### Preface

This document provides step-by-step instructions to install the Oracle Financial Services Data Foundation (OFSDF) Application Pack 8.0.2.0.0 Minor Release.

This chapter discusses the following topics:

- [Summary](#)
- [Audience](#)
- [Prerequisites for the Audience](#)
- [How this Guide is organized](#)
- [Recommended Environment](#)
- [Related Documents](#)
- [Conventions and Acronyms](#)

### Summary

You can find the latest copy of this document in [OTN library](#) which includes all the recent additions/revisions (if any) done till date.

Before you begin the installation, ensure that you have access to the Oracle Support Portal with the required login credentials to quickly notify us of any issues at any stage. You can obtain the login credentials by contacting Oracle Support.

### Audience

OFSDF Application Pack Installation Guide is intended for Administrators, Business User, Strategists, and Data Analyst, who are responsible for installing and maintaining the application pack components.

### Prerequisites for the Audience

The document assumes that you have experience in installing Enterprise components and basic knowledge about the following is recommended.

The following are the expected preparations from the administrator before starting the actual installation:

- Oracle Financial Services Data Foundation pack components
- OFSAA Architecture
- UNIX Commands
- Database Concepts

- Web Server/ Web Application Server

### How this Guide is organised

The OFSDF Application Pack Installation Guide includes the following topics:

- [OFSDF Application Pack Release 8.0.2.0.0](#)
- [Appendix A](#)

### Recommended Environment

Infrastructure application has been tested with Microsoft Internet Explorer™ browser. For best viewing of Infrastructure pages, set the screen resolution to a minimum resolution of 1024 x 768 pixels.

### Access to Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

### Related Documents

For more information, refer the OFSDF Application Pack 8.0.2.0.0 documents available in the [OTN](#) documentation library.

- Oracle Financial Services Data Foundation User Guide Release 8.0.2.0.0
  - Oracle Financial Services Analytical Applications Infrastructure User Guide ([OTN documentation library](#))
  - Oracle Financial Services Analytical Applications Infrastructure Installation Guide

### Conventions and Acronyms

Conventions	Description
Actions are indicated in <b>Bold</b> .	
Command or query is indicated in <code>Courier New font</code> .	
AIX	Advanced Interactive eXecutive
OFS AAI	Oracle Financial Services Analytical Applications Infrastructure
OFSDF	Oracle Financial Services Data Foundation
OFS_BFND_PACK	Oracle Financial Services Data Foundation Application Pack

Conventions	Description
RHEL	Red Hat Enterprise Linux
ML	Maintenance Level
Atomic Schema	Database schema where the application data model is uploaded.
Config Schema	Database schema which contains setup related configurations and metadata.
GA	General Availability

# 1 OFS Data Foundation Application Pack Minor Release 8.0.2.0.0

This Minor Release of OFS Data Foundation Application Pack is cumulative and includes all enhancements and bug fixes done since the OFSDF Application Pack v8.0.0.0.0 release.

---

**NOTE:** The schema / domain for FSDF are referred to as BFND.

---

## 1.1 Pre Installation Requirements

- You should have OFSDF Application Pack version 8.0.0.0.0 as the minimum patch set level.
- Download the consolidated one-off patch **25777667** from [My Oracle Support](#).

---

**NOTE:** You can refer to [Technology Matrix](#), for Hardware and Software Requirements.

---

## 1.2 Downloading the Software

Refer to the following instructions to download and extract the release.

1. Login to <https://support.oracle.com/> and search for Bug# **22304119** under the *Patches & Updates* tab.
2. Download the OFSDF Application Pack v8.0.2.0.0 archive file and copy it to your OFSAA server in **Binary** mode.

---

**NOTE:** The archive files are different for different operating system like AIX, Solaris, and Oracle Linux.

---

3. If you have Unzip utility, skip to the next step. Download the Unzip utility (OS specific) **unzip\_<os>.Z** and copy it in **Binary** mode to the directory that is included in your PATH variable, typically **\$HOME** path or directory in which you have copied the 8.0.2.0.0 installer.

- Uncompress the unzip installer file using the command:

```
uncompress unzip_<os>.Z
```

---

**NOTE:** In case, you notice an error message “**uncompress: not found [No such file or directory]**” when the package is not installed, contact your UNIX administrator.

---

- Give EXECUTE permission to the file using the command:

```
chmod 751 OFSBFND_80200_<OperatingSystem>.zip.
```

4. Extract the contents of the 8.0.2.0.0 archive file using the command:

```
unzip_<os> -a <name of the file to be unzipped>
```

---

**NOTE:** Rename or remove the existing OFSAA Application Pack folder from the OFSAA server prior to extracting the contents from the release archive (.zip). For example: For this release when extracted from the archive creates a folder with name `OFS_BFND_PACK`. Rename or remove if a folder with the same name exists in the path where the release archive is copied.

---

---

**NOTE:** The above “-a” option is mandatory to unzip the archive file. For example:

```
unzip_aix -a OFSBFND_80200_<OperatingSystem>.zip
```

---

### 1.3 Pre Installation Activities

The configuration file (`Params.conf`) should be updated before triggering the installation. `Params.conf` file is available in the path `/OFS_BFND_PACK/OFS_BFND/conf`

Following are the input parameters for `Params.conf` file:

**Model Upload Process: Input values required are 0/1**

- **0** indicates Skip Model Upload process
- **1** indicates Trigger Model Upload process

If the value is **1**, then next option is to choose the option of type of Model upload

- **0** indicates Released Data Model
- **1** indicates Customized Data Model

If the value is **1**, then provide the inputs for Data Model name and the path of Data Model.

---

**NOTE:** If you have selected Released Data Model, model upload will be performed during installation. While upgrading from 8.0 to 8.0.2 or 8.0.1 to 8.0.2, in case the model upload fails due to any database issues, run the script file [OFS\\_BFND\\_Rollback.sql](#) manually in atomic schema before retriggering the installer.

---

### 1.4 How to Apply This Minor Release?

#### 1.4.1 Installing OFS Data Foundation Application Pack

Refer to the following instructions to install and configure the release.

1. Login to the server where OFSAA is installed.

---

**NOTE:** Modify the X\_ARGS\_APP variable in the `.profile` file to customize the Java memory settings for model upload based on the data model size. The recommended value for Xmx size is 10 times that of the data model size.

---

2. Execute the following command:

```
chmod -R 750 $FIC_HOME
```

3. Shut down all the OFSAAI Services. For more information, refer to the *Start/Stop Infrastructure Services* section in Oracle Financial Services Data Foundation Installation Manual Release 8.0 Java 7 and Java 8 in [OTN](#) documentation library.
4. Complete the [Pre Installation Activities](#) before installing the software.
5. Give EXECUTE permission to the minor release archive file. Navigate to OFS\_BFND\_PACK directory and execute the command:

```
chmod 750 OFSAAIUpdate.sh
```

6. Execute **OFSAAIUpdate.sh** file using the following command.

```
./OFSAAIUpdate.sh
```

Verify if the release is applied successfully by checking the log file generated in the installation folder. Logs can be found in `/OFS_BFND_PACK/logs` and `/OFS_BFND_PACK/OFS_BFND/logs` folder.

You can ignore ORA-00001, ORA-00955, ORA-02260, and ORA-01430 errors in the log file. In case of any other errors, contact Oracle Support.

7. For more information on securing your OFSAA Infrastructure, refer to the Security Guide in [OTN Library](#).
8. After successful installation, perform the these steps:
  - Clear the application cache. Navigate to the following path depending on the configured web application server and delete the files.
  - **Tomcat:**

```
<Tomcat installation
folder>/work/Catalina/localhost/<Application
name>/org/apache/jsp
```
  - **WebLogic:**

```
<Weblogic installation location>/domains/<Domain
name>/servers/<Server name>/tmp/_WL_user/<Application
name>/<auto generated folder>/jsp_servlet
```

▪ **WebSphere:**

```
<Websphere installation
directory>/AppServer/profiles/<Profile name>/temp/<Node
name>/server1/<Application name>/<.war file name>
```

9. Add umask 0027 in the `.profile` of the UNIX account which manages the WEB server to ensure restricted access permissions.
10. Perform the necessary additional configuration as mentioned in [Additional Configurations](#) section.
11. Install the one-off patch **25777667**. For more details, refer the Read Me available with the patch.
12. Generate the application EAR/WAR file and redeploy the application onto your configured web application server. For more information on generating and deploying EAR / WAR file, refer to the *Post Installation Configuration* section in Oracle Financial Services Data Foundation Installation Manual Release 8.0 Java 7 and Java 8 in [OTN](#) documentation library.
13. After the successful installation of the release, restart all the OFSAAI services. For more information, refer to the *Start/Stop Infrastructure Services* section in Oracle Financial Services Data Foundation Installation Manual Release 8.0 Java 7 and Java 8 in [OTN](#) documentation library.
14. To view the new seeded Batches in Batch Maintenance Menu, change the ownership of the batches. For more information, refer to the Change ICC Batch Ownership section in Oracle Financial Services Data Foundation Installation Manual Release 8.0 Java 7 and Java 8 in [OTN](#) documentation library.
15. Download the patch **22755805** from MOS and apply the same to initialize a batch using `InitializeBatch.sh` with External Scheduler (ES) utility.

## Appendix A

### Frequently Asked Questions

#### What checks does the 8.0.2.0.0 Release patch perform?

- Environment Check- As part of environment check, it performs Java validation, Environment Variables validation, OS specific validation, DB specific validation, and it shuts down all OFSAAI Services (Infrastructure Server, ICC Server, and back-end services).
- Post Install check- As part of Post install check, it checks if OFSAAI services can be successfully started.

#### Which version of ERwin Data Modeler does OFSAAI support?

OFSAAI now supports ERwin version 9.2 and 9.5 generated xmls in addition to ERwin 4.1, ERwin 7.1, ERwin 7.3, and ERwin 9.0 formats.

#### What should I do for viewing the log files in Debug level for troubleshooting?

By default, the log level is set as INFO. You need to manually change it to Debug to view the log files in debug level. Based on your requirement, you can change the log level to Warn, Error, or Fatal as well.

1. Navigate to `$FIC_HOME/conf` in the APP layer of your OFSAAI installation.
  - Change the **priority value** to **Debug** in the `RevLog4jConfig.xml` file.

For example:

```
<root>
  <priority value ="debug" />
  <appender-ref ref="ConsoleAppender1"/>
</root>
```

- Change the value of **LOGGERLEVEL** in the `DynamicServices.xml` file from **20** to **0**. (**20** is the value for Info and **0** for Debug.)

---

**NOTE:** For multi-tier installation, you need to change the log level to Debug in the `DynamicServices.xml` and `RevLog4jConfig.xml` files, which are present in `$FIC_APP_HOME/conf`, `$FIC_DB_HOME/conf`, and `$FIC_WEB_HOME/conf` as well.

---

2. Navigate to `$FIC_WEB_HOME/webroot/conf` and change the **priority value** to **Debug** in the `ExportLog4jConfig.xml`, `MDBLogger.xml`, and `PR2Logger.xml` files for viewing log files in Debug level for the modules Archive/Restore, Metadata Browser and RRF respectively.

3. Generate the application EAR/WAR file and redeploy the application onto your configured web application server. For more information on generating and deploying EAR / WAR file, refer to the *Post Installation Configuration* section in Oracle Financial Services Data Foundation Installation Manual Release 8.0 Java 7 and Java 8 in [OTN](#) documentation library.
4. Restart the OFSAAI Services (APP and WEB). For more information, refer to the *Start/Stop Infrastructure Services* section in Oracle Financial Services Data Foundation Installation Manual Release 8.0 Java 7 and Java 8 in [OTN](#) documentation library.
