# 1. Preface

## 1.1 Intended Audience

This document is intended for the following audience:

- Customers
- Partners

## 1.2 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

## 1.3 Access to Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For information, visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

## 1.4 Structure

This manual is organized into the following categories:

*Preface* gives information on the intended audience. It also describes the overall structure of the User Manual.

*Introduction* provides brief information on the overall functionality covered in the User Manual.

The subsequent chapters provide information on transactions covered in the User Manual.

Each transaction is explained in the following manner:

- Introduction to the transaction
- Screenshots of the transaction
- The images of screens used in this user manual are for illustrative purpose only, to provide improved understanding of the functionality; actual screens that appear in the application may vary based on selected browser, theme, and mobile devices.
- Procedure containing steps to complete the transaction- The mandatory and conditional fields of the transaction are explained in the procedure.

If a transaction contains multiple procedures, each procedure is explained. If some functionality is present in many transactions, this functionality is explained separately.

## 1.5 Related Information Sources

For more information on Oracle Banking Digital Experience Release 18.1.0.0.0, refer to the following documents:

- Oracle Banking Digital Experience Licensing Guide
- Oracle Banking Digital Experience Installation Manuals

## 2. Wallets

Today's need of a user is to make fast and easy payment using a hand held device. To know recipient's bank details or entering it while making a payment (or maintaining it) is tedious and time consuming. Payment using a contact number or email id is far more convenient to the user as it is hassle free and requires no maintenance of payment details.

In order to facilitate easy and fast payments for users, a digital channel introduced as 'Wallets'. Wallets will serve easy payments to the recipients just by entering the recipient's email id or mobile number. The bank can serve additional channel for its users for basic banking and a trending way of making payments.

With wallet, user can perform basic banking using a simple and easy to use user interface.

Wallet features includes:

- Wallet Registration
- Wallet Dashboard
- Add funds to wallet
- Wallet Statement
- Pay Funds to another wallet
- Claim funds
- Unclaimed Funds
- Request Funds from your contacts
- Requested Funds
- Profile

[Home](#)

### 3. Wallet Registration

In order to avail wallet and its services, user needs to register for the wallet. The Wallet registration link will be available on the bank portal so that, new user (prospect user) can also access and register for Wallet services.

A prospect user needs to follow wallet registration process which involves a few steps.

Steps involved in wallet registration;

- A verification code will be sent to the user's mobile number entered as the first step of registration.
- User needs to enter the verification code as received.
- On successful authentication, the user needs to enter primary details.
- User needs to enter the unique verification code (OTP) received on email as 'Email Id' verification process and create login credentials to get the registration process completed.
- System authenticates the verification code and allows user to proceed further.
- Once registered, user landed on the wallet dashboard and can start using the wallet.

### 3.1 Wallet Registration - Prospect User

Using this option, user can create and register for digital wallet from the bank portal.

## **FAQs**

### **1. Where can I use my wallet?**

You can use your wallet for:

- Transferring funds to another wallet user
- Making payments
- Requesting funds from another wallet user

### **2. I have entered wrong OTP, how to register for a wallet now**

If you have entered the wrong OTP, you can try providing the correct OTP again. There is also an option available to re-generate the OTP.

[Home](#)

## 4. Wallets Dashboard

Wallet dashboard provides a simple and clean view of the transactions and options available to the customers on wallet. Ease of use is the primary principle of wallet dashboard. Wallet dashboard is more action oriented rather than just showing read-only information.

Wallet dashboard is broadly classified into the below four sections;

- Header
- Transactions
- Payment / Request notifications
- Mini Statement
- Offers

## Dashboard Overview

### Header

It consist of the option to access user profile from which user can access features like change password, unclaimed funds, status of requested funds, profile, login details, logout, etc.

- Any alerts to the user
- Wallet balance along with currency

### Transactions

Standard transactions supported in the wallet are accessible through the transaction section.

Transactions includes;

- Pay (Pay funds to wallet user and non wallet user): Click the card to go to the wallet **Pay** screen.
- Add (add funds into wallet): Click the card to go to the wallet **Add** funds screen.
- Request (request funds from other wallet users): Click the card to go to the wallet **Request** funds screen.

### Payment / Request notifications

Any payment request coming to the user from another wallet will be shown to the user for his action. User can click this button to pay or decline the fund request.

It displays the following details:

- Name: Name of the wallet user who has requested funds
- Description: Description mentioned by wallet user while initiating the fund request
- Amount: Amount requested

### Mini Statement

- Displays the recent financial activities performed by the user. It displays the value date of transaction, description, amount of the transaction and the Dr/Cr indication along with the amount.
- With the view more option, user can navigate to the details statement screen.

### Offers

- Any offers as hosted by the bank will be shown on the wallet dashboard.

---

[Home](#)

## 5. Add

In order to make fund transfers or payments through the wallet, there should be balance available into a wallet. The wallet can be funded using:

- External accounts like credit card, debit card (using payment aggregator)
- Internet banking (same bank account)

Funding wallet from any credit or debit card or using internet banking requires processing the transaction from an aggregator mode.

Using internet banking, a user can fund wallet using his own account available within bank. After a successful authentication, a user can select an account from which the wallet is to be funded. Depending on the transaction status (acknowledgment) from the aggregator, wallet balance is updated.

### How to reach here:

*Wallet Dashboard > Add*

### Add

### Field Description

Field Name	Description
<b>Wallet Balance</b>	Balance in the wallet along with currency.
<b>Amount</b>	Amount to be funded.
<b>Comments</b>	Free text for user to enter any comments/ remarks as desired by the user.

**To fund a wallet:**

1. In the **Amount** field, enter the amount to be funded.
2. In the **Comments** field, enter the appropriate comment.
3. To fund the wallet, click **Add Funds**.
4. The **Review** screen appears which navigates the user to the aggregator page, click **Confirm**.
5. The **Aggregator** screen appears; select either **Credit card / Debit card** or **Internet banking** option.

3. In the **CVV/ CVC** field, enter the CVV/ CVC number written on the back of your card.
4. In the **Card Holder Name** field, enter the name mentioned on the card.
5. Click **Pay Now**.  
The application will get acknowledgment regarding the transaction and money will be credited into user's wallet account.

### **FAQs**

#### **1. Are my funds safe and secure?**

The bank takes financial security and payment regulations very seriously. It strictly ensures the financial security of both the bank and the account holders.

[Home](#)

## 6. Statement

Statement plays an important role for customers to manage and control an account. Similar to any regular saving account, wallets supports activity statements for wallets as well. This Wallet statement shows all the accounting entries that affect the wallet balance. A brief summary of last few transactions can be viewed on the wallet dashboard.

However, there is also an option to view complete statement for the wallet. All transactions performed from wallet are shown in chronological order.

User can use the below filters to narrow the search the result.

- Transaction period
  - Last 10 Transactions
  - Between date range
- Transaction type
  - Debits transactions
  - Credit transactions
  - Debit and Credit transactions

User also has sort option to sort the result basis transaction date.

### How to reach here:

*Wallet Dashboard > Mini Statement > Statement*

---------------	--

**To view the wallet activity:**

1. To view the wallet statements within the specific period, click **Date Range**.  
OR  
Click the other filter to view the transactions based on transaction type.

[Home](#)

## 7. Pay

Paying from wallet is simple and fast. With Wallet, user can pay directly to another wallet user or to a desired contact using the contact's email or mobile number. Wallet smartly identifies whether the email id / mobile number is registered for wallet services or not. If the email id / mobile number are registered for wallet, funds are directly credited into the recipient's wallet.

However, if the recipient is not registered for a wallet, a payment link is sent to the recipient's email id / mobile number. In order to receive funds, the recipient needs to register for wallet within the stipulated time frame. Failing to register for wallet within the time frame will not allow the recipient to receive funds. Funds will be credited back to the sender's wallet.

---

**Note:** The recipient must register for wallet in order to claim funds.

---

### How to reach here:

*Wallet Dashboard > Pay*

### Pay

The screenshot displays the 'PAY' screen of a wallet application. At the top left is a wallet icon, and at the top right is the word 'PAY' in orange. Below this is a teal header bar showing 'Balance : A\$1,000.00'. The main content area is white and contains three input fields: 'Pay Who' with the email 'zartab.x.khalique@oracle.com', 'Amount' with 'A\$500.00', and 'Comments' with 'pay to Zartab'. Below the comments field, it says '27 characters left'. At the bottom center is an orange button labeled 'PAY' with a white right-pointing arrow. A red arrow on the left side of the screen points towards the 'Pay Who' field.

## Field Description

Field Name	Description
<b>Wallet balance</b>	Wallet balance along with the currency.
<b>Pay Who</b>	Recipient information that can be email id or mobile number.
<b>Amount</b>	The amount to be transferred.
<b>Comments</b>	Free text for user to enter any comments/ remarks as desired by the user.

### To pay from your wallet:

1. In the **Pay Who** field, enter the email id or mobile number of the recipient.
2. In the **Amount** field, enter the amount to be transferred.
3. In the **Comments** field, enter the appropriate comment.
4. Click **Pay**.
5. The **Review** screen appears. Verify the details and click **Confirm**.  
OR  
Click **Cancel** to cancel the transaction.
6. The **Verification** screen appears. For more information click [here](#).
7. Click **Continue**.
8. The success message appears, along with the reference number. Click **Done** to complete the transaction.

### Note:

- 1) In case of payment to a mobile number or email id, the payment will follow the Peer to Peer payment mode in the background.
- 2) In case of payment to an internal bank account, the payment will follow regular Internal transfer mode in the background.

## FAQs

### 1. How will a non-registered recipient receive or retrieve the money sent by me from the wallet?

To receive money sent by you, the recipient has to register for the wallet facility.

### 2. What If recipient does not claim money?

If the recipient does not claim money within the stipulated time period, your money is transferred back to your wallet.

[Home](#)

## 8. Claim Money - Prospect User

A user can transfer the funds from wallet to any contact via an email id or a mobile number. In order for a recipient to claim these funds, recipient needs to have a wallet. If the recipient does not have a wallet, recipient needs to register for wallet to claim funds. Recipient needs to access the wallet registration link sent by the sender to register for wallet.

Recipient of the amount can be a registered user of the bank or can be a new user.

- In either case, recipient needs to register for wallet.
- Post successful registration, money will be credited directly into the user's wallet account. Wallet balance will be shown to the user.

---

**Note:** The recipient must register for wallet in order to claim funds.

## 10. Request

With Wallet, user has the option to request funds from another wallet that is, from another user using the wallet. There are scenarios / situation, when a user may require funds or request funds from his desired contact.

User requests funds from the desired contact using the contact's email id or mobile number. User needs to select the desired contact or enter the desired email id or mobile number and specify the funding amount to initiate the request for funds. However, it is necessary for the contact (owner of email id or mobile number) to have registered for wallet services.

The application identifies whether the email id or mobile number is registered for the wallet. If registered, the request is honored else the initiation is not permitted.

### How to reach here:

*Wallet Dashboard > Request*

### Request

The screenshot shows a mobile application interface for sending a request. At the top left is a circular icon with a white wallet symbol on a teal background. The word "REQUEST" is displayed in orange at the top right. Below this is a teal header bar with the text "Balance : A\$0.00". The main content area is white and contains three input fields: "From" with the email "zartab.x.khalique@oracle.com", "Amount" with "A\$1,000.00", and "Comments" with "Please lend me some money". Below the comments field, it says "15 characters left". At the bottom is an orange button with the text "SEND REQUEST" and a right-pointing arrow. A teal sidebar on the left contains a red left-pointing arrow.

## Field Description

### Field Name Description

---

<b>Balance</b>	Wallet balance along with the currency.
<b>From</b>	Email id or mobile number of the wallet user from whom the money is to be requested.
<b>Amount</b>	Amount requested.
<b>Comments</b>	Free text for user to enter any comments/ remarks as desired by the user.

---

#### To request from the contact:

1. In the **From** field, enter the email id/ mobile number of the contact.
2. In the **Amount** field, enter the amount to be funded.
3. In the **Comments** field, enter the appropriate comment.
4. To request for funds from the contact, click **Send Request**.
5. The **Review** screen appears. Verify the details and click **Confirm**.
6. A notification is sent to the contact person, about the request to fund the user's wallet. Click **Done** to complete the transaction.

---

**Note:** A payment card appears at the recipient dashboard. The recipient can either click **Pay** or **Decline** to pay or decline the fund request.

---

## 13. Change Password

With wallet, user has an option to change his login password. User needs to type an old password followed by a new password as indicated, and then type the new password again to confirm it. On validating the password with the password policy successfully, the new password will get updated in the application.

### How to reach here:

Upper right corner icon > Change Password

### Change Password

The screenshot shows a 'CHANGE PASSWORD' form with a teal header bar. The form contains three input fields: 'Old Password', 'New Password', and 'Confirm New Password'. Each field has a label in teal and a masked input area with seven dots. A teal question mark icon is positioned to the right of the 'New Password' field. Below the input fields is a large orange 'SUBMIT' button with a white right-pointing arrow, and a smaller orange 'CANCEL' button below it.

**Field Description**

<b>Field Name</b>	<b>Description</b>
<b>Old Password</b>	Old login password for wallet access.
<b>New Password</b>	New password for wallet access.
<b>Confirm New Password</b>	Re-enter the new password to confirm.

**To change the password:**

1. In the **Old Password** field, enter the password.
2. In the **New Password** field, enter the password.  
OR  
Click  to view the password policy.
3. In the **Confirm New Password** field, re-enter the password.
4. Click **Submit**.  
OR  
Click **Cancel** to cancel the transaction.
5. The success message of changing the password appears. Click **Done** on confirmation screen to log in to the application.

**FAQs****1. Why do I need to change my password?**

You need to change your password in order to ensure the security of your wallet account. Sometimes the application prompts you to do so or when you believe that someone else had access to it or has broken into your account.

## 18. One Time Password

One Time Password is a unique code that can be used only once. It is mandatory, if configured. A verification code is sent to your registered mobile number or email ID of the account holder. You have to enter the received code to complete the process. You can use Resend Code, to receive the code (if not received or expired).

### For OTP verification:

1. In the **Verification Code** field, enter the code as received.  
OR  
Click **Resend Code**, if you wish to receive the verification code again or your verification code got expired.

### OTP Mobile Verification

### Field Description

Field Name	Description
Verification Code	The code sent to the customer to their registered email id or mobile number.

2. Click **Submit**. The success message appears.

## **FAQs**

**1. Why is there a need for a One-Time Password (OTP)?**

An OTP helps to protect against online fraud. It is a secure way to authenticate whether a customer who is making an online transaction is the rightful owner of the credit / debit card being used.

**2. When do I key in the OTP and how do I receive the OTP?**

When you make an online transaction using your credit/ debit card, an OTP will be sent to your mobile phone via SMS or email.
