How to Apply This Release?

For detailed instructions on installing this OFS ECM Release, see OFS ECM Application Pack Installation Guide 8.0.8.1.0.

New Features / Changes

The following is the list of new features incorporated in this release.

1. Account Restriction field has been updated to allow users to select from a configurable list of restrictions

2. Quantifind Batch Process for Sending Customers and Receiving Risk Score Card

    2.1 Filter events to be considered for Quantifind batch

    2.2 Extract Customers from Filtered Events to send to Quantifind

    2.3 Deduplicate Customers for sending to Quantifind

    2.4 Populate ECM Quantifind landing area with customers

3. PEP information now flows in from FCDM into ECM cases and can be managed as part of the customer's case record

4. Case Due Dates can be set in days, hours and minutes

5. Count of related events was different from the number of records shown because of queries did not include all relevant filters

6. Manually created events where showing as being created by the system as opposed to the user who created them

7. Duplicate accounts were being shown under the Customer Accounts grid because of missing filter

8. User is was allowed to add an external entity to a case even if the entity was already present

9. Duplicate links were displaying in Network Analysis tab

10. Issue fixed in Expired Events Purge Script that was causing it not to complete
