Oracle Banking Digital Experience
Connector Credential Store Guide
Release 18.1.0.0.0

Part No. E92727-01

January 2018
# Table of Contents

1. Preface .................................................................................................................. 4  
   1.1 Intended Audience .......................................................................................... 4  
   1.2 Documentation Accessibility ......................................................................... 4  
   1.3 Access to Oracle Support ............................................................................... 4  
   1.4 Structure ........................................................................................................ 4  
   1.5 Related Information Sources ......................................................................... 4  

2. Steps to Create Credential Mapping .................................................................... 5
1. **Preface**

1.1 **Intended Audience**
This document is intended for the following audience:
- Customers
- Partners

1.2 **Documentation Accessibility**

1.3 **Access to Oracle Support**
Oracle customers have access to electronic support through My Oracle Support. For information, visit

1.4 **Structure**
This manual is organized into the following categories:
- **Preface** gives information on the intended audience. It also describes the overall structure of the User Manual.
- **Introduction** provides brief information on the overall functionality covered in the User Manual.
- The subsequent chapters provide information on transactions covered in the User Manual.

Each transaction is explained in the following manner:
- Introduction to the transaction
- Screenshots of the transaction
- The images of screens used in this user manual are for illustrative purpose only, to provide improved understanding of the functionality; actual screens that appear in the application may vary based on selected browser, theme, and mobile devices.
- Procedure containing steps to complete the transaction- The mandatory and conditional fields of the transaction are explained in the procedure.
- If a transaction contains multiple procedures, each procedure is explained. If some functionality is present in many transactions, this functionality is explained separately.

1.5 **Related Information Sources**
For more information on Oracle Banking Digital Experience Release 18.1.0.0.0, refer to the following documents:
- Oracle Banking Digital Experience Licensing Guide
- Oracle Banking Digital Experience Installation Manuals
2. **Steps to Create Credential Mapping**

- In WebLogic, go to Deployments, expand the deployed connector ear and click on Resource Adapter module.

![Deployments Table](image)

Fig.1 Deployed ear com.ofss.digx.app.connector, It has Resource Adapter Module com.ofss.digx.connector.rar

- Screen for Resource Adapter module’s setting will open. Click Security->Outbound Credential Mapping. This will display Outbound Credential Mappings table.
Steps to Create Credential Mapping

Fig. 2 Shows setting for com.ofss.digx.connector.rar

- Click on New. This will display screen to create new security credential map entry. Also it shows Outbound Connection pool table. This table has Outbound Connection pool entry for each connection instance in weblogic-ra.xml in Resource Adapter along with default connection pool.

Fig. 3 Shows Outbound Connection pool table. Fig 3.1 shows corresponding weblogic-ra.xml file
Steps to Create Credential Mapping

Fig.3.1 weblogic-ra.xml

- Select Outbound connection pool to associate the credential map. And click Next. This will show screen to select weblogic server user.

Fig 4. Weblogic server user screen
Steps to Create Credential Mapping

- Select Default User. Selecting ‘Default User’ as WebLogic Server user will configure the user that will be used as the default for any authenticated WebLogic Server user that does not have a credential mapping specifically for them.

- And click Next. Screen to configure username and password will appear. Enter username and password. As DIGX using AES (Advanced Encryption standard) as encryption and decryption algorithm, password must be 16 digit.

Fig 5. User name and password configuration

- Click Finish. The new security credential map entry will be created.
Fig 6. Credential map entry with username as MERCHANT associated with ra/DIGXConnectorMERCHANT connection pool.

- Table digx_fw_config_all_b must have entry with category_id as "CredentialConnector" and prop_value as selected Outbound Connection Pool with JNDI name as prop_id.

E.g. insert into digx_fw_config_all_b (PROP_ID, CATEGORY_ID, PROP_VALUE, FACTORY_SHIPPED_FLAG, PROP_COMMENTS, SUMMARY_TEXT, CREATED_BY, CREATION_DATE, LAST_UPDATED_BY, LAST_UPDATED_DATE, OBJECT_STATUS, OBJECT_VERSION_NUMBER) values ('MERCHANT_RA_JNDIKEY', 'CredentialConnector', 'ra/DIGXConnectorMERCHANT', 'N', 'RA Connector JNDI Names for OFFLINE_CHANNEL', 'RA Connector JNDI Names for MERCHANT', 'ofssuser', SYSDATE, 'ofssuser', SYSDATE, 'Y', 1);
