**Preface**

**Audience**

Following are the intended audience for the FCUBS user guide:

- **ETL Developers**: The ETL Developers from the IT Department of the financial services institution, who do the data sourcing.
- **Business Analysts**: The business analysts from the IT Department of the financial services institution, who do the mapping of the tables.

**Prerequisites**

- Data Integration Hub (DIH) should be installed
- OFSAA – FCUBS Interface should be installed
- Oracle Data Integrator environment for executing the interfaces

**Related Information Sources**

Along with this user manual, you can also refer to the following documents OTN documentation Library:

- Oracle Financial Services Data Integration Hub User Guide 8.0.1.0.0
- Oracle Financial Services Data Integration Hub Applications Pack Installation Guide Release 8.0.1.0.0
- Oracle Flexcube UBS-OFSAA Integration guide

1 Introduction to FCUBS to OFSAA Interface

1.1 Overview of DIH Interface

Data Integration Hub (DIH) enables to load the data from the source systems to the OFSAA staging tables, through logical interfaces, known as Application Data Interfaces (ADI). DIH provides a set of User Interfaces (UI), which is used to define and maintain External Data Descriptors (EDD), Application Data Interfaces, and also map the EDDs and ADIs through Connectors. The mappings can be one to one, one to many, and many-to-many.

The source systems that supply data include, the core banking systems, rating systems, modeling systems, and so on. In the absence of DIH, the data from the source systems are extracted, transformed, and loaded (ETL process) to the physical tables in Oracle Data Integrator (ODI). With DIH, the ETL activity is not replaced; but DIH serves as an abstract, logical layer to the physical tables in Oracle Data Integrator (ODI).

Oracle Financial Services Analytical applications (OFSAA) enables financial institutions to measure and meet risk-adjusted performance objectives, cultivate a risk management culture, lower the costs of compliance and regulation, and improve customer insight.

Oracle FLEXCUBE Universal Banking (FCUBS) supports the changing landscape of retail, corporate, and investment banking needs with strong transaction banking and Islamic banking capabilities.

The current FCUBS-OFSAA interfaces, transfers all key data elements across various modules within FCUBS to OFSAA Common Staging Area (CSA).

The integration between the Oracle FCUBS and the OFSAA enables the financial institutions to:

- get insight to customer patterns based on the data captured in core banking
- achieve end-to-end improvement in business delivery
- achieve effective performance and risk free management using the available customer data

This integration is achieved by handing off FCUBS core banking data with OFSAA through FLEXCUBE Information Server (FIS) and DIH.
1.2 Data flow

The procedures are packaged within FCUBS which populates data from various tables in FCUBS to several landing area tables after execution. Essentially a 1:1 mapping is done between the landing area table (EDD) and OFSAA staging area table (ADI). Most of the calculations and transformations are done within these extraction routines. The DIH connector pulls data from the landing tables and populates the same in the staging area tables.

1.3 Integration Scope in Oracle FLEXCUBE Universal Banking System

The following integration activities take place in Oracle FLEXCUBE Universal Banking System.

<table>
<thead>
<tr>
<th>Module</th>
<th>Hand off Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Core Entities</td>
<td>• Customer address, phone numbers, and email IDs</td>
</tr>
<tr>
<td></td>
<td>• Customer education and employment details</td>
</tr>
<tr>
<td></td>
<td>• Customer marital status</td>
</tr>
<tr>
<td></td>
<td>• Customer relationship details</td>
</tr>
<tr>
<td></td>
<td>• Details of organizations that are the customers</td>
</tr>
<tr>
<td></td>
<td>• Exchange rate information</td>
</tr>
<tr>
<td></td>
<td>• Details of all geographical locations and transaction channels of the bank</td>
</tr>
<tr>
<td></td>
<td>• Details of the loan product category and list of all products</td>
</tr>
</tbody>
</table>
### Current Account and Savings Account
- All the personal and business addresses, email IDs and phone numbers associated with an account
- List of branch transactions
- CASA account ledger and transactions on OD accounts
- Interest rates of CASA and OD accounts

### Consumer Lending
- All the personal and business addresses, email IDs and phone numbers associated with an account
- Loan contract transactions details
- Repayment schedules of contracts like loan, mortgages, OD and credit cards

### Term Deposit
- Term deposit product processor and term deposit ledger table details

### Enterprise Limits and Collateral Management
- Details of the collaterals submitted by the customer for various loan contracts
- Customer credit line details
- Market value and original value of the collaterals

### General Ledger
- GL book parameters and the list of GL items available in FCUBS
- GL balance of the customer
- Interbank correspondent transactions of a customer

### Foreign Exchange
- Forex account transaction data of a customer
- Foreign exchange contracts of a customer
- Exchange rates between two currencies

### Money Market
- Borrowing records of the customer
- Money market transaction data

## 1.4 Extraction process for tables of Flexcube module

FIS is used as the gateway in the FCUBS - OFSAA integration. FCUBS internally uses FIS framework components to extract data and stores the data in the staging tables of FCUBS. During End of Financial Input (EOFI) batch, the module wise data in FIS are extracted to staging tables in FCUBS. FCUBS provides a control table to indicate successful data extraction. OFSAA pulls the data from the tables in FCUBS using the DIH connector. If source and target systems are in the same database, then data from source staging table are transformed and loaded to fact and dimension tables in target system using synonyms. If the source and target systems are in different database, then data from source staging table are loaded to target staging table using...
transportable table spaces. The transfer or extraction of data from FCUBS to OFSAA differs based on the staging tables as follows:

- Master table - Incremental data between two extraction dates are transferred.
- Maintenance and contract tables - Entire transaction data are transferred in each extraction.
- Transaction table - Data related to the transactions created on the extraction date are transferred.

1.5 Data Transfer from FCUBS to OFSAA

The core banking data in Oracle FCUBS are transferred to OFSAA using FIS. The data in FCUBS staging tables are mapped to FIS staging table. During end of day, the core banking data are sent to FIS. OFSAA then picks the data from FIS through DIH.

For details on data transfer from FCUBS to OFSAA, refer to the attached sheet FCUBS_OFSAA_Data_Transfer_Details.xls.

The file FCUBS OFSAA data transfer details has the following details:

- Source System
- Target System
- Data Transferred
- Source System Module
- FCUBS Staging Table Name
- Extraction Package Name
- Target System Table Name
- Extraction Routine
- Data Included in the Extraction

1.6 List of Flexcube modules

The modules used in Flexcube are as follows:

- CASA
- CL
- CORE
- ELCM
- FX
- GL
• MM
• TD
2 Flexcube- OFSAA Interface Architecture

In this data flow environment diagram, the data is extracted from FCUBS to the FCUBS landing zone. This data, with the help of DIH Connectors, is loaded to DIH ADI which in turn is mapped to the OFSAA Staging table.
3 Mapping the OFSAA User to FCUBS User Groups

User group mapping enables you to map user(s) to specific user group which in turn is mapped to a specific Information Domain and role. Every User Group mapped to the infodom should be authorized. Else, it cannot be mapped to users.

User Group Map screen displays fields such as User ID, Name, and the corresponding Mapped Groups. You can view and modify the existing mappings within the User Group Maintenance screen.

To access User Group Mapping navigate to, and click Identity Management section. For details on mapping user to user groups refer to OFSAAI User Guide in OTN documentation library.

Seeded User Groups for OFSAA - FCUBS Interface

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>FCUBS Admin</td>
<td>User mapped to this group will have access to all the menu items for entire FCUBS Application. The exclusive menu’s which are available only to this group users are FCUBS Administration</td>
</tr>
<tr>
<td>FCUBS Data Mapping</td>
<td>User mapped to this group will have access to FCUBS Data Mapping Menu</td>
</tr>
<tr>
<td>FCUBS Operator</td>
<td>User mapped to this group will have access to Orchestration and Execution Menu</td>
</tr>
</tbody>
</table>
4 Logging into FCUBS-OFSA Interface

Access the FCUBS-OFSA Interface using your login credentials (User ID and password). The built-in security system ensures that you are permitted to access the window and actions based on the authorization only.

After logging into the application, select Interface for Oracle Flexcube Universal Banking System from the applications drop-down list.

**Note:** You should be mapped at least any one of the FCUBS user groups in order to get the application in the drop down.

The FCUBS-OFSA landing page is displayed below.
5 Prerequisites for Deploying OFSAA-FCUBS Connectors

The deployment process requires the below actions to be performed as prerequisites. Ensure that these requirements are met before starting the deployment using Refresh FCUBS interface menu.

- The user must be mapped to the user group FCUBS Admin in order to get the Refresh FCUBS Interface menu.
- The user should have mapped to DIH Admin and DIH Data Mapping user groups to configure the Oracle Data Integrator (ODI) settings and External Data Store respectively.

Follow the below steps:

1. Complete the ODI settings using “Settings” option in DIH Application menu before deploying the interface.

2. Select the entry which is present and click Edit.

3. The ODI settings screen is displayed. Update the setting information correctly before proceeding to the deployment of FCUBS interface connectors.

<table>
<thead>
<tr>
<th>Settings Menu</th>
<th>Values Required</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>ODI User</td>
<td>User Name used for Login to ODI</td>
<td>SUPERVISOR</td>
</tr>
<tr>
<td>ODI Password</td>
<td>ODI Password for the ODI user to login</td>
<td>odipassword</td>
</tr>
<tr>
<td>Master Repository DB User</td>
<td>Master Repository DB Schema User Name created for ODI</td>
<td>DIHDEV_ODI_REPO</td>
</tr>
<tr>
<td>Master Repository DB Password</td>
<td>Master Repository DB Schema Password</td>
<td>dbpassword</td>
</tr>
<tr>
<td>Master DB Driver</td>
<td>Oracle Driver (Use the Default)</td>
<td>oracle.jdbc.OracleDriver</td>
</tr>
<tr>
<td>Master DB Connection</td>
<td>Oracle Database JDBC URL</td>
<td>jdbc:oracle:thin:@10.184.135.6:1521:DIHDB</td>
</tr>
<tr>
<td>Work Repository</td>
<td>Repository used inside ODI</td>
<td>DIHREP</td>
</tr>
</tbody>
</table>
4. A source named FCUBS_STAGE_SRC is present in External Data Store under DIH Application. Select the entry which is present as FCUBS_STAGE_SRC and click Edit.

5. Provide the details of FCUBS schema user name and password where you have the Landing Tables of FCUBS Application. Refer to DIH User manual for more details on External Data Store settings.
6. Navigate to **DIH Application**, select **Administration** menu and Click **Refresh ADI Menu**. This will refresh all the Application Data Interfaces, and creates the Application Data Interfaces for all the staging tables present in the model which is being uploaded in the same Infodom.

7. Navigate to **DIH Application**, select **Administration** menu and click **Refresh Target Datastores**. This will refresh all the available target data stores.
6 Deploying OFSAA-FCUBS Connectors Using Refresh FCUBS Interface Menu

After the pre-requisites are complete, you can deploy the FCUBS connectors that map the multiple file EDD's to the corresponding ADI's, by using **Refresh FCUBS Interface** menu. This creates the corresponding External Data Descriptor and Connectors inside **Data Mapping** Menu of the FCUBS Interface.

1. Navigate to the FCUBS application interface.
2. Select **Administration**, and click **Refresh FCUBS Interface**.
3. Select the **Source App Version** (FCUBS Version 12.0.3.0) from the drop-down menu.
4. Click **Deploy Selected Version**
5. A message “Are you sure you want to Deploy the Selected Version?” is displayed. Click Yes to proceed.
After the deployment is complete, the “Deployment Successful” message is displayed.

6. Navigate to **External Data Descriptor** and **Connectors** under **FCUBS Data Mapping** for checking the deployed EDDs, Connectors and the Mappings.
**FCUBS External Data Descriptor**

**FCUBS Connectors**
7 Undeploying OFSAA-FCUBS Connectors Using Refresh FCUBS Interface Menu

You can use the Undeploy All button to undeploy the connectors. Use the undeploying feature in the following scenarios.

7.1 Deploying Upgraded Source Version

If there is an upgraded source application (FCUBS) available, you can undeploy the existing version of the connector, and redeploy the same by selecting the available upgraded source version. The current available source version for FCUBS connector supports FCUBS version 12.0.3.0.

Note: You can deploy only one source version at a time. You need to upgrade the source, undeploy the version and deploy the required version.

7.2 Changes in ODI / External Data Store Settings

If there is a change in the ODI/External Data Store settings, then you can undeploy the connectors. Modify the settings and redeploy to obtain the latest connector settings.

Note: You cannot undeploy the connectors if any of the Connector/External Data Descriptor is in published mode. Unpublish all the Connector/External Data Descriptor before proceeding with undeployment.

Follow the below steps to undeploy:

1. Click Undeploy All to undeploy the Connector version.
2. A message “Are you sure you want to Undeploy All?” is displayed. Click Yes to proceed.

3. After the undeployment is complete, the “Successfully Deployed All” message is displayed.
8 CASA Module

Currents and Savings Account (CASA) is an attempt to combine savings and checking accounts to entice customers to keep their money in the banks. It is more prominent in Middle and Southeast Asia.

8.1 List of CASA tables

- For Connector: Con_Flx_Cust_Acct_Casa
  The ADI is: Customer Account
  ADI Subtype: CASA Contracts
  The EDD is: AATB_CASA

- For Connector: Con_Flx_Cust_Acct_OD
  The ADI is Customer Account
  ADI Subtype: OD Accounts
  EDD is: AATB_OD_ACCTS

- For Connector: Con_Flx_Branch_Transactions
  The ADI is Branch Transactions
  ADI Subtype: -
  EDD is: AATB_SRC_BRANCH_TXNS

- For Connector: Con_Flx_Cust_Acct_Casa_Txn
  The ADI is Customer Account Transaction
  ADI Subtype: CASA Transaction
  EDD is: AATB_CASA_TXNS

- For Connector: Con_Flx_Cust_Acct_OD_Txn
  The ADI is Customer Account Transaction
  ADI Subtype: Over Draft Accounts Transactions
  EDD is: AATB_OD_ACCTS_TXNS

- For Connector: Con_Flx_Account_Address
  The ADI is Account Address
EDD is: AATB_ACCT_ADDRESS

- For Connector: Con_Flx_Account_Email_Address
  The ADI is Account Email Address
  EDD is: AATB_STG_ACCOUNT_EMAIL_ADDR

- For Connector: Con_Flx_Account_Phone
  The ADI is Account Phone
  EDD is: AATB_ACCT_PHONE

- For Connector: Con_Flx_Account_Status_Master
  The ADI is Account Status Master
  EDD is: AATB_ACCT_STATUS_MAST

For the above connectors, refer the file CASA for FCUBS Column name and the Target Logical Name.
9 Consumer Lending (CL) Module

Consumer Lending is an amount of money lent to an individual (usually on a non-secured basis) for personal purpose. Consumer loans are monitored by government regulatory agencies for their compliance with consumer protection regulations such as the Truth in Lending Act.

9.1 List of CL tables

- For Connector: Con_Flx_Cust_Acct_Loan
  The ADI is Customer Account
  ADI Subtype: Loan Contracts
  EDD is: AATB_LOAN_CONTRACTS

- For Connector: Con_Flx_Cust_Acct_Loan_Txn
  The ADI is Customer Account Transaction
  ADI Subtype: Loan Contracts Transactions
  EDD is: AATB_LOAN_CONTRACT_TXNS

- For Connector: Con_Flx_Payment_Schedule
  The ADI is Payment Schedule
  ADI Subtype: -
  EDD is: AATB_PAYMENT_SCHEDULE

- For Connector: Con_Flx_Account_Address
  The ADI is Account Address
  ADI Subtype: -
  EDD is: AATB_ACCT_ADDRESS

- For Connector: Con_Flx_Account_Email_Address
  The ADI is Account Email Address
  ADI Subtype: -
  EDD is: AATB_STG_ACCOUNT_EMAIL_ADDR

- For Connector: Con_Flx_Account_Phone
  The ADI is Account Phone
ADI Subtype: -
EDD is: AATB_ACCT_PHONE

- For Connector: Con_Flx_Account_Status_Master
  The ADI is Account Status Master
  ADI Subtype: -
  EDD is: AATB_ACCT_STATUS_MAST

For the above connector, refer the file CL for FCUBS Column name and the Target Logical Name.
10 **CORE Module**

10.1 **List of CORE tables**

- For Connector: Con_Flx_Branch_Master
  
  The ADI is Branch Master
  
  ADI Subtype: -
  
  EDD is: AATB_BRANCH_MAST

- For Connector: Con_Flx_Contact_Master
  
  The ADI is Contact Master
  
  ADI Subtype: -
  
  EDD is: AATB_CONTACT_MAST

- For Connector: Con_Flx_Country_Master
  
  The ADI is Country Master
  
  ADI Subtype: -
  
  EDD is: AATB_COUNTRY_MAST

- For Connector: Con_Flx_Cust_Address
  
  The ADI is Customer Address
  
  ADI Subtype: -
  
  EDD is: AATB_CUST_ADDRESS

- For Connector: Con_Flx_Cust_Class_Mast
  
  The ADI is Customer Classification Master
  
  ADI Subtype: -
  
  EDD is: AATB_CUST_CLSFCTN

- For Connector: Con_Flx_Cust_Country_Relation
  
  The ADI is Customer Country Relation
  
  ADI Subtype: -
  
  EDD is: Customer Country Relation
- For Connector: Con_Flx_Cust_Details
  The ADI is Customer Details
  ADI Subtype: -
  EDD is: AATB_CUSTDETAILS

- For Connector: Con_Flx_Cust_Education_Master
  The ADI is Customer Education Master
  ADI Subtype: -
  EDD is: AATB_CUST_EDUCATION

- For Connector: Con_Flx_Cust_Email_Address
  The ADI is Customer Email Address
  ADI Subtype: -
  EDD is: AATB_CUST_EMAIL_ADD

- For Connector: Con_Flx_Cust_Emp_Type_Mast
  The ADI is Customer Employment Type Master
  ADI Subtype: -
  EDD is: AATB_CUST_EMPLOYMENT

- For Connector: Con_Flx_Cust_Identi_Doc
  The ADI is Customer Identification Document
  ADI Subtype: -
  EDD is: AATB_CUSTID_DOC

- For Connector: Con_Flx_Cust_Master
  The ADI is Customer Master
  ADI Subtype: -
  EDD is: AATB_CUST_MAST

- For Connector: Con_Flx_Cust_Phone
  The ADI is Customer Phone
  ADI Subtype: -
EDD is: AATB_CUST_PHONE

- For Connector: Con_Flx_Cust_Relationships
  The ADI is Customer Relationships
  ADI Subtype: -
  EDD is: AATB_CUST_RLTNSP

- For Connector: Con_Flx_Cust_To_Cust_Rel
  The ADI is Customer To Customer Relationships
  ADI Subtype: -
  EDD is: AATB_CUST_CUST_RLTN

- For Connector: Con_Flx_Cust_Type_Master
  The ADI is Customer Type Master
  ADI Subtype: -
  EDD is: AATB_CUST_TYPE

- For Connector: Con_Flx_Exchange_Rates
  The ADI is Exchange Rates
  ADI Subtype: -
  EDD is: AATB_XCHNGE_RATE_HIST

- For Connector: Con_Flx_Financial_Year_Master
  The ADI is Financial Year Master
  ADI Subtype: -
  EDD is: AATB_FINYEAR_MAST

- For Connector: Con_Flx_Geography_Master
  The ADI is Geography Master
  ADI Subtype: -
  EDD is: AATB_GEOGRAPHY_MAST

- For Connector: Con_Flx_Marital_Status_Master
The ADI is Marital Status Master
ADI Subtype: -
EDD is: AATB_MARITAL_STAT

- For Connector: Con_Flx_Prod_Category_Master
  The ADI is Product Category Master
  ADI Subtype: -
  EDD is: AATB_PROD_CATG_MAST

- For Connector: Con_Flx_Prod_Master
  The ADI is Product Master
  ADI Subtype: -
  EDD is: AATB_PRODUCT_MAST

- For Connector: Con_Flx_Prod_Type_Master
  The ADI is Product Type Master
  ADI Subtype: -
  EDD is: AATB_PRODTYPE_MAST

- For Connector: Con_Flx_Transaction_Master
  The ADI is Transaction Master
  ADI Subtype: -
  EDD is: AATB_TXN_MASTER

For the above connectors, refer the file CORE for FCUBS Column name and the Target Logical Name.
11 Enterprise Limits and Collateral Management (ELCM) Module

Financial institutions face multiple challenges while assessing their exposure levels to customers, entities, or industry sectors. Moreover, the usage of multiple product processors to manage lines of businesses prevents financial institutions from gaining a consolidated view of their exposure.

Oracle FLEXCUBE ELCM integrates with the existing IT application landscape and offers you a single source for managing online, real-time exposure across the enterprise. Its process-centric architecture enables centralized collateral management, enterprise-wide limits definition, and tracking for effective exposure management as well as resource utilization.

11.1 List of ELCM tables

- For Connector: Con_Fix_Account_Mitigant_Map
  The ADI is Account Mitigant Map
  ADI Subtype: -
  EDD is: AATB_ACCT_MITIGANT_MAP

- For Connector: Con_Fix_Collateral_Master
  The ADI is Collateral Master
  ADI Subtype: -
  EDD is: AATB_COLLATERAL_MAST

- For Connector: Con_Fix_Collaterals
  The ADI is Collaterals
  ADI Subtype: -
  EDD is: AATB_STAGE_COLLATERAL

- For Connector: Con_Fix_Cr_Facility_Details
  The ADI is Credit Facility Details
  ADI Subtype: -
  EDD is: AATB_CR_LINE_DETAILS

- For Connector: Con_Fix_Cr_Facility_Master
  The ADI is Credit Facility Master
  ADI Subtype: -
EDD is: AATB_CR_LINE_MAST

- For Connector: Con_Flx_Cr_Facility_Type_Mast
  The ADI is Credit Facility Type Master
  ADI Subtype: -
  EDD is: AATB_CR_LINE_TYPE_MAST

- For Connector: Con_Flx_Mitigant_Issuer_Master
  The ADI is Mitigant Issuer Master
  ADI Subtype: -
  EDD is: AATB_MIT_ISSUER_MAST

- For Connector: Con_Flx_Mitigant_Master
  The ADI is Mitigant Master
  ADI Subtype: -
  EDD is: AATB_MITIGANT_MAST

- For Connector: Con_Flx_Mitigants
  The ADI is Mitigants
  ADI Subtype: -
  EDD is: AATB_MITIGANTS

For the above connectors, refer the file ELCM for FCUBS Column name and the Target Logical Name.
12 Foreign Exchange (FX) module

Foreign exchange, or Forex, is the conversion of one country's currency into that of another. In a free economy, a country's currency is valued according to factors of supply and demand. In other words, a currency's value can be pegged to another country's currency, such as the U.S. dollar, or even to a basket of currencies. A country's currency value also may be fixed by the country's government. However, most countries float their currencies freely against those of other countries, which keep them in constant fluctuation.

12.1 List of FX tables

- For Connector: Con_Flx_Forward_Exch_Rates
  The ADI is -
  ADI Subtype: Borrowings
  EDD is: AATB_FWD_EXCHG_RATES

- For Connector: -
  The ADI is Forex Account Transaction
  ADI Subtype: -
  EDD is: AATB_FOREX_TXNS

For the above connectors, refer the file FX for FCUBS Column name and the Target Logical Name.
13 General Ledger (GL) Module

A general ledger is a complete record of financial transactions over the life of a company. The ledger holds account information that is needed to prepare financial statements, and includes accounts for assets, liabilities, owners’ equity, revenues and expenses.

13.1 List of GL tables

- For Connector: Con_Fix_Accounting_Entries
  The ADI is Accounting Entries
  ADI Subtype: -
  EDD is: AATB_ACCOUNTING_ENTRIES

- For Connector: Con_Fix_General_Ledger_Data
  The ADI is General Ledger Data
  ADI Subtype: -
  EDD is: AATB_GL_DATA

- For Connector: Con_Fix_General_Ledger_Master
  The ADI is General Ledger Master
  ADI Subtype: -
  EDD is: AATB_GL_MASTER

- For Connector: Con_Fix/GL_Book_Master
  The ADI is GL Book Master
  ADI Subtype: -
  EDD is: AATB_GL_BOOK_MAST

- For Connector: -
  The ADI is Interbank Transactions
  ADI Subtype: -
  EDD is: AATB_INTERBANK_TXNS

For the above connectors, refer the file GL for FCUBS Column name and the Target Logical Name.
14  Money Market (MM) Module

Money Market (MM) Module

MM is a segment of the financial market in which financial instruments with high liquidity and very short maturities are traded. Money market securities consist of negotiable certificates of deposit, banker’s acceptances, U.S. Treasury bills, commercial paper, municipal notes, federal funds, and repurchase agreements.

14.1  List of MM tables

- For Connector: Con_Flx_Cust_Acct_Borr
  
  The ADI is Customer Account
  ADI Subtype: Borrowings
  EDD is: AATB_MM_BORROWINGS

- For Connector: Con_Flx_Cust_Acct_Borr_Txns
  
  The ADI is Customer Account Transaction
  ADI Subtype: Borrowings Transaction
  EDD is: AATB_BORROWINGS_TXNS

- For Connector: Con_Flx_Cust_Acct_MM
  
  The ADI is Customer Account
  ADI Subtype: Money Market Contracts
  EDD is: AATB_MM_CONTRACTS

  The ADI is Dealer Master
  ADI Subtype: -
  EDD is: AATB_DEALER_MAST

For the above connectors, refer the file MM for FCUBS Column name and the Target Logical Name.
15 Term Deposit (TD) Module

Term Deposit is a deposit held at a financial institution that has a fixed term. These are generally short-term with maturities ranging anywhere from a month to a few years. When a term deposit is purchased, the lender (the customer) understands that the money can only be withdrawn after the term has ended or by giving a predetermined number of days notice.

15.1 List of TD tables
