Description

Oracle Financial Services Enterprise Case Management (OFS ECM) Application Pack v8.0.0.0.0 Minor Release #6 8.0.6.0.0 (**ID 28080898**)

This release of OFS ECM Application Pack is cumulative of all enhancements and bug fixes done since previous release.

Prerequisites

Release 8.0.6.0.0 of Oracle Financial Services Enterprise Case Management is not fully backward compatible with earlier versions of FCCM applications. You must upgrade all of your FCCM applications from existing 8.0.x versions to 8.0.6.0.0 version and cannot choose to upgrade only selective application packs to v8.0.6.0.0.

How to Apply This Release?

For detailed instructions on installing this OFS ECM Release, see [OFS ECM Application Pack Installation Guide 8.0.6.0.0](#).

New Features

The following is the list of new features incorporated in this release. For detailed information on usage of these features, see various [OFS ECM Application Pack Guides](#).

- **Manual Event Creation** – Allows users with access to add events manually to a case or create them and have them place in the correlation pool.
- **Search Cases Using Event ID** - Enables users to search on cases by the events correlated in the case.
- **Positive/False Positive Indicator for Events** - Allows users to decide if a correlated event is positive or false positive. This improves correlation logic in the future.
- **Case Prioritization** - Cases can be prioritized as High, Medium, and Low based on ranges associated with select case attributes (Score, Case Type, Domain, and Jurisdiction).
- **Create and Manage Personal Search Views** – Allows users to create and manage personal search criteria for future uses. This include renaming, deleting and marking which view should be the default search.
- **Correlation Score Breakdown** – Allows users to see how the case score breaks down into individual scoring components.
- **Validation Framework** – A configurable framework which can enforce actions to be completed when an individual takes an action on a case.
- **Network Analysis and Correlation Network Tabs** – These tabs have been reintroduced with improved graphical representation.

For more information on the OFS AAI requirements, see [OFS Advanced Analytical Applications Infrastructure Application Pack](#).

Known Issues/Limitations in This Release

The known issue / limitation in OFS ECM Release 8.0.6.0.0 is as follows:

Table 3: List of Known Issues

Bug ID	Description
28074889	Performance of ECM Application on IE version 11 is slow when opening business data tabs while viewing a case and on select modal window in business data tabs. This issue in not seen in Microsoft Edge and Google Chrome.
