This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this software or related documentation is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Preface

Oracle Hospitality Symphony Venue Management (SimVen) is a perpetual inventory management solution focused on the needs of stadium, arena, theme park, concert hall, and convention center managers. SimVen provides comprehensive reports that identify ways to reduce labor costs, theft, and spoilage, improve operational efficiencies, and enable the efficient management of nonprofit groups and commissions.

Purpose

These Release Notes provide a brief overview of additions, enhancements, and corrections implemented in this software release. Their intent is informative, not instructional. Review Symphony Venue Management's product documentation, including technical and application advisories for previous versions, for detailed information on installation, upgrade, configuration, and general use.

Audience

This document is intended for all users of Oracle Hospitality SimVen.

Customer Support

To contact Oracle Customer Support, access My Oracle Support at the following URL: <https://support.oracle.com>

When contacting Customer Support, please provide the following:

- Product version and program/module name
- Functional and technical description of the problem (include business impact)
- Detailed step-by-step instructions to re-create
- Exact error message received and any associated log files
- Screen shots of each step you take

Documentation

Oracle Hospitality product documentation is available on the Oracle Help Center at <http://docs.oracle.com/en/industries/hospitality/>

Revision History

Date	Description of Change
January 2018	<ul style="list-style-type: none">• Initial publication

1 Features and Updates

This section describes the new features and enhancements included in this release.

Simphony Venue Management

Enhanced Application Security with Timeout

SimVen now times out after 15 minutes of inactivity. After 15 minutes of inactivity, the user is logged out, all screens close, and all unsaved work is discarded. A dialog box appears on the desktop to indicate an activity timeout.

Support for Internationalization

You can configure SimVen to incorporate your preferred language so that it shows throughout the application, as well as in reports. From the SimVen **Setup - Master Files** menu drop-down list, a new module called **Application Locale Settings** has been added to assign your language, currency symbol, and currency naming conventions. The currency settings directly affect the look, visibility/accessibility, and functionality of user interface components used for data input in the Cash Room Deposits Entry view. The new Locale settings also influence the SimVen application reporting components by showing your language and currency symbol. These settings also allow you to configure report amount totals with the addition of configurable monetary symbols and amount separators based on the country's currency standard.

The *Oracle Hospitality Simphony Venue Management User Guide* contains more information about configuring international settings.

Support for Centralized Access and Operations Logs

Operations logging for SimVen has been changed so you can access logs directly within the application. In addition, you can purge the logs manually or automatically (by setting the number of days to keep the logs).

The following two tabs have been added to the Security Profile Management module:

- **Access Log**

The Access Log tracks users as they log in to the application. This includes the date and time of each login attempt, each user name, and the result of each successful and unsuccessful log in attempt.

- **Operations Log**

The Operations Log tracks users accessing various application modules, and the operations performed. In some instances, you can obtain additional details by clicking the **Show Details** button.

The *Oracle Hospitality Simphony Venue Management User Guide* contains more information about accessing, configuring, and purging the logs.

Enhanced User Interface

The side navigational menu has been removed from this release. A new toolbar appears at the top of the screen.

The tab named Security/Utilities has been renamed to System/Utilities.

The following three desktop icons appear upon upgrading or installing SimVen:

- Symphony Venue Management
- Vending
- Vending Room

The UI has also been updated by replacing the label Category with Family Group throughout the application as needed. Item Category remains the same in the application.

Support for Multiple Tenders

You can now enter multiple tenders per field in the Tender Media tab of the System/Utilities Sysfile Maintenance window. You can use a comma to separate the values.

2 System Requirements, Supported Systems, and Compatibility

This section describes the supported POS applications, enterprise server operating systems, databases, and devices by SimVen.

Supported POS Applications

- Oracle Hospitality Symphony First Edition version 1.7.X
- Oracle Hospitality Symphony version 2.9.X

Supported Enterprise Server Technology

SimVen supports the following operating systems:

- Microsoft Windows Server 2012
- Microsoft Windows Server 2008 R2

SimVen supports the following databases:

- Microsoft SQL Server 2012 R2
- Microsoft SQL Server 2008 R2
- Microsoft SQL Server 2005

Supported POS Client Devices

- Oracle MICROS Workstation 6 Series
 - Oracle MICROS Workstation 610
 - Oracle MICROS Workstation 620
 - Oracle MICROS Workstation 650
- Oracle MICROS Tablet E-Series 8-inch and 11-inch models
- Oracle MICROS PC Workstation 2015
- Oracle MICROS Workstation 5A

The following devices are supported only when running Oracle Hospitality Symphony First Edition:

- Oracle MICROS Tablet R-Series
- Oracle MICROS Workstation 5A
- Oracle MICROS Workstation 5
- Oracle MICROS Workstation 4LX
- Oracle MICROS Keyboard Workstation 270 (KW270)

3 Resolved Issues

Table 1 shows a list of issues that have been fixed since the last release.

Table 1 - Resolved Issues

Module	CRID	TPID	Description
Simphony Venue Management	N/A	148674	You can complete Return Items To Locations without receiving errors.
Simphony Venue Management	N/A	152397	Cash Deposits reports now include the other currency balance in the totals.
Simphony Venue Management	N/A	152964	You no longer receive errors when recalculating standsheets.
Simphony Venue Management	N/A	154587	You no longer receive a parsing error when synchronizing Simphony version 2.9 events with SimVen.
Simphony Venue Management	N/A	154894	You no longer receive a communication error when starting a standsheet at a workstation.
