1 Preface

This Preface provides supporting information for the Oracle Insurance Data Foundation Application Pack Release Notes and includes the following topics:

- [Overview of OFSAA](#)
- [Purpose of This Document](#)
- [Intended Audience](#)
- [Access to Oracle Support](#)
- [Related Documents](#)

1.1 Overview of OFSAA

In today's turbulent markets, financial institutions require a better understanding of their risk-return, while strengthening competitive advantage and enhancing long-term customer value. Oracle Financial Services Analytical Applications (OFSAA) enable financial institutions to measure and meet risk adjusted performance objectives, cultivate a Risk Management culture through transparency, lower the costs of compliance and regulation, and improve insight into customer behavior.

OFSAA uses industry-leading analytical methods, shared data model and applications architecture to enable Integrated Risk Management, Performance Management, Customer Insight, and Compliance Management. OFSAA actively incorporates risk into decision making, enables to achieve a consistent view of performance, promote a transparent risk management culture, and provide pervasive intelligence.

Oracle Financial Services Analytical Applications delivers a comprehensive, integrated suite of financial services analytical applications for both banking and insurance domain.

1.2 Purpose of this Document

This document contains release information for Oracle Insurance Data Foundation Application Pack (OIDF).

1.3 Intended Audience

This document is intended for users of Oracle Insurance Data Foundation Application Pack.

1.4 Access to Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info>

OR visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

1.5 Related Documents

This section identifies additional documents related to ODF Application 8.0.8.2.0. You can access Oracle Documentation online from the Documentation Library.

- [Oracle Insurance Data Foundation Installation Guide Release 8.0.8.2.0](#)
- [Oracle Financial Services Analytical Applications Technology Matrix](#)

2 Introduction to Oracle Insurance Data Foundation Application Pack

The Oracle Insurance Data Foundation (OIDF) is an analytical data warehouse platform for the Financial Services industry. OIDF combines an industry data model for Financial Services along with a set of management and infrastructure tools that allows Financial Services Institutions to develop, deploy, and operate analytical solutions spanning key functional areas in Financial Services, including:

- Health Insurance
- Property Casualty
- Life Insurance

OIDF is a comprehensive data management platform that helps institutions to manage the analytical data life cycle from sourcing to Reporting and Business Intelligence or BI using a unified, consistent platform and toolset.

2.1 Components of OIDF

OIDF consists of the following components, which are described in additional detail in the following sections:

- **OIDF Analytical Warehouse Data Model:** A Physical Data Model that supports data sourcing and reporting related to key analytical use cases in the Insurance industry. The Warehouse Model is a physical data model, unlike the OIDF LDM, meaning that it is readily deployable, and consists of database object definitions, and additional supporting scripts. It is organized into two distinct sets of tables based on purpose:
 - The Staging Model, which facilitates data sourcing from the Insurance provider's internal operational systems such as Policy systems, Claims systems, Fund Management, and so on.
 - The Reporting Model, which facilitates the storage of outputs from analytical tools, applications, and engines in a manner that is conducive to BI Reporting.

The Warehouse Model is typically deployed into production via a set of management tools called the Oracle Financial Services Analytical Application Infrastructure (OFSAAI). The AAI is a separate product, and is a prerequisite for OIDF (see Infrastructure).

- **Supporting Scripts:** As part of the OIDF Package, there are additionally a number of scripts provided for basic operations such as internal data movement between the Staging and Reporting areas.

Oracle Insurance Data Foundation Application Pack v8.0.8.2.0 ML Release is cumulative of all enhancements and bug fixes done since v8.0.8.0.0 release.

Patch **34431959** - ORACLE INSURANCE DATA FOUNDATION PACK 8.0.8.2.0 ML RELEASE.

Oracle Insurance Data Foundation Applications Pack is a separately licensed product.

ATTENTION Refer to [My Oracle Support](#) - Doc ID [2890601.1](#) and install the appropriate compatibility patches based on your applications installed.

This chapter includes the following topics:

- [New Features](#)
- [Prerequisites](#)
- [How to Apply this Maintenance Level Release?](#)
- [List of Bugs Fixed in This Release](#)
- [Known Issue or Limitations](#)

2.2 New Features

There are no new features as part of this release.

2.3 Prerequisites

The prerequisite software that must be installed for this release are:

- Minimum patch set required for Oracle Insurance Data Foundation Applications Pack ML Release 8.0.8.2.0 are:
 - Oracle Insurance Data Foundation Application Pack v8.0.8.0.0 Minor Release Patch **29888073**.
 - Oracle Financial Services AAI Application Pack v8.0.8.0.2 One-off Release Patch **29952285**.
 - The additional software that must be installed to access and use Data Domain Browser for ODF Application is:
 - Oracle Financial Services Data Integration (OFS DI) Application Pack v8.0.7.2.0 ML Release Patch **30268362**.

2.4 How to Apply this Maintenance Level Release?

For detailed instructions on installing this Maintenance Level Release, refer to [Oracle Insurance Data Foundation Application Pack Installation Guide Release 8.0.8.2.0](#) in OHC.

NOTE

- This release patch is applicable only for the RDBMS installation.
- This patch installation has taken approximately 1 hour to complete in Oracle Test Labs.

2.5 List of Bugs Fixed in this Release

There are no bug fixes as part of Oracle Insurance Data Foundation Application Pack Release 8.0.8.2.0.

2.6 **Known Issues or Limitations**

The Known Issues or Limitation in Oracle Insurance Data Foundation Application Pack 8.0.8.2.0 is the enhancements due to development of the table FSI_INTRA_COMPANY_POLICY, which impacts run enabled result tables, will be completed in future release. Intra Company flag update was completed in the release 8.0.8.0.0.

3 **Hardware or Software Tech Stack Details**

The hardware or software combinations required for Oracle Insurance Data Foundation Application Pack Release 8.0.8.0.0 are available at [OFS Analytical Application Technology Matrix](#).

4 Licensing Information

For details on the third party software tool used, see [OFSAA Licensing Information User Manual Release 8.0.8.0.0](#).

OFSAA Support

Raise a Service Request (SR) in [My Oracle Support \(MOS\)](#) for queries related to the OFSAA Applications.

Send Us Your Comments

Oracle welcomes your comments and suggestions on the quality and usefulness of this publication. Your input is an important part of the information used for revision.

- Did you find any errors?
- Is the information clearly presented?
- Do you need more information? If so, where?
- Are the examples correct? Do you need more examples?
- What features did you like most about this manual?

If you find any errors or have any other suggestions for improvement, indicate the title and part number of the documentation along with the chapter or section or page number (if available) and contact the My Oracle Support.

Before sending us your comments, you might like to ensure that you have the latest version of the document wherein any of your concerns have already been addressed. You can access the My Oracle Support site that has all the revised or recently released documents.
