Custom RAD Extensibility Maintenance Screens Oracle Banking Payments Release 14.%0.0.0 [A Upp[2018]

1	Preface	.3
2	Approach	.4

# 1 Preface

•

This document is a step by step guide to demonstrate how to make additions to an existing Maintenance screen/function Id.

## 2 Approach

For demo purpose, we will be taking a Maintenance screen: PMDHSTPR (Host Parameters). We will create a demo table, add it to the RAD with 3 fields and then Save/query the record.

## Select Options -> User Preferences

# Select the function generation

### Select the RAD file to be uploaded (Using PWDOTONL for Demo purpose)

## Creating a new table for Demo purpose- CUSTOM\_TEST:

PL/SQL Developer - FCUBSOTHER	ERSBOCL - (SQL Window - DROP TABLE CUSTOM, TEST; create table CUSTOM, TEST; RELD1 VARCHAR2;105 CHARI; HELD2 VARCHAR2;105]

Points to note:

- 1. Here Field1 is used only for mapping with parent table. It must be part of Data Block and a fieldset (although it could be made invisible, but it has to be present in one of the fieldsets).
- 2. Relationship given:

```
STTMS_HOST_PARAM.HOST_CODE=CUSTOM_TEST.FIELD1
```

Added new Data Block- CUSTOM\_TEST and then added three fields to it- Field1 (PK field, and to be used for entity/table mapping), Field2 and Field3. Make sure the PK is mentioned in Block PK fields.

Field2 and Field3 are visible, Field1 is made invisible.

Created a new Field set FST\_CUSTOM\_TEST and added all the three fields to it. Added it in the Body section.

Points to Note:

- 1. The generated artifacts need to be added to the project.
- 2. Common Files and Entity files will replace existing kernel files. Others will be of different names, e.g., HstParamCustomSys.java (instead of HstParamSys.java as in case of Kernel files).
- 3. These files extend kernel files, and hence all kernel functionality would be retained and additional code can be added in these Custom files as need be.
- 4. Please note that any additional business logic/validations can be added in Added in Custom.java file (for example, in this case, HstParamCustom.java).
