	10100
10095.8463	Cutoff	1	10095.84
		10	10095.8
		100	10095
		1000	10090
10095.8463	Round	1	10095.85
		10	10095.8
		100	10096
		1000	10100

1.33. LN046 - Post Dated Cheques Maintenance

Using this option, customers can repay their loan installments through post dated cheques. All cheques are designated in the same currency, and therefore, a series of cheques can be accepted and maintained. Postdated cheques are presented to the clearing house on the respective cheque dates and subsequently treated like normal cheques.

This is used in case of EMI (Equated Monthly Installment) type of loans where the loan installment amounts (Principal+Interest) are the same. This maintenance can only be done for Term loans and for those term loan accounts where disbursement has been done.

Definition Prerequisites

- STM59 - Settlement Bank Parameters
- BAM20 - Bank Codes Maintenance
- STM54 - Routing Branch Maintenance
- STM64 - Clearing Type Maintenance
- LN057 - Loan Direct Account Opening

Modes Available

Add, Delete, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add postdated cheque for installment payment

1. Type the fast path **LN046** and click **Go** or navigate through the menus to Transaction Processing > Account Transactions > Loan Account Transactions > Clearing > Post Dated Cheques Maintenance.
2. The system displays the **Post Dated Cheques Maintenance** screen.

Routing Number	<p>[Optional, Numeric, Nine]</p> <p>Type the appropriate routing number of the cheque.</p> <p>The routing number is a combination of the bank code, the branch code and the sector code from where the instrument was drawn.</p> <p>The combination can be obtained from the Routing Branch Maintenance (Fast Path: STM54) option.</p> <p><i>Routing Number</i>⁶⁵ = Sector Code / Bank Code + Branch Code</p> <p>For a deposited cheque, this routing number is used by the system to determine the float days and thus the value date of the instrument.</p> <p>The order, in which the codes in the routing number are to be entered, is determined by the set up using the Settlement Bank Parameters screen.</p>

⁶⁵(It is the number printed on the cheque, also called MICR number (Magnetic Ink Character Recognition). This number facilitates faster clearance of the

Field Name	Description
Drawer Acct. No.	<p>[Mandatory, Numeric, 16]</p> <p>Type the appropriate account number, on which the cheque is drawn.</p> <p>The drawer account number is the account number of the person who has issued the cheque. The drawer account, generally printed on the cheque leaf, is the account from where the funds will come into the beneficiary account. If the cheque is drawn on a different bank, the drawer account number will not be validated by the system. If the cheque is drawn on your own bank, the system will validate the drawer account number for its correctness.</p>
Clearing Type	<p>[Mandatory, Drop-Down]</p> <p>Select the appropriate clearing type from the drop-down list.</p> <p>The bank can set up multiple clearing types, where cheques that are required to be cleared at different times of the day are deposited so that they can be treated differently. All processes for a cheque from outward clearing, running of value date, and marking late clearing, etc. takes place on the basis of the clearing type. Refer to Clearing Type Maintenance (Fast Path: STM64) option in <i>Clearing User's Guide</i>.</p>
Drawee Bank	<p>[Display]</p> <p>This field displays the drawee bank name and the branch name based on the routing number.</p>

Column Name	Description
From/To	<p>[Mandatory, Numeric, 12]</p> <p>Type the Start and End series of the Post dated EMI cheques.</p>
No. Of cheques	<p>[Mandatory, Numeric, 12]</p> <p>Double-click the column and type the appropriate total number of cheques in the range.</p>

instrument. It can be configured to have the following information: Bank code, Sector, Branch Code.)

Column Name	Description
Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Double click the column and select the appropriate date of the cheques from the pick list. In case there are multiple cheques being deposited that have sequential serial numbers, the date of the first cheque in the series would be entered in the date field. The remaining cheque dates would be anniversary dates based on the frequency set up.</p> <p>For example, the cheque range could be from 111 to 180. If the date on the first cheque-111 is October 12, 2003 and the frequency is set to Monthly, the next cheque would be picked up for processing on November 12, 2003.</p>
Frequency	<p>[Mandatory, Drop-Down]</p> <p>Double click the column and select the appropriate frequency from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • One Time • Monthly • Bi-Monthly • Quarterly • Half Yearly • Annual <p>It is the frequency at which the cheques are to be sent for collection. There is no validation for setting a specific frequency. This will pick up the cheque automatically for clearing on the date and at the frequency specified.</p>
Cheque Amount	<p>[Mandatory, Numeric, 13, Two]</p> <p>Double click the column and type the appropriate cheque amount.</p> <p>There is no validation for the cheque amount. The cheque can be more or less than the installment amount due on that specific account.</p>

7. Click the **ViewDetails** button to view the **Details** tab.

Field Description

Field Name	Description
Account No	[Mandatory, Numeric, 16] Type the appropriate loan account number for which you want to view the loan account balance. The name of the Loan account holder is populated, adjacent to the account number.
Account Ccy	[Display] This field displays the currency assigned to the product at the product level, under which the account is opened. All the entries posted in the account are in the account currency. The exchange rate values must be defined and downloaded. For example, if the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.
Account Status	[Display] This field displays the status of the loan account. The options are: <ul style="list-style-type: none">• Closed• Blocked• Closed Today• Open Today• Dormant• Regular• Written Off• Paid Off• Cheque Pending Settlement• Product Transferred Out• Transferred Out
Maturity Date	[Display] This field displays the final date for installment payment for the loan, i.e., the date on which the loan account will mature.
Next Due Date	[Display] This field displays the next due date from the current system date for payment of the loan installment.
Next Installment Due	[Display] This field displays the next installment amount which will be due as per the next due date.
Outstandings	

Field Name	Description
Principal Balance	<p>[Display]</p> <p>This field displays the principal balance on the date of Loan balance inquiry if all dues were paid on time. In other words the amount displayed will be the schedule balance as on the date of inquiry not including any unpaid arrears.</p>
Amount Disbursed Today	<p>[Display]</p> <p>This field will display the amount that is disbursed on the current date, if the Loan balance inquiry is done on the date when the loan was disbursed.</p>
Installment Arrears	<p>[Display]</p> <p>This field displays the total installment arrears that are outstanding in the loan account. Installment arrears will comprise of only the Principal and Interest arrears.</p> <p><i>Installment Arrears = Principal + Interest</i></p>
Other Arrears	<p>[Display]</p> <p>This field displays the other arrears to be paid in the account. Other arrears would include arrears like Fee arrears, Premium arrears, Outgoing arrears, Legal fee arrears, etc.</p>
Penalty Arrears	<p>[Display]</p> <p>This field displays the penalty interest amount due on the loan account for the non-payment of the dues.</p>
UnBilled Penalty Interest	<p>[Display]</p> <p>This field displays the unbilled penalty interest amount.</p> <p>Unbilled Penalty Interest is the penalty interest accrued on the loan account from the last penalty charging date till the current date. The same is calculated online as on the date of loan balance inquiry.</p>
UnBilled Interest	<p>[Display]</p> <p>This field displays the unbilled interest amount.</p>
UnApplied Credits	
Amount Paid Today	<p>[Display]</p> <p>This field displays any amount paid today, i.e., current date into the loan account by installment payment, advance payment, partial payoff or standing instruction.</p>

Field Name	Description
Funds in RPA	<p>[Display]</p> <p>This field displays the amount in RPA⁶⁶ GL.</p> <p>Any amount which is paid to the credit of the loan account is always routed or credited to the RPA account. The same is appropriated at EOD. If the amount paid into the loan account is in excess of the arrears due, the credit balance will be reflected in RPA. RPA is a liability type GL. Generally Loan Advance Payment amounts are shown in RPA.</p>
Current Balance	
Total Outstanding	<p>[Display]</p> <p>This field displays the total of all the outstanding in the loan account.</p> <p><i>Total Outstanding = Principal Balance + Installment Arrears + other Arrears + Penalty Arrears - Amount Paid Today - Funds in RPA + Penalty Interest Accrued + Unbilled Compounding Interest</i></p>
Uncleared Funds	<p>[Display]</p> <p>This field displays the uncleared funds.</p> <p>Any amount paid by clearing cheque by the customer into the loan account, but pending clearance of the cheque, such unclear cheque deposit amounts are displayed in this field.</p>
Available Balance	<p>[Display]</p> <p>This field displays the available balance.</p> <p>This field indicates the available balance in the cash card, i.e., Revolving loan.</p>

3. Enter the account number and press the **<Tab>** key.
4. Click the **Ok** button.
5. The system displays the loan account balance details.
6. Click the **Close** button.

Stage Name	<p>[Display]</p> <p>This column displays the stage type attached to a loan account.</p> <p>This is defined in at the Schedule Type definition under Global Definitions.</p> <p>The options are:</p> <ul style="list-style-type: none"> • IOI • EPI • REV • PMI • FPI
Stage Start Date	<p>[Display]</p> <p>This column displays the start date for the corresponding stages.</p> <p>For the first stage, the start date will be the date of the first disbursement. For the remaining stages, it is the End Date of the previous preceding stage.</p>
Principal Amount	<p>[Display]</p> <p>This column displays the principal amount payable by the customer.</p> <p>This field is applicable only for IPI⁶⁸, EPI and FPI type of loans.</p> <p>If any debit type disbursement charges are levied at the time of disbursement, the same is added to the disbursed amount.</p>
Principal Payments	<p>[Display]</p> <p>This column displays the number of installments in which the principal is paid.</p> <p>For the IOI⁶⁹ stage, the principal payments will be zero as in this stage, only the interest is repaid and not the principal.</p> <p>Based on this number, the system calculates the End Date column and the Stage Start Date column for the next stage.</p> <p>For the EPI stage, the sum of principal payments and interest payments are equal.</p>

⁶⁸(Interest and Principal Installment)

⁶⁹(Interest Only Installment)

Column Name	Description
Interest Payments	<p>[Display]</p> <p>This column displays the number of installments in which the interest on the loan amount is paid.</p> <p>The system calculates the number of interest payments, and it will be one less than the principal payment.</p> <p>For the IOI stage, the tenure will be defaulted from the schedule type definition, which can be modified.</p>
First Principal Due Date	<p>[Display]</p> <p>This column displays the first due date for the principal to be paid.</p> <p>For the IOI stage, this field is not applicable as only interest is repaid and not the principal.</p> <p>For the EPI stage, the first principal due date is same as the first interest due date. For the first stage, this is same as the Stage Start Date. For subsequent stages for the same stage name, it is calculated using First Principal Due Date and principal payments of previous stage. For the IPI stage, it can be different.</p> <p>Based on this date, the system calculates the End Date column and the Stage⁷⁰ Start Date column for the next stage.</p>
First Interest Due Date	<p>[Display]</p> <p>This column displays the first due date for the interest to be paid.</p> <p>This date will be defaulted to the end of the month in case of calendar type of products. In case of anniversary type, it should be the same date or a greater date of the next month.</p> <p>For the EPI stage, this field is the same as First Principal Due Date column.</p>
Installment Amount	<p>[Display]</p> <p>This column displays the installment amount to be repaid by the customer in each stage. The installment amount is the sum of the principal and the interest component.</p>
Stage End Date	<p>[Display]</p> <p>This column displays the end date for the particular stage.</p> <p>The system calculates the stage end date, and it is one day less than the first interest due date.</p> <p>The preceding end date is the start date for the next stage.</p>

10. Click the **Validate** button. The system validates the entries.
11. Click the **Generate Schedule** button.
12. The system displays the **Schedule Details** tab.

⁷⁰(It is a part of schedule. Various stages can be defined like IOI, IPI, EPI etc. A schedule is typically made up of more than one stage.)

Schedule Details

This tab displays the repayment schedule for the entire term of the loan. If the loan has more than one stage, then these stages will be updated with the installments and the term. The date of repayment will be the same as the disbursement date, as the installment is deducted at the time of first disbursement.

Outstanding Balance	<p>[Display]</p> <p>This column displays the total outstanding or the scheduled balance after paying the installment.</p>

13. Click on the **Schedule Definition** tab.
14. Click the **Serial Number** column in **Schedule Definition** tab.
15. The system displays the **Edit Schedule** tab.

Reschedule Parameters

At loan account opening, the loan has a specific schedule of payments attached to it. During the life cycle of a loan, system calculates and charges installment based on this schedule. In case, the customer wants to reduce the amount of installment, or increase the amount of installment and reduce the term this can be done. This can also happen when the customer has been unable to repay the loan for some period of time, and the bank decides to restructure the loan by changing the schedule itself. Any type of loan can be rescheduled e.g.: EPI/ IPI / FPI etc.

The system validates that the loan account is in regular stage with disbursement stage complete.

Rescheduling cannot be done on the installment repayment date.

Audit Trail Inquiry

This inquiry provides all the details of the transactions that have affected the loan account for given range of dates. Details like transaction date, Value date, transaction description, GL code effected are displayed. Entries like interest accrual and charging, arrears appropriation, Performing to Non-performing GL movement and vice-a-versa for the particular account, Misc. Loan debits etc. are displayed. As GL posting takes place only during the End of day processing, no details will appear in this option on the date of account opening. Further the user can also drill down on the transaction details by clicking on the transaction for which information is required.

To view the Audit Trail of the loan account click on the Audit Trail Inquiry radio button.

Arrear Total

A snap-shot view of all the statistical details related to the dues in the loan account can be viewed using the Arrear Total tab. System makes available the account related details like the amount of interest , post maturity interest, fees, penalty, premium , legal fees and outgoing due on date. The total principal arrears, total of normal arrears, total of suspended arrears and sum total of arrears is also displayed.

The screenshot displays the 'Agriculture Transaction Inquiry*' application window. The 'Account Details' section at the top shows fields for Account No (50000000309700), Currency (INR), Product (70001-Non-Crop (Maturity) Agriculture), Name (RAM SINGH), Accrual Status (NORMAL), and Account Status (ACCOUNT OPEN REG). The Outstanding Balance is 25082 and the Date of Maturity is 15/09/2015. Below this, a tabbed interface shows 'Arrear Totals' selected. The main area is divided into 'NORMAL' and 'SUSPENDED' columns. The 'NORMAL' column lists Interest (82.19), Post Maturity Interest (0), Fees (0), Penalty (0), Premium (0), Legal Fees (0), Outgoings (0), and DND Amount (0). The 'SUSPENDED' column shows zeros for all corresponding fields. To the right, summary fields show Principal Arrears (6249.99), Follo Arrears (0), Total Normal Arrears (0), Total Suspended Arrears (0), Total Arrears (6332.18), and Review Period (12). The bottom of the window features a navigation bar with various transaction types and buttons for 'UDF', 'Close', and 'Clear'.

NORMAL		SUSPENDED		Summary	
Interest :	82.19		0	Principal Arrears :	6249.99

Outgoings :	0		0		
DND Amount :	0				
Review Date :	15/01/2015				

Field Description

Field Name	Description
------------	-------------

Normal

Arrears which have been due in the loan account with accrual status of the loan account as Normal then the values will be displayed in the following fields. Arrears which were due and have not been clawed back post Suspension of the loan account will also display values under the Normal arrears column.

Interest

[Display]

The normal interest due paid in the loan account is displayed.

Field Name	Description
Post Maturity Interest	<p>[Display]</p> <p>If the loan account in Post Maturity stage the post maturity interest amount will be displayed. Ideally this field should not have any value as banks usually treat loans in Post maturity stage as Suspended and hence the Post Maturity interest arrear should appear in the suspended column as against the normal.</p>
Fees	<p>[Display]</p> <p>The fees due in the loan account is displayed.</p>
Penalty	<p>[Display]</p> <p>The penalty due from the customer under the normal period is displayed.</p>
Premium	<p>[Display]</p> <p>The premium due under the normal period is displayed.</p>
Legal Fees	<p>[Display]</p> <p>The legal fees due under the normal period is displayed.</p>
Outgoings	<p>[Display]</p> <p>The outgoings due the normal period is displayed.</p>
DND Amount	<p>[Display]</p> <p>The amount that is debited to the agri loan account.</p>
Review Date	<p>[Display, dd/mm/yyyy]</p> <p>The review date of the loan amount.</p> <p>This field is system generated, as the review period is selected the review date is displayed.</p> <p>The system generates the report and also displays a warning message if the user attempts any transaction on the account after this date is over.</p>
Review Period	<p>[Display]</p> <p>The review period of the loan amount.</p> <p>The review period is in months.</p>
Suspended	
<p>Arrears which have been due in the loan account with accrual status of the loan account as Suspended then the values will be displayed in the following fields. Arrears which were due prior to suspension of the loan account and clawed back will also display values under the Suspended arrears column.</p>	
Interest	<p>[Display]</p> <p>The interest due in the suspended period is displayed.</p>

Field Name	Description
Post Maturity Interest	[Display] The post maturity interest due for the suspended period is displayed.
Fees	[Display] The fees due under the suspended period is displayed.
Penalty	[Display] The penalty due from the customer under the suspended period is displayed.
Premium	[Display] The premium due under the suspended period is displayed.
Legal Fees	[Display] The legal fees due under the suspended period is displayed.
Outgoings	[Display] The outgoings due under the suspended period is displayed.
Review Date	[Display, dd/mm/yyyy] The review date of the loan amount. This field is system generated, as the review period is selected the review date is displayed. The system generates the report and also displays a warning message if the user attempts any transaction on the account after this date is over.
Review Period	[Display] The review period of the loan amount. The review period is in months.
Principal Arrears	[Display] The total principal arrears due on the loan account till date is displayed.
Total Normal Arrears	[Display] The total normal arrears for the loan account till date. This field displays the total of all the arrears under the normal column.
Total Suspended Arrears	[Display] The total suspended arrears for the loan account till date. This field displays the total of all the arrears under the suspended column.

Field Name	Description
Total Arrears	[Display] The total arrears for the loan account till date. This field displays the total of Principal Arrears + Total Normal Arrears + Total Suspended Arrears.
Folio Arrears	[Display] The folio Arrears.

To inquire on loan account transactions

1. Type the account number and press the <Tab> key.
2. Select the **Audit Trail Inquiry** option.
3. The system displays the **Transactions** tab.
4. Enter the relevant information and click the **Inquire** button.
5. Double-click the appropriate record to view the **Txn Details** tab.
6. The system displays the **Txn Details** tab.

16. Double-click the appropriate record to view the **Txn Details** tab.

1.38. ALM83-Agri Account Rates

The Account Rates option allows the user to vary the interest rate at the account level against the loan product. In other words the interest rate for a specific loan account can be changed by modifying the account level variance. This option provides the flexibility to the user to provide a preferential interest rate to the customer. The account level variance is validated against the minimum and maximum interest variance parameters specified at the **Loan Product Master level** option (Fast Path: LNM11).

There are schemes where borrowers can avail of capital or interest subsidy for the borrowed loan amount. In case of capital subsidy, the amount of subsidy would be placed as a non interest bearing term deposit and there would be no interest charged up to the amount of the subsidy. In case of interest subsidy, the differential interest amount is to be claimed back.

Access

- Fast Path: ALM83
- Transaction Processing > Account Transactions > Agri Account Transactions > Other Transactions > Agri Account Rates

Definition Prerequisites

- Loans Product Rates Plan (Fast Path: LN060)
- Interest Index Rates (Fast Path: BAM13)
- Interest Index Maintenance (Fast Path: BAM12)

Other Prerequisites

- Loans Product Master Maintenance (Fast Path: LNM11): Minimum and Maximum Interest Variance is specified

Field Description

Column Name	Description
Date Effective	<p>[Display]</p> <p>The date from which the existing interest rate has been effective on the loan account is displayed.</p>
Start Months	<p>[Display]</p> <p>The number of months defined for the slab. This field is applicable only when the selected plan is tiered term based.</p> <p>This is the duration for which the defined interest, penalty rates and variances will be applicable.</p> <p>For more information, refer to the Loan Product Rates Plan option (Fast Path: LN060).</p>

Column Name	Description
Start Days	<p>[Display]</p> <p>The number of days defined for the slab. This field is applicable only when the selected plan is tiered term based.</p> <p>This is the duration for which the defined interest, penalty rates and variances will be applicable.</p> <p>For more information, refer to the Loan Product Rates Plan option (Fast Path: LN060).</p>
Amount	<p>[Display]</p> <p>The amount defined for the slab. This field is applicable only when the selected plan is tiered amount based.</p> <p>This is the amount on which the defined interest, penalty rates and variances will be applicable.</p> <p>For more information, refer to the Maintaining Tiered Interest Rates for Loan Product option.</p>
Interest Rate	<p>[Display]</p> <p>The default interest rate for the loan product is displayed. This rate is the current effective interest rate (without considering the variance) linked to the interest index code.</p> <p>For more information, refer to the Index Codes Maintenance(BAM12) option and Interest Index Rate option (BAM13).</p>
Interest Variance	<p>[Display]</p> <p>The interest variance.</p> <p>This is the variance defined on the interest for the interest plan.</p> <p>For more information, refer to the Maintaining Tiered Interest Rates for Loan Product option (Fast Path: LN060).</p>
Fixed Amount	<p>[Display]</p> <p>If the selected interest plan attached to the loan account being modified is tiered amount based type then the fixed amount of interest defined for the respective slab is displayed.</p> <p>For more information, refer to the Maintaining Tiered Interest Rates for Loan Product option (Fast Path: LN060).</p>
Rate Account Variance	<p>[Mandatory, Numeric]</p> <p>The user has to enter the variance value in this field. This is the account level variance and its value should be between the maximum and the minimum level defined at the product level.</p>
Net Rate	<p>[Display]</p> <p>The net rate is computed and displayed.</p> <p><i>Net Rate= Interest Rate - Rate Account Variance</i></p>

Rate Change Parameters

The rate change either on the higher or lower side will have an influence on the loan account in terms of the installment or in terms of the tenure of the loan. The loan account schedule will have to be redrawn due to the change in the interest rate. Thus, after modifying the Rate Account Variance the loan account has to be rescheduled.

After entering the relevant information and after modifying the Rate Account Variance click on the **Rate Change Parameters** tab.

The screenshot shows the 'Agri Account Rates' window with the 'Rate Change Parameters' tab selected. The window contains several input fields and sections:

- Account Information:** Account Number, Product, Plan Name, Rate Change Effective Date (01/01/1800), Set Fixed checkbox, Branch, and Currency.
- Tier Definition:** Slab Definition, Tier Criteria, Tiered Term Lookup, and Tiered Lookup Balance.
- Definition:** Advice Required checkbox and Reschedule Option dropdown.
- Record Details:** Input By, Authorized By, Last Mnt. Date, Last Mnt. Action, and Authorized checkbox.
- Buttons:** Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry, UDF, OK, Close, and Clear.

Field Description

Field Name	Description
Advice Required	[Optional, Check Box] Select this check box if the advice is required to be sent to the customers informing them of the rate change. For more information, refer to the Maintaining Tiered Interest Rates for Loan Product option (Fast Path: LN060).

Field Name	Description
Reschedule Option	<p>[Optional, Drop-Down]</p> <p>Select the option for rescheduling.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Recalculate Term - Select this option to allow the system to keep the installment constant (as before rescheduling) and to change the term of the loan • Recalculate Installment - Select this option to allow the system to keep the maturity date of the loan constant and to change the installment amount

To view account rates details

1. Select the **Inquiry** mode.
2. Type the account number and press the **<Tab>** key.
3. The system displays the account rates details.

To modify account rates details

1. Navigate to the **Account Rates** option (Fast Path: LNM83).
2. Select the **Modify** mode.
3. Type the account number and press the **<Tab>** key.
4. Select the plan name from the pick list.
5. After selecting the appropriate options click on the **Ok** button.
6. The system displays the message "Record Modified...Authorisation Pending...Click Ok to Continue".

To delete account rates details

1. Select the **Delete** mode.
2. Type the account number and press the **<Tab>** key.
3. Select the plan name from the pick list.
4. Click the **Ok** button.
5. The system displays the message "Record Deleted...Authorisation Pending...Click Ok to Continue".

To cancel account rates details

1. Select the **Cancel** mode.
2. Type the account number and press the **<Tab>** key.
3. Select the plan name from the pick list.
4. Click the **Ok** button.
5. The system displays the message "Record Cancelled...Click Ok to Continue".

To amend account rates details

1. Select the **Amend** mode.
2. Type the account number and press the **<Tab>** key.
3. Select the plan name from the pick list.
4. Modify the relevant information and click the **Ok** button.
5. The system displays the message "Record Amended...Authorisation Pending...Click Ok to Continue".

To authorize account rates details

1. Select the **Authorize** mode.
2. Type the account number and press the **<Tab>** key.
3. Select the plan name from the pick list.
4. Click the **Ok** button.
5. The system displays the message "Record Authorized...Click Ok to Continue".

1.39. LNM81 - Rate Change

Using this option you can maintain future dated interest rate changes, effective at the interest index code level at a future date. Backdated rate change is not allowed.

Further, the rescheduling of loan accounts due to the rate change can be based on recalculate term, or recalculate installment. This is however applicable for EMI loans only. In case of **IPI**⁷⁷ type loans, system will recalculate the installment amount and the term will remain the same.

If an advice is to be generated for all accounts which have undergone a rate change, it is possible by setting the advice flag during the rate change definition.

To perform an index level rate change, the interest index code needs to have a new rate maintained with the new effective date. The effective date has to be greater than the current date. This can be done by using the **Interest Index Rate** (Fast Path: BAM13) option. Once this is done, the new rate and effective date details are defaulted for index level rate change for loan accounts in this option.

Note: The new rate will not be applied to the products, if the **Rate Revision** check box at the product level is not selected for product attached to an index.

Definition Prerequisites

- BAM12 - Interest Index Maintenance
- BAM13 - Interest Index Rates
- LNM11 - Product Master Maintenances: Rate revision flag should be enabled
- _Ref-1587468015LN060 - Loans Product Rates Plan: The rate definition should be Floating Rate

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add rate change details

1. Type the fast path **LNM81** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Other Transactions > Rate Change**.
2. The system displays the **Rate Change** screen.

1.40. AL444-Miscellaneous Charges Waiver

Miscellaneous charges can be waived using the Miscellaneous Charges Waiver option. These charges are arrears that have been raised on the account, which are still pending payment. Payment pending may be part or all of arrears assessed. The user can waive the entire amount due and cannot modify the due amount to be waived. There is no effect of miscellaneous charges waiver on principal outstanding. If miscellaneous charges are a part of interest base then the interest base gets updated accordingly and the interest base gets reduced by the waived amount. If miscellaneous charges are a part of Penalty interest base then the Penalty interest base gets updated accordingly and the Penalty interest base gets reduced by the waived amount. Miscellaneous charges once waived cannot be reversed.

2. The record will be added and sent for authorization.

1.42. ALM35-Agri Loan Account Attributes Maintenance

The **Agri Loan Account Master Attributes Maintenance** option allows you to modify the details of a loan account. The account attributes are defaulted at the account level from the various master maintenances. Using this option the user can suitably modify the default parameters at the loan account level. Apart from modification this option allows maintaining of solicitors code, allotting an Account officer, mail control parameters, modification of NPA appropriation sequence etc.

The NPA appropriation sequence set at the product level is defaulted for an account. This sequence can be modified at an account level also. Similarly the longest over due first flag set at product level can be overridden by the appropriation control flag for **NPL**⁷⁸.

For the account for which the bank requires an override - the account attributes can be modified accordingly.

This maintenance also provides some free format text fields like project status and limit ID etc which the bank can use to maintain miscellaneous loan details.

Area of the Farm (in hectares)	[Alphanumeric, Seven] The area of the farm. It is used for MIS reporting.

To view agri loan account attributes

1. Select the **Inquiry** mode.
2. Type the account number and press the **<Tab>** key or select it from the pick list.
3. The system displays the loan account attributes details.

To modify agri loan account attributes

1. Navigate to the **Loan Account Master Attributes Maintenance** option (Fast Path: ALM35).
2. The system displays the **Loan Account Master Attributes Maintenance** screen.
3. Select the **Modify** mode.
4. Type the account number and press the **<Tab>** key or select it from the pick list.
5. This populates the related fields in the **Details** Tab.
6. Click on the **Attributes** Tab.
7. The system displays the **Attributes** Tab.
8. Enter/select the relevant information.
9. Modify the relevant information and click the **Ok** button.
10. The system displays the message "Record Modified...Authorisation Pending...Click Ok to Continue".

To cancel agri loan account attributes

1. Select the **Cancel** mode.
2. Type the account number and press the **<Tab>** key or select it from the pick list.
3. Click the **Ok** button.
4. The system displays the message "Record Cancelled...Click Ok to Continue".

To amend agri loan account attributes

1. Select the **Amend** mode.
2. Type the account number and press the **<Tab>** key or select it from the pick list.
3. Modify the relevant information and click the **Ok** button.
4. The system displays the message "Record Amended...Authorisation Pending...Click Ok to Continue".

To authorize agri loan account attributes

1. Select the **Authorize** mode.
2. Type the account number and press the **<Tab>** key or select it from the pick list.
3. Click the **Ok** button.
4. The system displays the message "Record Authorized...Click Ok to Continue".

1.43. LNM34 - Loan Collateral Link Maintenance

Using this option the collateral created is linked with the loan account. This maintenance is mandatory for secured loans, as system will not allow disbursement unless the above linkage is done.

You can attach, delink and re-attach collateral on the same day. **FLEXCUBE** allows attaching multiple Term Deposit's as collateral to a loan account .Term Deposit as collateral can be attached to a loan account up to the amount of Term Deposit certificate subject to the lendable margin. **FLEXCUBE** also supports linking of a foreign currency Term deposit as collateral to a local currency Loan account.

Definition Prerequisites

- BAM39 - Collateral Codes Maintenance
- BAM63 - Product Collateral Linkage
- LN057 - Loan Direct Account Opening
- BAM74 - Collateral Header Maintenance

Modes Available

Add, Modify, Delete, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add loan collateral link details

1. Type the fast path **LNM34** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transaction > Collaterals > Loan Collateral Link Maintenance**.
2. The system displays the **Loan Collateral Link Maintenance** screen.

Field Description

Field Name	Description
Account Details	
Account No	[Mandatory, Numeric, 16] Type the loan account number for which the account collateral link is to be maintained.
Customer Name	[Display] This field displays the name of the customer who holds the loan account.
Product	[Display] This field displays the product code under which the loan account is opened.
Loan Amount	[Display] This field displays the sanctioned loan amount. It displays the loan amount after deducting the customer's contribution.

Field Name	Description
Currency	<p>[Display]</p> <p>This field displays the currency assigned to the product at the product level, under which the account is opened.</p>
Branch	<p>[Display]</p> <p>This field displays the name of the home branch where the loan account is opened and maintained.</p>
Collateral Details	
Collateral Code	<p>[Mandatory, Drop-Down]</p> <p>Select the appropriate collateral code from the drop-down list.</p> <p>The collateral codes are added and maintained in the Collateral Codes Maintenance (Fast Path: BAM39) option and attached to the product by using the Product Collateral Linkage (Fast Path BAM63) option.</p> <p>For linking a TD in foreign currency, you need to select an appropriate collateral code in the same currency as the TD. For example to link a TD with USD currency, the collateral code should be of Deposit type and currency should be USD.</p>
Priority	<p>[Optional, Numeric, Three]</p> <p>Type the priority.</p> <p>It allows the user to set the priority on the collaterals and guarantees attached to the loan.</p>
Collateral ID	<p>[Mandatory, Alphanumeric, 16]</p> <p>Type the appropriate collateral ID.</p> <p>In case of collateral as a Term deposit, the collateral ID will be the Term deposit account number.</p> <p>In case of a FCY TD, the currency of the TD account should be the same as the currency of the collateral code selected as defined in the Collateral Code Maintenance (Fast Path: BAM39) option.</p> <p>If account currency is local currency (i.e., branch Currency), in case of a TD, this field will accept a TD account number maintained in any other currency – foreign / local.</p> <p>If account currency is not a local currency (i.e., branch currency), in case of a TD, this field will accept a TD account number maintained in a currency same as account currency.</p>

Field Name	Description
TD Account Number	<p>[Conditional, Numeric, 16]</p> <p>Type the TD account number.</p> <p>In case of a FCY TD, the currency of the TD account should be the same as the currency of the selected collateral code as defined in the Collateral Code Maintenance (Fast Path: BAM39) option.</p> <p>In case of a TD, if account currency is local currency (i.e., branch currency), it will accept a TD account number maintained in foreign/local currency. If account currency is not a local currency (i.e., branch currency), in case of a TD, this field will accept a TD account number maintained in a currency same as account currency.</p> <p>This field is enabled for TD type collaterals.</p>
Deposit No.	<p>[Conditional, Pick List]</p> <p>Select the deposit number from the pick list.</p> <p>Deposit number allows the user to attach the term deposit as collateral with the loan account.</p>
Deposit Ccy	<p>[Display]</p> <p>This field displays the currency of the TD account.</p>
Net TD Rate	<p>[Display]</p> <p>This field displays the net term deposit rate.</p>
Collateral Value	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the appropriate value of the collateral, which is to be linked to the loan account.</p> <p>The system will default the value of the collateral as defined in the Collateral Header Maintenance (Fast Path: BAM74) option.</p> <p>This value can be modified by the user but only to a lesser amount. This flexibility enables to link a single Collateral Header to multiple accounts.</p> <p>The maximum allowed value for time deposit collateral is <i>Deposit amount * Currency rate * Lendable margin.</i></p>
Currency Rate	<p>[Display]</p> <p>This field displays the conversion rate for the collateral currency (from BA_CCY_RATES) if the TD collateral is in any other currency than the account currency.</p> <p>The rate displayed is the last rate of the day when the last EOM was executed. However, on the day the collateral is linked to a loan account this field displays the mid-rate of that particular day.</p> <p>If the collateral and account currency are the same, this field displays the value as one.</p>

Field Name	Description
Collateral Value in Collateral Ccy	<p>[Display]</p> <p>This field displays the collateral amount based on the value entered in the Collateral Value field and the Currency Rate.</p> <p><i>Collateral Value (collateral Currency) = Collateral Value * Currency Rate</i></p> <p>If the collateral and account currency are the same, this field will display the collateral value in its own currency.</p>
Deduction Flag	<p>[Optional, Check Box]</p> <p>Select the Deduction Flag check box to deduct the value of the collateral before the loan loss provisioning.</p>
Prime /Secondary	<p>[Mandatory, Drop-Down]</p> <p>Select the status of the security attached to the loan account from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Prime • Secondary <p>The status being selected is for the purpose of ascertaining whether the security linked to the loan account is Primary or Secondary for reporting purposes.</p>
Link TD for Interest	<p>[Conditional, Check Box]</p> <p>Select the Link TD for Interest check box to calculate the installment amount of the loan irrespective of the interest rate defined at the product level.</p> <p>This field is enabled only if TD is selected as collateral in the Collateral Code field.</p>

Field Name	Description
Impact of Rate Change	<p>[Conditional, Drop-Down]</p> <p>Select the parameter to be changed due to change in the rate from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Change Installment • Change Term <p>This field is enabled only if TD is selected as collateral in the Collateral Code field.</p> <p>The account is rescheduled as on the date TD is attached as collateral and linked for calculation of interest.</p> <p>If the Change Installment option is selected, then on attaching the second TD as collateral FLEXCUBE will default the impact of rate change option as Reschedule Installment.</p> <p>If the Link TD for Interest option is selected and the loan account schedule does not have TD linked rates, then the TD based rates will not apply to the loan account.</p> <p>If the user attaches 5 TD's as collateral and selects Link TD for Interest only for 3 TD's, then only 3 TD's will be considered for calculation of loan interest rate, however 5 TD's will be linked as collateral.</p>

3. Click the **Add** button.
4. Type the account number and press the <Tab> key.
5. Select the collateral code from the drop-down list.
6. Enter the other collateral details.
