

## Oracle Financial Services Sanctions Application Pack Release v8.1.2.2.0

Oracle Financial Services (OFS) Sanctions Application Pack is a separately licensed product.

### Description

ID 34684200 – OFS Sanctions v8.1.2.0.0 MINOR RELEASE #2 (8.1.2.2.0).

This release of the OFS Sanctions Application Pack is a cumulative of enhancements and bug fixes that were done for Transactions Filtering (TF) and Customer Screening (CS) since the 8.1.2.0.0 release.

### Topics:

- [Pre-installation Requirements](#)
- [New Features](#)
- [How to Apply This Patch](#)
- [List of Bug Fixes in this Release](#)

### Pre-installation Requirements

The following pre-installation steps are required for this release:

1. The OFS Sanctions v8.1.2.0.0 base pack must be installed.
2. Download and install the following mandatory patches from [My Oracle Support](#) by searching for the patch under the Patches & Updates tab.
  - Bug 34684200- OFS SANC 8.1.2.2.0: ML RELEASE #1
  - Bug 34278179- CONSOLIDATED FIXES OF ALL ISSUES IDENTIFIED IN AAI ON 8.1.2.1. ML.

### New Features

The following is the list of new features included in the release 8.1.2.2.0:

### **Sanctions Pack**

- Spanish language users can view the User Interface (UI) in Spanish for both CS and TF Applications.
- Save time and allows better choices by using the enhanced Queue Management experience that enable changes to the queue without a restart. The queue administrator can see an alert that will illustrate the impact of changes made to the queue before the changes are live.
- The keyboard (Ctrl C+Ctrl V) shortcut keys on the comments sections of events or alerts to save time and reduce waste are enabled.

### **Customer Screening specific**

- Save time and reduce wastage by merging different event types into a single case ID within OFS Enterprise Case Management (ECM).
- Removed the effort duplication through the suppression of case id in batch screening if a real-time case is created for the same name.
- Enhanced the Customer Screening Real-Time API response to include the OFC ECM Case link in the response (in case of a match).

### **Transaction Filtering specific**

- The latest Fedwire and SWIFT November 2022 updates are supported.

## **How to Apply This Patch?**

For detailed instructions on installing this OFS Sanction Application Pack release, see [OFS Sanctions Application Pack ML Installation Guide](#).

## **List of Bugs Fixed in This Release**

The following table provides the list of bugs fixed in this release.

**Table:1 List of Bugs Fixed**

| Bug ID   | Product               | Description   |
|----------|-----------------------|---|
| 33697025 | Customer Screening    | Due date and time configuration: "due date" update is not working properly.                     |
| 34213495 | Customer Screening    | Rest API execution failed with response code:400 if the date of birth is not provided(missing). |
| 34403735 | Transaction Filtering | The highlight is not working for country and city WS events/HIT (SR 3-30067711271).             |
| 34451701 | Customer Screening    | Missing country of citizenship in UI under cs alert event details.                              |

|          |                       |   |
|----------|-----------------------|---|
| 34512497 | Customer Screening    | The incorporation date for entity screening of customer details is shown in the updated date.         |
| 34513155 | Transaction Filtering | Filter in the alert screen not working properly.  |
| 34537312 | Customer Screening    | Issue when we have multiple pages for events in the alert summary screen.                             |
| 34540195 | Transaction Filtering | PMF should fail once the web service is not available in EDQ.   |
| 34553172 | Customer Screening    | The incorporation date for entity screening of customer details shown is incorrect.                   |
| 34558134 | Transaction Filtering | Exempted payments synchronous response not consumed by source system due to empty external data info. |
| 34590159 | Customer Screening    | Customer details/external entity tab detail fields are missing in the downloaded PDF.                 |
| 34595128 | Transaction Filtering | Screening multiple values for the same tag is not working in TF20022 messages.                        |
| 34603090 | Transaction Filtering | Alert filter not working as expected.   |
| 34625812 | Customer Screening    | GSCONEFCC-1584: MX alert count is not correct in the alert list screen.                               |
