Preface

This guide provides an overview of installing Oracle Utilities Smart Grid Gateway and is intended for anyone interested in the installation process. This section includes:

- [Related Documents](#)
- [Updates to Documentation](#)
- [Conventions](#)
- [Acronyms](#)
- [Additional Resources](#)

To complete installation you should have:

- Administrative privileges on the host where you are installing the software.
- Experience installing and configuring application servers and other software.

Related Documents

The following documentation is included with this release.

Installation Guides and Release Notes

- *Oracle Utilities Smart Grid Gateway Release Notes*
- *Oracle Utilities Smart Grid Gateway Quick Install Guide*
- *Oracle Utilities Smart Grid Gateway Installation Guide*
- *Oracle Utilities Smart Grid Gateway Database Administrator's Guide*
- *Oracle Utilities Smart Grid Gateway Licensing Information User Manual*

Configuration and User Guides

- *Oracle Utilities Meter Data Management / Oracle Utilities Smart Grid Gateway V2.2.0 Service Pack 2 Business User Guide*
- *Oracle Utilities Meter Data Management / Oracle Utilities Smart Grid Gateway V2.2.0 Service Pack 2 Administrative User Guide*

Supplemental Documents

- *Oracle Utilities Smart Grid Gateway Server Administration Guide*
- *Oracle Utilities Smart Grid Gateway Security Guide*

Updates to Documentation

Additional and updated information about the product is available from the **Knowledge Base** section of **My Oracle Support** (<http://support.oracle.com>). Please refer to **My Oracle Support** for more information. Documentation updates are also posted on the Oracle Technology Network documentation page as they become available (http://docs.oracle.com/cd/E72219_01/documentation.html).

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Acronyms

The following acronyms and terms are used in this document:

Acronym	Definition
ADF	Oracle Application Development Framework
EAR	Enterprise Archive
EJB	Enterprise JavaBeans
HTML	HyperText Markup Language
JAR	Java Archive
JDBC	Java database connectivity
JMX	Java Management Extensions
JNDI	Java Naming and Directory Interface
JSP	JavaServer Pages
JVM	Java Virtual Machine.
MPL	Multi Purpose Listener
OAAF	Oracle Utilities Application Framework

Acronym	Definition
OAM	Oracle Access Manager
OIM	Oracle Identity Management
ONS	Oracle Notification Service
OSB	Oracle Service Bus
Oracle RAC FCF	Oracle Real Application Clusters Fast Connection Failover
RMI	Remote Method Invocation
SOAP	Simple Object Access Protocol
SOA	Service-oriented architecture
SPLEBASE	The location where the application will be installed.
SPLOUTPUT	This location is used for storing batch log files and output from batch jobs
WAR	Web application Archive
WLS	WebLogic
XAIApp	XML Application Integration

Chapter 1

Introduction

This chapter provides an overview of the Oracle Utilities Smart Grid Gateway product and installation process. It contains the following sections:

- [Installation Overview](#)
- [Installation Components](#)
- [Installation Types](#)
- [Media Pack Components](#)

Installation Overview

This section provides a high-level overview of the installation steps for Oracle Utilities Smart Grid Gateway (SGG) V2.2.0.2.0 and selected additional software. For more information, see Oracle Utilities Smart Grid Gateway *Installation Guide*.

To install Oracle Utilities Smart Grid Gateway:

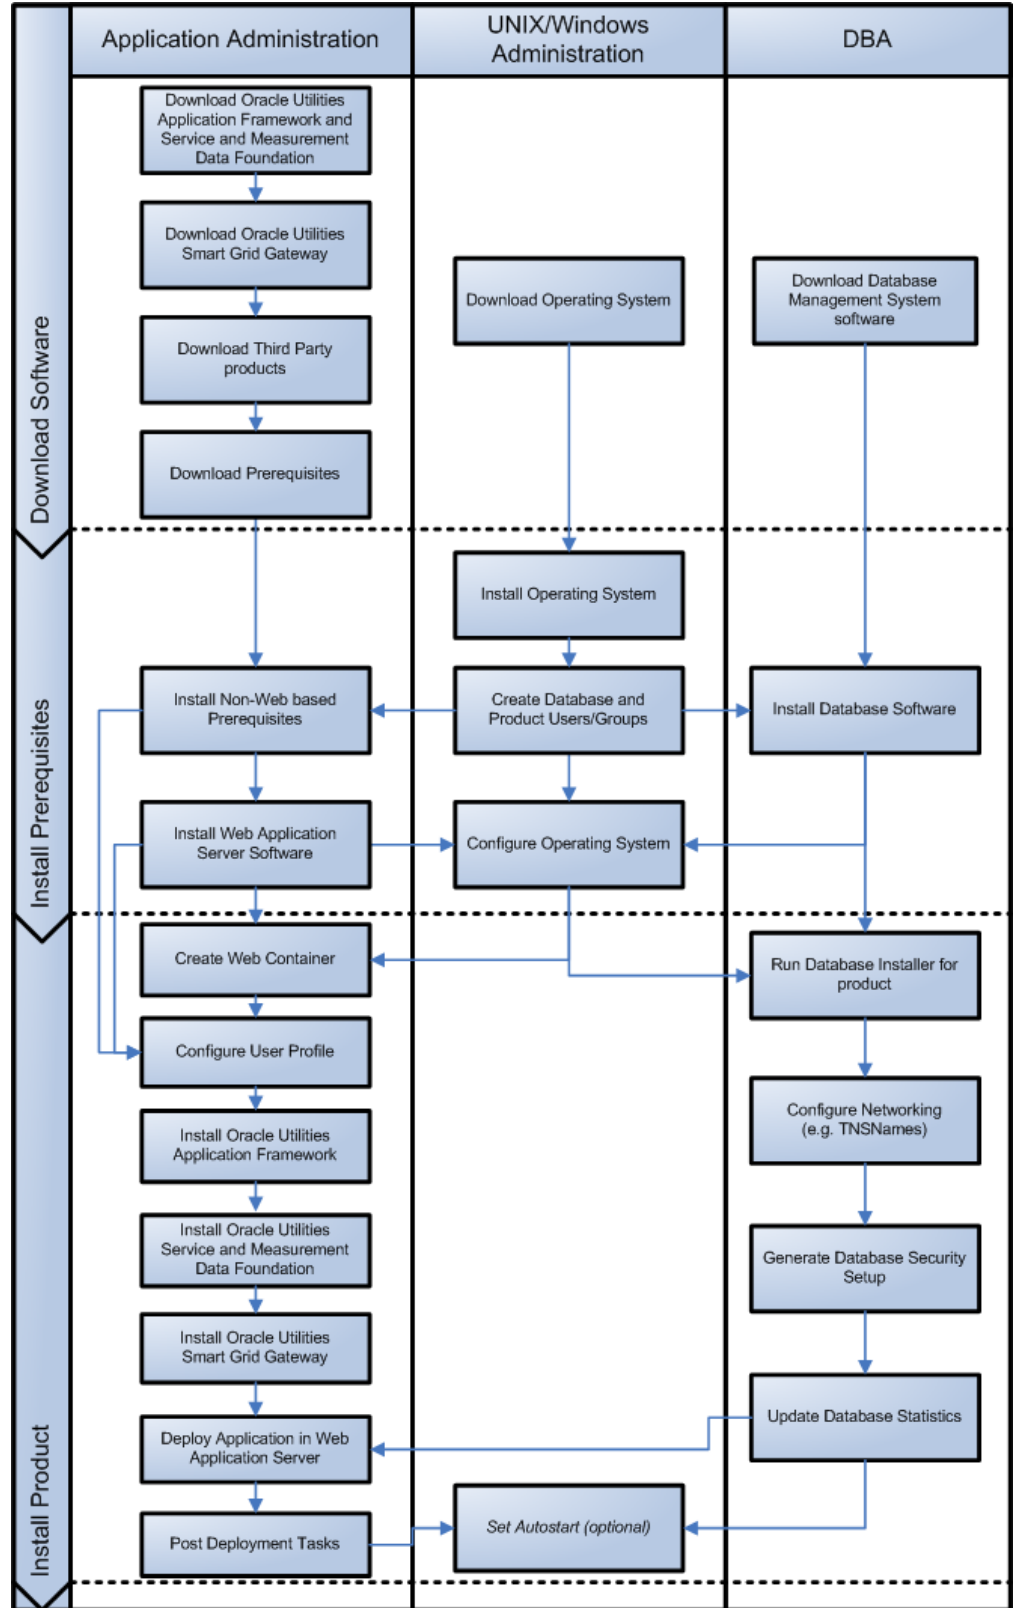

1. Install all required third-party software.
2. Install database. See *Oracle Utilities Smart Grid Gateway Database Administrator's Guide* for complete details.

Note: When implementing Oracle Utilities Smart Grid Gateway with Oracle Utilities Meter Data Management, both the Smart Grid Gateway and Meter Data Management database components should be installed in the same database.

3. Install Oracle Utilities Application Framework (Application server only).
4. Install Oracle Utilities Application Framework Single Fixes.
5. Install Oracle Utilities Service and Measurement Data Foundation (Application server only).
6. Install Oracle Utilities Smart Grid Gateway V2.2.0.2.0 Adapter Components (Application server only).
 - MV90 Adapter for Itron
 - Adapter Development Kit
 - Adapter for Networked Energy Services

- Adapter for Itron OpenWay
 - Adapter for Landis+Gyr
 - Adapter for Sensus RNI
 - Adapter for Silver Spring Networks
7. Install Oracle Utilities Service Order Management Components.
 8. Generate Application Viewer items (this includes the Data Dictionary).

The following diagram provides an overview of the steps that need to be taken to install and configure Oracle Utilities Smart Grid Gateway:

Refer to My Oracle Support for up-to-date additional information on Oracle Utilities Smart Grid Gateway installation.

Installation Components

The Oracle Utilities Smart Grid Gateway product installation consists of the following components:

- Database Components
 - Oracle Utilities Application Framework database
 - Oracle Utilities Service and Measurement Data Foundation database
 - Oracle Utilities Smart Grid Gateway database
- Application Components
 - Oracle Utilities Application Framework application
 - Oracle Utilities Service and Measurement Data Foundation application
 - Oracle Utilities Smart Grid Gateway application

For a successful installation, you must install ALL of the above components.

Installation Types

The first step in the installation procedure is to determine the installation type that meets your business requirements. The following are the possible installation types:

- [Initial Installation](#) - A base installation, typically used for a production environment.
- [Demo Installation](#) - A base installation with pre-populated demo data, typically used for demonstration or training purposes.
- [Upgrade Installation](#) - An upgrade installation from version 2.1.0.3.0 or 2.2.0.1.0 to version 2.2.0.2.0.

Initial Installation

This installation type is applicable when installing Oracle Utilities Smart Grid Gateway for the first time or from scratch. For an initial install, you must install all of the following components:

- Database components

Refer to the “Initial Install” section of the *Oracle Utilities Smart Grid Gateway Database Administrator’s Guide* for more information.

- Application components
 - Oracle Utilities Application Framework application
 - Oracle Utilities Application Framework Single Fix Pre-Requisite Rollup for Oracle Utilities Service and Measurement Data Foundation
 - Oracle Utilities Service and Measurement Data Foundation application
 - Oracle Utilities Smart Grid Gateway application

See [Installing Oracle Utilities Smart Grid Gateway - Initial Installation](#) for the instructions for installing these components.

Demo Installation

This installation type is applicable when installing a demo application of Oracle Utilities Smart Grid Gateway for demonstration or training purposes. For a demo install, you must install all of the following components:

- Demo Database components

Refer to the “Demo Install” section of the *Oracle Utilities Smart Grid Gateway Database Administrator’s Guide* for more information.

- Application components
 - Oracle Utilities Application Framework application
 - Oracle Utilities Application Framework Single Fix Pre-Requisite Rollup for Oracle Utilities Service and Measurement Data Foundation
 - Oracle Utilities Service and Measurement Data Foundation application
 - Oracle Utilities Smart Grid Gateway application

See [Installing Oracle Utilities Smart Grid Gateway - Demo Installation](#) for the instructions for installing these components.

Upgrade Installation

This installation type is applicable when upgrading Oracle Utilities Smart Grid Gateway from version 2.1.0.3.0 or 2.2.0.1.0 to version 2.2.0.1.0. For an upgrade, you must upgrade all of the following components:

- Database components

Refer to the “Upgrade Install” section of the *Oracle Utilities Smart Grid Gateway Database Administrator Guide* for more information.

- Application components
 - Oracle Utilities Application Framework application
 - Oracle Utilities Application Framework Single Fix Pre-Requisite Rollup for Oracle Utilities Service and Measurement Data Foundation
 - Oracle Utilities Service and Measurement Data Foundation application
 - Oracle Utilities Smart Grid Gateway application

See [Upgrading Oracle Utilities Smart Grid Gateway](#) for the instructions for installing these components.

Media Pack Components

The Oracle Utilities Smart Grid Gateway Base Media Pack consists of the following packages:

- Oracle Utilities Smart Grid Gateway V2.2.0.2.0 Release Notes
- Oracle Utilities Smart Grid Gateway V2.2.0.2.0 Quick Install Guide
- Oracle Utilities Smart Grid Gateway V2.2.0.2.0 Install Documentation
- Oracle Utilities Smart Grid Gateway V2.2.0.2.0 User Documentation

- Oracle Utilities Smart Grid Gateway V2.2.0.2.0 Supplemental Documentation
- Oracle Utilities Application Framework V4.3.0 Service Pack 5 Multiplatform
- Oracle Utilities Application Framework V4.3.0 Service Pack 5 Single Fix Prerequisite Rollup for SMDF V2.2.0.2.0
- Oracle Utilities Service and Measurement Data Foundation V2.2.0.2.0 Multiplatform
- Oracle Utilities Smart Grid Gateway V2.2.0.2.0 Oracle Database Multiplatform

The Oracle Utilities Smart Grid Gateway MV-90 Adapter for Itron Media Pack consists of the following additional packages:

- Oracle Utilities Smart Grid Gateway MV-90 Adapter for Itron V2.2.0.2.0 User Documentation
- Oracle Utilities Smart Grid Gateway MV-90 Adapter for Itron V2.2.0.2.0 Multiplatform

The Oracle Utilities Smart Grid Gateway Adapter Development Kit Media Pack consists of the following additional components:

- Oracle Utilities Smart Grid Gateway Adapter Development Kit V2.2.0.2.0 User Documentation
- Oracle Utilities Smart Grid Gateway Adapter Development Kit V2.2.0.2.0 Multiplatform

The Oracle Utilities Smart Grid Gateway Adapter for Networked Energy Services Media Pack consists of the following additional components:

- Oracle Utilities Smart Grid Gateway Adapter for Networked Energy Services V2.2.0.2.0 User Documentation
- Oracle Utilities Smart Grid Gateway Adapter for Networked Energy Services V2.2.0.2.0 Multiplatform

The Oracle Utilities Smart Grid Gateway Adapter for Itron OpenWay Media Pack consists of the following additional components:

- Oracle Utilities Smart Grid Gateway Adapter for Itron OpenWay V2.2.0.2.0 User Documentation
- Oracle Utilities Smart Grid Gateway Adapter for Itron OpenWay V2.2.0.2.0 Multiplatform

The Oracle Utilities Smart Grid Gateway Adapter for Landis+Gyr Media Pack consists of the following additional components:

- Oracle Utilities Smart Grid Gateway Adapter for Landis+Gyr V2.2.0.2.0 User Documentation

- Oracle Utilities Smart Grid Gateway Adapter for Landis+Gyr V2.2.0.2.0 Multiplatform

The Oracle Utilities Smart Grid Gateway Adapter for Sensus RNI Media Pack consists of the following additional components:

- Oracle Utilities Smart Grid Gateway Adapter for Sensus RNI V2.2.0.2.0 User Documentation
- Oracle Utilities Smart Grid Gateway Adapter for Sensus RNI V2.2.0.2.0 Multiplatform

The Oracle Utilities Smart Grid Gateway Adapter for Silver Spring Networks Media Pack consists of the following additional components:

- Oracle Utilities Smart Grid Gateway Adapter for Silver Spring Networks V2.2.0.2.0 User Documentation
- Oracle Utilities Smart Grid Gateway Adapter for Silver Spring Networks V2.2.0.2.0 Multiplatform

The Oracle Utilities Smart Grid Gateway Service Order Management Media Pack consists of the following additional components:

- Oracle Utilities Smart Grid Gateway Service Order Management V2.2.0.2.0 User Documentation
- Oracle Utilities Smart Grid Gateway Integration for MWM-SOM Release V2.2.0.2.0
- Oracle Utilities Smart Grid Gateway Integration for CC&B-SOM Release V2.2.0.2.0

Chapter 2

Supported Platforms and Hardware Requirements

This section provides an overview of the tiers on which the product is implemented, and shows each of the operating system/server combinations that the product is certified for, including:

- [Operating Systems and Application Servers](#)
- [Hardware Requirements](#)
- [Application Server Memory Requirements](#)
- [Support for Software Patches and Upgrades](#)

Operating Systems and Application Servers

This section provides information on the operation system, web browser and OSB and SOA adapter combinations that are supported. Please refer to the notes below the table for additional details regarding WebLogic support.

This section details the operating system and application server combinations on which this version of Oracle Utilities Smart Grid Gateway is supported.

Application Server Operating Systems

- Oracle Linux 6.x for x86_64
- Oracle Linux 7.x for x86_64
- Oracle Solaris 11.x for SPARC (64-bit)
- IBM AIX 7.1/7.2 TLx for POWER (64-bit)

Prerequisite Application Server Software

- Oracle Database Client 12.1.0.x
- Oracle Java SE Development Kit 1.8.0_121+ (Oracle platforms only)
- IBM 64-bit SDK for AIX 8.0.0.x (IBM platforms only)
- Hibernate ORM 4.1.0 and Hibernate 5.2.3 jars
- Oracle WebLogic 12c (v12.2.1.1+) 64-bit

Notes

- Oracle Linux is 100% user space-compatible with Red Hat Enterprise Linux, therefore, OUAF is also supported on Red Hat Enterprise Linux.
- Refer to the Framework DBA Guide for the Oracle Database Server Requirements.

Refer to the [Product Support Matrix \(Doc ID 1454143.1\)](#) on Oracle Support to determine if support for newer versions of the listed products have been added.

Please note the following:

- Version numbers marked with a "+" are the MINIMUM version supported. That version and all future 4th digit updates will be supported.

Example: Oracle 12.1.0.2+ means that 12.1.0.2 and any higher 12.1.0.x versions of Oracle are supported.

* An "x" indicates that any version of the digit designed by the "x" is supported.

Example: Linux 7.x indicates that any version of Linux 7 (7.0, 7.1, 7.2 etc) will be supported.

Windows Server

- Windows Server is **not** supported for Production environments. Wherever Windows Server is referenced within this guide, it is supported for Test or Development environments **only**.

WebLogic Server

- Oracle WebLogic Server (Fusion Middleware Infrastructure) 12.2.1.1+

WebLogic Server 12.2.1.1 and any higher versions of Oracle are supported.

- Although Oracle Utilities Smart Grid Gateway is supported only on the Oracle WebLogic application server, it can write to any JMS compliant queuing application by way of Oracle Service Bus. For more information about Oracle Service Bus, refer to the Oracle Fusion Middleware Developers Guide for Oracle Service Bus.
- **OSB and SOA Adapters are only supported on WebLogic version 12.2.1.0. The browser version supports versions 12.1.3.0+ and 12.2.1.1+.
- Oracle Utilities Service Order Management is only supported on WebLogic version 12.1.3.0+.
- Customers must download Oracle WebLogic Server from the Oracle Software Delivery Cloud.

Oracle Database Server

Prerequisite Database Server Software (on any vendor supported platform where x is vendor supported version):

- Oracle Database Server Enterprise Edition 12.1.0.2+
- Oracle Database Server Standard Edition 2 12.1.0.2+
- Oracle Database Server Enterprise Edition 12.2.0.2+
- Oracle Database Server Standard Edition 2 12.2.0.2+

Note: Oracle Database Enterprise Edition and the Partitioning and Advanced Compression options are strongly recommended in all situations.

Oracle VM Support

This version of Oracle Utilities Smart Grid Gateway is supported on Oracle VM Server for x86 for supported releases of Oracle Linux and Microsoft Windows operating systems.

Refer to My Oracle Support knowledge base article 249212.1 for Oracle's support policy on VMWare.

Hardware Requirements

This section provides information on client side hardware requirements for Oracle Utilities Smart Grid Gateway.

Configuration	Processor	Memory (RAM)	Monitor (Display)
Minimum	Pentium IV - 2.0 GHz	1024 MB	1024X768** 16-bit Color
Recommended*	Pentium IV -3.0+ GHz, (or) any Core 2 Duo (or) any Athlon X2	2048 MB	1280X1024** 32-bit Color

* The Recommended configuration supports better performance of the client.

** To reduce the amount of scrolling required for pages that are longer than 768 or 1024 pixels, consider placing a monitor into vertical position (with narrow side on the bottom).

Application Server Memory Requirements

For each application server environment a minimum of 4 GB of real memory is required, plus 6 GB of swap space. The approximate disk space requirements in a standard installation are as follows (the size represents the MINIMUM required):

Location	Size	Usage
Install Dir Location	5 GB minimum	This is the location where the application and Framework get installed. Startup, shutdown and other online log files are stored here. The size and space that is used should be monitored because various debugging options can significantly affect the size of log files. Note: This does not include the size of the edge product.
Log Location	2 GB minimum	This location is used for storing batch log files and output from batch jobs. The size of this space should be influenced by which batches are run and how often, and the amount of debugging information that is collected.
Location of the application web work files on the web servers	1.5 GB minimum	This location is used by various web server vendors to expand the application. It should be considered when installing these products. Refer to the individual web server documentation to determine the location of the temporary files.

Location	Size	Usage
Installation Temporary Area	4 GB	The application gets installed from this location. You need enough space to uncompress the files and install the application.
Oracle Data Area	4 GB minimum	This location is where the Oracle database data files are stored. The size of this space should be based on the requirements of the production environment. For an initial or demo database install 4 GB should be sufficient.

Support for Software Patches and Upgrades

Due to the ongoing nature of software improvement, vendors will periodically issue patches and service packs for the operating systems, application servers and database servers on top of specific versions that Oracle products have already been tested against.

If it is necessary to apply an upgrade, please do so in a test environment that is running on the same platform as your production environment prior to updating the production environment itself.

The exception to this rule is Hibernate software version 4.1.0. This version should not be upgraded.

Always contact Oracle Support prior to applying vendor updates that do not guarantee backward compatibility.

Chapter 3

Planning the Installation

This chapter provides information for planning an Oracle Utilities Smart Grid Gateway installation, including:

- [Before You Install](#)
- [Prerequisite Software List](#)
- [Installing Prerequisite Software](#)
- [Readiness Checklist](#)

Before You Install

Refer to My Oracle Support for up-to-date additional information about installing Oracle Utilities Smart Grid Gateway.

Prerequisite Oracle Utilities Application Framework Patches

Oracle Utilities Application Framework patches must be installed prior to installing Oracle Utilities Smart Grid Gateway. Refer to the *Oracle Utilities Work and Asset Management or Oracle Utilities Operational Device Management Release Notes* for more information.

WebLogic Native Installation

With Oracle Utilities Application Framework 4.3.0.5.0, a WebLogic native installation is required. Refer to the *Native Installation Oracle Utilities Application Framework* (Doc ID: 1544969.1) white paper on My Oracle Support.

Application Server Clustering

If you are considering application server clustering, refer to the following whitepaper, available on My Oracle Support, for additional information:

- Implementing Oracle ExaLogic and/or Oracle WebLogic Clustering (Doc ID: 1334558.1)
- Additional information about WebLogic clustering can be found at http://docs.oracle.com/cd/E17904_01/web.1111/e13709/toc.htm.

Directory Names

Directory cannot contain whitespace characters.

Prerequisite Software List

Before you install Oracle Utilities Smart Grid Gateway, you must install prerequisite software.

Refer to the respective installation documentation of the software for instructions on downloading and installing.

Prerequisite Software for Database Server

The prerequisite software for the database component of Oracle Utilities Smart Grid Gateway is as follows:

- **Oracle Database Server 12.1.0.1+** - This is required for installing the database component of the Oracle Utilities Smart Grid Gateway product. The following version of the database server is supported:
 - Oracle Database Enterprise Edition

Important: Oracle Database Enterprise Edition and the Partitioning and Advanced Compression options are strongly recommended in all situations.

Prerequisite Software for Application Server

The prerequisite software for the application component of Oracle Utilities Smart Grid Gateway is as follows:

- Oracle Database 12c Client
- JDK 1.8.0_102+ (64-bit)
- Oracle WebLogic 12c (12.2.1.1+)

Note: Only WebLogic Fusion Middleware Infrastructure Installer should be used.

- Hibernate 4.1.0 Final, Hibernate 5.5.4 Final
- Oracle Service Bus 12.2.1.0

Oracle Service Bus is required for an implementation that plans to use a productized adapter or the Adapter Development Kit to process meter reading or device event data.

Note: Oracle Service Bus 12.2.1.0 requires Oracle WebLogic Server 12.2.1.0.

- Oracle SOA Suite 12.2.1.0

Oracle SOA Suite (specifically, BPEL Process Manager) is required for an implementation that plans to use a productized adapter or the Adapter Development Kit to implement two-way communications for processing meter commands.

Note: Oracle SOA Suite 12.2.1.0 requires Oracle WebLogic Server (12.2.1.0). Oracle Utilities Service Order Management only supports Oracle Service Bus/Oracle SOA Suite 12.2.1.0.

Oracle Security Fix Updates

It is recommended that you keep the Oracle prerequisite software up to date with the latest security fixes provided by Oracle.

Web Browser Requirements

The web browsers listed below are supported when used on each of the operating systems indicated:

Browser	Windows Operating System
Internet Explorer 11	Microsoft Windows 7, 8.1, 10 (64-bit)
Firefox ESR 52	Microsoft Windows 7, 8.1, 10 (64-bit)
Google Chrome	Microsoft Windows 7, 8.1, 10 (64-bit)

Installing Prerequisite Software

Refer to the section “**Installing Prerequisite Software**” in the *Oracle Utilities Smart Grid Gateway Installation Guide* for detailed instructions on installing the prerequisite software.

Readiness Checklist

The following checklist will guide you through the installation process of Oracle Utilities Smart Grid Gateway. The details for each step are presented in the *Oracle Utilities Smart Grid Gateway Installation Guide*.

1. Confirm recommended hardware is ready. Refer to **Supported Platforms and Hardware Requirements** for more details.
2. Install prerequisite software, refer to **Prerequisite Software List** for more details.
3. Ensure that you have downloaded Oracle Utilities Smart Grid Gateway v2.2.0.2 components.
4. Go through the installation and configuration worksheets to understand the configuration menu.
5. Determine type of the installation:
 - **Initial Installation** - For initial installation follow the instructions mentioned in *Oracle Utilities Smart Grid Gateway Installation Guide*.
 - **Demo Installation** - For demo installation follow the instructions mentioned in *Oracle Utilities Smart Grid Gateway Installation Guide*.
 - **Upgrade Installation** - For upgrade installation follow the instructions mentioned in *Oracle Utilities Smart Grid Gateway Installation Guide*.
6. Perform post-installation tasks.

Chapter 4

Installing Oracle Utilities Smart Grid Gateway - Initial Installation

This chapter provides an overview of installing Oracle Utilities Smart Grid Gateway from scratch. This chapter includes:

- [Before You Install](#)
- [Initial Installation Procedure](#)

Before You Install

Refer to My Oracle Support for up-to-date additional information on Oracle Utilities Smart Grid Gateway.

Initial Installation Procedure

The initial installation procedure consists of:

- [Installing Database Component](#)
- [Installing Application Components](#)

Installing Database Component

Installation of the database component of Oracle Utilities Smart Grid Gateway must be complete before you can proceed with the following sections. Refer to the section “**Initial Install**” of the *Oracle Utilities Smart Grid Gateway Database Administrator's Guide*, which provides instructions on installing the database component.

Note: When implementing Oracle Utilities Smart Grid Gateway with Oracle Utilities Meter Data Management, both the Smart Grid Gateway and Meter Data Management database components should be installed in the same database.

Installing Application Components

Refer to the chapter “**Installing Oracle Utilities Smart Grid Gateway - Initial Installation**” of the *Oracle Utilities Smart Grid Gateway Installation Guide*, which provides instructions on installing the application components.

Chapter 5

Installing Oracle Utilities Smart Grid Gateway - Demo Installation

This chapter provides an overview of the instructions for setting up a demo application of Oracle Utilities Smart Grid Gateway useful for demonstration or training purposes.

This chapter includes:

- [Before You Install](#)
- [Demo Installation Procedure](#)

Before You Install

Refer to My Oracle Support for up-to-date additional information on Oracle Utilities Smart Grid Gateway.

Demo Installation Procedure

The demo installation procedure consists of:

- [Installing Database Component](#)
- [Installing Application Components](#)

Installing Database Component

Installation of the database component of Oracle Utilities Smart Grid Gateway must be complete before you can proceed with the following sections. Refer to the section “**Demo Install**” of the *Oracle Utilities Smart Grid Gateway Database Administrator's Guide*, which provides instructions on installing the database component with pre-populated demo data.

Note: When implementing Oracle Utilities Smart Grid Gateway with Oracle Utilities Meter Data Management, both the Smart Grid Gateway and Meter Data Management database components should be installed in the same database.

Installing Application Components

Refer to the chapter “**Installing Oracle Utilities Smart Grid Gateway - Demo Installation**” of the *Oracle Utilities Smart Grid Gateway Installation Guide*, which provides instructions on installing the application components.

Chapter 6

Upgrading Oracle Utilities Smart Grid Gateway

This chapter provides an overview of upgrading Oracle Utilities Smart Grid Gateway from version 2.1.0.3.0 or 2.2.0.10 to version 2.2.0.2.0.

This chapter includes:

- [Before You Upgrade](#)
- [Upgrade Procedure](#)

Before You Upgrade

Review the list of operating system, application server and database server combinations that Oracle Utilities Smart Grid Gateway is certified to operate on, in the chapter [Supported Platforms and Hardware Requirements](#).

For further assistance, contact My Oracle Support before you upgrade.

Upgrade Procedure

The initial installation procedure consists of:

- [Upgrading Database Component](#)
- [Upgrading Application Components](#)

Upgrading Database Component

Upgrade of the database component of Oracle Utilities Smart Grid Gateway must be complete before you can proceed with the following sections. Refer to the chapter “**Upgrade Install**” of the *Oracle Utilities Smart Grid Gateway Database Administrator's Guide*, which provides instructions on upgrading the database component.

Note: When implementing Oracle Utilities Smart Grid Gateway with Oracle Utilities Meter Data Management, both the Smart Grid Gateway and Meter Data Management database components should be installed in the same database.

Upgrading Application Components

Refer to the chapter “**Upgrading** Oracle Utilities Smart Grid Gateway” of the *Oracle Utilities Smart Grid Gateway Installation Guide*, which provides instructions on installing the application components.

Appendix A

Additional Information for Installing Other Oracle Software

Please read this section and the follow directions if you purchased a license from Oracle for Oracle WebLogic.

Oracle WebLogic

Customers must download Oracle WebLogic Server from the Oracle Software Delivery Cloud. The version of Oracle WebLogic Server is in the Oracle Utilities Smart Grid Gateway Supported Platforms Summary section.

Note: If you install a temporary license for Oracle WebLogic, please note that this license is limited to 5 non-current users. You will need to install the full license.

Install the Oracle WebLogic license

To apply a full license you will need to complete the following steps:

1. The license keys for Oracle WebLogic products are located at:
<http://licensecodes.oracle.com/bea.html>
2. The following products are supported: Oracle WebLogic Server Standard Edition and Oracle WebLogic Server Enterprise Edition.
3. At the time of release of this document the license key on the web site for Oracle WebLogic Server Standard Edition is BEA WebLogic Server Advantage Edition.

The license key for Oracle WebLogic Server Enterprise Edition on the web site is BEA WebLogic Server Premium Edition.

4. Shut down the Oracle Utilities Smart Grid Gateway application server.
5. Follow the instructions from the Oracle WebLogic installation document to install the license key.
6. Start the Oracle Utilities Smart Grid Gateway application server.
