## CHAPTER 1 Getting Started

This chapter provides step-by-step instructions to access the FCCM Analytics reports of the Oracle Financial

Services Analytical Applications (OFSAA) Application page.

## Accessing OFSAA Applications

Access to the Oracle Financial Services FCCM Analytics application depends on the Internet or Intranet environment. Oracle Financial Services FCCM Analytics can be accessed through Microsoft Internet Explorer (IE),

Google Chrome, Mozilla Firefox, and Microsoft Edge. Your system administrator provides the intranet address uniform resource locator (URL).

To access the FCCM Analytics reports, follow these steps:

1. Enter the OFSAA URL in your browser using the following format:

<scheme/ protocol>://<ip address/ hostname>:<port>/<context-name>/login.jsp
For example: https://myserver:9080/ofsaaapp/login.jsp

The OFSAA Login page is displayed.

5. Click **Reports** from the Navigation list.

The FCCM Analytics application home page is displayed.

## CHAPTER 2

# Oracle Financial Services Crime and Compliance Management Analytics

This chapter describes the Oracle Financial Services Crime and Compliance Management Analytics (FCCM Analytics) application and covers the following topics:

- About FCCM Analytics
- Accessing the FCCM Analytics Application Dashboards
- Common Report Features
- FCCM Analytics Dashboards

## About FCCM Analytics

In order to use FCCM Analytics, you must have Oracle Business Intelligence (OBIEE) installed on site.

## Accessing the FCCM Analytics Application Dashboards

You can access the FCCM Analytics application dashboards from the FCCM Analytics application home page by selecting the **Dashboards** menu. You have access only to the data configured for your user role.

The following dashboards are available within the application:

- Business Entity Reports
- MIS Reports
- Statement View

Figure 4 shows you how to access the dashboards:

Figure 4. Accessing the Dashboards

You can click the desired dashboard to view the related reports.

**Note:** You may also customize existing FCCM Analytics reports and create new reports; however, customization information is not documented in this guide. Refer to the *Oracle Financial Services Behavior Detection Configuration Guide* for more information.

## **Common Report Features**

Each of the features below are common to many of the FCCM Analytics reports.

#### **Common Filters for MIS and Business Entity Reports**

Global filters are available in most reports. You can use global filters to apply conditions to the individual reports. To

access the report filters, click the funnel icon The individual report filter fields will appear to the left of the report. Each report has its own specific set of filters.

**Note:** Click the **Trend of Avg Loss & Recovery Amt for Cases** hyperlink to go back to the Trend of Average Loss and Recovery Amounts for Cases report.

#### **Common Actions**

The following actions are provided for each of the reports:

- **Refresh**: When you click **Refresh**, the current report will refresh the results of the current request.
- **Print:** When you click **Print**, two options to print the current report are displayed: Printable PDF and Printable HTML. Click one of the options to view the report in that format, following which you can print the report by clicking CTRL+P.
- **Export**: When you click **Export**, the current report can be exported into a PDF, Excel, PowerPoint, various data formats or a Web page.

### **Error Messages**

If the report does not have any results, the application displays the following messages:

- No Results For the Selected Criteria
- Matching Result Set Not Found

When you see one of the above errors, you can do one of the following:

- Change the filter values
- Click **Refresh**

## FCCM Analytics Dashboards

#### **Business Entity Reports**

The Business Entity Reports offer a variety of reports which detail information specific to the selected business entity. Each report has its own unique filters with results displaying the primary information about that business entity. Typically, one record per entity is returned in the report. The results are independent of alerts or cases and represent all matching records found within the Financial Service Data Models.

The following reports are available in this dashboard:

- Account Entity Search Report
- Customer Entity Search Report
- Trade/Execution Entity Search Report
- Orders Entity Search Report
- Security Entity Search Report
- Transaction Entity Search Report
- Transaction Monitoring Report
- Transaction Volume Report

#### Accessing the Business Entity Reports

To access the business entity reports, click the **Business Entity Reports** link in the **Dashboards** menu as shown in Figure 4.

#### **MIS Reports**

The MIS Reports dashboard provides users with access to reports, both summary and detailed, for applications as well as areas of interests like Productivity and Alerts.

The following areas are available:

- Alerts
- Scenario Tuning
- Productivity
- Cases
- Trade Blotter
- SARs
- Personal Trading
- Fraud
- KYC
- CTR
- FATCA
- CRS
- Scenario Configuration

#### Accessing the MIS Reports

To access the MIS reports, click the **MIS Reports** link in the **Dashboards** menu as shown in Figure 4. To see the

individual reports under each section, select the expansion icon to the left of the section header. Some of the application sections contain Home pages which run automatically when accessed. These reports may have global filters to allow for the manipulation of the information displayed.

The default page appears which shows the list of all pre-defined reports.

The default page is configurable and can be designed to include reports, dashboards and views generic for all applications. To expand each section and view more report details, click the downward arrow.

All the MIS reports also have report filters for each individual report similar to the Business Entity reports. For more information, see *Running an Individual Business Entity Report*.

#### Alerts

Use the Alert reports to view reports related to the due alerts, comparison of the past and present alerts, and number of alerts grouped by a particular scenario or status.

The following figure shows the Alert home page:

Figure 12. Alert Home Page

The following Alert reports are available in the Alert home page:

- Top 10 by Alert Count: Use this report to view the top 10 highest risk branches for an organization.
- Number of Alerts [Current Year Vs Previous Year]: Use this report to compare the number of alerts generated for the current year and the number of alerts generated for the previous year.
- Number of Alerts by Scenario: Use this report to view the number of alerts generated for a particular scenario.
- Number of Alerts by Closing Status: Use this report to view the number of alerts generated for a particular closing status.

You can also filter the data in the reports using the following filter fields:
