Parameter	Description
Function	FN_GET_RTGS_RECEIVER
No of Parameters	7
Function Call Id	1
Cluster/Custom Function Name	FN_GET_RTGS_RECEIVER
Additional parameters	l_tb_cluster_data
Sent to Extensible layer	None
Received from Extensible layer	None
Hook Description	Hook provided to support changes in fedwire fund service (rtgs)
Description	Hook provided to support changes in fedwire fund service (rtgs) All parameters received by kernel function are passed to the cluster hook. Additional parameters passed to cluster hook are mentioned in field "Additional Parameters". The variables mentioned in "Sent to Extensible Layer" field are passed to cluster hook. The variables mentioned in "Received from Extensible Layer" field are reassigned to kernel.
Bug No	18804641

Parameter	Description
Function	FN_INSERT
No of Parameters	7
Function Call Id	1
Cluster/Custom Function Name	FN_INSERT
Additional parameters	l_tb_cluster_data
Sent to Extensible layer	None
Received from Extensible layer	None
Hook Description	Hook Provided for a functional capability enhancement to use SWIFT-RUR6 standards for processing financial notifications considering rules of Russian Payment system in order to perform settlements in Russian rubble (RUB).
Description	Hook Provided for a functional capability enhancement to use SWIFT-RUR6 standards for processing financial notifications considering rules of Russian Payment system in order to perform settlements in Russian rubble (RUB). All parameters received by kernel function are passed to the cluster hook. Additional parameters passed to cluster hook are mentioned in field "Additional Parameters". The variables mentioned in "Sent to Extensible Layer" field are passed to cluster hook. The variables mentioned in "Received from Extensible Layer" field are reassigned to kernel.
Bug No	20125470

ORACLE®

Parameter	Description
Function	FN_MT101
No of Parameters	4
Function Call Id	1
Cluster/Custom Function Name	FN_MT101
Additional parameters	l_tb_cluster_data
Sent to Extensible layer	None
Received from Extensible layer	None
Hook Description	Hook Provided

Description	Hook Provided
	
	  All parameters received by kernel function are passed to the cluster hook.
	    Additional parameters passed to cluster hook are mentioned in field "Additional Parameters".
	    The variables mentioned in "Sent to Extensible Layer" field are passed to cluster hook.
	    The variables mentioned in "Received from Extensible Layer" field are reassigned to kernel.

Bug No	17861835

Parameter	Description
Function	FN_MT102
No of Parameters	3
Function Call Id	1
Cluster/Custom Function Name	FN_MT102
Additional parameters	l_tb_cluster_data
Sent to Extensible layer	l_Tb_Cluster_Data(l_recvcorr_flag)
Received from Extensible layer	l_Tb_Cluster_Data(l_recvcorr_flag)
Hook Description	Hook Provided for a functional capability enhancement to use SWIFT-RUR6 standards for processing financial notifications considering rules of Russian Payment system in order to perform settlements

Description	Hook Provided for a functional capability enhancement to use
	SWIFT-RUR6 standards for processing financial notifications
	considering rules of Russian Payment system in order to
	perform settlements
	  All parameters received by kernel function are passed to the cluster hook.
	    Additional parameters passed to cluster hook are mentioned in field "Additional Parameters".
	    The variables mentioned in "Sent to Extensible Layer" field are passed to cluster hook.
	    The variables mentioned in "Received from Extensible Layer" field are reassigned to kernel.

Bug No	20125470

Parameter	Description
Function	FN_MT102
No of Parameters	3

ORACLE®

Function Call Id	2
Cluster/Custom Function Name	FN_MT102
Additional parameters	l_tb_cluster_data
Sent to Extensible layer	None
Received from Extensible layer	None
Hook Description	Hook Provided for a functional capability enhancement to use SWIFT-RUR6 standards for processing financial notifications considering rules of Russian Payment system in order to perform settlements

Description	Hook Provided for a functional capability enhancement to use SWIFT-RUR6 standards for processing financial notifications considering rules of Russian Payment system in order to perform settlements
	
	All parameters received by kernel function are passed to the cluster hook.
	   Additional parameters passed to cluster hook are mentioned in field "Additional Parameters".

Parameter	Description
Function	FN_MT202
No of Parameters	4
Function Call Id	7
Cluster/Custom Function Name	FN_MT202
Additional parameters	l_tb_cluster_data
Sent to Extensible layer	l_Tb_Cluster_Data(32A)
Received from Extensible layer	l_Tb_Cluster_Data(32A)
Hook Description	Corrected code to display System generated MT202 cover
	with incomplete message details

ORACLE®

Description	Corrected code to display System generated MT202 cover with incomplete message details. All parameters received by kernel function are passed to the cluster hook. Additional parameters passed to cluster hook are mentioned in field "Additional Parameters". The variables mentioned in "Sent to Extensible Layer" field are passed to cluster hook. The variables mentioned in "Received from Extensible Layer" field are reassigned to kernel.
Bug No	18730087

Parameter	Description
Function	FN_MT202
No of Parameters	4
Function Call Id	8
Cluster/Custom Function Name	FN_MT202
Additional parameters	l_tb_cluster_data
Sent to Extensible layer	None
Received from Extensible layer	None
Hook Description	Hook Provided for generating new reference number and that should be populated into user reference number during new /copy action for FTDTRONL
