This chapter gives an overview of Oracle Financial Services Currency Transaction Reporting application.

This chapter covers the following topics:

- Introduction to Currency Transaction Report
- Logging into Currency Transaction Report
- CTR Menu

Introduction to Currency Transaction Report

As part of Regulations and Compliances, organizations are required to perform appropriate analysis and report any suspicious activities which may lead to fraud or money laundering within the institution to the regulatory authorities. These regulatory bodies are responsible for safeguarding financial institutions and consumers from abuse, providing transparency in the country's financial system, enhancing that country's security, and deterring and detecting criminal activity in the financial system.

Currency Transaction Reporting (CTR), which currently applies only for Currency Transaction Reports in the United States, is a robust solution developed to meet operational and regulatory requirements of the Financial Crimes Enforcement Network (FinCEN). This product helps minimize repetitive data entry and supports parallel processing of Currency Transaction Reports. CTR also helps in reducing the process cycle time using STP (Straight Through Processing) and accommodates FinCEN compliance and real time environmental changes. This product automates the workflow, analysis and report production and offers integration capabilities with internal and external systems thereby improving the operational efficiency.

CTR supports the e-filing of cash transactions that are greater than \$10,000 or multiple transactions that aggregate to greater than \$10,000. The Currency Transaction Reports are created either at the branches or through the end of day files, where CTR aggregates multiple transactions performed at the branch, ATMs and Vaults. In addition, this application also captures and reports Monetary Instrument Purchases.

A Currency Transaction Report can be created in the following ways:

- System Generated Currency Transaction Reports
- Manual Creation of Currency Transaction Reports
- Branch Generated Currency Transaction Report

System Generated Currency Transaction Reports

CTR creates Currency Transaction Reports through batch processing of transaction data.

The following variations are possible for system generated Currency Transaction Reports:

- Currency Transaction Reports created on an exempted entity (Audit Currency Transaction Reports).
- Superseded Currency Transaction Reports in which the activity is the same or subset and the aggregation focus is less preferred to another Currency Transaction Report.

- Currency Transaction Reports that pass the initial validation are created with ‘Pending QA Review’ status (STP) and Currency Transaction Reports that do not pass initial validation are created with ‘New’ status.

Manual Creation of Currency Transaction Reports

You can manually create a Currency Transaction Report using the **Create New Report** submenu option from the Currency Transaction Report menu in CTR. For detailed information about creating a Currency Transaction Report, refer to *Creating a Currency Transaction Report*.

Branch Generated Currency Transaction Report

When a CTR is integrated with the Retail Branches, a Currency Transaction Report is generated in the following manner:

1. The branch system identifies an eligible transaction during the teller session and the teller queries the CTR application to determine its Exemption status. The CTR application returns an appropriate notification to the Teller stating whether a transaction is an exempt transaction or a Currency Transaction Report must be created.
2. Subsequently if a Currency Transaction Report is required, the teller enters the Currency Transaction Report data.
3. This Branch CTR data is then provided to the CTR application as part of a batch load of Branch CTR data (see the *Data Interface Specification* for details about data captured and passed to the CTR application).
4. Upon entry into the CTR application, required fields will be validated and customer/beneficiary information will be pre-populated from available customer business data.

Thus, a branch Currency Transaction Report is generated.

Note: CTR will have standard work queues, user defined workflow and reporting functionality to manage exceptions, continuous quality reviews, and audits.

Logging into Currency Transaction Report

This chapter describes the workflow of an Exemption, managing the Search and List page, and managing the Exemption Details page. Exemptions can be created on Customers, Accounts and Tax Identifiers. Exempt entities are considered exempt from the filing of CTRs. When designated as exempt Oracle marks transactions associated with those entities as exempt and they generate only Audit CTRs and not CTRs meant for filing. This chapter focuses on the following topics:

- Exemption Workflow
- Managing Search and List
- Managing Exemption Details Page
- Creating an Exemption

Exemption Workflow

The following diagram illustrates the workflow of the Exemption:

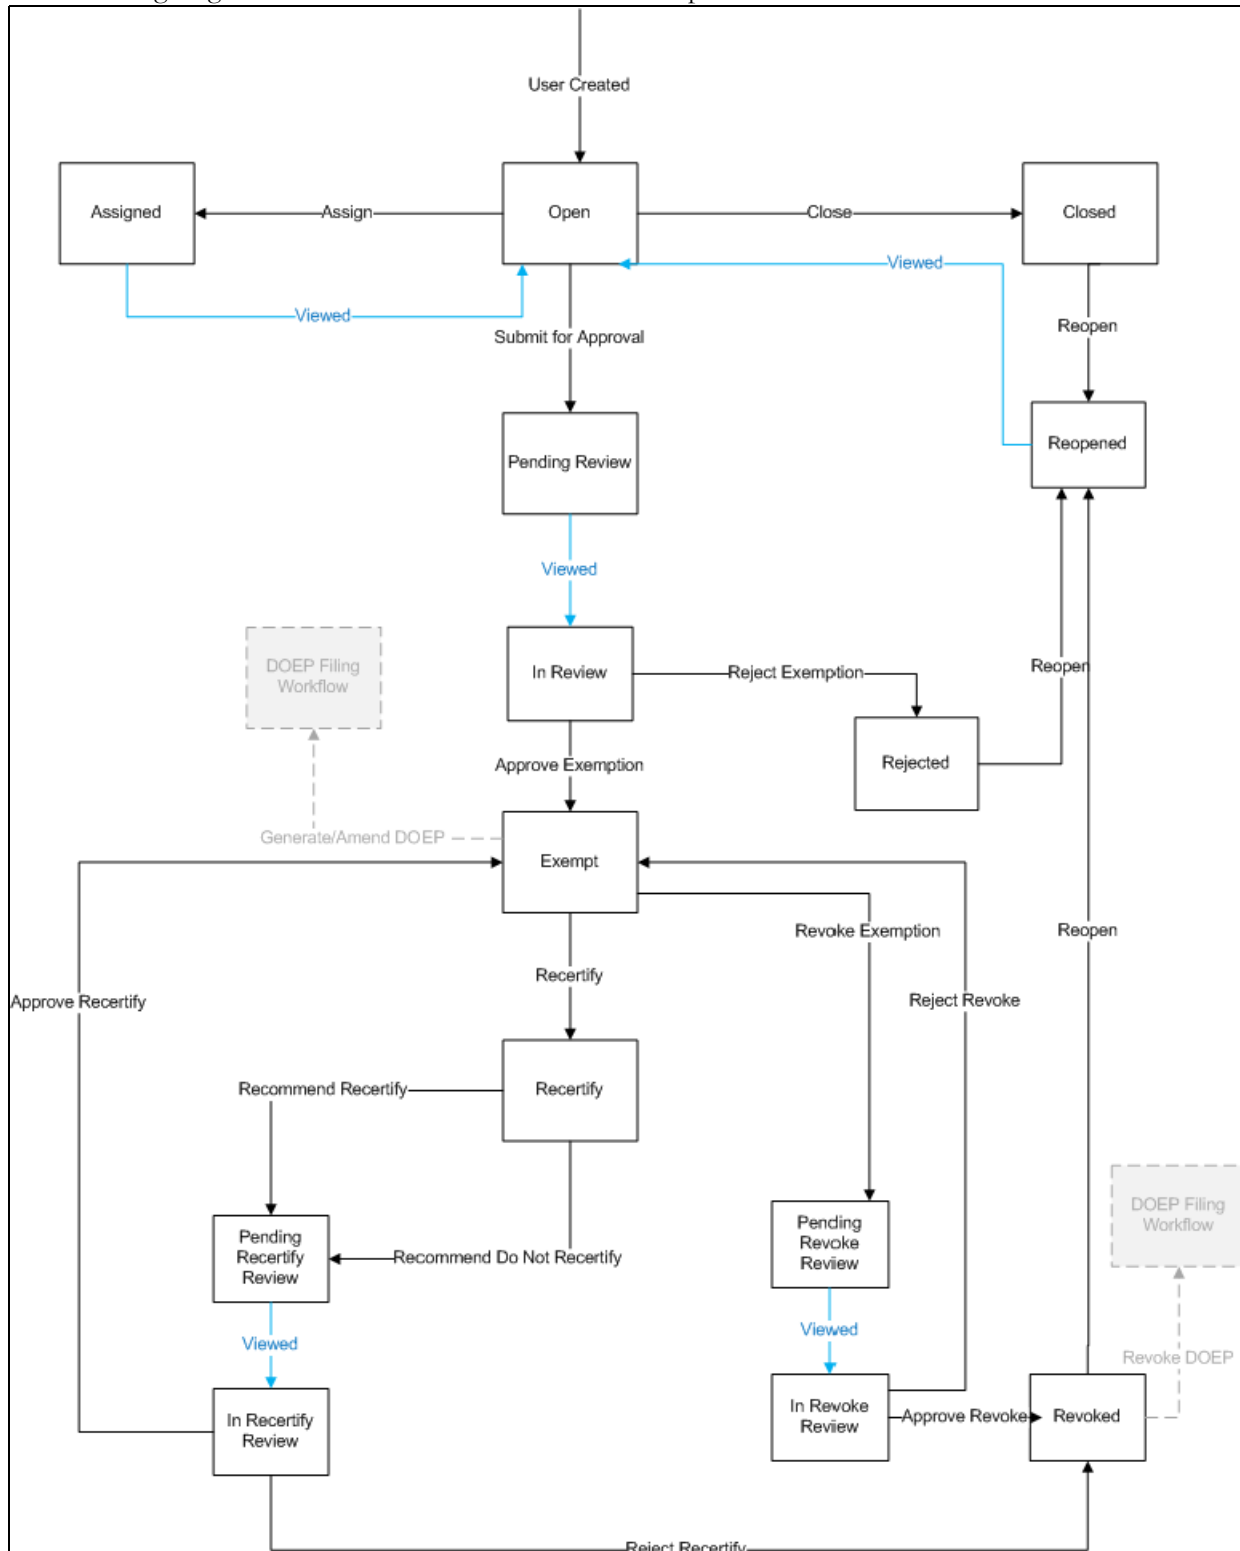

Figure 46. Exemption Workflow

Life Cycle of an Exemption

Open

When a user creates a new Exemption or re-opens an Exemption, the status of that Exemption is changed to Open. All Exemptions must be created manually.

Closed

A user can close an Exemption if its status is changed to Open or Re-Open from Revoked, Rejected, or Closed status.

Pending Review

The status of an Exemption is changed to Pending Review in the following scenarios:

- When a user takes a Submit for approval action or any other action taken along with Submit for approval
- When a supervisor submits for Exemption approval while creating new Exemption/Reopening rejected/Revoked/Closed Exemptions

Reassign

An Exemption can be reassigned in the following statuses:

- Open
- Pending Review
- In- review
- Pending Recertify Review
- In Recertify Review
- Pending Revoke Review
- In Revoke Review
- Reopened
- Reassigned
- Recertify

Reassign is not possible on an Exemption in the following statuses:

- Exempt
- Revoked
- Closed
- Rejected

Reopen

The status of an Exemption can be changed to Reopen when its in Rejected, Revoked, or Closed status.

In-review

The status of an Exemption changes to In-review when a Supervisor views an Exemption in Pending Review status.

Exempt

The status of an Exemption can be changed to Exempt when a Supervisor approves an Exemption.

An Exemption can move to Exempt status in the following cases:

- When a newly created Exemption is approved by the supervisor to be Exempt.
- When an existing Exemption goes through the yearly system-triggered or user-submitted recertification process and is Recertified
- When Revoked/Rejected Exemptions are Reopened and Exempted again.
- When Rejected/Closed Exemptions are reopened and Exempted.

Exempt Date

An Exempt Date is the date on which the entity exempted for filing Currency Transaction Report for the first time.

An exempt date is recorded in CTR in the following scenarios:

- When an Exemption is Recertified (Approve - Recertify) as a result of a system- triggered or user- submitted Recertify action. The exempt date is not changed but the status is changed to Exempt.
- When an Exemption is Reopened from the Rejected or Closed status and exempted for the first time, records the Exempt Date.
- When an Exemption is reopened from the Rejected status if such Exemption had already been approved at least once before, then it gets rejected and does not record an exempt date and gets Exempt status again.

Note: CTR does not extend the expiration date on the Exemption if the Exempt status has resulted from the Reject Revoke action.

Filing the Exemptions

This section details the various DOEP and Exemptions statuses, when the Exemptions are Approved or Revoked to support DOEP Filing:

- **DOEP Not Required:** This action button is activated once the Exemption is approved and the DOEP status is NULL and the Exemption class is any of the following:
 - Phase I - Bank
 - Phase I - Federal, State or Local Gov Agency/Dept
 - Phase I - Entity Exercising Gov't'l Authority w/in US
- **Generate DOEP:** This action button is activated once the Exemption is approved and the DOEP is NULL and the Exemption class is any of the following:
 - Phase I - NYSE/ASE Listed; NASDAQ Mkt Sec Listed
 - Phase I - Subsidiary of NYSE/ASE Listed; NASDAQ Mkt Sec Listed
 - Phase II - Payroll Customer
 - Phase II – Eligible Non-Listed Business

On successful action, the DOEP status is changed to Exempt – Ready for DOEP Filing.

- **Amend DOEP:** This action button is activated once the Exemption is Exempt and the DOEP status is any of the following:
 - DOEP Filed - Success
 - Amended DOEP Filed - Success
 - DOEP Filed - Success w/Errors
 - Amended DOEP Filed - Success w/Errors
 - Revoked DOEP Filed - Success w/Errors
 - DOEP Filed - Rejected
 - Amended DOEP Filed - Rejected
 - Revoked DOEP Filed - Rejected

On successful action, the DOEP status is changed to Exempt – Amended Ready for DOEP Filing.

- **Revoke DOEP:** This action button is activated once the Exemption is Revoked and the DOEP status is any of the following:
 - DOEP Filed - Success
 - Amended DOEP Filed - Success
 - DOEP Filed - Success w/Errors
 - Amended DOEP Filed - Success w/Errors
 - DOEP Filed – Rejected
 - Amended DOEP Filed – Rejected

On successful action, the DOEP status is changed to Exempt – Revoked Ready for DOEP Filing.

Revoked

The status of an Exemption can be changed to Revoked in the following scenarios:

- Revoke action can be taken on Exemption which is in Exempt status. However, this action results in Pending Revoke Review status. Once a supervisor approves the Revoke, (Approve – Revoke), the Exemption moves to Revoked status, if the supervisor rejects (Reject – Revoke) the Exemptions status changes to Exempt.
- Submit for Revoke action can be taken on Exemption which is in Recertify status. However, this action results in Pending Recertify Review status. Once the supervisor approves the Reject Recertify, the Exemption moves to Revoked status. If the supervisor approves the Approve Recertify, the Exemption is extended for the next one year from the date of Approve Recertify action and Exemption status changes to Exempt.
- Exemptions which are in Revoked status can be reopened to reinstate the Exemption.
- CTR expires the Exemptions on the date of expiry irrespective of the status, however the Exemption status remains unchanged.
- When the Exemptions which are in Pending Recertify Review, In Recertify Review, Pending Revoke Review, and In Revoke Review status pass the expiry date, CTR revokes the Exemption by clearing the exempt date from the Exemption without changing the status.

Note: For Exemptions that are moved to the Revoked status, the expiration date is cleared.

Recertify

The status of an Exemption can be changed to Recertify in the following scenarios:

- Upon an Exemption record moving to Exempt status, CTR applies an Initiate Recertification Date that is current day + 320 calendar days (45 days prior to yearly review date).

Note: The Initiate Recertification Date range is configurable by clients and can be set for something other than 45 days.

- When a user recertifies (Approve – Recertify) and the status returns to an exempt status and the process repeats (initiate recertification date is reset).
- When a user does not recertify (Rejected – Recertify) the Exemption status moves to Revoked and initiates recertification and expiration dates are cleared.

Recertify Date

A recertify date is recorded in CTR in the following situations:

- Recertify (Last Renewal) date is recorded when an Exemption gets recertified.
- Recertify (Last Renewal) date is not recorded when an Exemption is exempted for the first time.

In Revoke Review

The status of an Exemption can be changed to In-Revoke Review in the following scenarios:

- When a supervisor views an Exemption which is in the status of Pending Revoke Review, the status changes to In Revoke Review. The possible actions on In Revoke Review state are Approve Revoke or Reject Revoke.
- The Expire Date is not cleared on the Exemption until an Exemption is in In Revoke Review status. Clearing of Expire Date on an Exempt Entity depends on the supervisor action. If a supervisor takes a Reject Revoke action, then the Expire Date stays on the Exempt entity as is. If a supervisor takes an Approve Revoke action, then the Expire Date is cleared from the Exemption entity immediately.

In Recertify Review

The status of an Exemption can be changed to In-Recertify Review in the following scenarios:

- When a supervisor views an Exemption which is in Pending Recertify Review, the status changes to In Recertify Review.
- A supervisor can take Approve Recertify action which change Exemption status to Exempt and can extend the expiry date to next one year from the date of Approve Recertify action.

Rejected

The status of an Exemption can be changed to Rejected when Exemptions are denied. This status is considered as inactive status of Exemption.

Pending Revoke Review

The status of an Exemption can be changed to Pending Revoke Review when Submit for Revoke Exemption action is taken on Exemption which is in Exempt status.

Pending Recertify Review

The status of an Exemption can be changed to Pending Recertify Review when a user takes Submit for Renewal Approval action on the Exemption which is in Recertify status.

Managing Monetary Instrument Transaction (MIT) Log

This feature allows banks to manage MI transactions that they are required to log and have available for review by examiners or audit to verify compliance. A financial institution must maintain a Monetary Instrument Log for five years. Oracle creates the MI log based off of logic that can be found in the CTR TSD, but clients have a need to review the data and possibly add or remove records as well as edit them.

They can then use the Oracle analytic report for generating the MI log if they have access to OBI or implemented the reports. Else they can report using information available when managing the records via this feature.

This chapter provides details to manage the Monetary Instrument Transaction (MIT) Log tab. Users can add, remove, and edit MIT Log data.

This chapter focuses on the following topics:

- Managing Search and List
- Managing MIT Details Page

Managing Search and List

This chapter discusses the following topics:
