# Release Notes Version 11.0.2

**The purpose of this document is to:**

Introduce Oracle Insurance Data Exchange (OIDX) Release 11.0.2

## Oracle Insurance Data Exchange

Oracle Insurance is proud to introduce Oracle Insurance Data Exchange (OIDX), a B2B data hub that provides secure real time data aggregation, data transformation, and data routing services of insurance policy data between insurance carriers, agencies/agents, and service providers. OIDX components include: AdminView, QuickView, Identity Manager, and the core engine.

- AdminView is a web-based application that is the administrative part of the Oracle Insurance Data Exchange (OIDX) product. It allows OIDX administrators to configure parties, party services, endpoints, and party contract mapping using the AdminView application. Key highlights of AdminView include the ability to define sender and receiver parties, create and manage contracts.

- QuickView is a web-based application that allows users to view real-time policy details processed by Oracle Insurance Data Exchange (OIDX). Key highlights for QuickView include the ability to search policies and view policy status and details.

- Oracle Identity Manager is a multi-tenant web application that allows clients to set-up and maintain their user accounts, user privileges and access rights

OIDX is a cloud solution that can be used when regulatory restrictions require secure data routing. There are multiple data access and transmission options, and pre-defined validation rules for both web-service and FTP requests.

## Key Highlights

- PGP digital signature support for file protection, integrity and non-repudiation
- Batch result file handling and encryption
- Sender / Receiver integration (contract) validation
- QuickView UI application to view policy details
- Support for Oracle Fusion Middleware 12.2.1.3
- Support for Oracle DB 19c
