1. Oracle FLEXCUBE Investor Servicing Solutions

This document describes step to install FCIS application into weblogic server in remote deployment option

1.1 FCIS Application Remote Deployment

1. Launch Oracle FLEXCUBE Investor Servicing Installer.

Enter the following details

JDK Path

Provide Home folder path of JDK1.8

Oracle Home

Provide home folder path of Oracle Client or Database

Application Server Home

Provide home folder path of Application Server

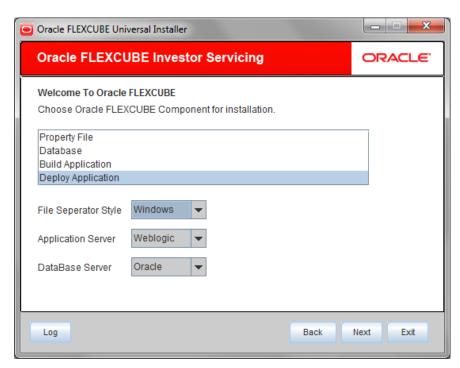

Application Server Location

Select location of the application server as Remote

2. Click on 'Next' and the following screen is displayed:

- 3. Select 'Oracle FLEXCUBE Investor Servicing'.
- 4. Click 'Next' and the following screen is displayed:

5. Select 'Deploy Application'.

6. Specify the following details:

Release

Select the release in which you are installing the FCIS application. Select the appropriate one from the adjoining drop-down list.

Server's Operating System

Select the server's operating system in which you are installing the FCIS application. Select the appropriate one from the adjoining drop-down list.

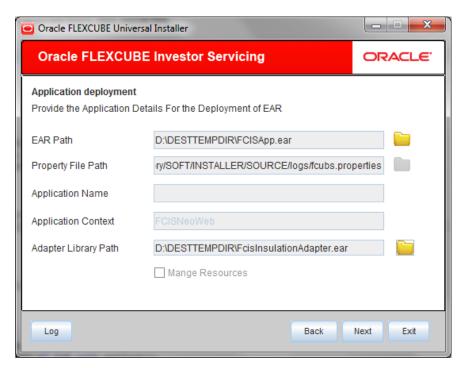

Application Server

Select 'Weblogic' from the adjoining drop down list.

Database Server

Select the database server in which you are installing the FCIS application. Select the appropriate one from the adjoining drop-down list.

7. Once you have specified all the details, click 'Next' and the following screen is displayed:

8. Specify the following details:

EAR Path

Specify the location of FCIS ear file. You can use the directory button to browse and select the directory.

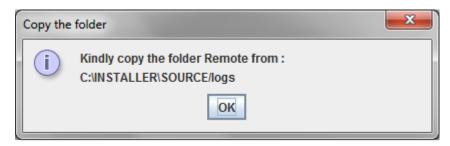

The Application EAR path cannot be copied and pasted on to the text box, thereby demanding the use of the browse button to the select the EAR.

Property File Path

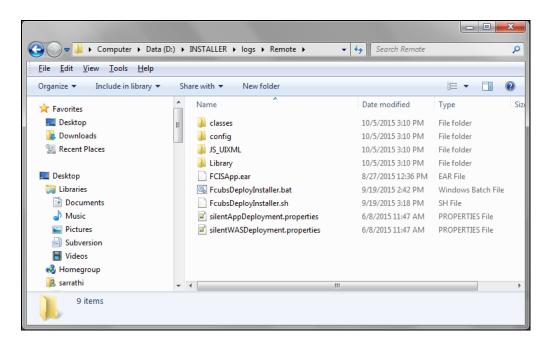

If the property file is internal to the application EAR, it gets displayed here on selection of EAR path. If the property file is external, specify the location. You can use the directory button to browser and select the directory.

Below three fields are disabled in remote application server option.

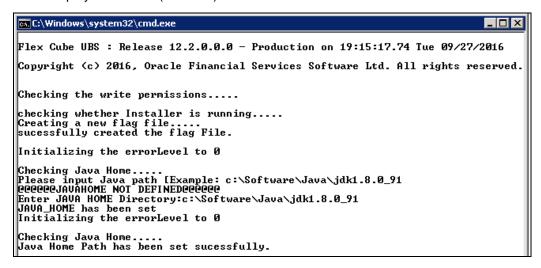

- Application Name
- Application Context
- Manage Resources
- 9. Click 'Next' and wait few seconds for installer to prepare the files for remote deployment. The following message is dispayed once the prepration is successful.

10. Please copy the files from the location (Remote folder) shown in message box and place in the machine where the target application server is installed. The content of the remote folder looks as below

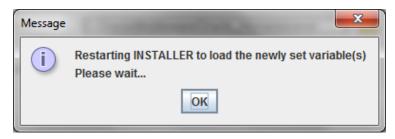

Launch the Deployer by double cllicking FcubsDeployInstaller.bat (windows OS) or FcubsDeployInstaller.sh (linux OS)

11. Enter JAVA Home, Oracle Home, and Application Server Home and Server location when prompted. The installer will get launched and it will show below screen.

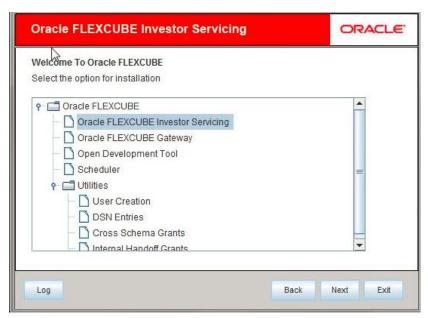

12. Click 'Next'

13. The above message will be displayed. Click Ok to restart the installer.

14. Click Next

From this step onwards refer appropriate deployment document as per application server and FCIS component

For example:

If your appserver is webpshere and application is Gateway then refer the document "Gateway Application Deployment Websphere"

Note: EAR file will be under Remote directory itself, this should be selected for deployment.
