2. Oracle FLEXCUBE Information Server

2.1 Introduction

Oracle FLEXCUBE Information system provides for flexible enterprise reporting that helps improved decision making. The Oracle FLEXCUBE Information Server collects the data stored in Oracle FLEXCUBE and generates reports.

You can use the Oracle FLEXCUBE Information Server for monitoring your business performance closely. With the reports generated using Oracle FLEXCUBE Information Server, you can have a vivid view of the problems in the business environment and identify the areas that require attention. You can also analyse the new business opportunities and trends that help you enhance your businesses.

The key features of Oracle FLEXCUBE Information Server reporting are as follows:

- Extraction of information in a consumable format at all operational levels and management hierarchies
- Cross functional data in summary form
- Provisions for totals, averages, changes, variances or ratios
- Information based on customer types and product types.
- Historical data for comparisons

2.2 Maintenances in Oracle FLEXCUBE

In order to use the Oracle FLEXCUBE Information Server, you need to maintain certain information in Oracle FLEXCUBE. These maintenances are discussed under the following headings.

2.2.1 Maintaining Batch Programs

You need to maintain the batch program 'GEBEXTRC' using 'Mandatory Batch Program Maintenance' screen. This batch extracts the data from Oracle FLEXCUBE during end of transaction input (EOTI) stage at head office. You also need to maintain the extraction routine.

After EOD operations, you need to run the batch 'GEBEXTRC' as intraday. During the intraday batch, the system populates the data onto FIS related tables.

2.2.2 Maintaining Details of Data Transformation Tool

You need to map the source entities (staging tables) to the respective target entities (fact and dimension tables) using 'Data Transformation Tool' screen. To invoke this screen, type

ORACLE®

'RPDDTT' in the field at the top right corner of the application toolbar and click the adjoining arrow button.

Specify the following details:

Source Entity

Select the source entity that you need to map to the target entity. The option list displays the existing staging tables available for selection. Select the appropriate one.

Target Entity

Select the target entity that you need to map to the selected source entity. The option list displays the existing fact and dimension tables available for selection. Select the appropriate one.

Program Name

Based on the target entity, the system displays the program name.

Program Description

Enter a brief description of the above program.

Surrogate Key Name

Based on the target entity, the system displays the surrogate name.

Surrogate Key Type

The surrogate key type is ASCII.

ORACLE®

Once you have specified the above details, click 'Mapping Details' button to map the source and target elements. The system displays the 'Dimension Mapping Details' screen.

Click 'Enrich' button to populate the source elements. The system will populate the source elements in the screen.

You may also manually enter the source elements, In that case you need not click 'Enrich' button. You can directly specify the following details:

Source Element

Select the source element that you need to map to the target element.

Target Element

Select the target element to be mapped to the selected source element.

Key Column Type

Select the key column type. The drop-down list displays the following options:

- No versioning
- Natural key
- Versioning

Select the appropriate one.

You can add more rows to the list using add button. To delete a row, check the adjoining check box and click delete button.

Note

The required dimension mapping details are available within Oracle FLEXCUBE. However, if you need to modify the mapping, you can do it using these screens.

ORACLE®

2.2.2.1 Mapping Facts

You can map the source and target elements and define the key column type and transform rules using 'Fact Mapping Details' screen.

Click 'Enrich' button to populate the source elements.

Specify the following details:

Source Element

Select the source element that you need to map to the target element.

Target Element

Select the target element to be mapped to the selected source element.

Key Column Type

Select the key column type. The drop-down list displays the following options:

- No versioning
- Natural key
- Versioning

Select the appropriate one.

Transform Rule

Define the transform rule.

2.2.3 Maintaining FLEXCUBE Information Server Scheduler

You can maintain the Oracle FLEXCUBE Information Server jobs and their dependencies using 'FLEXCUBE Information Server Scheduler Maintenance' screen. To invoke this screen,

ORACLE®

type 'RPDSCH' in the field at the top right corner of the application toolbar and click the adjoining arrow button.

Specify the following details:

Job Type

Specify the job type 'Data Transformation'.

Scheduler Program Type

Specify the program type. By default, the system displays 'PLSQL_BLOCK'. However, you can modify this.

Scheduler Program ID

Select the program ID from the option list.

Scheduler Program Name

Based on the program ID, the system displays the name of the program.

Scheduler Program Action

Specify the program action.

Enable Flag

Check this box to enable the program action.

Scheduler Parent Program

Specify the scheduler parent program. You can select the appropriate program from the option list.

Schedule

Based on the selected scheduler parent program ID, the system displays the name of the schedule.

Note

The required scheduler maintenances are available in Oracle FLEXCUBE. However, if you need to modify the maintenances, you can do it using this screen.

ORACLE®

Once you have specified the above details, save the maintenance.

2.3 <u>Generating Reports</u>

You can generate the various preset reports from Oracle FLEXCUBE Information Server. Login to Oracle Business Intelligence Enterprise Edition. Go to Dashboards. The reports are organized as tabs under the dashboard. You can drill down to the account level by clicking the data.
