Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

Contents

1. FN_MAIN/3/1 1
----------------	---------

Parameter	Description
Function	FN_MAIN
No of Parameters	3
Function Call Id	1
Cluster/Custom Function Name	FN_BLOCK_MAIN
Additional parameters	None
Sent to Extensible layer	None
Received from Extensible layer	None
Hook Description	<p>Inline hook is given to call Gwpsk_Ext_Switchservice.Fn_Block_Main</p> <p>Based on the Error code returned in the process, customised handling can be done. As per kernel code, system will return false if error code is not null. But different customised handling can be achieved using this hook.</p>
Description	<p>Inline hook is given to call Gwpsk_Ext_Switchservice.Fn_Block_Main</p> <p>Based on the Error code returned in the process, customised handling can be done. As per kernel code, system will return false if error code is not null. But different customised handling can be achieved using this hook.</p> <p>All parameters received by kernel function are passed to the cluster hook.</p> <p>Additional parameters passed to cluster hook are mentioned in field "Additional Parameters".</p> <p>The variables mentioned in "Sent to Extensible Layer" field are passed to cluster hook.</p> <p>The variables mentioned in "Received from Extensible Layer" field are reassigned to kernel.</p>
